Students choose a Plan A (Thesis) or Plan B (Project) option as their program culminating experience. Each student must secure the commitment of three faculty members of the university, two of whom must be members of the permanent faculty, to serve as members of the student's Plan A (thesis) or Plan B (Project) committee, with one permanent faculty member agreeing to serve as chair. The committee must approve the student's thesis or project
proposal for the master's degree no later than one month prior to the end of the semester preceding the one in which enrollment in the final project or thesis course(s) is planned.

**Plan A (Thesis)**

The thesis will include original research on a topic approved by the thesis committee and must meet university requirements as stipulated in this catalog and in the SJSU Master's Thesis and Doctoral Dissertation Guidelines. It will undergo a thorough review and revision process under the guidance of the candidate's thesis committee chair with the assistance of the thesis committee. In addition, the candidate for the MS degree must successfully pass a final oral defense of the thesis.

**Plan B (Project)**

Under rare circumstances, a very strong project of appropriate scope and depth for master's level work might be approved in lieu of the thesis. This option requires the written consent of at least three graduate advisors, the graduate coordinator, and the department chair. In addition to the required coursework, Plan B students will take comprehensive examinations on three topics to be arranged by the student's project committee.

**Master's Requirements (30 units)**

**Seminars (9 units)**

- ENVS 200 - Seminar: Environmental Methods 3 unit(s)
- ENVS 250 - Seminar: Environmental Thought and Philosophy 3 unit(s)
- ENVS 297 - Research and Proposal Development 3 unit(s) (GWAR)

**Application Science (9 units)**

9 units of 100- or 200-level field analysis, laboratory work, or other form of application science selected with advisor's approval.

**Electives (6 units)**

- 100- or 200-level courses in Environmental Studies or related fields selected with advisor's approval. The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 15.

**Culminating Experience (6 units)**

**Complete One Option (Plan A or Plan B):**

**Plan A (Thesis) (6 units)**

- ENVS 299 - Master's Thesis or Project 1-6 unit(s)

**Plan B (Project) (6 units)**

- ENVS 298 - Special Study 1-4 unit(s) (3 units required)
• Additional 3 units of electives selected with advisor’s approval 3 unit(s)

Total Units Required (30 units)

Elective courses must be planned in consultation with the Graduate Advisor.

The maximum number of upper-division undergraduate units that can be applied toward the master’s degree is 15.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate.

Certificate

Global Citizenship Certificate (Graduate)

Overview

Global Studies at SJSU is an interdisciplinary program that encourages students to look at the world holistically. The tremendous international migrations of people, movements of goods, technology transfers, and mixing of cultures makes it important to study the world as a human community in ways we haven't considered in the past. The program is designed to train future leaders to grapple with some of the most pressing issues of our time, from a global perspective. The focus of our program on studying global issues from multiple perspectives provides students the intellectual foundation and the analytical and communication skills to prepare for careers in government, education, NGOs, international development agencies, international philanthropic organizations, law, consulting, global health organizations, writing, and graduate study. We are the only Global Studies program in the San Francisco Bay Area and one of the few in the CSU system that offers an interdisciplinary program that includes a suite of core courses in Global Studies. Global Studies is a relatively new field and our program is at the leading edge of shaping this field for the future.

Global Citizenship is an interdisciplinary certificate program intended to assist students and members of the non-student community in understanding the interconnectedness of peoples, genders, cultures, and societies and celebrating the richness of human diversity in a global context. The program complements SJSU's goals of globalizing the campus and graduating students who are globally responsible citizens. Students will examine questions of meaning and value associated with citizenship in today's increasingly connected world. Students will also develop their own understanding of personal, social, and corporate responsibility to the global community. In a rapidly changing world, it is necessary for college students to acquire the knowledge, skills, values, and attitudes to adapt and thrive in the enlarged and evolving global context.

Certificate Requirements (15 units)

Lower Division Electives (6 units)

Complete two courses from:

- ANTH 11 - Cultural Anthropology 3 unit(s) (D1)
- ARTH 70B - Art History, Renaissance to Modern 3 unit(s) (C1)
- ARTH 70C - Arts of Asia 3 unit(s) (C1)
- COMM 74 - Fundamentals of Intercultural Communication 3 unit(s) (E)
- ENGL 40 - Contemporary World Fiction 3 unit(s) (C2)
- GEOG 10 - Cultural Geography 3 unit(s) (D1)
• GEOG 12 - Global Geography 3 unit(s) (D2)
• GLST 1A - Introduction to Global Studies 3 unit(s)
• HIST 1A - World History to 1500 3 unit(s)
• HIST 1B - World History from 1500 3 unit(s)
• MUSC 19 - Music in World Cultures 3 unit(s) (C1)
• POLS 2 - Introduction to Comparative Politics 3 unit(s) (D2)
• POLS 4 - Introduction to International Relations 3 unit(s) (D3)
• RELS 70 - Gods, Guns, Gurus, Grails-World Religion 3 unit(s) (C2)

Upper Division Electives (6 units)

Note: Students who have not satisfied the prerequisites for SJSU Studies will select the 3 courses that are not SJSU Studies Courses. Alternatively those students may wait to satisfy this requirement until completion of SJSU Studies prerequisites.

Complete two courses from:

• GLST 143 - Gender, Power, Intnl Dev 3 unit(s) (V)
• GLST 156 - Technology of the Modern World 3 unit(s)
• GLST 162 - Contemporary Global Issues 3 unit(s)
• GLST 164 - Advanced Seminar in Global Citizenship 3 unit(s)
• GLST 167 - Changing Ecologies of Globalization 3 unit(s) (R)
• HIST 155 - 20th Century World 3 unit(s) (V)

Additional Requirements (3 units)

Note: Students may take GLST 189 either for a volunteer or internship abroad or for working with a local community with approval of the Global Studies advisor. A semester abroad or FLP summer class may also be substituted for this requirement.

Complete one course from:

• GLST 188 - Special Topics in International Experiences 3 unit(s) (V)
• GLST 189 - Global Experience 1-3 unit(s)

Total Units Required (15 units)

Minor

Environmental Impact Assessment Minor

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Requirements (42 units)
• ENVS 10 - Life on a Changing Planet 3 unit(s) (B2)
• ENVS 124 - Introduction to Environmental Law 3 unit(s)
• ENVS 151 - Race, Class and the Environment 3 unit(s)
• ENVS 185 - Environmental Impact Analysis 4 unit(s)
• ENVS 190 - Advanced Environmental Impact Assessment 4 unit(s)

Complete One Course From:

• ENVS 119 - Energy and the Environment 3 unit(s) (R)
• ENVS 128 - Water Resource Management 3 unit(s)
• ENVS 129 - Water Policy in the Western U.S. 3 unit(s)

Complete One Course From:

• ENVS 144 - California Wetland Controversies 4 unit(s)
• ENVS 173 - Forest Ecology and Conservation 4 unit(s)
• ENVS 187 - Environmental Restoration 4 unit(s)
• ENVS 270 - Field Studies in Water Resource Management 4 unit(s)

Total Units Required (24 units)

Environmental Justice Minor

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Requirements (18 units)

• ENVS 127 - Community-Based Participatory Research 3 unit(s)
• ENVS 150 - Introduction to Environmental Thought 3 unit(s) (S)
• ENVS 151 - Race, Class and the Environment 3 unit(s)

Complete One Course From:

• ENVS 1 - Introduction to Environmental Issues 3 unit(s) (D1)
• AFAM 25 - The Changing Majority: Power and Ethnicity in America 3 unit(s) (D2)

Complete One Course From:

• ENVS 119 - Energy and the Environment 3 unit(s) (R)
• ENVS 124 - Introduction to Environmental Law 3 unit(s)
• ENVS 129 - Water Policy in the Western U.S. 3 unit(s)
• ENVS 140 - Politics and the Environment 3 unit(s)
• ENVS 159 - Nature and World Cultures 3 unit(s) (V)

Complete One Course From:

• AFAM 130 - Psychology of the Black Community 3 unit(s)
• AFAM 133 - Introduction to Social Issues in Planning 4 unit(s)
• AFAM 142 - Race, Ethnicity, and the Law 3 unit(s)
• AFAM 145 - Urban Policy and Its Impact on Inner City Residents 4 unit(s)
• AFAM 159 - Economic Issues in the Black Community 3 unit(s)
• AFAM 160 - Blacks in U.S. Politics and Society 3 unit(s)

Total Units Required (18 units)

Environmental Restoration Minor

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Requirements (24 units)

• BIOL 30 - Principles of Biology I 4 unit(s) (B2B3)
• ENVS 144 - California Wetland Controversies 4 unit(s)
• ENVS 154 - Sustainable Agriculture 4 unit(s)
• ENVS 173 - Forest Ecology and Conservation 4 unit(s)
• ENVS 187 - Environmental Restoration 4 unit(s)
• ENVS 191 - Advanced Environmental Restoration 4 unit(s)

Total Units Required (24 units)

Environmental Studies Minor

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Requirements (19 units)

• ENVS 1 - Introduction to Environmental Issues 3 unit(s) (D1)
• ENVS 124 - Introduction to Environmental Law 3 unit(s)
• ENVS 185 - Environmental Impact Analysis 4 unit(s)
• Two Advisor-approved electives 6 unit(s)
Complete One Course From:

- ENVS 107 - Introduction to Environmental Economics and Policy 3 unit(s)
- ENVS 119 - Energy and the Environment 3 unit(s) (R)

Total Units Required (19 units)

Global Studies Minor

Overview

Global Studies at SJSU is an interdisciplinary program that encourages students to look at the world holistically. The tremendous international migrations of people, movements of goods, technology transfers, and mixing of cultures makes it important to study the world as a human community in ways we haven't considered in the past. The program is designed to train future leaders to grapple with some of the most pressing issues of our time, from a global perspective. The focus of our program on studying global issues from multiple perspectives provides students the intellectual foundation and the analytical and communication skills to prepare for careers in government, education, NGOs, international development agencies, international philanthropic organizations, law, consulting, global health organizations, writing, and graduate study. We are the only Global Studies program in the San Francisco Bay Area and one of the few in the CSU system that offers an interdisciplinary program that includes a suite of core courses in Global Studies. Global Studies is a relatively new field and our program is at the leading edge of shaping this field for the future.

Students may complete a minor in Global Studies by completing 15 units of lower and upper division core coursework in Global Studies.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Requirements (15 units)

Complete One Course From:

- GLST 1A - Introduction to Global Studies 3 unit(s)
- GLST 1B - Introduction to Global Studies 3 unit(s) (B2)

Complete One Course From:

- GLST 188 - Special Topics in International Experiences 3 unit(s) (V)
- GLST 189 - Global Experience 1-3 unit(s)

Complete Three Courses From:

- GLST 143 - Gender, Power, Intnl Dev 3 unit(s) (V)
- GLST 156 - Technology of the Modern World 3 unit(s)
- GLST 162 - Contemporary Global Issues 3 unit(s)
- GLST 164 - Advanced Seminar in Global Citizenship 3 unit(s)
- GLST 167 - Changing Ecologies of Globalization 3 unit(s) (R)
- GLST 187 - Special Topics 3 unit(s)

Total Units Required (15 units)

**Park Ranger and Administration Minor**

**University Graduation Requirements**

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

**Minor Requirements (19-21 units)**

**Core Courses (13 units)**

- ENVS 187 - Environmental Restoration 4 unit(s)
- Three 3-unit lower division (CSU-transferable) courses from an A.S. degree in Park Management, from West Valley College or equivalent program 9 unit(s)

**Additional Units (6-8 units)**

Complete two courses from:

- ENVS 144 - California Wetland Controversies 4 unit(s)
- ENVS 154 - Sustainable Agriculture 4 unit(s)
- ENVS 165 - National Parks 3 unit(s)
- ENVS 173 - Forest Ecology and Conservation 4 unit(s)
- ENVS 189 - Coastal Field Studies 4 unit(s)
- POLS 114 - Introduction to Public Administration 3 unit(s)

Total Units Required (19-21 units)

**Sustainable Energy Minor**

**University Graduation Requirements**

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

**Minor Requirements (23 units)**

- PHYS 2A - Fundamentals of Physics 4 unit(s) (B1+B3)
- PHYS 2B - Fundamentals of Physics 4 unit(s) (B1B3)
- ENVS 116 - Solar Energy Analysis 3 unit(s)
• ENVS 119 - Energy and the Environment 3 unit(s) (R)
• ENVS 130 - Energy Policy Analysis 3 unit(s)
• ENVS 133 - Sustainable Energy Strategies 3 unit(s)

Choose One Course From:

• ENVS 132 - Solar Home Design 3 unit(s)
• ENVS 137 - Green Building Design Issues 3 unit(s)

Total Units Required (23 units)

**Sustainable Water Resources Minor**

**University Graduation Requirements**

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

**Minor Requirements (21 units)**

• ENVS 1 - Introduction to Environmental Issues 3 unit(s) (D1)
• ENVS 128 - Water Resource Management 3 unit(s)
• ENVS 129 - Water Policy in the Western U.S. 3 unit(s)
• ENVS 144 - California Wetland Controversies 4 unit(s)
• ENVS 154 - Sustainable Agriculture 4 unit(s)
• ENVS 270 - Field Studies in Water Resource Management 4 unit(s)

Total Units Required (21 units)

*ENVS 1 - Introduction to Environmental Issues*

3 unit(s)
What effects are human activities having on the natural environment and our quality of life? Discover the technical and social causes of environmental degradation; learn how your personal and career choices can protect the environment for current and future generations.

*Satisfies D1: Human Behavior*

*Grading: Graded*

*ENVS 10 - Life on a Changing Planet*

3 unit(s)
An introduction to basic knowledge and theory in the life sciences, focusing on the theme of environmental change. Examines challenging issues in biology and methods for evaluating conflicting data and claims. Develops students’ analytical and writing skills.

*Satisfies B2: Life Science*
**Prerequisite(s):** As required for Core GE courses in B2.  
**Grading:** Graded

**ENVS 92 - International Program Studies**

1-12 unit(s)  
**Grading:** Mixed Grading

**ENVS 100W - Environmental Research and Writing**

3 unit(s)  
Advanced research and writing skills for future environmental professionals. Focus on issues, literature and challenges associated with environmental writing. Emphasis on writing for technical and general audiences. GE Area: Z.  
*Satisfies SJSU Studies Z: Written Communication II.*

**Prerequisite(s):** A3 or equivalent second semester composition course (with a grade of C- or better); completion of core GE; satisfaction of Writing Skills Test or completion of ENGL 100A / LLD 100A with C or better; and upper division standing. Or Graduate or Postbaccalaureate level.  
**Grading:** Graded

**Note(s):** Must be passed with C or better to satisfy the CSU Graduation Writing Assessment Requirement (GWAR).

**ENVS 105 - Environmental Change and Problems, San Francisco Bay Area**

3 unit(s)  
Systematic inquiry into physical environments of the San Francisco Bay Area, with emphasis on impacts and changes to those systems by human action. Analysis of public action and policies regarding regional environmental issues.  
**Prerequisite(s):** ENVS 1 and ENVS 100W.  
**Grading:** Graded

**Note(s):** Offered only occasionally.

**ENVS 106 - Exploring Ocean Environments**

3 unit(s)  
Understand human interactions with marine environments by exploring the ocean as a place of socio-ecological encounter. Students learn and employ interdisciplinary approaches to conceptualizing, knowing, exploiting, and managing ocean environment.  
**Grading:** Graded

**ENVS 107 - Introduction to Environmental Economics and Policy**

3 unit(s)  
Analysis of basic economic and political factors related to the environmental crisis. Surveys policy approaches to the problem: regulation, taxes, subsidies, cost benefit analysis.
ENVS 108 - Cost-Benefit Analysis

4 unit(s)
Theory and practice of cost-benefit analysis applied to various topics including public projects and environment. Welfare foundations of CBA, valuation of goods (such as clean air, wilderness, and sports arenas), discounting future values and cost.

Prerequisite(s): ECON 1B or instructor consent.
Grading: Graded

ENVS 110 - Resource Analysis

4 unit(s)
Quantitative analysis of Earth's natural resources. Topics typically include the status and trends of resources such as topsoil, agriculture, water, energy, wildlife and the impacts of human population growth on these resources. Emphasis is on problem solving and computational methods applied to resource management problems.

Misc/Lab: Lecture 4 hours/lab 3 hours.

Prerequisite(s): ECON 1B and ECON 3 or STAT 95, or instructor consent.
Grading: Graded

ENVS 111 - Geology and the Environment

3 unit(s)
The effect of Earth processes on humans and their structures. Environmental problems related to earthquakes, landslides, minerals, energy, water and urban growth.

Lecture 3 hours/field trips.

Satisfies SJSU Studies R: Earth & Environment

Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

ENVS 112 - Hazardous Waste

3 unit(s)
Familiarization with major environmental problems through study of federal, state and regional regulation of hazardous waste management. Methods of treatment, disposal and destruction.

Prerequisite(s): Junior standing, two semesters chemistry and biological science or instructor consent.
Grading: Graded

ENVS 113 - Atmospheric Pollution
3 unit(s)
Descriptive discussion of the sources, effects and fates of pollutants in the atmosphere. Interaction of pollutants and weather systems, including acid precipitation, ozone destruction; air pollution policy and regulations.

Satisfies SJSU Studies R: Earth & Environment

Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

ENVS 116 - Solar Energy Analysis

3 unit(s)
Provides a comprehensive overview of sustainable solar energy resources, economics, and policy. Includes a review of basic solar energy physics and interdisciplinary analysis of economic, social justice and environmental strategies for a solar powered civilization.

Prerequisite(s): ENVS 119, PHYS 2A, and PHYS 2B or instructor consent

Grading: Graded

ENVS 117 - Human Ecology

3 unit(s)
Diversity and similarity of human adaptation, cultural evolution, cultural change and environmental modification in African, Asiatic, Oceanic and Latin American cultural groups. Emphasis: traditional non-Western conservation practices and their lessons for the modern-day resource manager.

Prerequisite(s): ENVS 1, ENVS 10 and ENVS 100W, or instructor consent.

Grading: Graded

ENVS 118 - Sustainable Home Gardens

4 unit(s)
Techniques for designing landscape gardens which are sustainable in the various biomes of California. Students first research, explore, and photograph California native plant communities. Then, they design a California native home garden based on their field investigations and principles of ecology.

Misc/Lab: Lecture 3 hours / Activity 2 hours

Course may be repeated for credit for up to 8 units.

Prerequisite(s): ENVS 1 or instructor consent.

Grading: Graded

ENVS 119 - Energy and the Environment

3 unit(s)
Introduces students to the sources of energy that fuel industrial civilization and the environmental impacts of energy extraction, distribution, and consumption. Explores a range of approaches to moving society toward a more sustainable energy future.
Satisfies SJSU Studies R: Earth & Environment

**Prerequisite(s):** Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

**Grading:** Graded

**Note(s):** All of SJSU Studies courses require completion of the WST and upper division standing.

**ENVS 121 - Population and Global Change**

3 unit(s)
Impact of population changes on countries, regions, and their environments. Demographic comparisons of developed and developing societies from perspectives of land use, economics and politics.

**Prerequisite(s):** Upper division standing.

**Grading:** Graded

**ENVS 122 - Borderlands and the Environment**

3 unit(s)
Comparative study of environmental issues in borderland regions, which encompass environmental, economic, cultural, political and social processes surrounding a geopolitical border. Investigation of historical, cultural, and political causes and responses to environmental problems. Analysis of understandings of territory, nation-states, and exclusion based on theories in border studies, environmental studies, and the study of social movements.

**Prerequisite(s):** ENVS 1 or instructor consent.

**Grading:** Graded

**ENVS 124 - Introduction to Environmental Law**

3 unit(s)
Development, interpretation, application and enforcement of environmental laws, regulations and legal policies by legislatures, courts, administrative agencies and citizens. Examination of air and water quality, hazardous materials, workplace, land use and wetlands regulation, international, ethical and efficacy issues.

**Prerequisite(s):** ENVS 1 or Instructor Consent.

**Grading:** Graded

**ENVS 125 - Advanced Environmental Law**

3 unit(s)
Detailed evaluation of practical environmental law problems. Students use an interdisciplinary approach, combining evaluation of technical data with review and application of law and policy. Extensive legal analysis and writing.

**Prerequisite(s):** ENVS 1 and ENVS 124.

**Grading:** Graded

**ENVS 126 - Environmental Ethics and Philosophy**
3 unit(s)
Extensions and applications of Kantian, Lockean, consequentialist and other philosophical theories of value to problems of the environment such as pollution, global warming, species depletion and overpopulation.

Prerequisite(s): 3 units of philosophy or upper division standing.
Grading: Graded

ENVS 127 - Community-Based Participatory Research

3 unit(s)
This course integrates interdisciplinary theory and practice in developing a situated understanding of community-based participatory research (CBPR) toward redressing environmental inequities. Students will apply these theories and practices in their own environmental research and advocacy projects regarding local environmental issues.

Prerequisite(s): Upper Division Standing
Grading: Graded

ENVS 128 - Water Resource Management

3 unit(s)
Water uses and supplies; water resource measurement methods; hydrology; erosional processes; sediment production and transport particularly on Northern California coastal watershed; flood hazards and methods of control; groundwater and groundwater aquifers; water quality.

Prerequisite(s): ENVS 129 and STAT 95 or appropriate math course; or instructor consent.
Grading: Graded

ENVS 129 - Water Policy in the Western U.S.

3 unit(s)
Water resource development; federal reclamation policy; water law and water rights; interbasin transfers; Colorado River, Central Valley Project and State Water Project; groundwater overdrafting; agricultural water and water pricing.

Prerequisite(s): ENVS 1 or Instructor Consent.
Grading: Graded

ENVS 130 - Energy Policy Analysis

3 unit(s)
Energy policy questions and examination of choices including energy pricing, options for controlling oil imports, incentives for reducing consumption, allocation and end use controls, synthetic fuel production, offshore oil development.

Prerequisite(s): Upper division standing.
Grading: Graded

ENVS 131 - Air Pollution Meteorology

3 unit(s)
Quantitative description of contaminants in the atmosphere: sources, dispersion and sinks; their effects on atmospheric energy balance and condensation.
**ENVS 132 - Solar Home Design**

3 unit(s)
Techniques for designing environmentally-sensitive, healthy, passive solar homes via site selection, energy conservation, lighting, non-hazardous natural building materials. Residential passive solar heating and cooling approaches for retrofits and new construction. For homeowners, teachers, professional designers and architects.

**Prerequisite(s):** ENVS 1 or instructor consent.
**Grading:** Graded

**ENVS 133 - Sustainable Energy Strategies**

3 unit(s)
Challenges and opportunities facing sustainable energy pathways for heat, fuel, and electricity with a focus on energy efficiency, solar, wind, geothermal, bioenergy, alternative modes of transportation and other energy consuming infrastructures.

**Prerequisite(s):** ENVS 119, PHYS 2A, and PHYS 2B or instructor consent
**Grading:** Graded

**ENVS 135 - U.S. Environmental Policy**

3 unit(s)
Inquiry focuses on state of the environment, public attitudes toward the problem, interest groups involved in formulation of policy, the response of government leaders to the problem and what the future outlook is for addressing the agenda.

**Grading:** Graded

**ENVS 136 - Intro to Land Use and Urban Planning**

4 unit(s)
Land use and facilities planning practices in the context of American cities, emphasizing interrelationships between various land uses and public facilities and service requirements. Study of the role of public law in addressing urban growth and environmental change issues.

**Prerequisite(s):** Upper division standing or instructor consent.
**Grading:** Graded

**ENVS 137 - Green Building Design Issues**

3 unit(s)
Provides an overview of green building design strategies based on renewable energy, water conservation, healthy interior design, beneficial building orientation, native landscaping, sustainable building materials; includes economics, policy, and green building auditing and certifications.

**Prerequisite(s):** Upper division standing.
**Grading:** Graded
ENVS 140 - Politics and the Environment

3 unit(s)
Application of different political strategies to local issues examined through examples from specific environmental challenges facing the Bay Area. Considers relative contributions of the public, elected officials, government employees and interest groups in environmental decision-making.

Prerequisite(s): ENVS 1, ENVS 107 and ENVS 124 or instructor consent.
Grading: Graded

ENVS 142 - Introduction to Environmental Planning

4 unit(s)
Environmental sustainability and its application to local planning. Review of regulatory tools and legislation that underlie most environmental planning and current environmental planning topics. Course may be repeated for credit when topic changes.

Prerequisite(s): Upper division standing or instructor consent.
Grading: Graded

ENVS 144 - California Wetland Controversies

4 unit(s)
Impact of agriculture, urbanization and other human land uses upon the California coastal wetlands with emphasis on current environmental problems and controversies. State public agencies concerned with vital environmental problems and analysis of current environmental legislation. May be repeated for a maximum of 8 units.

Misc/Lab: Lecture 4 hours/lab 4 hours.

Course may be repeated for credit for up to 8 units.

Prerequisite(s): ENVS 1 or instructor consent.
Grading: Graded

ENVS 146F - Communication and the Environment

4 unit(s)
Examination of communication in environmental issues, especially conflicting values and modes of discourse that assume different meanings of human-nature relationship. Emphasis on environmentalism as popular movement, rhetoric of radical ecology and the technical discourse of environmental policy administration.

Prerequisite(s): Upper division standing or instructor consent.
Grading: Graded

ENVS 148 - Sustainable Materials Management

4 unit(s)
Focuses on practical understanding and approaches to managing discarded materials for sustainability. An interdisciplinary perspective that includes politics, business, economics, marketing, science, and environmental principles. Provides direct experience through field trips and service learning.

Misc/Lab: 3 hours lecture/ 2 hours lab
**Prerequisite(s):** ENVS 1 or instructor consent.

**Grading:** Graded

**ENVS 150 - Introduction to Environmental Thought**

3 unit(s)
An introduction to significant works in the field of environmental studies. Topics covered include preservation, conservation, biocentrism, environmental justice, eco-feminism, deep ecology, and environmental activism.

Satisfies SJSU Studies S: Self, Society & Equality in US

**Prerequisite(s):** Pass the WST before enrollment. Upper division standing or instructor consent.

**Grading:** Graded

**ENVS 151 - Race, Class and the Environment**

3 unit(s)
Analysis of the relationship between the environmental crisis and people of color and poor communities in the U.S., emphasizing the interplay among race/ethnicity, class and politics in the struggle for environmental justice and survival by communities of color and poor people.

**Grading:** Graded

**ENVS 152 - Globalization and the Environment**

3 unit(s)
Scientific approach to goods distribution worldwide, and environmental consequences of shipping materials and packaging, which when discarded become waste. Mutual interests of commerce and environment.

Satisfies SJSU Studies R: Earth & Environment

**Prerequisite(s):** Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

**Grading:** Graded

**Note(s):** All of SJSU Studies courses require completion of the WST and upper division standing.

**ENVS 154 - Sustainable Agriculture**

4 unit(s)
Analysis of and practicum in environmentally sustainable methods of food production, emphasizing biological diversity, water conservation, air quality, social equity and economic justice. Special focus on primary research in natural and social sciences for sustainable agriculture. Field trips and labs.

**Misc/Lab:** Lecture 3 hours/lab 2 hours.

**Prerequisite(s):** ENVS 1 and GE B2 course, or instructor consent.

**Grading:** Graded

**ENVS 156 - Introduction to Local Transportation Planning**
4 unit(s)
Examination of transportation planning issues addressed at the neighborhood and municipal level such as bicycle and pedestrian planning, traffic calming, and parking policy.

**Prerequisite(s):** Upper division standing or instructor consent.
**Grading:** Graded

*ENVS 158 - Environmental Education*

3 unit(s)
Education of individuals can make a difference in protecting the environment. Comprehensive overview from the perspective of schools, American culture and law. Interdisciplinary approaches for correcting conditions created by modern living, energy and environmental demands.

**Prerequisite(s):** ENGL 1A and ENGL 2; upper division standing or instructor consent.
**Grading:** Graded

*ENVS 159 - Nature and World Cultures*

3 unit(s)
The influence of industrialization and globalization on earth and the environment as seen through culture.

*Satisfies SJSU Studies V: Culture, Civil & Global Understanding*

**Prerequisite(s):** Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
**Grading:** Graded

**Note(s):** All of SJSU Studies courses require completion of the WST and upper division standing.

*ENVS 160 - Topics in Environmental Planning*

4 unit(s)
In-depth examination of selected topics specifically related to environmental planning. Consult department for current offerings. Course may be repeated for credit when topic changes.

*Course may be repeated for credit for up to 8 units.*

**Prerequisite(s):** Upper division standing or instructor consent
**Grading:** Graded

*ENVS 161 - California Wildlands*

4 unit(s)
Discussion and field analysis of California's wildlands, including the range of biodiversity, associated agencies, environmental issues, policy choices and management approaches to protect different types of open space.

*Misc/Lab: 3 hours lecture/ 2 hours lab*

**Prerequisite(s):** ENVS 1 and ENVS 100W
**Grading:** Graded
ENVS 165 - National Parks

3 unit(s)
An exploration of the history, philosophy, and science of park and wilderness preservation. Includes site visits to selected parks and wilderness areas.

Prerequisite(s): Upper division standing or instructor consent.
Grading: Graded

ENVS 166 - Nature and Conservation Photography

4 unit(s)
Still photography of nature and illustrative conservation subjects in both color and black and white. Theory critique sessions supplemented with field experience. May be repeated for a maximum of 8 units.

Misc/Lab: Lecture 2 hours/activity 4 hours.

Course may be repeated for credit for up to 8 units.

Prerequisite(s): Photo experience or instructor consent.
Grading: Graded

ENVS 167 - Managing Environmental Issues

3 unit(s)
The management of environmental issues, including the relationship of business to the natural environment; the public policy context of management decision-making; and the greening of the corporation and implications for strategic management, operations, human resources, marketing and accounting.

Grading: Graded

ENVS 168A - Global Climate Change I

6 unit(s)
Scientific and social scientific approaches to the process and effects of global climate change: Climate changes in the Earth's past, interactions between climate and life, anthropogenic climate change, socioeconomic contexts of environmental effects, cultural influences on climate change mitigation strategies.

Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

ENVS 168B - Global Climate Change II

3 unit(s)
Scientific and social scientific approaches to the process and effects of global climate change: Climate changes in the Earth's past, interactions between climate and life, anthropogenic climate change, socioeconomic contexts of environmental effects, cultural influences on climate change mitigation strategies.
Satisfies SJSU Studies R+S+V: Earth & Environment + Self, Society & Equality in the U.S. + Culture, Civilization & Global Understanding

Prerequisite(s): COMM 168A / ENVS 168A / GEOL 168A / HUM 168A / METR 168A; Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

ENVS 169 - Introduction to Social Media in Planning

1-4 unit(s)
An introduction to social media tools and their use in urban planning, with a particular emphasis on public participation.

Prerequisite(s): Upper division standing
Grading: Graded

ENVS 170 - Introduction to Environmental Health and Safety

3 unit(s)
An overview of environmental health and safety issues that affect industry and government, including regulatory framework and basic technical elements; course covers historical and legislative background, risk management and training required in the field.

Prerequisite(s): ENVS 100W.
Grading: Graded

ENVS 173 - Forest Ecology and Conservation

4 unit(s)
A field based course designed to provide students with the conceptual framework and practical tools necessary for understanding the ecology and conservation of local forest ecosystems. Topics covered include forest restoration, succession, wildlife, diversity, natural and human disturbance, and the history of forest management.

Misc/Lab: Lecture 3 hours/lecture 2 hour/lab.

Prerequisite(s): ENVS 1, ENVS 10, or upper division standing.
Grading: Graded

ENVS 178 - Intro to Regional Transport Planning

4 unit(s)
Principles and concepts relevant to transportation planning and policy at the regional level, such as historical and current regional transportation planning processes, the relationship between regional travel demand and transportation infrastructure, and travel demand modeling practices.

Prerequisite(s): Upper division standing
Grading: Graded
ENVS 179A - Fundamentals of GIS for Urban Planning

4 unit(s)
Exploration of Geographic Information Systems (GIS) area analysis techniques for spatial information management in local government: planning support systems, needs analysis, envisioning neighborhoods utilizing multiple maps, charts, photos and the Internet. Course may be repeated for credit when topic changes.

Prerequisite(s): Upper division standing or instructor consent.
Grading: Graded

ENVS 181 - Environmental Resource Center

1-3 unit(s)
Supervised projects that support the Environmental Resource Center, a source of sustainability information and activities for the campus and community; projects help students take personal action toward achieving a sustainable lifestyle.

Misc/Lab: Activity 2-6 hours.

Course may be repeated for credit for up to 6 units.

Prerequisite(s): ENVS 1 or instructor consent.
Grading: Credit/No Credit

ENVS 184 - Directed Reading

1-4 unit(s)
Directed reading in an environmental subject to gain broader knowledge. Repeatable: Repeatable for credit.

Prerequisite(s): Specific proposal to or need defined by department, with consent of faculty.
Grading: Credit/No Credit

ENVS 185 - Environmental Impact Analysis

4 unit(s)
Current environmental impact reports subjected to critical review; determination of alternative procedures and mitigating opportunities; extensive field analysis and practice.

Misc/Lab: Lecture 3 hours/lab 2 hours.

Prerequisite(s): ENVS 1, ENVS 124 or instructor consent.
Grading: Graded

ENVS 187 - Environmental Restoration

4 unit(s)
Interdisciplinary art and science of restoring destroyed or degraded habitats. Emphasis on the interplay of ecological principles, policy, public involvement and economics in the planning, implementation and monitoring of restoration plans. Field work and independent research required.

Misc/Lab: Lecture 3 hours/lab 2 hours.
Prerequisite(s): ENVS 1, GE B2 course and any 100W, or instructor consent.

Grading: Graded

**ENVS 189 - Coastal Field Studies**

4 unit(s)
Introduction to coastal processes, resources, policy, and conservation. Course emphasizes environmental issues, human impact, and protection efforts focusing on adapting to coastal change. Students conduct research and participate in local field trips along the California coast.

Misc/Lab: Lecture 2 hours/lab 3 hours.

Prerequisite(s): ENVS 1.

Grading: Graded

**ENVS 190 - Advanced Environmental Impact Assessment**

4 unit(s)
Advanced work in the field of environmental impact assessment. Analysis of EIA documents for regulatory adequacy, consistency with local planning documents and technical accuracy.

Misc/Lab: Lecture 3 hours/lab 2 hours.

Prerequisite(s): ENVS 185 or instructor consent.

Grading: Graded

**ENVS 191 - Advanced Environmental Restoration**

4 unit(s)
Advanced restoration research and applications. Emphasis on independent literature research and field data collection. Participation in on-going restoration project. Fieldwork and grasp of restoration principles required.

Misc/Lab: Lecture 3 hours/lab 2 hours.

Prerequisite(s): ENVS 187.

Grading: Graded

Note(s): Offered only occasionally.

**ENVS 192 - Int'l Program Studies**

1-6 unit(s)

Grading: Mixed Grading

**ENVS 193 - Supervised Projects and Research**

1-15 unit(s)
Projects and/or research to build practical environmental skills. Work on or off campus on projects with direct social value.

Course may be repeated for credit for up to 15 units.
**Prerequisite(s):** Upper division standing.

**Grading:** Graded

**ENVS 194 - Environmental Internship**

1-9 unit(s)
Service in a local, city, county, state or federal environmental/sustainability agency, school or in environmental/sustainability industry; or with a worthwhile environmental education or protection organization or center.

**Prerequisite(s):** Senior standing in Environmental Studies.

**Grading:** Credit/No Credit

**ENVS 195 - Instructor Assistant in Environmental Studies**

1-3 unit(s)
Experience as a tutor assistant in classroom demonstrations, field techniques and discussion. May be repeated for a 4 unit maximum, but not for same course or instructor.

*Course may be repeated for credit for up to 6 units.*

**Prerequisite(s):** Senior standing, ENGL 1A, instructor consent and appropriate academic background.

**Grading:** Credit/No Credit

**ENVS 198 - Senior Seminar**

4 unit(s)
Culmination of interdisciplinary curriculum in environmental studies through integration and critical assessment of the field. Primary research, fieldwork, and project presentation supports transition from undergraduate experience to full professionalism.

**Prerequisite(s):** Filed for graduation, completion of Environmental Studies core, including ENVS 100W.

**Grading:** Graded

**ENVS 199 - Senior Thesis**

3 unit(s)
Thesis demonstrating grasp of environmental subjects and principles, ability to research in depth particular environmental problems and facility at recommending practical solutions.

**Prerequisite(s):** Senior standing in Environmental Studies, completion of all Environmental Studies core requirements and university 100W writing requirement.

**Grading:** Credit/No Credit

**ENVS 200 - Seminar: Environmental Methods**

3 unit(s)
Rigorous analysis of methods used by social, physical and natural scientists in assessing a region's natural resources and quality of environment. Environmental application of such techniques as field methods, maps, social surveys and project evaluation. Critique of individual research proposals.
Prerequisite(s): ENVS 297 and consent of graduate advisor.
Grading: Graded

ENVS 210 - Current Topics in Environmental Studies

1-3 unit(s)
An investigation of current research topics in the field of Environmental Studies. Lectures by faculty, visiting scholars, and Master's student candidates are accompanied by class discussions and analysis of academic journal articles.

Course may be repeated for credit for up to 6 units.

Prerequisite(s): Graduate Student Standing or instructor consent
Grading: Credit/No Credit

ENVS 227 - Advanced Community Based Participatory Research

3 unit(s)
Integrates interdisciplinary theory and practice in developing a situated understanding of community-based participatory research (CBPR) toward redressing environmental inequities. Course explores the epistemological, environmental and movement-building imperatives for creating effective and responsible community-researcher partnerships for social, health and environmental justice.

Grading: Graded

ENVS 230 - Seminar: Environmental Theory

3 unit(s)
Intensive probe into interdisciplinary research and theories related to natural resources and environmental management. Applications of these theories to the present-day concerns of the resource manager and environmental professional. Oral critiques of various theories; advanced individual research paper and presentation.

Prerequisite(s): Graduate standing in Environmental Studies or instructor consent.
Grading: Graded

ENVS 250 - Seminar: Environmental Thought and Philosophy

3 unit(s)
An in-depth critical analysis of significant works in the field of environmental studies. Topics covered include preservation versus conservation, biocentrism, environmental justice, eco-feminism, deep ecology, and environmental activism. Individual student research is presented with oral and written reports.

Prerequisite(s): Graduate standing in Environmental Studies or instructor consent.
Grading: Graded

ENVS 260 - Computer Applications in Environmental Analysis

3 unit(s)
Overview of environmental simulation software used by professionals to investigate design alternatives and decision-making in the social and life sciences. Application of model designs to individual projects.

Misc/Lab: Lecture 3 hours/lab 3 hours.
**Prerequisite(s):** Graduate standing in Environmental Studies or instructor consent.
**Grading:** Graded

*ENVS 270 - Field Studies in Water Resource Management*

4 unit(s)
An intensive field investigation of water resource agencies and projects to acquaint resource managers, environmental quality specialists and other interested students with projects and philosophies unique to particular geographic areas.

*Misc/Lab: Lecture 4 hours/lab 2 hours.*

**Prerequisite(s):** Upper division standing and ENVS 128 or ENVS 129, or instructor consent.
**Grading:** Graded

*ENVS 284 - Directed Reading for Graduate Students*

3 unit(s)
Directed reading on an environmental subject to assist graduate-level research thesis development. Analysis of peer-reviewed and grey literature; development of a literature review.

*Course may be repeated for credit for up to 6 units.*

**Prerequisite(s):** Graduate student standing or instructor consent
**Grading:** Credit/No Credit

*ENVS 285 - Graduate Internship*

3-9 unit(s)
Advanced service in a local, city, county, state agency, federal agency or environmental industry.

**Prerequisite(s):** Graduate standing in Environmental Studies or instructor consent.
**Grading:** Credit/No Credit

*ENVS 291 - Advanced Topics in Environmental Restoration*

4 unit(s)
High-level restoration research and applications for advanced students. Emphasis on independent literature research and field data collection/analysis. Participation in ongoing restoration project and/or thesis research. Fieldwork and grasp of restoration principles required. Repeatable for up to 8 units of credit

*Misc/Lab: Lecture 4 hours/Activity 2 hours.*

*Course may be repeated for credit for up to 8 units.*

**Prerequisite(s):** Graduate standing and ENVS 187 or equivalent, or instructor consent.
**Grading:** Graded

*ENVS 292 - Intern'l Prgm Studies*

1-6 unit(s)
**Grading:** Mixed Grading
ENVS 295 - Graduate Teaching Assistant

3 unit(s)
Teaching experience in environmental studies at the college level. Does not meet requirements for California Certification in Elementary or Secondary Education. May be repeated for maximum of 6 units, but not for same course or instructor.

Course may be repeated for credit for up to 6 units.

Prerequisite(s): Graduate standing in Environmental Studies or instructor consent.
Grading: Credit/No Credit

ENVS 297 - Research and Proposal Development

3 unit(s)
Students develop their thesis topic through extensive literature research. The product will be a draft thesis proposal to be circulated among potential committee members.

Satisfies GWAR: Graduation Writing Assessment Requirement.

Repeatable for credit.

Prerequisite(s): Graduate Standing in Environmental Studies or consent of instructor.
Grading: Graded

ENVS 298 - Special Study

1-4 unit(s)
Advanced individual research and projects.

Prerequisite(s): Graduate standing in Environmental Studies or instructor consent.
Grading: Mandatory CR/NC/RP

ENVS 299 - Master's Thesis or Project

1-6 unit(s)
Masters thesis research.

Prerequisite(s): Graduate standing in Environmental Studies or instructor consent.
Grading: Mandatory CR/NC/RP

ENVS 1290R - Culminating Experience Supervision

1 unit(s)
Continued work on dissertation, thesis, or project or in preparation for comprehensive exams beyond the minimum required units for cases in which final deliverables are still in progress and all other degree requirements except the culminating experience have been fulfilled.

Prerequisite(s): Outstanding RP grade in a preceding semester in a project or thesis class
Grading: CR/NC, No Degree Credit

Note(s): No Degree Credit.
GLST 1A - Introduction to Global Studies

3 unit(s)
Introduces students to the scope of global studies as seen from the social and cultural perspectives. Readings based on the best critical studies of globalization and its outcomes. Occasionally, visiting professors will give new academic approaches to this field.

Grading: Graded

GLST 1B - Introduction to Global Studies

3 unit(s)
Presents scientific ways for understanding global phenomena and for developing policy to achieve positive outcomes of globalization. Interdisciplinary approaches require new analytical models. Visiting professors will collaborate with instructor.

Satisfies B2: Life Science

Grading: Graded

GLST 92 - International Program Studies

1-12 unit(s)
Grading: Mixed Grading

GLST 100W - Writing Workshop

3 unit(s)
Development of skills required for geographical research and writing.

Satisfies SJSU Studies Z: Written Communication II

Prerequisite(s): GA3 or equivalent second semester composition course (with a grade of C- or better); completion of core GE; satisfaction of Writing Skills Test or completion of ENGL 100A or LLD 100A with C or better; and upper division standing. Or Graduate or Postbaccalaureate level.

Grading: Graded

Note(s): Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).

GLST 143 - Gender, Power, Intl Dev

3 unit(s)
Explore issues of poverty, gender, economic transformations, inequality while examining the history of development. Consider various meanings given to development by women and men, primarily as residents of particular regions, but also as aid workers, policy makers, and government officials. Explore the underlying political, economic, social, and gender dynamics that make "development" an ongoing problem world-wide.

Satisfies SJSU Studies V: Culture, Civil & Global Understanding

Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses.
Corequisite(s): Any 100W.
Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

GLST 156 - Technology of the Modern World

3 unit(s)

Grading: Graded

GLST 162 - Contemporary Global Issues

3 unit(s)
Interdisciplinary approach to contemporary global issues. Understanding and analyzing global issues are the focus of the course. Students will explore, analyze, and articulate the unique challenges each of the issues pose to the global community in ways that will foster student's ability to understand and evaluate causes, consequences, and responses to global challenges.

Prerequisite(s): Upper Division standing or Instructor Consent
Grading: Graded

GLST 164 - Advanced Seminar in Global Citizenship

3 unit(s)
Designed to encourage and inspire students to develop their own understanding of the concept of global citizenship and to develop informed perspectives related to concerns of the global community. Students will be asked to consider the impact they may have, as well as their individual and collective responsibilities, as global citizens, within their local, national, and global communities.

Prerequisite(s): Upper Division Standing or Instructor Consent
Grading: Graded

GLST 167 - Changing Ecologies of Globalization

3 unit(s)
Environmental and human issues and challenges 1492 to present. Global environmental shifts & relationship to social, demographic, cultural, political change. Human interaction with natural environment.

Satisfies SJSU Studies R: Earth & Environment

Prerequisite(s): Passage of WST; completion of Core GE; Upper division standing
Corequisite(s): GEOG 100W (if not already completed)
Grading: Graded

GLST 179 - Capstone Seminar in Global Studies

3 unit(s)
Course is designed for majors to help them to gain coherence in their theoretical knowledge, factual grounding,
international living, personal aptitudes, and career aspirations. It will also give them experience in interdisciplinary research through preparation of a major scholarly paper. The format includes discussion, group analysis, visiting professors, and individual work.

**Prerequisite(s):** Completion of GLST 1A, senior standing.

**Grading:** Graded

**GLST 187 - Special Topics**

3 unit(s)
Selected topics in Global Studies. Topics vary and will be announced each semester.

*Course may be repeated for credit for up to 15 units.*

**Prerequisite(s):** Upper division standing.

**Grading:** Graded

**GLST 188 - Special Topics in International Experiences**

3 unit(s)
Study of modern history, government, immigration and impacts on development of diverse communities. Study of effects of immigration, economics, biases, and other factors on community development, as well as comparing and contrasting US and other cultural perspectives. Course offered as FLP in countries outside the U.S. GE Area: V.

*Satisfies SJSU Studies V: Culture, Civil & Global Understanding.*

*Course is repeatable for up to 6 units.*

**Prerequisite(s):** Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

**Grading:** Graded

**Note(s):** All of SJSU Studies courses require completion of the WST and upper division standing.

**GLST 189 - Global Experience**

1-3 unit(s)
Required for Global Studies majors. Completion of Global Studies sponsored faculty-led international educational study, semester-long residence abroad, for formal study, research, service learning, or internship. Students will develop their programs with the advice and approval of the GLST advisor and the International Programs and Service office. Students may transfer in additional credits from approved study, with prior approval of the GLST advisor.

*Course may be repeated for credit for up to 3 units.*

**Prerequisite(s):** Completion of GLST 1A, junior standing.

**Grading:** Credit/No Credit

**GLST 192 - International Program Studies**

1-12 unit(s)

**Grading:** Mixed Grading

Overview

History provides the tools to understand the world and to make sense of it in the past, present, and future. The SJSU Department of History offers undergraduate and graduate programs that teach our students to read carefully, compare sources, make judgments, and communicate persuasively using evidence-based research. Graduates of our programs often become teachers, but most work in other fields such as law, journalism, the arts, museums, libraries, archives, media, non-profits, consulting, government, and every field of business. Internships are available and Phi Alpha Theta, the History honors society, sponsors academic and social activities for our students. The Social Science Teacher Preparation (SSTP) program helps prepare students for teaching careers. At the graduate level, our primary fields of study are U.S. history, European history, and World history. Many of our MA graduates teach at local middle schools, high schools, and community colleges. Our faculty and students conduct research that draws on the special resources of the MLK Library as well as outstanding local archives such as History San José, the California History Center at De Anza College, the Hoover Institution at Stanford University, and the Bancroft Library at the University of California, Berkeley.

Honors Program in History

A student may qualify for admission to the History Department honors program provided he or she is a history major or minor or a Social Science major who has completed 15 upper division units in history. To apply to History Honors the student must have an overall GPA of 3.0, a GPA of 3.5 for all history upper division courses, or the permission of the chair. If accepted, qualified seniors must complete one of the following: HIST 221, HIST 230, HIST 240, HIST 241, HIST 272, HIST 274, HIST 276, HIST 280, HIST 283, or HIST 288, with a grade of "A" or "B" or the equivalents.
Undergraduate

History & Social Science Teacher Preparation (SSTP), BA (Double BA)

The double major in History and in Social Science Teacher Preparation (SSTP), offered by the Department of History, is ideal for students considering a teaching career. Middle and high school social science teachers typically teach survey courses in both United States and World History. Future social science teachers would therefore benefit from acquiring the in-depth historical content knowledge and historical thinking skills of a History BA. But social science teachers at the secondary level must often teach economics, government, geography, or ethnic studies as well. Students who double major in History and SSTP will therefore benefit from the breadth of courses in the SSTP program and its emphasis on the practical elements of teaching, including how to engage students in the classroom and how to create and maintain effective learning environments. Both majors can be completed in four years and will provide subject matter preparation for a single subject teaching credential program.

- Program Learning Outcomes: History, BA and Social Science, BA

University Requirements for Graduation

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Undergraduate Graduation Requirements section of the Policies and Procedures.

Program Roadmaps

The 4-Year Roadmap is available online. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Degrees (ADT) Pathways are also available online.

General Education/American Institution Requirements

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

University Requirements (38 units)

Core Lower Division General Education (33 units)
Of the 39 units required by the university, 6 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

Note: Students who have completed the ADT Transfer degree (under SB 1440) for this major will have completed all lower division GE requirements and should follow the 60 unit guarantee roadmap. Meet with an advisor prior to registering for your first semester for the 60 unit roadmap or specific questions.

Upper Division General Education (3 units)

Of the 9 units required by the university, 6 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B, HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Consult major advisor for department recommended coursework to meet GE requirement.

Physical Education (2 units)

Graduation Writing Assessment Requirement (3 units)

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Majors Requirements (76 units)

Lower Division Major Requirements (15 units)

- HIST 1A - World History to 1500 3 unit(s)
- HIST 1B - World History from 1500 3 unit(s)
- HIST 99 - History Fundamentals 3 unit(s)

Complete One Sequence From:

African American Studies

- AFAM 2A - African Americans and the Development of America's History and Government 3 unit(s) (D2)
- AFAM 2B - African Americans and the Development of America's History and Government 3 unit(s) (M7)

Asian American Studies
- AAS 33A - Asian Americans in U.S. History I 3 unit(s) (D2)
- AAS 33B - Asian Americans in U.S. History II 3 unit(s) (M7)

US History

- HIST 15 - Essentials of U.S. History 3 unit(s) (M12)
- POLS 15 - Essentials of U.S. & California Government 3 unit(s) (M11)

American People

- HIST 20A - History of the American People 3 unit(s) (US1)
- HIST 20B - History of the American People 3 unit(s) (US1)

Chicana and Chicano Studies

- CCS 10A - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (M12)
- CCS 10B - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (M12)

Upper Division Requirements- History (34 units)

*Students who fulfill SJSU Studies Area S with HIST 188 and/or SJSU Studies Area V with HIST 153 or HIST 155 will complete the History major with 32 or 33 upper-division units.

- HIST 100W - History Writers' Workshop 3 unit(s) (Z)
- SOCS 195 - Social Science Teacher Preparation 3 unit(s)

Field of Study Courses (28 units)

*Upper-division History courses are divided into 4 fields of study: Ancient & Medieval, Modern Europe, United States, and World. 28 units of upper-division courses must include 2 from one field, 2 courses from a second field, 1 course from a third field, and 2 from any field for a total of 7 courses. Among those 7 courses, double-major students must select HIST 189A, HIST 189B, at least 2 Advanced Topics, and at least 2 pre-1750 courses. Consult History advisor for details.

- HIST 189A - California History to 1900 4 unit(s) (US3)
- HIST 189B - California History Since 1900 4 unit(s) (US3)

Upper Division Requirements- SSTP (27 units)

**These 9 courses are separate and distinct from the History BA requirements.

- ECON 109 - Analysis of Economic Issues for Teachers 3 unit(s)
- CCS 185 - Teaching in a Diverse Society 3 unit(s)
- POLS 101 - American Government for Teachers 3 unit(s)
- RELS 191 - Religion in America 3 unit(s) (S)
- SOCI 143 - Feminist Perspectives on Gender and Education 3 unit(s)
- SOCI 177 - Sociology of Education 3 unit(s)
- SOCS 137 - California History for Teachers 3 unit(s)
- SOCS 138 - US History for Teachers 3 unit(s) (S)
- SOCS 139 - World History for Teachers 3 unit(s) (V)

University Electives (6 units)

Total Units Required (120 units)

**History, BA**

Courses offered under this program by the Department of History are planned for those who wish a general liberal education, for those who want a broad foundation for any one of the social sciences, for those who desire advanced degrees in the field of history, and for those who wish to secure the teaching credential.

**University Requirements for Graduation**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Undergraduate Graduation Requirements section of the Policies and Procedures.

**Program Roadmaps**

The 4-Year Roadmap is available online. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Degrees (ADT) Pathways are also available online.

**General Education/American Institution Requirements**

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

**University Requirements (38 units)**

**Core Lower Division General Education (33 units)**

Of the 39 units required by the university, 6 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.
Note: Students who have completed the ADT Transfer degree (under SB 1440) for this major will have completed all lower division GE requirements and should follow the 60 unit guarantee roadmap. Meet with an advisor prior to registering for your first semester for the 60 unit roadmap or specific questions.

Upper Division General Education (3 units)

Of the 9 units required by the university, 6 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B, HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Consult major advisor for department recommended coursework to meet GE requirement.

Physical Education (2 units)

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Major Requirements (48-50 units)

Lower Division Major Requirements (15 units)

- HIST 99 - History Fundamentals 3 unit(s)

Complete One Sequence From:

World History

- HIST 1A - World History to 1500 3 unit(s)
- HIST 1B - World History from 1500 3 unit(s)

Western Civilization

- HIST 10A - Western Civilization 3 unit(s) (D2)
- HIST 10B - Western Civilization 3 unit(s) (D2)

Complete One Sequence From:
US History

6 units of the GE requirement can be fulfilled by choosing the HIST 15 and POLS 15 courses among the major requirement.

- HIST 15 - Essentials of U.S. History 3 unit(s) (M12)
- POLS 15 - Essentials of U.S. & California Government 3 unit(s) (M11)

American People

- HIST 20A - History of the American People 3 unit(s) (US1)
- HIST 20B - History of the American People 3 unit(s) (US1)

Upper Division Major Requirements (33-35 units)

Students who fulfill SJSU Studies Area S with HIST 188 and/or SJSU Studies Area V with HIST 153 or HIST 155 will complete the major with 33 or 34 upper-division units and thus will need additional upper-division courses to meet the minimum University graduation requirement of 40 upper-division units. Such students should take an additional upper-division History course.

- HIST 100W - History Writers' Workshop 3 unit(s) (Z)
- HIST 102 - Historiography 4 unit(s)
- Field of Study Courses 26-28 unit(s)
  Upper-division History courses are divided into 4 fields of study: Ancient & Medieval, Modern Europe, United States, and World. 25-28 units of upper-division courses must include 2 from one field, 2 courses from a second field, 1 course from a third field, and 2 from any field for a total of 7 courses. Among those 7 courses, students must select at least 2 Advanced Topics and at least 2 pre-1750 courses. Consult History advisor for details.

University Electives and/or Minor (32-34 units)

Minor recommended, but not required; consult history advisor.

Total Units Required (120 units)

A checklist of requirements is available in department office.

Social Science, Preparation for Teaching (Single Subject), BA

This major is designed for students interested in teaching history, political science (government), economics, or social science in high school or middle school. The following course work satisfies San José State University's requirements for a BA in Social Science. The BA Social Science Preparation for Teaching, offered by the Department of History, is approved as subject matter preparation for a single subject credential by the California Commission on Teacher Credentialing (CCTC). Individuals who do not complete an approved degree program, or individuals seeking a single subject credential in subject areas not listed must pass all portions of the appropriate Commission-approved subject matter examination(s).
Minimum grade point average (GPA) of at least 2.87 and completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See "Teaching: How to Become a Teacher in California" (see Teaching) for information on application and admission to credential programs.

- SOCS 177 - Sociology of Education 3 unit(s)
- SOCS 195 - Social Science Teacher Preparation 3 unit(s)
- Two Upper Division U.S. History Courses (approved by Social Science Teacher Preparation Advisor) 6-8 unit(s)

University Electives (18-20 units)

Total Units Required (120 units)

Master

History, History Education Concentration, MA

The Master of Arts in History, Concentration in History Education, offered by the Department of History, is designed for middle and secondary school social science teachers. The curriculum broadens the candidate’s knowledge of U.S. and World History. In addition, the program increases the candidate’s academic proficiency in history subjects and his or her professional competence in special areas of interest within the field of history and social science education. This is a terminal degree. Candidates who plan to pursue more advanced graduate training in history should apply to the regular Master's degree program outlined above. Please refer to the Department of History website for the most current information.

Requirements for Admission to Classified Standing

Prospective students must apply separately to the university to obtain approval for graduate-level admission and to the department to obtain admission into the MA in History, Concentration in History Education program. Applicants must meet all the university admission requirements. Students can be admitted in either classified or conditionally classified standing.

Admission to classified standing for the MA in History, Concentration in History Education requires that the student has completed a Single Subject Social Science Teaching Credential, has completed a BA in History or passed the Social Science CSET Examination.
Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirement webpage at GAPE.

**Requirements for Advancement to Candidacy**

At least one semester before a candidate expects to graduate, the student must complete the Advancement to Candidacy Application delineating the entire degree program, that is, the courses that the student has completed or expects to complete toward the MA. The candidate must submit the form to the Graduate Advisor and then to Graduate Studies for final approval. Through this procedure, the student's entire program will be examined to determine whether it complies with all departmental and university requirements for the degree, including the university requirement for demonstrated competency in written English.

The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Procedures for approval for the MA in History, Concentration in History Education are the same as for the general Masters's degree except the Concentration does not require a foreign language.

**Requirements for Graduation**

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

**Department Graduation Requirements**

Following admission to the university and to the department, the student should consult the history department website and speak with an advisor regarding degree requirements and a proposed degree program. Candidates must complete 20 units of course work in one of the following fields of study: United States History, Modern European History, or World History. Eight units may be taken in any field of history. Two units will focus on professional development. U.S. History specialists may apply one HIST 220 - Advanced Colloquium in World History to their primary field, and World History specialists may apply one U.S. History Colloquium (HIST 210) to their primary field. Five courses and the 2 units of professional development --a total of 22 units-- must be completed at the graduate level. All students must maintain a 3.0 average to remain in the program and pass the comprehensive examination (Plan B) to receive the degree. Procedures for approval for the MA in History, Concentration in History Education are the same as for the general Masters's degree except the Concentration does not require a foreign language.

**Graduation Writing Assessment Requirement**

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

**Culminating Experience**
Plan B (Comprehensive Examination)

In addition to the course of study outlined above, graduate students must take and pass a comprehensive examination (Plan B). On the exam, the student is expected to demonstrate considerable breadth and depth of knowledge, a familiarity with historiographical issues, and adherence to acceptable rules of grammar, spelling, and literary style in presentation. The examination will be scheduled toward the end of the fall and spring semesters, and students must pass the examination within three attempts or no degree will be awarded.

Master's Requirements (30 units)

Professional Development (2 units)

- HIST 298 - Special Study 1-6 unit(s) (Should be completed during student's first semester)

Colloquia (8-12 units)

European History Primary Field (8 units)

- HIST 209 - Colloquium in Ancient and Medieval Europe 4 unit(s) (GWAR)
- HIST 211 - Advanced Colloquium in Modern Europe 4 unit(s) (GWAR)

United States History Primary Field (12 units)

- HIST 210A - Advanced Colloquium United States History 4 unit(s)
- HIST 210B - Advanced Colloquium United States History 4 unit(s) (GWAR)
- HIST 210C - Advanced Colloquium United States History 4 unit(s)

World History Primary Field (8 units)

- HIST 220 - Advanced Colloquium in World History 4 unit(s)

Seminars (8 units)

Electives (8-12 units)

Graduate or Upper Division courses selected in consultation with the Graduate Advisor

Total Units Required (30 units)

Elective courses must be planned in consultation with the Graduate Advisor.

The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 8.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate.
History, MA

While designed to strengthen students' depth and breadth of historical knowledge, the MA in History requires those who study the past at an advanced level to move beyond the acquisition of content knowledge and develop the more complex skills and habits of mind associated with historiography—including synthesis, analysis, and evaluation. This course of study serves those preparing to teach history at community colleges, those seeking preparation for the doctorate, museum curators, historical archivists, historians working in governmental agencies, and secondary teachers choosing a traditional Master's degree.

Requirements for Admission to Classified Standing

Prospective students must apply separately to the university to obtain approval for graduate-level admission and to the department to obtain admission into the MA in History program. Applicants must meet all the university admission requirements as outlined in this catalog and stated in subsequent policy changes (this refers both to admission and graduation procedures). Students can be admitted in either classified or conditionally classified standing. Admission to classified standing for the MA - History requires that the undergraduate preparation of the applicant be comparable to that of the BA degree at San José State University. This preparation must include one upper-division or graduate course in historical method and a course in historiography. The applicant who does not have this preparation must remove all deficiencies. Students who have a baccalaureate degree in a field other than history will be required to complete up to 16 units in upper-division or graduate history courses. Units thus taken will not be counted toward the minimum 30 units required for the MA - History. Requirements and policies change; please refer to the Department of History website for the most current information.

Requirements for Admission to Conditionally Classified Standing

A student who does not meet all requirements for admission in classified standing for the MA - History may be admitted in conditionally classified status. The graduate advisor will list on the admissions notification all deficiencies and courses that must be taken. Upon completing these requirements, the student must file a petition for a change of status to classified standing.

University Requirements

The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirement webpage at GAPE.

Requirements for Advancement to Candidacy
At least one semester before a candidate expects to graduate, the student must complete the Advancement to Candidacy Application delineating the entire degree program, that is, the courses that the student has completed or expects to complete toward the Master's. The candidate must submit the form to the Graduate Advisor and then to GAPE for final approval. Through this procedure, the student's entire program will be examined to determine whether it complies with all departmental and university requirements for the degree, including the university requirement for demonstrated competency in written English.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Department Graduation Requirements

Following admission to the university and the department, the student should consult the history department website and speak with the graduate advisor regarding degree requirements and a proposed degree program. Candidates must complete 20 units of course work in one of the following fields of study: United States History, European History or World History. Eight units may be taken in any field of history. Two units will focus on professional development. Specialists in European History and United States History may apply one World History Colloquium (HIST 220) to their primary field, and World History specialists may apply one U.S. History Colloquium (HIST 210) or one European History Colloquium (HIST 209 or HIST 211) to their primary field. Five courses and the 2 units of professional development—a total of 22 units—must be completed at the graduate level. All students must maintain a 3.0 GPA average to remain in the program and either pass the comprehensive examination or complete a thesis to receive the degree.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

Culminating Experience

Plan B (Comprehensive Examination)

In addition to the course of study outlined above, graduate students must take and pass a comprehensive examination (Plan B). On the exam, the student is expected to demonstrate considerable breadth and depth of knowledge, a familiarity with historiographical issues, and adherence to acceptable rules of grammar, spelling and literary style in presentation. The examination will be scheduled toward the end of the fall and spring semesters, and students must pass the examination within three attempts or no degree will be awarded.

Plan A (Thesis)

In some exceptional cases, students may substitute a thesis (Plan A) for the comprehensive examination. The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master's Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate's thesis committee chair with the assistance of the thesis committee. A thesis option will be considered only upon the nomination of a professor, who
agrees to serve as the first reader. The student must demonstrate to the nominating professor, in a written proposal, that he or she is capable of completing a thesis, both in terms of research skills and writing ability, and that he or she has sufficient time to undertake a major research and writing project. In addition, the proposed project must have intrinsic historical value. Demonstrating these points does not obligate a professor to nominate or to serve as a first reader, and no reason need be given to a student for declining to supervise a thesis. Permission to write a thesis is also contingent on finding two other professors willing to serve as second and third readers; they also serve entirely at their own discretion. Finally, the department's graduate studies committee must approve all thesis proposals. After all three readers have signed the thesis, the candidate must submit it to the University for final approval.

A thesis committee has the option of terminating the thesis option if the candidate does not submit an acceptable thesis within five semesters. In that situation, the student will be required to take the Plan B comprehensive examination as the program culminating experience.

Language Requirement

All candidates for general MA in History must demonstrate competency in one foreign language. The sole exception are students whose primary field is U.S. History, who may, if they do not wish to meet the language requirement, take two history graduate-level courses in substitution.

The language competency requirement may be met in four ways:

1. Through examination by a history faculty member with expertise in your language, the exam will be a translation of approximately 500 words to be completed in two hours with a dictionary allowed.
2. By taking two years of a foreign language at a university or community college. An average grade of "C" or better must have been attained, and the coursework completed within five years of admission to the university.
3. If your primary concentration is European History, you may also fulfill this requirement by taking one year of Greek and one year of Latin.
4. By taking and passing the Educational Testing Service Graduate Foreign Language Exam.

Master's Requirements (30 units)

Professional Development (2 units)

- HIST 298 - Special Study 1-6 unit(s) *(Should be completed during student's first semester)*

Colloquia (8-12 units)

European History Primary Field (8 units)

*HIST 209 and HIST 211 may be repeated for credit*

- HIST 209 - Colloquium in Ancient and Medieval Europe 4 unit(s) *(GWAR)*
- HIST 211 - Advanced Colloquium in Modern Europe 4 unit(s) *(GWAR)*

United States History Primary Field (12 units)

- HIST 210A - Advanced Colloquium United States History 4 unit(s)
- HIST 210B - Advanced Colloquium United States History 4 unit(s) *(GWAR)*
- HIST 210C - Advanced Colloquium United States History 4 unit(s)
World History Primary Field (8 units)

- HIST 220 - Advanced Colloquium in World History 4 unit(s) (*HIST 220 may be repeated for credit*)

Seminars (8 units)

*Graduate or Upper Division courses selected in consultation with the Graduate Advisor.*

Additional Graduate or Upper Division Courses (8-12 units)

Total Units Required (30 units)

Elective courses must be planned in consultation with the Graduate Advisor.

The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 8.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate.

**Minor**

**Ancient and Medieval History Minor**

*University Graduation Requirements*

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

**Minor Requirements (18 units)**

- HIST 10A - Western Civilization 3 unit(s)
- HIST 10B - Western Civilization 3 unit(s)
- Courses in upper division Ancient and Medieval History 12 unit(s)

**Asian History Minor**

*University Graduation Requirements*

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

**Minor Requirements (18 units)**

- HIST 1A - World History to 1500 3 unit(s)
- HIST 1B - World History from 1500 3 unit(s)
- Courses in upper division Asian History 12 unit(s)
Total Units Required (18 units)

**European History Minor**

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Requirements (18 units)

- HIST 10A - Western Civilization 3 unit(s) (D2)
- HIST 10B - Western Civilization 3 unit(s) (D2)
- Courses in upper division European History 12 unit(s)

Total Units Required (18 units)

**General History Minor**

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Requirements (18 units)

- Upper division electives from two areas exclusive of lower division (breakdown of requirements available in department office) 12 unit(s)

Complete One Sequence From:

**World History**

- HIST 1A - World History to 1500 3 unit(s)
- HIST 1B - World History from 1500 3 unit(s)

**Western Civilization**

- HIST 10A - Western Civilization 3 unit(s) (D2)
- HIST 10B - Western Civilization 3 unit(s) (D2)

Total Units Required (18 units)

**Jewish Studies Minor**
Overview

In the Jewish Studies Program, students explore Jewish and Israeli culture, history, literature, religion, politics, philosophy, languages, and art. The curriculum fosters critical thinking within and across disciplines and, as is true with any good learning, seeks to enable students to make the leap from knowledge to commitment and action. An interdepartmental minor in Jewish studies includes courses offered by six departments within the College of Humanities and Arts and the College of Social Sciences: the Departments of History, Religious Studies, English and Comparative Literatures, Foreign Languages, Art History, Political Science, Geography and Global Studies. Scholarships are awarded each semester to outstanding students enrolled in the Jewish studies minor program.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Requirements (15 units)

Required Courses (9 units)

- JWSS 90 - Bible History and Literature 3 unit(s)
- JWSS 111 - Special Topics in Jewish Studies 3 unit(s)
- JWSS 126 - Holocaust Literature 3 unit(s)

Elective Courses (6 units)

Complete 6 units from JWSS courses or other courses in consultation with the Jewish Studies Advisor.

Total Units Required (15 units)

Latin American History Minor

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Requirements (18 units)

- HIST 1A - World History to 1500 3 unit(s)
- HIST 1B - World History from 1500 3 unit(s)
- Courses in upper division Latin American History 12 unit(s)

Total Units Required (18 units)

Military History Minor

University Graduation Requirements
To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Requirements (16 units)

- Courses in upper division Military History 16 unit(s)

Total Units Required (16 units)

United States History Minor

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Requirements (16 units)

- Courses in upper division U.S. History 16 unit(s)

Total Units Required (16 units)

HIST 1A - World History to 1500

3 unit(s)
Introduces students to the world's regions and civilizations as interconnected entities. HIST 1A examines the growth and development of traditional civilizations to 1500. HIST 1B surveys the transformation of civilizations since 1500.

Satisfies D2: Comparative Systems.

Grading: Graded

HIST 1B - World History from 1500

3 unit(s)
Introduces students to the world's regions and civilizations as interconnected entities. HIST 1A examines the growth and development of traditional civilizations to 1500. HIST 1B surveys the transformation of civilizations since 1500.

Satisfies D2: Comparative Systems.

Grading: Graded

HIST 10A - Western Civilization

3 unit(s)
History and culture of Europe; social and political structures; roles of individuals and groups; relationships among ideas, institutions, society and culture; to 1648.
Satisfies D2: Comparative Systems

**Grading:** Graded

**HIST 10B - Western Civilization**

3 unit(s)
History and culture of Europe; social and political structures; roles of individuals and groups; relationships among ideas, institutions, society and culture; 1648 to present.

Satisfies D2: Comparative Systems

**Grading:** Graded

**HIST 15 - Essentials of U.S. History**

3 unit(s)
Treatment of essentials of U.S. history. Satisfies the American Institutions requirement in U.S. history (US1) and the Core GE requirement in Social Sciences: Comparative Systems, Cultures, and Environments (D2).

Satisfies D2 + US1: Comparative Systems and American History

**Grading:** Graded

**HIST 20A - History of the American People**

3 unit(s)
Survey of continuity and change in society, culture, institutions and environment. Origins through slavery conflict. American Institutions: US1

Satisfies American Institutions US1: US History

**Grading:** Graded

**HIST 20B - History of the American People**

3 unit(s)
Survey of continuity and change in society, culture, institutions and environment. Emergence of modern society and world power status. American Institutions: US1

Satisfies American Institutions US1: US History

**Grading:** Graded

**HIST 50 - Historical Process: Understanding Historical Reasoning**

3 unit(s)
Modes and skills of practical logic and reasoning through study of historical method. Historical problems examined to that end.

Satisfies A3: Critical Thinking
Prerequisite(s): Completion of GE Areas A1 and A2 each with grades of C- or better

Grading: Graded

HIST 92 - Int'l Program Studies

1-12 unit(s)

Grading: Mixed Grading

HIST 99 - History Fundamentals

3 unit(s)

An introduction to the skills, technology and technique of history reading, writing and research. It is a prerequisite to HIST 100W. Sophomores and transferring juniors are required to take this course.

Prerequisite(s): Open to History and Social Science Teacher Preparation majors only; lower or upper division standing.

Grading: Graded

HIST 100W - History Writers' Workshop

3 unit(s)

Development of skills required for the art and practice of historical research and writing. Library research, oral reports and written exercises dealing with a variety of historical problems.

Satisfies SJSU Studies Z: Written Communication II.

Prerequisite(s): HIST 99 required or Department permission. A3 or equivalent second semester composition course (with a grade of C- or better); completion of core GE; satisfaction of Writing Skills Test or completion of ENGL 100A / LLD 100A with C or better; and upper division standing. Allowed Declared Majors: History majors only. Or Graduate or Postbaccalaureate level.

Grading: Graded

Note(s): Must be passed with C or better to satisfy the CSU Graduation Writing Assessment Requirement (GWAR).

HIST 102 - Historiography

4 unit(s)

Critical study of the writings of great historians.

Prerequisite(s): HIST 99 and HIST 100W.

Grading: Graded

HIST 103 - History of the Modern Middle East

4 unit(s)
This course surveys European Medieval History from the late fourth century through the first millennium. It examines the political, economic, social, cultural, and religious changes that constituted the transformation of the antique world into a unique “European” civilization.

Prerequisite(s): Upper division standing
Grading: Graded

HIST 121B - Medieval Worlds, 1000-1500

4 unit(s)
From 1000 - 1500 emphasizing growth of papal power, commercial revolution and revival of urban life, twelfth century Renaissance, interactions between the European, Byzantine, and Islamic worlds, and late medieval transformations leading to modernity

**Prerequisite(s):** Upper division standing  
**Grading:** Graded

**HIST 122 - The Renaissance and Reformation**

4 unit(s)  
The European world in transition from 1400-1600.

**Prerequisite(s):** Upper Division Standing  
**Grading:** Graded

**HIST 124 - Early Modern Europe**

4 unit(s)  
The European world in transition from 1580 to 1750. A continuation of HIST 122, exploring the central place of the princely court in the transformation of politics, religion, art, culture, science, technology and philosophy. Introduction to the Enlightenment.

**Prerequisite(s):** Upper Division Standing  
**Grading:** Graded

**HIST 126 - Advanced Topics in Medieval History**

4 unit(s)  
An investigation in depth of selected periods or topics in Medieval history. Repeatable for credit when topic changes for up to 12 units.

*Course may be repeated for credit for up to 12 units.*

**Prerequisite(s):** Departmental consent required.  
**Grading:** Graded

**HIST 132 - Advanced Topics in World History**

4 unit(s)  
Aspects of world history under various topics. Repeatable for credit when topic changes for up to 12 units.

*Course may be repeated for credit for up to 12 units.*

**Prerequisite(s):** Upper division standing or instructor consent  
**Grading:** Graded

**HIST 143 - Europe, 1750-1900**

4 unit(s)  
Major political, economic, social and cultural themes of European history from the Enlightenment to 1900.
Prerequisite(s): Upper division standing
Grading: Graded

HIST 144 - Europe, 1900-1945

4 unit(s)
A history of political, economic, social and cultural developments in Europe during the era of the two world wars.

Prerequisite(s): Upper division standing
Grading: Graded

HIST 145 - Europe and the World Since 1945

4 unit(s)
Political, economic and social developments since World War II, with emphasis on Europe.

Prerequisite(s): Upper division standing
Grading: Graded

HIST 146 - Advanced Topics in European History

4 unit(s)
An investigation in depth of selected periods or topics in European history. Repeatable for credit when topic changes up to 12 units.

Course may be repeated for credit for up to 12 units.

Prerequisite(s): Upper division standing
Grading: Graded

HIST 153 - History of Women in Europe

3 unit(s)
Changes in women's private and public roles in diverse national, class, religious, ethnic and racial contexts from Ancient Greece to Modern Europe.

Satisfies SJSU Studies V: Culture, Civil & Global Understanding.

Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

Gradning: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

HIST 155 - 20th Century World

3 unit(s)
Global perspectives on a century of scientific progress that also saw the violent deaths of millions, with emphasis on the decline of traditional imperialism and the ideological contention that led to World War II and the Cold War.

Satisfies SJSU Studies V: Culture, Civil & Global Understanding.
Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

HIST 162 - Colonial Latin America

4 unit(s)
The course covers the colonial administration and society of the Spanish and Portuguese colonies in the New World. I also look at social, economic, and political conditions of the Iberian Peninsula and of the Amerindian empires on the eve of the conquest. The course concludes with an overview of the independence movements in Hispanic America and Brazil.

Prerequisite(s): Upper division standing or instructor consent
Grading: Graded

4 unit(s)
Latin America since 1800. Focus on major political changes, such as independence, wars, popular uprisings, and systems of government. Also economic and cultural affairs, especially when they disrupt existing societies, and outstanding leaders who charted their nations’ destinies.

Prerequisite(s): Upper division standing or instructor consent
Grading: Graded

HIST 167 - Advanced Topics in Latin American History

4 unit(s)
An investigation in depth of selected periods or topics in Latin American history. Repeatable for credit when topic changes up to 12 units.

Course may be repeated for credit for up to 12 units.

Prerequisite(s): Upper division standing or instructor consent
Grading: Graded

HIST 170 - Topics in American History

3 unit(s)
An investigation in depth of selected periods or problems. American Institutions Requirement: US1 Repeatable for credit when topic changes.

Satisfies American Institutions US1: US History

Prerequisite(s): Upper division standing.
Grading: Graded

Note(s): No credit for history majors or minors.
HIST 170S - Topics in American History: American Identities and Institutions

3 unit(s)
An investigation in depth of selected periods or problems. This topic focuses on historical relationships between social groups and the political, social, economic and cultural institutions they created.

Satisfies SJSU Studies S + US1: Self, Society & Equality in the U.S. + American History

Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

HIST 171 - U.S. Constitutional & Legal History

4 unit(s)
Origins and evolution of the United States Constitution and federal system from the American Revolution to the present.

Prerequisite(s): Upper division standing or instructor consent.

Grading: Graded

HIST 173 - New World Encounters, 1400-1750

4 unit(s)
Examines the first wave of European expansion, from 1400-1750, through the prism of cultural and religious interactions. Explores how Europeans, Africans, and Indians understood each other during European exploration, conquest, and colonization of the "New World".

Prerequisite(s): Upper division standing or instructor consent.

Grading: Graded

Note(s): Offered only occasionally.

4 unit(s)
Modern history of the United States since 1950 including the Cold War, the Korean and Vietnam wars, the Civil Rights Movement, postwar society, culture, economics and politics.

Prerequisite(s): Upper division standing or instructor consent
Grading: Graded

HIST 180 - Individual Studies

1-4 unit(s)
Individual work on special topics by arrangement.

Prerequisite(s): History majors or minors.
Grading: Credit/No Credit

HIST 181 - Advanced Topics in American History
4 unit(s)
An investigation in depth of selected periods or topics in American history.

Course is repeatable for credit when topic changes up to 12 units.

Prerequisite(s): Upper division standing or instructor consent.
Grading: Graded

HIST 184 - Directed Reading

1-4 unit(s)
Directed reading on a specific topic in history.

Prerequisite(s): History major/minor and instructor and department chair consent.
Grading: Credit/No Credit

HIST 185 - LGBTQ+ History in the United States

3 unit(s)
Students use an intersectional framework to examine LGBTQ+ history in the United States. The course emphasizes how the development of institutions and ideals, the formation of identities, and shifting contexts of equality and inequality have impacted LGBTQ+ people through time.

Satisfies SJSU Studies S: Self, Society & Equality in US.

Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing (60 units or more) are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

HIST 188 - History of Women in the United States

3 unit(s)
A multi-faceted history of women in the United States from colonial times to the present. GE Area: S.

Satisfies SJSU Studies S: Self, Society & Equality in US.

Repeatable for credit.

Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

HIST 189A - California History to 1900

4 unit(s)
Topics include Native American civilizations, Spanish discovery and missions, the Mexican era, the American conquest, the Gold Rush, Chinese immigration, the railroad, growth, development, politics and class conflict.
American Institutions Requirement: US3

*Satisfies American Institutions US3: California Government*

**Prerequisite(s):** Upper division standing or instructor consent.

**Grading:** Graded

**Note(s):** Satisfies American Institutions requirement in California government.

**HIST 189B - California History Since 1900**

4 unit(s)
Social, political, and economic history of California since 1900. American Institutions Requirement: US3

*Satisfies American Institutions US3: California Government*

**Prerequisite(s):** Upper division standing or instructor consent

**Grading:** Graded

**Note(s):** Satisfies American Institutions requirement in California government.

**HIST 192 - Int'l Program Studies**

1-12 unit(s)

**Grading:** Mixed Grading

**HIST 197 - Introduction to Public History**

4 unit(s)
Introduction to preservation and presentation of history to the community and to roles historians play in public agencies. Exploration of archives, museums and historic sites. Required for admission to Public History internship.

**Prerequisite(s):** Upper division standing or consent of instructor.

**Grading:** Graded

**HIST 199 - Public History Internship**

3 unit(s)
Supervised placement in historical organizations, public institutions and community agencies concerned with preservation of history. May be repeated for 6 unit maximum.

*Course may be repeated for credit for up to 6 units.*

**Prerequisite(s):** Instructor consent.

**Grading:** Credit/No Credit

**HIST 200 - Graduate Methodology, Research and Writing**

4 unit(s)
An orientation to history graduate study focusing on the critical advanced writing, library, research and historiographical skills needed for success as a graduate student and professional historian. Includes an overview of current methodologies and trends in the field.
Grading: Graded

HIST 209 - Colloquium in Ancient and Medieval Europe

4 unit(s)
Intensive readings, discussions and reports on Ancient and Medieval Europe. For areas and field of emphasis see the schedule of classes. May be repeated when content changes.

Satisfies GWAR: Graduation Writing Assessment Requirement

Course may be repeated for credit for up to 8 units.

Prerequisite(s): Graduate standing or instructor consent
Grading: Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

HIST 210A - Advanced Colloquium United States History

4 unit(s)
Intensive readings, discussions, and reports on American history in the seventeenth and eighteenth centuries. Repeatable for credit once with different instructor.

Course may be repeated for credit for up to 8 units.

Prerequisite(s): Graduate standing
Grading: Graded

HIST 210B - Advanced Colloquium United States History

4 unit(s)
Intensive readings, discussions, and reports on American history in the nineteenth century. Repeatable for credit once with different instructor.

Satisfies GWAR: Graduation Writing Assessment Requirement

Course may be repeated for credit for up to 8 units.

Prerequisite(s): Graduate standing
Grading: Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

HIST 210C - Advanced Colloquium United States History

4 unit(s)
Intensive readings, discussions, and reports on American history in the twentieth century. Repeatable for credit once with different instructor.

Course may be repeated for credit for up to 8 units.
Prerequisite(s): Graduate standing
Grading: Graded

HIST 211 - Advanced Colloquium in Modern Europe

4 unit(s)
Intensive readings, discussions and reports. Topics have included the French Revolution, the Holocaust in Europe and issues of marginalization of gender and class during the modern period. May be repeated with different instructor or topic.

Satisfies GWAR: Graduation Writing Assessment Requirement

Course may be repeated for credit for up to 8 units.

Prerequisite(s): Graduate standing or instructor consent
Grading: Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

HIST 220 - Advanced Colloquium in World History

4 unit(s)
Intensive readings, discussions and reports in Asian, African, European and North and South American history, in one of three eras: ancient and classical eras (before 1000), between 1000 and 1750 or since 1750. May be repeated with different instructor or topic.

Course may be repeated for credit for up to 8 units.

Prerequisite(s): Graduate standing or instructor consent
Grading: Graded

HIST 221 - Seminar in World History

4 unit(s)
An intensive study of some area, problem or period in world history. Topics have included World War II, the Atlantic Economy, World Slavery, British Imperialism. Repeatable for up to 8 units when course content changes.

Course may be repeated for credit for up to 8 units.

Prerequisite(s): Graduate Standing
Grading: Graded

HIST 230 - Seminar in Ancient and Medieval Europe

4 unit(s)
An intensive study of some areas, problem or period in Ancient or Medieval Europe. Individual research with oral and written reports. May be repeated for up to 8 units with different instructor or topic.

Satisfies GWAR: Graduation Writing Assessment Requirement

Course may be repeated for credit for up to 8 units.

Prerequisite(s): Graduate Standing
Grading: Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

**HIST 240 - Seminar in Pre-Twentieth Century Europe**

4 unit(s)
An intensive study of some area, problem or period in European history before 1900. Topics have included economic, social and gender differences in Industrial Europe and social theories of Max Weber. May be repeated when content changes.

*Satisfies GWAR: Graduation Writing Assessment Requirement*

Prerequisite(s): Instructor consent.
Grading: Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

**HIST 241 - Seminar in Twentieth Century Europe**

4 unit(s)
An intensive study of some area or problem. Individual research with oral and written reports. Topics have included the Cold War, European diplomacy and international security.

*Satisfies GWAR: Graduation Writing Assessment Requirement*

Prerequisite(s): Graduate standing
Grading: Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

**HIST 272 - Seminar in American Diplomatic History**

4 unit(s)
An intensive analysis of some chronological period, area or major problem in American diplomatic history. Individual research with oral and written reports.

*Satisfies GWAR: Graduation Writing Assessment Requirement*

Course may be repeated for credit for up to 8 units.

Prerequisite(s): Graduate standing
Grading: Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

**HIST 274 - Seminar in US Social & Cultural History**

4 unit(s)
Intensive study of some phase of American social, cultural, and/or intellectual history. Individual research with oral and written reports. Topics have included class, race, ethnic, and gender differences. May be repeated when content changes. Repeatable for up to 8 units when topic changes.
Course may be repeated for credit for up to 8 units.

Prerequisite(s): graduate standing or instructor consent.
Grading: Graded

HIST 276 - Seminar in Early American History

4 unit(s)
An intensive study of some phase in, or problem of, American history from colonial period through the Civil War. Topics have included American independence from British control, the development of the industrial North and the colonization of the West. May be repeated when content changes.

Satisfies GWAR: Graduation Writing Assessment Requirement

Course may be repeated for credit for up to 8 units.

Prerequisite(s): Instructor consent.
Grading: Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

HIST 280 - Seminar in Recent American History

4 unit(s)
An intensive study of some phase or problem in the period from the Civil War to the present. Individual research with oral and written reports. May be repeated when content changes.

Satisfies GWAR: Graduation Writing Assessment Requirement

Course may be repeated for credit for up to 8 units.

Prerequisite(s): Graduate standing or instructor consent.
Grading: Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

HIST 283 - Seminar in California and Western History

4 unit(s)
An intensive study of an area, phase or period of history associated with California or the West. Individual research with oral and written reports. May be repeated for credit when course content changes.

Satisfies GWAR: Graduation Writing Assessment Requirement

Course may be repeated for credit for up to 8 units.

Prerequisite(s): Graduate standing and instructor consent.
Grading: Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

HIST 288 - Seminar in the History of Women in the United States
4 unit(s)
An intensive study of some phase of the history of women in the United States. Individual research with oral and written reports.

Satisfies GWAR: Graduation Writing Assessment Requirement

Course may be repeated for credit for up to 8 units.

Prerequisite(s): Graduate Standing
Grading: Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

HIST 292 - Int'l Program Studies

1-6 unit(s)
Grading: Mixed Grading

HIST 298 - Special Study

1-6 unit(s)
Advanced individual research.

Prerequisite(s): Instructor consent and approval by graduate advisor.
Grading: Mandatory CR/NC/RP

Note(s): More than 3 units only in areas where graduate courses not normally offered.

HIST 299 - Master's Thesis or Project

3-6 unit(s)
Open only to approved master's candidates in history. Reserved for students under Plan A.

Grading: Mandatory CR/NC/RP

HIST 1290R - Culminating Experience Supervision

1 unit(s)
This course is offered in special sessions for 1 unit. It is required of, and limited to, graduate students who have an outstanding RP grade in a preceding semester in a project or thesis class. If one has an outstanding RP, this course must be taken unless the student is enrolled in any other course. By outstanding, it is meant that the RP grade has not been changed to any other grade, including a CR or NC. The RP grade in the project or thesis course remains on the official record until a culminating memo has been submitted by the graduate advisor to the Office of Graduate Admissions & Program Evaluations and the course instructor of the class in which an RP was received has petitioned for a grade change to CR. This course receives no degree credit and therefore cannot be used on the candidacy form or to fulfill graduation requirements. It is repeatable up to 12 times.

Course may be repeated for credit for up to 16 units.

Prerequisite(s): HIST 299
Grading: CR/NC, No Degree Credit

Note(s): No Degree Credit
JWSS 10A - Elementary Hebrew

3 unit(s)
Basic structure of the language in the context of culture.

Grading: Graded

JWSS 10B - Elementary Hebrew

3 unit(s)
Basic structure of the language in the context of culture.

Prerequisite(s): HEBR 10A (or equivalent).
Grading: Graded

JWSS 15A - Intermediate Hebrew

3 unit(s)
Developing speaking skills.

Prerequisite(s): HEBR 10A and HEBR 10B (or equivalent).
Grading: Graded

JWSS 15B - Intermediate Hebrew

3 unit(s)
Developing speaking skills.

Prerequisite(s): HEBR 10A and HEBR 10B (or equivalent).
Grading: Graded

JWSS 90 - Bible History and Literature

3 unit(s)
The Bible in context of its history, literary sources and as a reflection of Jewish and Christian traditions. Motifs and themes in light of their original audience, historic usage and contemporary development.

Satisfies C2: Letters

Grading: Graded

JWSS 102A - Advanced Hebrew

3 unit(s)
Readings, grammar, discussion and composition.

Prerequisite(s): Four semesters of college Hebrew (or equivalent).
Grading: Graded

JWSS 102B - Advanced Hebrew
3 unit(s)
Readings, grammar, discussion and composition.

**Prerequisite(s):** 12 units of college Hebrew (or equivalent).
**Grading:** Graded

**JWSS 111 - Special Topics in Jewish Studies**

3 unit(s)
Special Topics in Jewish Studies. Topics vary and will be announced each semester. Repeatable for credit under different subtitles. Repeatable for credit when topic changes.

**Prerequisite(s):** Upper division standing.
**Grading:** Graded

**JWSS 126 - Holocaust Literature**

3 unit(s)
Survey of literature written by survivors or witnesses of the Holocaust, the destruction of European Jewry during World War II, focusing upon diaries, memoirs, fiction, and occasionally poetry and drama. Writers may include Elie Wiesel, Primo Levi, Anne Frank, Charlotte Delbo.

*Satisfies SJSU Studies V: Culture, Civil & Global Understanding*

**Prerequisite(s):** Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
**Grading:** Graded

**Note(s):** All of SJSU Studies courses require completion of the WST and upper division standing.

**JWSS 144 - Middle Eastern Politics**

4 unit(s)
Study of unfolding events in the Middle East. Themes include: the failure of democratic movements, nuclear proliferation and terrorism, US foreign policy towards the region, the Israel-Palestine conflict, urbanization, gender and human rights.

**Grading:** Graded

**JWSS 180 - Individual Studies**

1-3 unit(s)
Directed studies in relevant fields not covered by courses offered.

*Course may be repeated for credit for up to 3 units.*

**Prerequisite(s):** Instructor consent and program coordinator.
**Grading:** Credit/No Credit

**SOCS 137 - California History for Teachers**
Interdisciplinary course to prepare future teachers to teach California history from a wide range of social science perspectives. Includes the diverse history of California's people, politics, and cultures and their impact on the nation and the world. Create and implement teaching strategies for use in classrooms.

Grading: Graded

Note(s): Not acceptable for Economics majors, except double majors; acceptable for Economics minors.

SOCS 138 - US History for Teachers

Interdisciplinary course to prepare future teachers to teach the United States history from a wide range of social science perspectives. Study of the diverse history of the people, politics, and cultures of the US while examining movements for social justice. Students create and implement engaging strategies for use in classrooms. GE Area: S.

Satisfies SJSU Studies S: Self, Society & Equality in US.

Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

SOCS 139 - World History for Teachers

This interdisciplinary course is intended to prepare future teachers to teach world history from a wide range of social science perspectives. Students will compare the diverse ideas, values, and histories of various world cultures. Students will create and implement engaging teaching strategies for use in their own future classrooms. GE Area: V.

Satisfies SJSU Studies V: Culture, Civil & Global Understanding.

Prerequisite(s): HIST 15 and POLS 15 or AAS 33A and AAS 33B. Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

SOCS 195 - Social Science Teacher Preparation

In this capstone course Social Science Teacher Preparation majors will synthesize their learning about the theory and practice of Social Science education through the completion of a major portfolio project. Required for majors.

Prerequisite(s): SOCS 177; completed graduation application; or instructor consent.

Grading: Graded

SSED 184I - Student Teaching for Social Science Individualized Interns
2-4 unit(s)
Supervised student teaching in social science class(es) in the public school where the student is employed as an Individualized Intern. Repeatable for a total of 12 units.

**Course may be repeated for credit for up to 12 units.**

**Prerequisite(s):** Admission to Single Subject Credential Program; social science advisor and Single Subject Coordinator consent.

**Grading:** Credit/No Credit

**SSED 184Y - Student Teaching II - Classroom Teaching**

4-6 unit(s)
Minimum 80-120 class periods of classroom, teaching lab or field teaching in appropriate single subjects, grades K-12 and related teaching activities/seminar.

**Prerequisite(s):** SSED 378 with a passing grade of "B" or better (B- not acceptable) and joint approval of major and Education departments.

**Grading:** Credit/No Credit

**SSED 184Z - Student Teaching III - Classroom Teaching**

4-6 unit(s)
See SSED 184Y for course description.

**Grading:** Credit/No Credit

**Note(s):** May be in different subject/school and will be at a different grade level.

**SSED 378 - Social Science Methods**

3 unit(s)
For prospective secondary teachers who plan to teach in the social science field. A prerequisite to student teaching.

**Grading:** Graded

Overview

Since 1930, the Department of Justice Studies has developed, promoted and fostered social justice and empowered communities. In an ever-changing social, political and economic environment, we remain committed to academic excellence, social activism and policy relevant research. We offer BS and MS degrees in justice studies, a BS in forensic science and minors in justice studies, forensic studies, an MS in Criminology, legal studies and human rights. Among other topics, our widely regarded faculty conduct research in the areas of human rights, immigration, violence against women, sex offender behavior, family violence, and DNA profiling. Student groups and clubs include Alpha Phi Sigma, Chi Pi Sigma and the Forensic Science Club. Our graduates work in a multitude of settings including probation, parole, corrections, law enforcement, crime labs, and nonprofit agencies, or they continue their education in law school or other graduate programs.

Summary of Degree Units

University Graduation Requirements 41

Major Preparation 40

Major Requirements 35

University Electives 1-4

Total 120

University Requirements for Graduation
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Undergraduate Graduation Requirements section of the Policies and Procedures.

**Program Roadmaps**

The 4-Year Roadmap is available online. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Degrees (ADT) Pathways are also available online.

**Prerequisite Requirements**

Enrollment in any chemistry course requires that the prerequisite courses be passed with a grade of "C or better" (C- not accepted). Exceptions may be made only with instructor consent or if not explicitly stated in the course description. Refer to the SJSU Course Catalog for specific information regarding course prerequisites.

**Justice Studies International Experience Requirement**

To satisfy the Justice Studies Department International Experience, students must study abroad for at least nine days in an approved program (exemption from the study abroad portion of the requirement must be approved by the dean of the College of Applied Sciences and Arts based on compelling individual life experiences or physical limitations. A relevant cross-cultural experience in the U.S. will be substituted).

**General Education/American Institution Requirements**

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

**University Requirements (41 units)**

**Core Lower Division General Education (24 units)**

Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

**Note:** Students who have completed the ADT Transfer degree (under SB 1440) for this major will have completed all lower division GE requirements (except for 1 course in GE Area C and 1 course in GE Area D) and should follow the 60 unit guarantee roadmap (which include the missing GE in Area C and D). Meet with an advisor prior to registering for your first semester for the 60 unit roadmap or specific questions.

**Upper Division General Education (9 units)**

Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.

**American Institutions (6 units)**

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B, HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

**Complete One Sequence From:**
African American Studies (6 units)

- AFAM 2A - African Americans and the Development of America's History and Government 3 unit(s) (D2)
- AFAM 2B - African Americans and the Development of America's History and Government 3 unit(s) (D3+US123)

Asian American Studies (6 units)

- AAS 33A - Asian Americans in U.S. History I 3 unit(s) (D2)
- AAS 33B - Asian Americans in U.S. History II 3 unit(s) (D3+US123)

Chicana and Chicano Studies (6 units)

- CCS 10A - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D2)
- CCS 10B - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D3+US123)

U.S. History and Government (6 units)

- HIST 15 - Essentials of U.S. History 3 unit(s) (D2+US1)
- POLS 15 - Essentials of U.S. & California Government 3 unit(s) (D3+US23)

Physical Education (2 units)

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Major Preparation (40 units)

- CHEM 1A - General Chemistry 5 unit(s) (B1+B3)
- CHEM 1B - General Chemistry 5 unit(s) (B1+B3)
- CHEM 55 - Quantitative Analysis 2 unit(s)
- CHEM 55L - Quantitative Analysis Laboratory 2 unit(s)
- CHEM 112A - Organic Chemistry 3 unit(s)
- CHEM 112B - Organic Chemistry 3 unit(s)
- CHEM 113A - Organic Chemistry Lab 2 unit(s)
- MATH 30 - Calculus I 3 unit(s) (B4)
- PHYS 2A - Fundamentals of Physics 4 unit(s) (B1+B3)
- PHYS 2B - Fundamentals of Physics 4 unit(s) (B1+B3)
- STAT 95 - Elementary Statistics 3 unit(s) (B4)

Complete One Course From:
• CHEM 130A - Biochemistry 4 unit(s)
• CHEM 135 - General Biochemistry 4 unit(s)

Major Requirements (39 units)

Core Courses (32 units)

• BIOL 30 - Principles of Biology I 4 unit(s) (B2+B3)
• BIOL 31 - Principles of Biology II 4 unit(s) (B2+B3)
• BIOL 115 - General Genetics 4 unit(s)
• FS 11 - Survey of Forensic Science 3 unit(s)
• FS 161 - Crime Scene Investigation 3 unit(s)
• FS 162 - Forensic Science Applications 3 unit(s)
• FS 167 - Forensic Molecular Biology 5 unit(s)
• JS 100W - Writing Workshop 3 unit(s) (Z)

Complete One Course From:

• FS 169 - FS Senior Sem : Studies in Contemporary FS Issues 3 unit(s)
• JS 189 - Senior Seminar: Contemporary Problems 3 unit(s)

Practical Requirement (3 units)

• JS 181 - Internship: Justice Studies 1-6 unit(s) (3 units required)

International Experience (0-3 units)

In consultation with advisor, select an International Experience course.

Major Electives(1-4 units)

Complete 4 units from the following. Other electives may be substituted with advisor approval

• ANTH 157 - Forensic Anthropology 3 unit(s)
• BIOL 116 - Molecular Genetics 4 unit(s)
• BIOL 117 - Human Genetics 3 unit(s)
• BIOL 118 - Evolutionary Genetics 4 unit(s)
• BIOL 123A - Bioinformatics I 3 unit(s)
• BIOL 123B - Bioinformatics II 3 unit(s)
• BIOL 124 - Systems Physiology 3 unit(s)
• BIOL 125 - Systems Physiology Laboratory 2 unit(s)
• BIOL 135B - Eukaryotic Cell and Molecular Biology II 3 unit(s) (R)
• BIOL 135L - Molecular Cell Biology Lab 3 unit(s)
• BIOL 137 - Introduction to Principles of Toxicology 3 unit(s)
• BIOL 145 - Advanced Undergraduate Biology Seminar 1-3 unit(s)
• BIOL 145L - Advanced Undergraduate Biology Lab 1-2 unit(s)
• BIOL 165 - Advanced Human Anatomy 4 unit(s)
- CHEM 120S - Chemical Safety Seminar 1 unit(s)
- FS 160 - Special Topics in Forensic Science 1-5 unit(s)
- FS 163 - Fingerprint Science 3 unit(s)
- FS 164 - Crime Scene and Evidence Photography 3 unit(s)
- FS 165 - Forensic Biometrics 3 unit(s)
- FS 166 - Forensic Chemistry 3 unit(s)
- FS 168 - Fluorescent Applications in Molecular Biology and Forensic Science 3 unit(s)
- FS 106 - Forensic Entomology 3 unit(s)
- JS 143 - Criminal Evidence and Procedure 3 unit(s)
- JS 171 - Human Rights and Justice 3 unit(s) (V)
- JS 180 - Individual Studies 1-3 unit(s)
- JS 181 - Internship: Justice Studies 1-6 unit(s)
- JS 185 - Special Topics in Law and Justice 3 unit(s)
- MATH 31 - Calculus II 4 unit(s) (B4)
- MICR 101 - General Microbiology 5 unit(s)
- PHIL 133 - Ethics in Science 3 unit(s) (V)
- PHIL 160 - Philosophy of Science 3 unit(s) (R)
- PSYC 110 - Adult Psychopathology 3 unit(s)
- PSYC 129 - Neuroscience 3 unit(s)
- PSYC 153 - Psychology in the Courtroom 3 unit(s)

- CS 49C - Programming in C 3 unit(s)

Major Requirements (36 units)

Core Courses (24 units)

- FS 100W - Forensic Science Writing Workshop 3 unit(s) (Z) or JS 100W - Writing Workshop 3 unit(s) (Z)
- JS 114 - Research Methods in Justice Studies 3 unit(s)
- CS 146 - Data Structures and Algorithms 3 unit(s)
- FS 11 - Survey of Forensic Science 3 unit(s)
- FS 161 - Crime Scene Investigation 3 unit(s)
- FS 162 - Forensic Science Applications 3 unit(s)
- FS 130 - Introduction to Digital Forensics 3 unit(s)
- FS 131 - Digital Forensics Analysis 3 unit(s)

Computer Systems I-II (6 units)

*In consultation with advisor, select three computer systems courses.*

Complete three courses:

- CS 147 - Computer Architecture 3 unit(s)
- CS 149 - Operating Systems 3 unit(s)
- CS 157A - Introduction to Database Management Systems 3 unit(s)
- CS 157B - Database Management Systems II 3 unit(s)
- CS 158A - Computer Networks 3 unit(s)
- CS 158B - Computer Network Management 3 unit(s)
- CS 166 - Information Security 3 unit(s)
- CS 175 - Mobile Device Development 3 unit(s)

Senior Seminar (3 units)

Complete one course:

- FS 169 - FS Senior Sem : Studies in Contemporary FS Issues 3 unit(s)
- JS 189 - Senior Seminar: Contemporary Problems 3 unit(s)

Practical Requirement (3 units)

- JS 181 - Internship: Justice Studies 1-6 unit(s)
International Experience (0-3 units)

In consultation with advisor, select an International Experience course.

Major Electives (10 units)

Other electives may be substituted with advisor approval.

- Any Forensic Science (FS) Course 3 unit(s)
- JS 143 - Criminal Evidence and Procedure 3 unit(s)
- JS 144 - Criminal Law 3 unit(s)
- JS 161 - Introduction to Cybercrime 3 unit(s)
- JS 180 - Individual Studies 1-3 unit(s)
- JS 184 - Directed Reading 1-3 unit(s)
- CS 122 - Advanced Programming with Python 3 unit(s)
- CS 144 - Advanced C++ Programming 3 unit(s)
- CS 160 - Software Engineering 3 unit(s)
- PSYC 153 - Psychology in the Courtroom 3 unit(s)
- TECH 60 - Introduction to Electronics 3 unit(s)
- TECH 62 - Analog Circuits 3 unit(s)
- TECH 63 - Analog and Digital Circuits 3 unit(s)
- TECH 65 - Introduction to Networks 3 unit(s)
- TECH 66 - Network Administration 3 unit(s)
- TECH 115 - Automation and Control 3 unit(s)
- TECH 167 - Control Systems 3 unit(s)
- TECH 170 - Connected Products Applications 3 unit(s)
- TECH 171 - Network Security & Prevention Management 3 unit(s)
- TECH 172 - Database Server System Management 3 unit(s)
- TECH 173 - Cloud Computing System Management 3 unit(s)
- TECH 179 - Cyber Security System Management 3 unit(s)

Summary of Degree Units

University Graduation Requirements 41

Major Preparation 6

Major Requirements 45-48

University Electives 25-28
University Requirements for Graduation

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Undergraduate Graduation Requirements section of the Policies and Procedures.

Program Roadmaps

The 4-Year Roadmap is available online. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Degrees (ADT) Pathways are also available online.

Major-Specific Graduation Requirements

All courses in the Preparation and Requirements for the major (all courses in preparation, core, and concentration/specialization) must be completed with a grade of "C or better".

Justice Studies International Experience Requirement

To satisfy the Justice Studies Department International Experience, students must study abroad for at least nine days in an approved program (exemption from the study abroad portion of the requirement must be approved by the dean of the College of Applied Sciences and Arts based on compelling individual life experiences or physical limitations. A relevant cross-cultural experience in the U.S. will be substituted).

General Education/American Institution Requirements

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

University Requirements (41 units)

Core Lower Division General Education (30 units)

Of the 39 units required by the university, 9 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

Note: Students who have completed the ADT Transfer degree (under SB 1440) for this major will have completed all lower division GE requirements and should follow the 60 unit guarantee roadmap. Meet with an advisor prior to registering for your first semester for the 60 unit roadmap or specific questions.

Upper Division General Education (3 units)

Of the 9 units required by the university, 6 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions (6 units)

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies
(AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B, HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

**Complete One Sequence From:**

**African American Studies (6 units)**
- AFAM 2A - African Americans and the Development of America's History and Government 3 unit(s) (D2)
- AFAM 2B - African Americans and the Development of America's History and Government 3 unit(s) (M7)

**Asian American Studies (6 units)**
- AAS 33A - Asian Americans in U.S. History I 3 unit(s) (D2)
- AAS 33B - Asian Americans in U.S. History II 3 unit(s) (M7)

**U.S. History and Government (6 units)**
- HIST 15 - Essentials of U.S. History 3 unit(s) (M12)
- POLS 15 - Essentials of U.S. & California Government 3 unit(s) (M11)

**Chicana and Chicano Studies (6 units)**
- CCS 10A - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D2)
- CCS 10B - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (M7)

**Physical Education (2 units)**

**Graduation Writing Assessment Requirement**

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

*A grade of C or better (C- not accepted) is required to meet graduation requirement.*

**Major Preparation (6 units)**

Complete one course from:
- FS 11 - Survey of Forensic Science 3 unit(s)
- JS 10 - Introduction to Justice Studies 3 unit(s)
- JS 12 - Introduction to Legal Studies 3 unit(s)
- JS 25 - Introduction to Human Rights and Justice 3 unit(s) (D3)

**Complete One Course From:**

- JS 15 - Introductory Statistics in Justice Studies 3 unit(s) (B4)
- STAT 95 - Elementary Statistics 3 unit(s) (B4) *(UNVS 15F and UNVS 15S may be used in lieu of the statistics course required by this major.)*
Major Requirements (45-48 units)

International Experience (0-3 units)

In consultation with advisor, select an International Experience course.

Justice Studies Core (15 units)

- JS 100W - Writing Workshop 3 unit(s) (Z)
- JS 114 - Research Methods in Justice Studies 3 unit(s)
- JS 151 - Criminological Theory 3 unit(s)

Complete One Course From:

- JS 181 - Internship: Justice Studies 1-6 unit(s) (3 units required)
- JS 141 - Record Clearance Project Representation 3 unit(s)

Complete One Course From:

- JS 189 - Senior Seminar: Contemporary Problems 3 unit(s)
- FS 169 - FS Senior Sem : Studies in Contemporary FS Issues 3 unit(s)

Required Courses (6 units)

- JS 101 - Critical Issues and Ideas in Justice 3 unit(s)
- JS 102 - Police and Society 3 unit(s)

Additional Courses (24 units)

Students Must Complete 24 Units from the Following Areas

Area A: Theory Courses (6-9 units)

Complete six to nine units from:

- JS 103 - Courts and Society 3 unit(s)
- JS 104 - Penal Politics & Institutions 3 unit(s)
- JS 132 - Race, Gender, Inequality and the Law 3 unit(s) (S)
- JS 153 - Crime and Justice Across the Life Course 3 unit(s)
- JS 155 - Victimology 3 unit(s)
- JS 157 - Deviance and Justice 3 unit(s)
- JS 185 - Special Topics in Law and Justice 3 unit(s) (When topic area is offered.)

Area B: Methodology Courses (3-6 units)

Complete three to six units from:
• JS 107 - Justice Management and Ethics 3 unit(s)
• JS 117 - Qualitative Research Methods 3 unit(s)
• JS 131 - Crisis Intervention, Mediation and Restorative Justice 3 unit(s)
• JS 143 - Criminal Evidence and Procedure 3 unit(s)
• JS 185 - Special Topics in Law and Justice 3 unit(s) (When topic area is offered.)
• FS 161 - Crime Scene Investigation 3 unit(s)
• FS 162 - Forensic Science Applications 3 unit(s)

Area C: Critical Inquiry Courses (3-6 units)

Complete three to six units from:
• JS 122 - Drugs and Society 3 unit(s)
• JS 128 - Punishment, Culture and Society 3 unit(s)
• JS 130 - Sexuality & Justice 3 unit(s)
• JS 136 - Family and Community Violence 3 unit(s) (S)
• JS 144 - Criminal Law 3 unit(s)
• JS 150 - Gender and Crime 3 unit(s)
• JS 152 - Juvenile Delinquency & Justice 3 unit(s)
• JS 185 - Special Topics in Law and Justice 3 unit(s) (When topic area is offered.)

Area D: Local, Transnational, Historical Courses (3-6 units)

Complete three to six units from:
• JS 121 - Media and Justice 3 unit(s)
• JS 123 - Terrorism, Intelligence, and Security 3 unit(s)
• JS 127 - Immigration and Justice 3 unit(s)
• JS 129 - International Crime and Deviance 3 unit(s)
• JS 137 - Collaborative Response to Family Violence 3 unit(s)
• JS 145 - White Collar Crime 3 unit(s)
• JS 156 - Gangs, Criminal Syndicates & Justice 3 unit(s)
• JS 158 - The Prison Community 3 unit(s)
• JS 161 - Introduction to Cybercrime 3 unit(s)
• JS 171 - Human Rights and Justice 3 unit(s) (V)
• JS 172 - Human Trafficking and Modern Day Slavery 3 unit(s)
• JS 185 - Special Topics in Law and Justice 3 unit(s) (When topic area is offered.)

Area E: Experiential Learning Courses (0-6 units)

Complete up to six units from:
• JS 140 - Record Clearance Project 3 unit(s)
• JS 142 - RCP - Advanced Study and Community Involvement 3 unit(s)
• JS 179 - Human Rights Practicum and Seminar 3 unit(s)
• JS 180 - Individual Studies 1-3 unit(s)
• JS 181 - Internship: Justice Studies 1-6 unit(s) (3 units required) (JS 181 may be taken again for elective credit.)
• JS 184 - Directed Reading 1-3 unit(s)
University Electives (25-28 units)

A minor is strongly recommended

Master

Criminology, Global Criminology Concentration, MS

The Department of Justice Studies at San José State University offers an online Master of Science in Criminology with a Concentration in Global Criminology designed to adapt to the ever-changing environment of the justice and legal systems, and the discipline of criminology. It uniquely combines the advanced study of contemporary international crime and the various responses to crime around the globe with analytic and research techniques used by advanced scholars. It provides an international comparative curriculum that develops analytical skills, understanding of legal concepts, theoretical competency, and abilities to apply criminology in practical ways. It aims to equip graduates with a truly global outlook on crime and criminal justice, a commitment to international justice,
professional competencies to apply practices from around the globe to meet the particular needs of their communities.

This degree program is housed in the Department of Justice Studies. More information is available at www.sjsu.edu/justicestudies.

Graduate Coordinator: Dr. Claudio Vera Sanchez (claudio.verasanchez@sjsu.edu)

Admission Requirements

To be considered for admission to the MS in Criminology program, applicants must complete the university admission requirements, as well as have a baccalaureate degree from an accredited four-year college or university, minimum grade point average of 3.0 in the last 60 credits of coursework, a general understanding of computers and technology, and access to a computer with Internet. International applicants must have a TOEFL score of 550 (Paper Based), 213 (Computer Based), or 80 (Internet Based).

International (Foreign) Students

Documentation of the applicant's TOEFL score should accompany other admission material. For TOEFL Requirements see Policies and Procedures section, Graduate and Post baccalaureate information.

Requirements for Advancement to Candidacy

For advancement to candidacy for the Master of Science degree in Criminology, Concentration in Global Criminology, students must meet the general university requirements for admission to candidacy outlined in the Academic Regulations section of this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Graduation Requirements for the MS - Criminology, Concentration in Global Criminology.

Each student must take a core curriculum of 15 units (JS 265, JS 266, JS 271, JS 272, and JS 273). Elective courses must be 200-level courses in the department. Subject to graduate coordinator approval, two graduate courses in other departments or programs may be taken as electives, if the student demonstrates their relevance to the student's program of study and/or career goals. Undergraduate courses may not count toward the 30 units of required graduate course work. Students who are academically or administratively disqualified from the program will generally not be readmitted.

Special Session Program Information
Academic Programs offered through Special Session are operated by the College of Professional and Global Education (CPGE). Registration and enrollment in a Special Session course or program must use the special session application form and will follow the special session fees and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the CPGE website for more information.

**Graduation Writing Assessment Requirement**

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

**Masters Requirements (30 units)**

**Core Courses (15 units)**

- JS 265 - Comparative Criminal Justice Systems 3 unit(s) *(GWAR)*
- JS 266 - Applied Research Methods and Statistics 3 unit(s)
- JS 271 - International Human Rights 3 unit(s)
- JS 272 - Policing in Global Contexts 3 unit(s)
- JS 273 - International Criminology and Juvenile Delinquency 3 unit(s)

**Concentration Requirements (12 units)**

- JS 267 - Crime and Gender Around the World 3 unit(s)
- JS 268 - Immigration and International Law 3 unit(s)
- JS 269 - Cyber Forensics 3 unit(s)
- JS 270A - Global Terrorism 3 unit(s)

**Culminating Experience (3 units)**

- JS 274 - Applied Project 3 unit(s)

**Total Units Required (30 units)**

**Justice Studies, MS**

The Department of Justice Studies at San José State University offers a full-time two-year or part-time three-year Master's program drawing upon criminology, criminal justice, sociology, political science, psychology, law, and history.

Areas of teaching and research in the Department include theory, policing, law and society, human rights, policy evaluation, juvenile justice, immigration, punishment & society, race theory, history, and forensic science.

The Master's program prepares students for careers in criminal justice settings, public institutions, grassroots community organizations, and nonprofit agencies, as well as for doctoral programs and research positions in public agencies.
Admission Requirements

University Admissions

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system and meet all the university admission requirements. Applicants apply separately to the department to obtain admission into the MS, Justice Studies program.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE. For TOEFL Requirements, see the Policies and Procedures section, Graduate and Post Baccalaureate Information.

Admission to the Program

To be considered for admission to the Justice Studies Department, applicants must complete the university admission requirements, as well as have a minimum grade point average of 3.0 in the last 60 units of university course work. Admission decisions will be based on a weighted assessment of the applicant's grade point average, course work and preparation, two letters of recommendation from academics, and a short essay on a justice-related topic chosen each year by the Justice Studies graduate committee (see department website for further information).

Admission in Conditionally Classified Standing

Applicants meeting the university's requirements for the Graduate Division but lacking experience in research methods in the social sciences may, at the department's discretion, be required to take one or two classes to prepare them for the degree. These students may be admitted under conditionally classified standing. The individual admission notification will explain the required terms and conditions for attaining Classified standing.

Requirements for Advancement to Candidacy

For advancement to candidacy for the Master of Science degree in Justice Studies, students must meet the general university requirements for admission to candidacy outlined in the Academic Regulations section of this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Advancement to Candidacy requires the following:

1. Classified standing
2. Completion of 9 units of core or required courses with a grade point average of 3.0 (“B”) or better
3. Completion of the GWAR

Once advanced to candidacy, the student should meet with the department graduate coordinator to draft an approved plan of study. This program must identify 33 units of course work as outlined in the following list of course requirements.
Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Completing Requirements for the MS - Justice Studies

Course Requirements

Each student must complete a core curriculum of 18 units (JS 201, JS 202, JS 203, JS 207, JS 211 and JS 265), 9 units of elective courses, and master's thesis or project as their 6-unit culminating experience. The thesis option requires six units of JS 299; the project option requires completion of JS 297 and an additional 3-unit elective. Elective courses must be 200-level courses in the department. Subject to graduate coordinator approval, two graduate courses in other departments on campus may be taken as electives, if the student demonstrates their relevance to the student's program of study and/or career goals in Justice Studies. Undergraduate courses may not count toward the 33 units of required graduate course work. Students who are academically or administratively disqualified from the program will generally not be readmitted.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

Culminating Experience

Students select one of the following options for their culminating experience. Students should choose the option that best suits their particular interests and goals.

Plan A (with Thesis)

Plan A provides an advanced program of study for those who are primarily interested in conducting research, and pursuing advanced study toward the doctorate. The Plan A is a 6-unit thesis option designed to provide opportunities for in-depth investigation in the student's area of emphasis. The thesis will include original research on a topic approved by the thesis committee and must meet university requirements as stipulated in this catalog and in the SJSU Master's Thesis and Doctoral Dissertation Guidelines. The student and the thesis committee chair, with approval by the graduate coordinator, determine the thesis requirements and timelines. Approval by the graduate coordinator and thesis committee chair, with a "B" average in the core coursework is required before a student can register for JS 299 - Master's Thesis (3 units). Students interested in this option must also submit a brief written statement to the graduate coordinator describing their research interests and expertise, and receive permission from the graduate coordinator.

Plan B (Project)

The Plan B option provides an advanced program of study for professionals and those who want to pursue careers in justice studies fields. It requires a 3-unit research project that is conducted with the rigor appropriate to graduate
work. Its culminating experience is a substantial, original paper on a specific research topic and an associated poster presentation evaluated by a faculty panel comprised of all members of the Justice Studies graduate committee. Individual projects are agreed to by the graduate student and JS 297 academic advisor and require the approval of the Graduate Coordinator. Students choosing this option must take an additional 3-unit elective and enroll in JS 297 - Program Evaluation Project during their final semester.

Master's Requirements (33 units)

Core Courses (18 units)

- JS 201 - Justice and Social Theory 3 unit(s) (GWAR)
- JS 202 - Survey of Research Methods 3 unit(s)
- JS 203 - Seminar in Applied Statistics in Justice 3 unit(s)
- JS 207 - Seminar in Qualitative Research Methods 3 unit(s)
- JS 211 - Historical Issues in Justice Studies 3 unit(s)
- JS 223 - Seminar: Comparative Criminology & Criminal Justice 3 unit(s)

Electives (9 units)

9 units from the following:

- JS 204 - Justice Organizations, Ethics & Change 3 unit(s)
- JS 205 - Seminar in Law and Courts 3 unit(s)
- JS 206 - Seminar in Juvenile Justice 3 unit(s)
- JS 208 - Seminar: Punishment & Society 3 unit(s)
- JS 209 - Seminar in Police and Social Control 3 unit(s)
- JS 212 - Local & Global Perspectives on Human Rights 3 unit(s)
- JS 214 - Seminar: Social Movement, Community Organizing, and Social Justice 3 unit(s)
- JS 218 - Seminar: Immigration, Law & Justice 3 unit(s)
- JS 220 - Seminar: Criminological Theory 3 unit(s)
- JS 221 - Seminar: Deviance & Social Control 3 unit(s)
- JS 222 - Seminar: Penal Policies and Justice 3 unit(s)

Culminating Experience (6 units)

Plan A (with Thesis)

- JS 299 - Master's Thesis 3-6 unit(s) (6 units required)

Plan B (Project)

- JS 297 - Program Evaluation Project 3 unit(s)
- Additional 3 units electives 3 unit(s)

Total Units Required (33 units)

Elective courses must be planned in consultation with the graduate advisor.
Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

Certificate

Collaborative Response to Family Violence Certificate (Graduate)

The Certificate for Collaborative Response to Family Violence is available to community professionals of all disciplines who wish to enhance their skills and effectiveness through continued study. It is a 12-14 unit certificate program which integrates knowledge in the areas of family violence and collaboration to inform and improve our response to family violence and enhance innovation and effectiveness. Certificate participants will develop a strong working knowledge and awareness of:

- Family violence
- Dynamics, impacts and meaning of violence across disciplines
- Critical systems involved in responding to family violence
- Skills for collaboration
- Critical analysis of stages and elements of effective collaboration

Certificate Core (6 units)

- JS 136 - Family and Community Violence 3 unit(s) (S)
- JS 137 - Collaborative Response to Family Violence 3 unit(s)

Required Seminars (3 units)

Take three units of seminar courses.

- JS 243 - Collaborative Dialogues Seminar 1 unit(s)
- JS 244 - Collaborative Projects Seminar 1 unit(s)
- JS 245 - Collaborative Field Experience Seminar 1 unit(s)
- JS 245B - Independent Study ICR Field Placement 1 unit(s) (Students take two units of JS 245B only if needed to fulfill the JS 245 co-requisite for field experience)

Elective Courses (3 units)

Take three units of elective courses

Other courses with approval of advisor

- JS 246 - Research Methods in Family Violence 1 unit(s)
- JS 247 - Family Violence in Special Populations 1 unit(s)
- JS 248 - Community Justice 1 unit(s)
- JS 249 - Neurobiology Response to Family Violence 1 unit(s)
- SCWK 247 - Collaborative Leadership in Social Service Contexts 1 unit(s)
Total Units Required (12-14 units)

Minor

Forensic Studies Minor

The Minor in Forensic Studies will appeal to students in majors across the university, and has practical applications in the areas of law, law enforcement, engineering, computer science, accounting, chemistry, biology, nursing, medicine, and anthropology.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Requirement (15 units)

Required Courses (9 units)

- FS 11 - Survey of Forensic Science 3 unit(s)
- FS 161 - Crime Scene Investigation 3 unit(s)
- FS 162 - Forensic Science Applications 3 unit(s)

Additional Courses (6 units)

Complete Two Courses From:

Substantive Electives are revised each fall semester

- ANTH 157 - Forensic Anthropology 3 unit(s)
- FS 160 - Special Topics in Forensic Science 1-5 unit(s)
- FS 163 - Fingerprint Science 3 unit(s)
- FS 164 - Crime Scene and Evidence Photography 3 unit(s)
- FS 165 - Forensic Biometrics 3 unit(s)
- JS 143 - Criminal Evidence and Procedure 3 unit(s)
- JS 185 - Special Topics in Law and Justice 3 unit(s) (Special topic must be approved by minor advisor)
- PHIL 133 - Ethics in Science 3 unit(s) (V)
- PHIL 160 - Philosophy of Science 3 unit(s) (R)
- PHOT 110 - Black and White Photography 3 unit(s)
- PSYC 110 - Adult Psychopathology 3 unit(s)
- PSYC 129 - Neuroscience 3 unit(s)
- PSYC 153 - Psychology in the Courtroom 3 unit(s)

Total Units Required (15 units)

Human Rights Minor
The Minor in Human Rights is meant to prepare students for careers in relation to international law, human rights advocacy/reporting/organizing, and human rights scholarship. The Minor can supplement the program of students who have interests in (for example) social problems, public policy, social movements and social change, international relations/studies, law and governance, issues of justice, and global cultures.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Requirements (15 units)

Required Courses (9 units)

- JS 25 - Introduction to Human Rights and Justice 3 unit(s) (D3)
- JS 179 - Human Rights Practicum and Seminar 3 unit(s)

Complete One Course From:

- JS 171 - Human Rights and Justice 3 unit(s) (V)
- SOCI 118 - Sociology of Human Rights and Social Justice 3 unit(s)

Additional Courses (6 units)

Choose two courses from different departments. Substantive Electives are revised each Fall semester.

Complete two courses from:

- AAS 175 - Asian American Communities 3 unit(s) (S)
- AFAM 120 - Sociology of African American Communities 3 unit(s)
- AFAM 134 - The Black Civil Rights Movements 3 unit(s)
- AFAM 151 - Race, Class and the Environment 3 unit(s)
- AFAM 159 - Economic Issues in the Black Community 3 unit(s)
- ANTH 115 - The Emerging Global Culture 3 unit(s) (V)
- ANTH 140 - Human Sexuality 3 unit(s) (S)
- ANTH 146 - Culture and Conflict 3 unit(s) (V)
- COMM 157SL - Community Action/Community Service 3 unit(s) (S)
- COMM 174 - Intercultural Comm & Struct Inequality 3 unit(s) (S)
- ECON 112 - Economic Development 4 unit(s)
- ENGL 117B - Global Film, Literature, and Cultures 3 unit(s) (V)
- ENGL 122 - Topics in Comparative World Literature 4 unit(s)
- ENGL 126 - Holocaust Literature 3 unit(s) (V)
- ENGL 165 - Topics in Ethnic American Literature 4 unit(s)
- ENGL 169 - Ethnicity in American Literature 3 unit(s) (S)
- ENVS 105 - Environmental Change and Problems, San Francisco Bay Area 3 unit(s)
- ENVS 107 - Introduction to Environmental Economics and Policy 3 unit(s)
- ENVS 117 - Human Ecology 3 unit(s)
- ENVS 140 - Politics and the Environment 3 unit(s)
• ENVS 152 - Globalization and the Environment 3 unit(s) (R)
• ENVS 159 - Nature and World Cultures 3 unit(s) (V)
• GEOG 112 - Nations, Cultures, and Territorial Disputes 3 unit(s) (V)
• GEOG 115 - Global Development 3 unit(s)
• GLST 162 - Contemporary Global Issues 3 unit(s)
• GLST 164 - Advanced Seminar in Global Citizenship 3 unit(s)
• GLST 167 - Changing Ecologies of Globalization 3 unit(s) (R)
• HIST 188 - History of Women in the United States 3 unit(s) (S)
• PH 172 - Contemporary Environmental Health Issues 3 unit(s) (R)
• HUM 122 - Topics in Comparative World Literature 4 unit(s)
• HUM 126 - Holocaust Literature 3 unit(s) (V)
• JS 122 - Drugs and Society 3 unit(s)
• JS 127 - Immigration and Justice 3 unit(s)
• JS 129 - International Crime and Deviance 3 unit(s)
• JS 132 - Race, Gender, Inequality and the Law 3 unit(s) (S)
• JS 172 - Human Trafficking and Modern Day Slavery 3 unit(s)
• CCS 105 - Chicanos: United States/Mexico Relations 3 unit(s)
• CCS 120 - Political Economy and Chicana/o Communities 3 unit(s)
• CCS 130 - Chicanas and Chicanos in American Society 3 unit(s) (S)
• CCS 175 - Human Migrations: Global Reach 3 unit(s)
• MCOM 106 - Global Mass Communication 3 unit(s)
• MDES 144 - Middle Eastern Politics 4 unit(s)
• MDES 156 - Islam, Politics and the West 3 unit(s)
• METR 168A - Global Climate Change I 6 unit(s)
• METR 168B - Global Climate Change II 3 unit(s) (R+S+V)
• METR 174 - Climate Change Solutions 3 unit(s)
• NUFS 139 - Hunger and Environmental Nutrition 3 unit(s) (R)
• PHIL 122 - Social Justice 3 unit(s)
• PHIL 126 - Environmental Ethics and Philosophy 3 unit(s)
• POLS 130 - American Public Policy 4 unit(s)
• POLS 135 - U.S. Environmental Policy 3 unit(s)
• POLS 147 - Globalization 4 unit(s)
• POLS 150 - War and Peace 3 unit(s) (V)
• POLS 152A - International Organizations and NGOs 4 unit(s)
• POLS 152B - Model United Nations 4 unit(s)
• POLS 154 - U.S. Foreign Policy: Formulation and Administration 4 unit(s)
• POLS 155 - The Wealth of Nations 4 unit(s)
• POLS 170V - American Politics in Global Perspective 3 unit(s) (USV)
• PSYC 145 - Community Mental Health 3 unit(s)
• PSYC 191 - The Psychology of Prejudice 3 unit(s) (S)
• SOCI 116 - Global Society 3 unit(s)
• SOCI 118 - Sociology of Human Rights and Social Justice 3 unit(s)
• SOCI 120 - Contemporary Social Issues 3 unit(s)
• SOCI 141 - Environmental Sociology 3 unit(s)
• SOCI 160 - Immigration and Identity 3 unit(s)
• SOCI 162 - Race and Ethnic Relations 3 unit(s) (S)
• SOCI 164 - Social Action 3 unit(s)
• SOCI 165 - Poverty, Wealth and Privilege 3 unit(s)
• SOCI 172 - Lesbian, Gay, Bi, Transgender Studies 3 unit(s)
• SOCS 137 - California History for Teachers 3 unit(s)
• SOCS 138 - US History for Teachers 3 unit(s) (S)
• SOCS 139 - World History for Teachers 3 unit(s) (V)
• WOMS 101 - Sex, Power, and Politics 3 unit(s) (S)
• WOMS 112 - Women in the Global Economy 3 unit(s)
• WOMS 160 - Queering Gender, Race, and Class 3 unit(s)

Total Units Required (15 units)

Justice Studies Minor

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Requirements (18 units)

Required Lower Division Courses (3 units)

Complete one course from:
• JS 10 - Introduction to Justice Studies 3 unit(s)
• JS 12 - Introduction to Legal Studies 3 unit(s)
• JS 25 - Introduction to Human Rights and Justice 3 unit(s) (D3)

Required Upper Division Courses (6 units)

Complete Two Courses From:
• JS 101 - Critical Issues and Ideas in Justice 3 unit(s)
• JS 102 - Police and Society 3 unit(s)
• JS 114 - Research Methods in Justice Studies 3 unit(s)
• JS 151 - Criminological Theory 3 unit(s)

Upper Division Electives (9 units)

Complete any three upper division JS courses.

Total Units Required (18 units)

Legal Studies Minor

University Graduation Requirements
To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

**Minor Requirements (18-22 units)**

- POLS 120 - Law and Society 3 unit(s) (S)

**Additional Courses (15-19 units)**

*Take No More Than One Course From Each Area Below.*

**Perspectives in Law**

- ECON 141 - Law and Economics 4 unit(s)
- ENVS 124 - Introduction to Environmental Law 3 unit(s) *(Can also be taken as POLS 124)*
- JS 144 - Criminal Law 3 unit(s)
- PHIL 155 - Philosophy of Law 3 unit(s)

**Contemporary Issues in Law and Justice**

- AFAM 142 - Race, Ethnicity, and the Law 3 unit(s)
- JS 101 - Critical Issues and Ideas in Justice 3 unit(s)
- JS 122 - Drugs and Society 3 unit(s)
- JS 123 - Terrorism, Intelligence, and Security 3 unit(s)
- JS 132 - Race, Gender, Inequality and the Law 3 unit(s) (S)
- JS 143 - Criminal Evidence and Procedure 3 unit(s)
- JS 171 - Human Rights and Justice 3 unit(s) (V)
- CCS 127 - Chicanas/os and the Criminal Justice System 3 unit(s)
- SOCI 151 - Violence in the Family 3 unit(s)

**Legal History**

- AFAM 134 - The Black Civil Rights Movements 3 unit(s)
- POLS 121A - Constitutional Law: Institutional Powers 4 unit(s)
- POLS 121B - Constitutional Law: Civil Liberties 4 unit(s)
- POLS 121C - Constitutional Law: Civil Rights 4 unit(s)

**Law and Ethics**

- BUS3 186 - Professional and Business Ethics 3 unit(s) (S)
- COMM 133F - Ethical Problems in Communication 4 unit(s)
- MCOM 101 - Media Law and Ethics 3 unit(s)

**Law and the Courts**

- COMM 147P - Argumentation and Persuasion in Courts of Law 4 unit(s)
- JS 103 - Courts and Society 3 unit(s)
- POLS 122 - Judicial Politics 4 unit(s)

Total Units Required (18-22 units)

FS 11 - Survey of Forensic Science

3 unit(s)
This survey course introduces students to the profession of forensic science. Topics include the field's history and sub-disciplines, the CSI Effect, the application of the scientific method to physical evidence analysis. Virtual labs may be used to augment readings.

Grading: Graded

FS 100W - Forensic Science Writing Workshop

3 unit(s)
Development of advanced communication skills, both written and oral, with emphasis on forensic laboratory and crime scene report writing and court testimony. A scholarly paper, written in APA format and informed by research, is also required. GE Area Z.

Satisfies SJSU Studies Z: Written Communication II.

Prerequisite(s): FS 11 or JS 10; A3 or equivalent second semester composition course (with a grade of C- or better); completion of core GE; satisfaction of Writing Skills Test or completion of ENGL 100A / LLD 100A with C or better; and upper division standing. Or Graduate or Postbaccalaureate level.

Grading: Graded

Note(s): Must be passed with C or better to satisfy the CSU Graduation Writing Assessment Requirement (GWAR).

FS 106 - Forensic Entomology

3 unit(s)
Examines the science and methodology used to collect, analyze, and present information regarding insects and other arthropods that are important in legal investigations.

Lecture 2 hours/Lab 3 hours.

Prerequisite(s): BIOL 30 and BIOL 31 (with a grade of "C-" or better in each), or instructor consent. Must be a declared Biology or Forensic Science Major (all).

Grading: Graded

FS 130 - Introduction to Digital Forensics

3 unit(s)
Introduce students to the process of digital evidence analysis, including the common crimes committed in cyberspace, the tools used to analyze evidence, and emerging trends (e.g., deep fakes and biometrics).

Grading: Graded

FS 131 - Digital Forensics Analysis
3 unit(s)
An applied course where students get hands-on experience conducting digital evidence collection and analyses and gain an experience conducting forensic examinations.

**Prerequisite(s):** FS 130.

**Grading:** Graded

---

**FS 160 - Special Topics in Forensic Science**

1-5 unit(s)
Range of topics in Forensic Science which will vary by semester. Topics may include Blood Spatter Analysis, Microscopy and Trace Evidence, Forensic Art, Facial Reconstruction, and others. Repeatable for up to 9 units credit when content changes.

*Course may be repeated for credit for up to 9 units.*

**Prerequisite(s):** JS 10 or FS 11 or Instructor Permission. Justice Studies or Forensic Science major; Forensic Studies minor.

**Grading:** Graded

---

**FS 161 - Crime Scene Investigation**

3 unit(s)
Fundamental theories of physical evidence practically applied and the legal considerations involved in its recognition, collection preservation and presentation in court are covered. Topics include securing and recording the crime scene, collecting evidence, maintaining the chain of custody and reconstruction.

**Misc/Lab:** Lecture 3 hours/lab 3 hours

**Prerequisite(s):** FS 11, JS or FS Major/Minor, Upper Division Standing. JS students may substitute JS 10 or FS 11.

**Grading:** Graded

---

**FS 162 - Forensic Science Applications**

3 unit(s)
Scientific analysis and interpretation of physical evidence using identification and comparison techniques. Practical lab exercises in human identification, questioned documents, bite marks, trace evidence, presumptive testing and glass analysis. Additional topics include court testimony, quality assurance and ethics.

**Misc/Lab:** Lecture 2 hours/Activity 2 hours.

**Prerequisite(s):** FS 11, JS or FS Major/Minor, Upper Division Standing. JS students may substitute JS 10 for FS 11.

**Grading:** Graded

---

**FS 163 - Fingerprint Science**

3 unit(s)
History and use of fingerprints in criminal identification. Topics include the scientific basis for fingerprint ID, anatomy of friction ridge skin, pattern classification, minutiae marking, the Henry System, AFIS and ACE-V, and court presentation of fingerprint evidence.

**Misc/Lab:** Lecture 3 hours/Activity 3 hours.
Prerequisite(s): FS 11, JS or FS Major/Minor, Upper division Standing. JS Students may substitute JS 10 for FS 11.
Grading: Graded

FS 164 - Crime Scene and Evidence Photography

3 unit(s)
Practical use of photography in documenting crime scenes and evidence. Topics will include 35mm camera operation, lenses, focus, exposure, depth of field, lighting, composition, flash, injury documentation, digital cameras and video, and court presentation of photographic evidence.

Misc/Lab: Lecture 3 hours/Activity 3 hours.

Prerequisite(s): FS 11, JS or FS Major/Minor, Upper Division Standing. JS Students may substitute JS 10 for FS 11.
Grading: Graded

FS 165 - Forensic Biometrics

3 unit(s)
A survey of scientific and biometric tools and applications used to establish human identity. Topics include identification of missing persons; casualties of mass disasters; victims of war crimes; and the ethical, legal and social implications of such technology.

Prerequisite(s): FS 11, JS 10, JS 25, or ANTH 12; upper division standing
Grading: Graded

FS 166 - Forensic Chemistry

3 unit(s)
An exploration of scientific concepts, methods, practices, instrumentation, interpretation, statistics and court issues of chemistry as applied in forensic science including special topics: drug analysis, toxicology, arson and trace analysis emphasizing the instrumentation that allows chemical examination of evidence.

Prerequisite(s): CHEM 1A, CHEM 1B, FS 11
Grading: Graded

FS 167 - Forensic Molecular Biology

5 unit(s)
History, scientific concepts, methods, practices, instrumentation, interpretation, statistics and court issues of forensic DNA analysis via lectures, hands-on activities/laboratories, and videos. Collection, documentation and preservation of biological evidence, bioethics, QA, validation, admissibility and training will also be covered.

Misc/Lab: Lecture 4 hours/lab 2 hours.

Prerequisite(s): BIOL 31, CHEM 1A, and CHEM 1B
Grading: Graded

FS 168 - Fluorescent Applications in Molecular Biology and Forensic Science

3 unit(s)
This course covers scientific concepts, methods, practices, instrumentation, interpretation, statistics and court issues of fluorescence applications in molecular biology and forensic science. Topics include, atomic and molecular basis of
Misc/Lab: Lecture 4 hours/lab 6 hours.

Prerequisite(s): BIOL 30, BIOL 31, CHEM 1A, CHEM 1B, FS 162 all with grades of 'C' or better.
Grading: Graded

FS 169 - FS Senior Sem : Studies in Contemporary FS Issues

3 unit(s)
Identification, discussion and analysis of selected problems in forensic science. A major term paper, presentation on
a selected topic and participation on written as well as in-class assignments and activities are required.

Prerequisite(s): Justice Studies Majors: Senior standing, JS 100W and JS 114 or instructor consent, graduation
application filed and you must have already filled out and have a signed major form. Note- JS 114 is waived as a
prerequisite for forensic science majors. For Forensic Science Majors: Senior standing, JS 100W, FS 161, FS 162,
BIOL 30, CHEM 1A and CHEM 1B or by instructor consent, graduation application filed and you must have already
filled out and have a signed major form.
Grading: Graded

FS 170 - Forensic Science in Human Rights Investigations

3 unit(s)
Role of forensic science in pursuing justice for human rights victims, using documentation, collection, processing and
interpretation of evidence in violations of human rights and international humanitarian law and interfaces of law,
society, culture, politics, history, ethics and forensic science.

Corequisite(s): JS 10, JS 25, FS 11, or instructor consent.
Grading: Graded

FS 171 - Forensic Criminology

3 unit(s)
Contextualizes mental processes, intentions, motivations, and reactions of criminals, police, victims, and the courts
systems. Critically examines the psychology of deviant behavior, the evidentiary processes in justice systems, and
the validity and reliability that come with testimony and criminal defenses.

Course may be repeated for credit for up to 6 units.

Prerequisite(s): JS 100W
Grading: Graded

JS 10 - Introduction to Justice Studies

3 unit(s)
Historical and philosophical development of the justice system. Description, analysis and evaluation of criminal justice
agencies. Relationship between theory and practice.

Grading: Graded

JS 12 - Introduction to Legal Studies
The course presents historical and modern perspectives of the theories and structures of law, and provides an overview of the economic and sociological challenges to law making. This course also examines the nexus between law, social change, and dispute resolution.

**Grading:** Graded

**JS 15 - Introductory Statistics in Justice Studies**

3 unit(s)
Introduction to measures of central tendency, variation, correlation and regression, probability, estimation and hypothesis testing as used in Justice Studies.

*Satisfies B4: Mathematical Concepts*

**Prerequisite(s):** Math Enrollment Category M-I or M-II, or completion of a GE Area B4 course with a grade of C- or better.

**Grading:** Graded

**JS 25 - Introduction to Human Rights and Justice**

3 unit(s)
This course is a lower division introduction to the history of human rights as a concept and body of international law, and to the complicated role of human rights in contemporary social justice campaigns.

*Satisfies D3: Social Issues/Ethnic Studies*

**Grading:** Graded

**JS 92 - Int'l Program Studies**

1-12 unit(s)

**Grading:** Graded

**JS 100W - Writing Workshop**

3 unit(s)
Development of advanced communication skills, both written and oral. Emphasis on writing formats used by criminal justice professionals. A scholarly paper, written in APA format and informed by research, will be required.

*Satisfies SJSU Studies Z: Written Communication II*

**Prerequisite(s):** A3 or equivalent second semester composition course (with a grade of C- or better); completion of core GE; satisfaction of Writing Skills Test or completion of ENGL 100A or LLD 100A with C or better; and upper division standing. Or Graduate or Postbaccalaureate level.

**Grading:** Graded

**Note(s):** Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).

**JS 101 - Critical Issues and Ideas in Justice**
3 unit(s)
Interdisciplinary, historical and comparative examination of justice concepts and controversies, including the state's role in promoting justice and perpetuating injustice; legitimate versus illegitimate violence; human rights, stateless persons, and the international community; the relationship between social justice and criminal justice.

Course is repeatable for up to 3 units.

Prerequisite(s): Upper Division Standing; JS 10, JS 12, JS 25 or FS 11 or equivalent.
Corequisite(s): JS 100W; Justice Studies Minors, Legal Studies Minors: Any 100W.
Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 102 - Police and Society

3 unit(s)
A multidisciplinary study of law enforcement from the early 1800's to the present. Focus on significant studies in relation to the role of police and analysis of current models and practices.

Corequisite(s): Any 100W.
Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 103 - Courts and Society

3 unit(s)
Structure and functions of the court system. Emphasizes attorneys' and judges' roles and the court process. Examination of federal and state legislative, executive and judicial branch actions, including Supreme Court decisions in civil and criminal cases.

Prerequisite(s): Upper division standing.
Grading: Graded

Note(s): A grade of "C" or better is required for graduation.

JS 104 - Penal Politics & Institutions

3 unit(s)
Interdisciplinary examination of issues of race, class, gender, ethnicity, economy, and culture as it relates to punishment, the penal process, and social control.

Prerequisite(s): Upper division standing.
Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 107 - Justice Management and Ethics

3 unit(s)
The theory and practice of managing justice system agencies, including organizational change and contemporary issues. In-depth examination of ethical challenges in managing justice agencies, and strategies for ensuring ethical practices.
**Prerequisite(s):** Upper division standing.

**Grading:** Graded

**Note(s):** Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

**JS 114 - Research Methods in Justice Studies**

3 unit(s)
Introduction to quantitative research methods used in Justice Studies. Includes relationship of theory to empirical evidence; logic underlying methods of inquiry; ethics in conducting empirical research; and methodological design, operationalization, and data analysis.

**Prerequisite(s):** JS 10, JS 12, JS 25, or FS 11 with a grade of "C" or better; JS 15 or STAT 95 or equivalent with a grade of "C" or better; JS 100W with a grade of "C" or better. Justice Studies Minors: Any 100W and Upper Division Standing.

**Grading:** Graded

**Note(s):** Restricted to JS majors and minors and FS majors. Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

**JS 117 - Qualitative Research Methods**

3 unit(s)
Introduction to qualitative research methods used in Justice Studies. Includes relationship of empirical evidence to theory, ethics in conducting empirical research, methodological design, interviewing techniques, field methods, participant observation, and content analysis.

**Prerequisite(s):** Upper division standing.

**Pre/Corequisite(s):** Any 100W.

**Grading:** Graded

**Note(s):** Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

**JS 121 - Media and Justice**

3 unit(s)
This course is an interdisciplinary and comparative media examination of justice concepts and controversies, including forms of violence, human rights, undocumented persons, the state's role in promoting criminalization and social inequality, and the need for social justice and media reform.

**Corequisite(s):** Any 100W.

**Grading:** Graded

**Note(s):** Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

**JS 122 - Drugs and Society**

3 unit(s)
Examines the physiological effects of psychoactive drugs; history of legal and illegal drug use; causes and rates of use and addiction; drugs in the media; drug-related crime and violence; criminalization, decriminalization, legalization, harm reduction; drug courts; drug treatment.
Corequisite(s): Any 100W.
Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 123 - Terrorism, Intelligence, and Security

3 unit(s)
Examination of terrorist organizations and activities, definitions of terrorism, and social and political consequences of terrorism. Includes policy responses to terrorism, including roles of intelligence and security agencies, and impacts on law, rights and liberties.

Prerequisite(s): Upper division standing.
Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 127 - Immigration and Justice

3 unit(s)
Interdisciplinary analysis of cultural, social and political implications of transnational migrations and their historical and present influences on US culture. Emphasis on issues of social justice and human rights related to contemporary migratory movements.

Corequisite(s): Any 100W.
Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 128 - Punishment, Culture and Society

3 unit(s)
Critical analysis of the cultural, political and economic dimensions of penal politics in contemporary American society, with particular reference to the relationships between criminal justice and social justice. Emphasis on issues of racial, economic, and gender inequality.

Corequisite(s): Any 100W.
Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 129 - International Crime and Deviance

3 unit(s)
This course offers an international perspective on violence. This course analyzes transnational crime and deviance trends, their causes, as well as organizational responses. Topics discussed in this class include international drug markets, sexual commerce, child soldiers, and terrorism.

Pre/Corequisite(s): Any 100W
Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.
JS 130 - Sexuality & Justice

3 unit(s)
Surveys the relationship between sexuality and social and criminal justice. Students explore the nature and extent of sexual offenses against adults and children. A critical examination of recent public policies aimed at managing sexual aggression is included.

Corequisite(s): Any 100W.
Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 131 - Crisis Intervention, Mediation and Restorative Justice

3 unit(s)
Review of theory, research and practical skill development in communication and problem resolution strategies using techniques of crisis intervention, mediation and restorative justice in community policing, family court, dependency court and juvenile justice settings.

Corequisite(s): Any 100W.
Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 132 - Race, Gender, Inequality and the Law

3 unit(s)
History of legal issues and individual and institutional discrimination of women, ethnic/cultural and religious minorities, LGBTQ people and the disabled in education, employment, criminal justice and the family. Solutions for structured inequality in the U.S.

Satisfies SJSU Studies S: Self, Society & Equality in US

Course is repeatable for up to 3 units.

Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing. Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 136 - Family and Community Violence

3 unit(s)
Examines abusive relationships and responsive community and justice system policy and preventive interventions. Topics include child abuse, neglect, gang and hate crimes, rape, marital violence and elder abuse.

Satisfies SJSU Studies S: Self, Society & Equality in US

Course is repeatable for up to 3 units.
Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing. Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 137 - Collaborative Response to Family Violence

3 unit(s)
Employs an ecological framework to explore the scope, effects and response to family violence by diverse services and systems. Students are introduced to theory and practice of interdisciplinary collaboration and how it applies to respond more effectively to family violence.

Prerequisite(s): Upper Division standing or Instructor Permission.
Corequisite(s): Any 100W. Completion of JS 136 or previous courses in family violence is suggested but not required.
Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 140 - Record Clearance Project

3 unit(s)
RCP teaches students to give community education presentations and advise clients regarding court procedures to clear criminal convictions. Students learn legal interviewing, counseling, ethics, reading rap sheets, performing legal research and writing, court interpreting and related skills.

Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 141 - Record Clearance Project Representation

3 unit(s)
Record Clearance Project Representation teaches students to assist clients in preparing and filing petitions to clear criminal convictions in court, and related tasks. Under attorney supervision, students represent between two to four clients.

Prerequisite(s): JS 140 or instructor consent.
Grading: Credit / No Credit

Note(s): JS 141 fulfills the internship requirement for the Justice Studies major. Students can enroll in JS 141 and JS 142 concurrently.

JS 142 - RCP - Advanced Study and Community Involvement

3 unit(s)
Record Clearance Project - Advanced Study and Community Involvement involves assisting RCP mentors (who are former clients) in working with clients who are released from custody, mentoring RCP students in client interviews, coordinating project tasks and events, collecting data from former clients and students, helping with RCP community involvement, and assisting in other tasks.
Prerequisite(s): JS 140 or instructor consent.
Pre/Corequisite(s): JS 142 fulfills the internship requirement for the Justice Studies major. Students can enroll in JS 141 and JS 142 concurrently.
Grading: Credit / No Credit

JS 143 - Criminal Evidence and Procedure

3 unit(s)
Origin, development, philosophy and constitutional basis of evidence; administrative and judicial rules and procedures that govern admissibility; examination of judicial decisions interpreting individual rights; exploration of process by which attorneys introduce evidence as proof or exculpation of crime.

Corequisite(s): Any 100W.
Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 144 - Criminal Law

3 unit(s)
Historical development of philosophy of law and constitutional provisions, legal definitions, classifications of crime, case law, methodology and concepts of criminal law as a social force.

Corequisite(s): Any 100W.
Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 145 - White Collar Crime

3 unit(s)
Growth and development of white collar crime in the United States: crimes at the workplace, computer fraud, swindles, embezzlement, bribery and graft at the corporate and governmental levels.

Prerequisite(s): Upper division standing.
Grading: Graded

Note(s): A grade of "C" or better is required for Justice Studies majors.

JS 146 - Guns and the Law

3 unit(s)
(Formerly JS 196) Socio-historical examination of the legal regulation of guns in the United States. Topics include prevalence of gun ownership, gun use, and gun-related violence; Constitutional foundations of gun ownership; and policy debates surrounding gun rights and gun control.

Grading: Graded

JS 150 - Gender and Crime
3 unit(s)
Analysis of gender and its influence upon criminal participation and victimization, treatment in the criminal justice system, and those working in the criminal justice fields. Emphasis on women's experiences.

Corequisite(s): Any 100W.
Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 151 - Criminological Theory

3 unit(s)
Analysis of the nature and extent of crime, including causation and prevention. Descriptions of offenses, criminal typologies and victim surveys. Evaluation of various control and prevention strategies.

Prerequisite(s): JS 10, JS 12, JS 25 or FS 11.
Corequisite(s): JS 100W. Justice Studies Minors: Any 100W.
Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 152 - Juvenile Delinquency & Justice

3 unit(s)
History, theory and functions of the juvenile justice system. The legal processes for delinquent minors, status offenders and dependent children, including intake, detention, adjudication and disposition. Current legal issues and debate.

Prerequisite(s): Upper Division Standing.
Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 153 - Crime and Justice Across the Life Course

3 unit(s)
Explores how crime and justice are experienced by individuals over time. The nature and extent of offending and victimization at various ages across the life course is examined. A critical consideration of the criminal career paradigm is also provided.

Corequisite(s): Any 100W.
Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 155 - Victimology

3 unit(s)
Examination of the relationship between victim and offender; the behavior and attitudes of family, society and justice system toward the victim; nature and extent of loss, injury and damage to the victim.

Corequisite(s): Any 100W.
Grading: Graded
Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 156 - Gangs, Criminal Syndicates & Justice

3 unit(s)
A socio/historical examination of the emergence, evolution, persistence, activities and social structure of gangs and mobs, the effects of social factors, e.g., politics, law, technology and the economy, and consequences for communities and social institutions.

Pre/Corequisite(s): Any 100w
Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 157 - Deviance and Justice

3 unit(s)
This course examines various areas of norm violations and rule-breaking behaviors including, alcohol and drug use/abuse, criminal violence, corporate deviance, gang violence, and sexual deviance, child abuse, hate crime, mental illness, computer piracy and evaluates justice policies.

Corequisite(s): Any 100W.
Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 158 - The Prison Community

3 unit(s)
Analysis of formal and informal systems of organization and interaction among incarcerated people and staff. Effects of the social structure and external system on the organization of the prison community.

Corequisite(s): Any 100W.
Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 161 - Introduction to Cybercrime

3 unit(s)
Introduces students to the growing legal, technical, and social issues surrounding crimes committed in cyberspace or assisted by computers. Discusses the nature of cybercrime from an international perspective and how the borderless nature of cybercrime impacts regulation and enforcement.

Corequisite(s): Any 100W.
Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 171 - Human Rights and Justice
3 unit(s)  
Interdisciplinary exploration of human rights instruments, institutions, and notable human rights campaigns. The historical development of human rights and contemporary threats to the realization of fundamental dignity for humans and non-humans will also be explored. GE Area: V.

Satisfies SJSU Studies V: Culture, Civil & Global Understanding.

Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements. All SJSU Studies courses require completion of the WST and upper division standing.

JS 172 - Human Trafficking and Modern Day Slavery

3 unit(s)
Examines the social, cultural, and historical dimensions of global human trafficking and modern-day slavery, with special attention to the efficacy, effectiveness, and unintended consequences of various anti-trafficking policies from around the world, including the United States.

Corequisite(s): Any 100W.

Grading: Graded

Note(s): Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.

JS 173 - Borders and Conflict

3 unit(s)
Explores border conflicts, including their history and evolution over time as they relate to states, institutions, practices, politics, and impact on communities. Issues include militarism, human rights/civil rights, environmental impact, and prospects for peace.

Corequisite(s): Any 100W.

Grading: Graded

Note(s): Must achieve a grade of "C" or better is required to meet Justice Studies major requirements.

JS 179 - Human Rights Practicum and Seminar

3 unit(s)
Complete field experience in human rights advocacy/reporting/organizing while surveying recent human rights scholarship in seminar format.

Prerequisite(s): JS 25, any 100W.

Grading: Graded

JS 180 - Individual Studies

1-3 unit(s)
Individual work on special topics by arrangement.
Prerequisite(s): Upper division standing. Not available to Open University Students.
Grading: Credit/No Credit

**JS 181 - Internship: Justice Studies**

1-6 unit(s)
The internship is designed to provide broad exposure to the requirements and operations of a variety of agencies and organizations that range from a criminal justice to social justice focus, including courts, law enforcement agencies, law offices, nonprofit organizations and community-based programs.

*Course is repeatable for up to 6 units.*

Prerequisite(s): Upper division standing; Justice Studies or Forensic Science major; JS 100W with a "C" or better; 2.0 GPA; Department Consent, No Open University.
Grading: Credit / No Credit

Note(s): Students can take up to 3 additional units as JS electives.

**JS 183 - Ethics in Criminal Justice**

3 unit(s)
In-depth examination of ethical issues in policing, forensic science, and the judicial system. Rhetorical and critical analyses of opposing arguments in justice studies from a variety of ethical perspectives.

Prerequisite(s): JS 10, JS 25 or FS 11 or equivalent.
Corequisite(s): JS 100W or approved substitute.
Grading: Graded

**JS 184 - Directed Reading**

1-3 unit(s)
Designed to meet individual needs and interests.

Prerequisite(s): Upper division standing. Not available to Open University Students.
Grading: Credit/No Credit

**JS 185 - Special Topics in Law and Justice**

3 unit(s)
Range of law and justice issues and topics may be addressed. Content varies by semester. Topics may include international law and globalization, the struggle for justice, human rights, law, inequality and injustice, and others. May be repeated for credit when content changes for a maximum of 9 units.

*Course may be repeated for credit for up to 9 units.*

Prerequisite(s): Upper division standing.
Grading: Graded

**JS 185ITL - Justice Studies International Experience**

1-9 unit(s)
The goal of this course is to gain insight into systems of criminal and social justice outside of the U.S. Issues of
justice are explored, and the role of the student as a global citizen is emphasized. Includes international experiential component through study abroad.

Course may be repeated for credit for up to 9 units.

Grading: Graded

JS 189 - Senior Seminar: Contemporary Problems

3 unit(s)
Identification, discussion and analysis of selected problems in justice studies. A major term paper on a selected topic is required.

Prerequisite(s): Senior standing in final semester; Justice Studies or Forensic Science major; FS 100W or JS 100W and JS 114 with a "C" or better; Department Consent.

Grading: Graded

Note(s): Must achieve a grade of "C" or better is required for Justice Studies majors.

JS 192 - Int'l Program Studies

1-12 unit(s)
Grading: Mixed Grading

JS 201 - Justice and Social Theory

3 unit(s)
Examines classic and contemporary theories of justice, including legal, social, economic and criminal justice and their application to current social issues.

Satisfies GWAR: Graduation Writing Assessment Requirement

Prerequisite(s): Graduate standing.

Grading: Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

JS 202 - Survey of Research Methods

3 unit(s)
Examination of research methods applied to solving problems and resolving issues in justice-related agencies, organizations and processes. Focuses on the application of the scientific method to problem-solving and program evaluation.

Prerequisite(s): STAT 95 or equivalent, JS 114 or equivalent, and graduate standing

Grading: Graded

JS 203 - Seminar in Applied Statistics in Justice

3 unit(s)
An evaluation of specific statistical methods for quantitative and nonquantitative analyses, concentrating on applications and interpretations in justice related settings.
Prerequisite(s): STAT 95 or equivalent, JS 114 or equivalent, and graduate standing
Grading: Graded

JS 204 - Justice Organizations, Ethics & Change

3 unit(s)
An examination of significant organization and management theories, behavioral processes, and organizational change and development.

Prerequisite(s): JS 201 and graduate standing
Grading: Graded

JS 205 - Seminar in Law and Courts

3 unit(s)
Roles of the law in society. Analysis and critique of courts, attorneys, judges and juries; dispute resolution; race, class, sex inequality; law's symbolic functions and unintended consequences; new socio-legal research; and comparative perspectives.

Grading: Graded

JS 206 - Seminar in Juvenile Justice

3 unit(s)
Analysis of philosophy, theories, relevant law, research, constitutional issues related to juvenile justice. Structure and purpose of juvenile court proceedings. Minors in criminal and civil court, juvenile corrections, death penalty for juveniles, transfers to adult court, child victims, fetal abuse.

Grading: Graded

JS 207 - Seminar in Qualitative Research Methods

3 unit(s)
Qualitative research methods used in Justice Studies. Includes relationship of empirical evidence to theory, ethics in conducting empirical research, methodological design, interviewing techniques, field methods, participant observation, and content analysis.

Prerequisite(s): Graduate standing; or instructor permission.
Grading: Graded

JS 208 - Seminar: Punishment & Society

3 unit(s)
Examination of a range of penal ideas and practices; includes historical analysis of punishment, overview of theoretical perspectives and empirical social science research on punishment and alternative sanctions and implications for contemporary penal policy.

Grading: Graded

JS 209 - Seminar in Police and Social Control
3 unit(s)
Critical examination of democratic policing, including internal and external strategies for control and reform. Emphasis on police role in democracy, policy, culture, performance measures for individuals and organizations, and alternative policing methods and policies.

Grading: Graded

JS 211 - Historical Issues in Justice Studies

3 unit(s)
Eqips students to do historical research, understand the significance of historical perspectives for contemporary issues, and explore the place of historical obligations and entitlements in theories of justice.

Prerequisite(s): JS 201 and graduate standing
Grading: Graded

JS 212 - Local & Global Perspectives on Human Rights

3 unit(s)
This course is a graduate level exploration of contemporary human rights scholarship and praxis in the United States and in relation to U.S. domestic and foreign policy.

Grading: Graded

JS 214 - Seminar: Social Movement, Community Organizing, and Social Justice

3 unit(s)
This course is an exploration of social movement praxis. The class investigates community organizing broadly and discusses the idea of social justice, specifically how it relates to establishing human rights in our communities through the active participation of informed citizens.

Grading: Graded

JS 218 - Seminar: Immigration, Law & Justice

3 unit(s)
Graduate level interdisciplinary analysis of the cultural, political and socioeconomic implications of contemporary migratory movements and immigration control policies in the United States, with particular emphasis on notions of international human rights and global justice.

Grading: Graded

JS 220 - Seminar: Criminological Theory

3 unit(s)
A critical review of classical and contemporary theories and research in criminology. Evaluation of contemporary criminal justice and its relationship to theories of criminal behavior.

Grading: Graded

JS 221 - Seminar: Deviance & Social Control
3 unit(s)
This course examines various areas of norm violations and rule-breaking behaviors including, alcohol and drug use/abuse, criminal violence, corporate deviance, gang violence, and sexual deviance, child abuse, hate crime, mental illness, computer piracy and evaluates justice policies.

**Prerequisite(s):** Graduate standing.
**Grading:** Graded

**JS 222 - Seminar: Penal Policies and Justice**

3 unit(s)
A critical review of historical and contemporary theoretical models. Evaluation of current research on treatment, rehabilitation/punishment models and their use in adult and juvenile institutions and community settings.

**Grading:** Graded

**JS 223 - Seminar: Comparative Criminology & Criminal Justice**

3 unit(s)
This course provides a comparative perspective on crime, violence and punishment in contemporary global societies. The course analyzes transnational trends in crime, as well as organizational responses to criminality. Topics include international drug markets, sexual commerce, child soldiers, and terrorism.

**Prerequisite(s):** Graduate Standing
**Grading:** Graded

**JS 243 - Collaborative Dialogues Seminar**

1 unit(s)
This course will engage students in facilitated dialogues on cultural and professional perspectives on family violence. Students will learn the philosophy and process of dialogue and how dialogue enriches and sustains collaborative capacities at individual, relationship and organizational levels.

**Prerequisite(s):** JS 136 and JS 137
**Grading:** Graded

**JS 244 - Collaborative Projects Seminar**

1 unit(s)
This course will facilitate the design and implementation of student projects designed to enhance services and service delivery through interdisciplinary collaboration.

**Prerequisite(s):** JS 136 and JS 137
**Corequisite(s):** Research Methods course (if needed)
**Grading:** Graded

**JS 245 - Collaborative Field Experience Seminar**

1 unit(s)
This seminar will facilitate integration of concepts of collaboration in the field of family violence using the students' current experience in the field. Topics covered in the seminar will include: elements of effective collaboration, trauma-informed practice, cultural competence and ethical considerations.
Prerequisite(s): JS 136 and JS 137
Grading: Graded

JS 245B - Independent Study ICR Field Placement

1 unit(s)
This independent study is designed for students unable to meet the program's field experience requirement through their current employment or internship. Students and community professionals taking the Independent Study: Collaborative field Placement internship will be placed in ICR approved placements. Students are required to complete a minimum of 60 hours in their field placement during the course.

Prerequisite(s): JS 136, JS 137
Corequisite(s): JS 245
Grading: Credit/No Credit

JS 246 - Research Methods in Family Violence

1 unit(s)
This course will prepare students to interpret, critique, plan and conduct applied research in the field of domestic violence by providing a fundamental understanding of the types and purposes of research and the logic involved in the scientific method and research design.

Grading: Graded

JS 247 - Family Violence in Special Populations

1 unit(s)
This course covers special populations in family violence, contributing to a broader understanding of this complex social issue. The course chooses one group for study, such as LGBT or military families, and explores the unique correlates, effects and intervention strategies.

Course may be repeated for credit for up to 2 units.

Grading: Graded

JS 248 - Community Justice

1 unit(s)
Collaborative justice efforts as they relate to family violence in the American justice system. Emphasis on the role of the community and how citizens can be involved in collaborative justice.

Grading: Graded

JS 249 - Neurobiology Response to Family Violence

1 unit(s)
In this course, we explore current research, models, and theories introduced through the field of Interpersonal Neurobiology to better understand trauma, collaboration, and violence. Using IPNB concepts, students work to improve sustainable impact in reducing family violence and its effects.

Grading: Graded
JS 265 - Comparative Criminal Justice Systems

3 unit(s)
Theory-based comparative analysis of US criminal justice system with criminal justice systems around the world. Course focuses on legal traditions, policing, courts and corrections, with emphasis on the role of geographical, historical and cultural traditions in shaping criminal justice.

Satisfies GWAR: Graduation Writing Assessment Requirement.

Grading: Graded

JS 266 - Applied Research Methods and Statistics

3 unit(s)
This course introduces research concepts, methodology, design, qualitative and quantitative data analysis, interpretation, and SPSS use for understanding crime and evaluating criminal justice issues, policies, and agency practices.

Prerequisite(s): JS 114 or equivalent
Grading: Graded

JS 267 - Crime and Gender Around the World

3 unit(s)
This course is designed to examine the growing body of literature that deals with women's experiences about crime and justice to understand the impact of gendered relations on criminal behavior and justice outcomes.

Grading: Graded

JS 268 - Immigration and International Law

3 unit(s)
This online course provides an overview of the United States legislation and policy relating to immigration and explores the opportunities and challenges facing policy-makers in the context of domestic law and policy, as well as global norms and regimes.

Grading: Graded

JS 269 - Cyber Forensics

3 unit(s)
This online course teaches procedures for identification, preservation and extraction of electronic evidence. Public and private sector responses to cyber security issues in national and international contexts are discussed.

Grading: Graded

JS 270A - Global Terrorism

3 unit(s)
This online course examines terrorism and the role it plays in today's complex world as well as the theory and practice of international terrorism.
Grading: Graded

JS 271 - International Human Rights

3 unit(s)
This online course focuses on the politics and history of the conception, protection, and violation of human rights in global perspectives as well as the examination of the practical applications of the theory.

Grading: Graded

JS 272 - Policing in Global Contexts

3 unit(s)
This online course examines policing from a global perspective. The objective of this course is to orient students as to how police organizations operate in different parts of the world in terms organization, crime control, and crime prevention.

Grading: Graded

JS 273 - International Criminology and Juvenile Delinquency

3 unit(s)
This online course will examine: (1) issues fundamental to criminological and juvenile delinquency research and practical applications; (2) the current and emerging national/international crime and delinquency issues; and (3) criminal and juvenile justice policies adopted by different countries.

Grading: Graded

JS 274 - Applied Project

3 unit(s)
For this project, a substantial paper of a justice agency program, justice policy, and/or organizational issue is required. The contents will be determined by the student in consultation with the instructor, with whom the student meets regularly for supervision.

Grading: Credit/No Credit

JS 281 - Justice Practicum

1-3 unit(s)
Supervised placement in a justice organization or agency in a position emphasizing analytical and research skills and/or managerial responsibilities. Culminating research or policy paper required.

Prerequisite(s): Graduate standing and graduate coordinator consent.
Grading: Credit/No Credit

JS 288 - Seminar in Special Topics

3 unit(s)
In-depth exploration and analysis of selected justice-related topic. Course will consider relevant theories, issues, and research on the selected topic.
Prerequisite(s): Graduate standing or instructor consent.
Grading: Graded

JS 297 - Program Evaluation Project

3 unit(s)
A substantial paper/mock evaluation of a justice agency program, justice policy, or organizational issue.

Prerequisite(s): Completion of JS 201, JS 202, JS 203, JS 204, Not available to Open University Students.
Grading: Mandatory CR/NC/RP

JS 298 - Special Study

1-3 unit(s)
Advanced individual research not covered in a regular course and not related to the project or the thesis topic.

Course may be repeated for credit for up to 18 units.

Prerequisite(s): Instructor and Grad Coordinator permission. Not available to Open University Students.
Grading: Mandatory CR/NC/RP

JS 299 - Master's Thesis

3-6 unit(s)
Six units are required to complete the thesis and oral defense of the thesis. Required for Plan A. Must be repeated for a total of 6 semester units.

Course may be repeated for credit for up to 6 units.

Prerequisite(s): Admission to candidacy for the MS degree and thesis chair consent. Not available to Open University Students.
Grading: Mandatory CR/NC/RP

JS 1290R - Thesis/Project Supervision

1 unit(s)
Continued work on thesis or project.

Course may be repeated for credit for up to 2 units.

Prerequisite(s): Outstanding RP grade in a preceding semester in a project or thesis class
Grading: Mandatory CR/NC/RP

Department of Political Science

Office: Clark Hall 471

Telephone: 408-924-5550

Email: polisci@sjsu.edu
Overview

Political science majors tackle the public issues of the day as well as the timeless issues of government, public policy and the political process. The Department of Political Science offers a BA in political science and a master's degree in public administration (MPA). Our courses cover U.S. politics and public administration, public law, comparative politics, international relations and political theory. Our extensive internship program includes funded internships in Sacramento and Washington, D.C., and our students have the opportunity to participate in a Model United Nations and the honor society Pi Sigma Alpha. We arrange annual trips to the state capital and state supreme court and campus presentations by guest speakers who range from Holocaust survivors to U. S. Senators. We prepare our graduates for advanced graduate study as well as careers in law, teaching, government service, legislative staffing, political consulting, interest group representation, international relations and other fields. Contact us at 408-924-5550 or visit us at www.sjsu.edu/polisci/.

Honors Program

The achievements of political science majors with an overall GPA of 3.20 and a 3.50 GPA in political science are recognized by the department honors program. These outstanding students are eligible to enroll in POLS 190H - Honors Thesis. Students who attain the required GPA and complete the honors thesis graduate with Honors in Political Science. Interested students should consult the department chairperson.

Undergraduate

Political Science, BA

The BA Political Science, offered by the Department of Political Science, provides students with an understanding of politics and the political process and prepares them for their lifelong responsibilities as citizens, as well as furthering
their skills in critical analysis and communication. The major in political science may lead to a wide variety of careers, including teaching, the law, business, and public service.

Summary of Degree Units

University Graduation Requirements 44

- Major Requirements 46-50
- University Electives 26-30

Total 120

University Requirements for Graduation

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Undergraduate Graduation Requirements section of the Policies and Procedures.

Major-Specific Graduation Requirements

Capstone course must be completed with a C- or better graduate.

Program Roadmaps

The 4-Year Roadmap is available online. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Degrees (ADT) Pathways are also available online.

General Education/American Institution Requirements

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

University Requirements (44 units)

Core Lower Division General Education (30 units)

Of the 39 units required by the university, 9 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

Note: Students who have completed the ADT Transfer degree (under SB 1440) for this major will have completed all lower division GE requirements and should follow the 60 unit guarantee roadmap. Meet with an advisor prior to registering for your first semester for the 60 unit roadmap or specific questions.

Upper Division General Education (9 units)

Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions (3 units)
The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B, HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Consult Major Advisor for department recommended coursework to meet GE requirement.

Physical Education (2 units)

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Major Requirements (46-50 units)

Lower Division Core Courses (12 units)

- POLS 2 - Introduction to Comparative Politics 3 unit(s) (D2)
- POLS 3 - Introduction to Political Thought 3 unit(s) (C2)
- POLS 4 - Introduction to International Relations 3 unit(s) (D3)

Complete one course (3 units):

- POLS 1 - American Government 3 unit(s) (US23)
- POLS 15 - Essentials of U.S. & California Government 3 unit(s) (D3+US23)

Upper Division Core Courses (21-22 units)

- POLS 100W - Writing Workshop 3 unit(s) (Z)
- POLS 100M - Political Inquiry 4 unit(s) A grade of C- or better is required

Additional Upper Division Core Courses (14-15 units)

Complete 14-15 units from the following. One course from each of the four fields is required.

U.S. Government and Politics (3-4 units)

Complete one course:

- POLS 102 - State Government and Politics 4 unit(s) (US3)
- POLS 103 - Local Government and Politics 4 unit(s)
- POLS 105 - Congress 4 unit(s)
- POLS 106 - The United States Presidency 4 unit(s)
- POLS 107 - Politics and Public Opinion 4 unit(s)
- POLS 108 - Political Participation 4 unit(s)
- POLS 114 - Introduction to Public Administration 3 unit(s)
- POLS 121A - Constitutional Law: Institutional Powers 4 unit(s)
- POLS 122 - Judicial Politics 4 unit(s)
- POLS 130 - American Public Policy 4 unit(s)

Comparative Politics (4 units)

Complete one course:
- POLS 141 - Politics of Post-Communist Countries 4 unit(s)
- POLS 142 - African Politics 4 unit(s)
- POLS 144 - Middle Eastern Politics 4 unit(s)
- POLS 145 - Asian Politics 4 unit(s)
- POLS 146 - Latin American Politics 4 unit(s)
- POLS 147 - Globalization 4 unit(s)
- POLS 148 - Nationalism and Comparative Political Cultures 4 unit(s)
- POLS 149 - Comparative Public Policy and Administration 4 unit(s)

International Relations (4 units)

Complete one course:
- POLS 152A - International Organizations and NGOs 4 unit(s)
- POLS 153 - European Union 4 unit(s)
- POLS 154 - U.S. Foreign Policy: Formulation and Administration 4 unit(s)
- POLS 155 - The Wealth of Nations 4 unit(s)
- POLS 157 - International Security 4 unit(s)

Political Thought (3 units)

Complete one course:
- POLS 160A - Classical Political Thought 3 unit(s)
- POLS 160B - Modern Political Thought 3 unit(s)
- POLS 160C - Recent Political Thought 3 unit(s)
- POLS 163 - American Political Thought 3 unit(s)

Additional Upper Division Courses (13-16 units)

Upper Division Electives (9-12 units)

Three additional upper division courses from POLS 102-POLS 199 (except POLS 120, POLS 150 or POLS 170V).

Capstone Course (4 units)

A grade of C- or better is required.
Complete one course:

- POLS 181C - Internship Capstone 4 unit(s)
- POLS 190 - Senior Seminar 4 unit(s)
- POLS 195 - Applied Research Methods 4 unit(s)

University Electives (26-30 units)

Students may choose Political Science or other electives.

Total Units Required (120 units)

Master

Public Administration, MPA

- Admissions Requirements
- Requirements for Advancement to Graduate Candidacy
- Requirements for Graduation
- Master's Requirements (36 units)
- Program Learning Outcomes

The program leads to the professional degree of Master of Public Administration. It provides pre-service students with the knowledge and skills necessary for effective administration of local, state, and federal government agencies and of nonprofit organizations. It also offers mid-career administrators and professionals in public service an opportunity to improve their management skills and qualifications. For the convenience of students who are employed full-time, all courses are offered in the evening. Alumni assist with orientation and mentoring activities.

The MPA program, offered by the Department of Political Science, provides each student with a basic understanding of the environment of public policy and the ability to deal with:

- Political and legal institutions and processes
- Economic and social institutions and processes
- Organization and management concepts, and human resource administration
- Concepts and techniques of budgeting and financial administration
- Application of quantitative and qualitative techniques of analysis in policy and program formulation, implementation and evaluation, and decision making and problem-solving

Students also develop the ability to:

- Define and diagnose public problems, engage in supported decision-making, collect relevant data including big data, perform logical analyses, develop alternatives, implement an effective and ethical course of action, and evaluate results.
- Organize and communicate information clearly to a variety of audiences through formats including oral presentations, written memoranda and technical reports, and statistical charts, graphs, and tables.
- Recognize and value diversity and diverse viewpoints within the community, and integrate diverse view into community problem solutions.
- Apply information technology to public administration problems, including community service provision and cybersecurity of systems.

For more information on the program please go to the program's website at www.sjsu.edu/mpa.
Admissions Requirements

The MPA program accepts students in unclassified and classified standing. People in unclassified standing must meet all admissions requirements, but may be lacking one or more of the prerequisites for the program. These prerequisites must be completed before registering for the fifth MPA course. People admitted in classified standing have met all requirements for admission to the program.

Minimum requirements for admission to the Graduate Division are outlined in the catalog.

The MPA does not use the GRE, as it is not a good predictor of performance for people who have been in the working world for several years. The MPA program is designed for working professionals, although well qualified recent graduates may be admitted.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE. For the MPA a minimum score of 575 is required.

Preparation

A bachelor's degree or its equivalent, from an accredited college or university is required. No specific undergraduate major is necessary. Preparation must include introductory courses in American government, micro-economics and statistics from an accredited community college or university, and competency in spreadsheet use. These are known as prerequisites, requirements to be met before beginning the MPA program. Deficiencies in preparation must be removed before admission to candidacy and before completion of four MPA courses. Transcripts for the baccalaureate, including from all colleges where prerequisites were taken, must be sent directly to Graduate Admissions upon applying to the program, not to the department. Transcripts for the missing prerequisites submitted after admission must go to the MPA Director directly.

Grade Point Average (GPA) Requirements

Applicants applying directly after graduating from an undergraduate school need an overall grade point average of 3.0 in all courses, or in the last 60 units as an undergraduate, or in the major. Applicants applying three or more years after completing the BA degree need a grade point average of 2.75 overall, or in the last 60 units of undergraduate courses, or in the major. These are minimum qualifications for consideration, and may not result in admission. In addition, applicants should submit evidence of professional development, such as promotions noted on a resume or in letters of recommendation.

Requirements for Advancement to Graduate Candidacy

Students must apply for admission to candidacy as early as possible, but no later than the last semester of their graduate program. University requirements for advancement to candidacy for the master's degree as outlined in the Graduate Policies and Procedures section can be found at this link.

Final date for submission in each semester may be found at the GAPE website www.sjsu.edu/gape/current_students/deadlines. In addition to meeting the universitywide requirements for
advancement to candidacy, as outlined in this catalog, applicants must have submitted an approved program for the degree.

Candidacy includes the successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website. Within the MPA program, PADM 210 meets the GWAR.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

This requirement is satisfied by passing PADM 210.

Culminating Experience

Plan A (with Thesis)

A thesis demonstrating the student's competence in original research and acceptable to the department must be submitted to the department at least eight weeks prior to the date on which the degree is to be awarded. This thesis must conform to university standards and be approved by the Associate Dean of Graduate Studies.

Plan B (with Project)

In lieu of a thesis, a student may complete an academically rigorous research project by enrolling in PADM 298 - Special Problems. In PADM 298 the student will complete a substantial paper under faculty supervision to complete the project component of Plan B.

Master's Requirements (36 units)

Core Courses (15 units)

The courses form a base of knowledge and skills that prepare students for advanced seminars. Students must complete these courses before taking PADM 298.

Complete fifteen units from:

- PADM 210 - Introduction to Public Administration 3 unit(s) (GWAR)
- PADM 212 - Administrative Research Methods 3 unit(s)
- PADM 213 - Policy Analysis and Evaluation 3 unit(s)
- PADM 214 - Introduction to Public Management 3 unit(s)
• PADM 218 - Public Budgeting 3 unit(s)

Advanced Seminars Electives (9-18 units)

Complete three courses from:

• PADM 202 - Regional Governance 3 unit(s)
• PADM 215 - Public Personnel Administration 3 unit(s)
• PADM 217 - Organizational Theory 3 unit(s)
• PADM 219 - Public Financial Administration 3 unit(s)
• PADM 220 - Non-Profit Management 3 unit(s)
• PADM 223 - Law and Public Administration 3 unit(s)
• PADM 228 - Urban Community Development 4 unit(s)
• PADM 240 - Environmental Planning 4 unit(s)
• PADM 295 - Topics in Public Administration 3 unit(s)

Additional Electives (0-9 units)

Depending on thesis or project arrangements, electives may include additional MPA courses

• PADM 281 - Public Administration Internship 3 unit(s)
• PADM 284 - Directed Reading 1-3 unit(s) (or approved 100- or 200-level courses in political science or other departments, up to a maximum of 9 units)

Culminating Experience (3 units)

Complete One Option (Plan A or Plan B):

Plan A (with Thesis) (3 units)

• PADM 299 - Master's Thesis 3 unit(s)

Plan B (with Project)

• PADM 298 - Special Problems 3 unit(s)

Total Units Required (36 units)

No more than six units of 100-level course work may be applied towards the MPA degree.

No more than six units of transfer credit from other universities may be applied toward the MPA degree.

Students who do not have substantial management work experience related to the curriculum are required to register for PADM 281 and complete an appropriate internship.

Elective courses must be planned in consultation with the Graduate Advisor.
Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

Minor

Applied Research Methods Minor

The interdisciplinary Minor in Applied Research Methods (ARM) is designed to prepare students for careers involving social research and data analysis. The ARM Minor provides students with a broad understanding of research methods, including both quantitative and qualitative approaches and techniques such as surveys, experiments, interviews, focus groups, ethnography, and content analysis. Students in the ARM Minor will learn to apply these research skills to socially relevant issues, combining theoretical background with hands-on skills practice. The ARM Minor provides an ideal complement to the programs of students from a variety of social sciences, business, and applied sciences and arts disciplines.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Preparation (3 units)

Introductory Statistics (3 units)

Complete one course from:

- STAT 95 - Elementary Statistics 3 unit(s) (B4)
- PH 67 - Introductory Health Statistics 3 unit(s) (B4)
- JS 15 - Introductory Statistics in Justice Studies 3 unit(s) (B4)
- SOCI 15 - Statistical Applications in the Social Sciences 3 unit(s) (B4)
- UNVS 15S - Statway Part B: Statistics-Concepts & Methods 3 unit(s) (B4) (UNVS 15S Prerequisite: UNVS 15F with grade of C- or better or concurrent enrollment in UNVS 1015W) (Or other introductory statistics course approved by Minor Coordinator)

Minor Requirements (12-16 units)

Intermediate Statistics (3-4 units)

Complete one course from:

- ECON 103 - Intro to Econometrics 4 unit(s)
- MATH 161A - Applied Probability and Statistics I 3 unit(s)
- STAT 115 - Intermediate Statistics 3 unit(s)

Quantitative Methods (3-4 units)

Complete one course from:

- COMM 155I - Quantitative Communication Inquiry 4 unit(s)
• ECON 108 - Cost-Benefit Analysis 4 unit(s)
• JS 114 - Research Methods in Justice Studies 3 unit(s)
• MATH 161B - Applied Probability and Statistics II 3 unit(s)
• POLS 100M - Political Inquiry 4 unit(s)
• PSYC 117 - Psychological Tests and Measures 3 unit(s)
• SOCI 104 - Quantitative Research Methods 3 unit(s)

Qualitative Methods (3-4 units)

Complete one course from:
• ANTH 149 - Ethnographic Methods 3 unit(s)
• COMM 156I - Observation and Interviewing Methods 4 unit(s)
• COMM 111P - Interviewing 4 unit(s)
• COMM 121P - Performance as Practice 4 unit(s)
• COMM 150I - Inquiry in Organizational Communication 4 unit(s)
• COMM 151I - New Media/New Methods 4 unit(s)
• GEOG 135 - Qualitative Methods in Geographical Research 3 unit(s)
• JS 117 - Qualitative Research Methods 3 unit(s)
• SOCI 105 - Qualitative Research Methods 3 unit(s)

Applied Research Methods Electives (3-4 units)

Complete one course from:
• ANTH 105 - Applied Anthropology 3 unit(s)
• ENVS 110 - Resource Analysis 4 unit(s)
• GEOG 170 - Introduction to Mapping and Geographic Information Systems 3 unit(s)
• ORGS 102 - Organizations, Inquiry & Analysis 4 unit(s)
• POLS 195 - Applied Research Methods 4 unit(s)

Total Units Required (12-16 units)

Political Science Minor

Students majoring in a wide variety of fields find a minor in political science interesting and useful, providing knowledge and skills that enhance their careers, improve their citizenship and cultivate their minds. The minor appeals especially to students in the other social sciences or in business, journalism or administration of justice, although many others also use the minor to broaden their education. Political Science department advisors help students customize their programs to support their special interests. A minimum of six units must be completed in residence to satisfy the requirements for a political science minor. The minimum requirements are:

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Requirements (18 units)
Lower Division Courses (6 units)

Complete One Course From:

- POLS 1 - American Government 3 unit(s) (US23)
- POLS 15 - Essentials of U.S. & California Government 3 unit(s) (M11)

Complete One Course From:

- POLS 2 - Introduction to Comparative Politics 3 unit(s) (D2)
- POLS 3 - Introduction to Political Thought 3 unit(s) (C2)
- POLS 4 - Introduction to International Relations 3 unit(s) (D3)

Upper Division Electives (12 units)

Twelve additional upper division units from POLS 102-POLS 199.

Total Units Required (18 units)

**Public Administration and Public Policy Minor**

The Public Administration and Public Policy minor provides a structured introduction to the practice of government. This minor appeals especially to students who are interested in exploring careers in the public, private, or non-profit sectors that involve policy development, advocacy, and evaluation, or government relations. This minor compliments the Political Science major, as well as other majors across the social sciences, business, journalism, justice studies, social work, and many other disciplines.

**University Graduation Requirements**

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

**Minor Preparation (3 units)**

Complete one course from:

- POLS 1 - American Government 3 unit(s) (US23)
- POLS 15 - Essentials of U.S. & California Government 3 unit(s) (M11)

**Minor Requirements (15 units)**

- POLS 114 - Introduction to Public Administration 3 unit(s)
- POLS 130 - American Public Policy 4 unit(s)

Complete Two Courses From:
- POLS 102 - State Government and Politics 4 unit(s) (US3)
- POLS 103 - Local Government and Politics 4 unit(s)
- POLS 121A - Constitutional Law: Institutional Powers 4 unit(s)
- POLS 149 - Comparative Public Policy and Administration 4 unit(s)
- POLS 181 - Internships 4 unit(s)

Total Units Required (18 units)

**PADM 202 - Regional Governance**

3 unit(s)
An exploration of current theories, practices, issues and problems in the governance of urban regions in the United States.

**Prerequisite(s):** POLS 1, PADM 210.

**Grading:** Graded

**PADM 210 - Introduction to Public Administration**

3 unit(s)
A broad overview of public administration, including policy analysis, budgeting, personnel, organization, leadership, decision-making and ethics in a political environment. Examination of the theory and application of public management practices at all levels of government.

**Satisfies GWAR: Graduation Writing Assessment Requirement**

**Grading:** Graded

**Note(s):** This course satisfies graduate-level GWAR in this master's program.

**PADM 212 - Administrative Research Methods**

3 unit(s)
The study and application of principles and methods of social science research and evaluation in a public administration context. Emphasis on learning research designs and using statistics and computers.

**Prerequisite(s):** Statistics.

**Grading:** Graded

**PADM 213 - Policy Analysis and Evaluation**

3 unit(s)
An examination of the application of analytical and administrative tools to solving public problems. Study of the processes of policy formulation and the research and political tools necessary to assess program effectiveness.

**Prerequisite(s):** Statistics.

**Grading:** Graded

**PADM 214 - Introduction to Public Management**
3 unit(s)
A study of current principles and practices of effectively managing public service organizations. Emphasis on critical thinking, project management, and implementation processes.

**Prerequisite(s):** Statistics.
**Grading:** Graded

**PADM 215 - Public Personnel Administration**

3 unit(s)
An overview of personnel management in a political environment and its role in maintaining a democratic society. Methods and problems of job analysis, compensation, staffing, EEO, evaluation, training and union relations.

**Prerequisite(s):** PADM 210.
**Grading:** Graded

**PADM 217 - Organizational Theory**

3 unit(s)
Analysis and application of theories about organizations, including organizational goals, structures, authority, leadership, decision patterns and communications. Emphasis on methods of change and differences between the public and private sectors.

**Prerequisite(s):** PADM 210.
**Grading:** Graded

**PADM 218 - Public Budgeting**

3 unit(s)
A study of current theory, techniques and practice of public budgeting for political decision-making, planning and management. Focus on executive and legislative budget processes, reform efforts, public choice analysis, financial processes and the role of accounting.

**Prerequisite(s):** PADM 210; ECON 1A (or equivalent).
**Grading:** Graded

**PADM 219 - Public Financial Administration**

3 unit(s)
An overview of public financial administration, including microeconomic concepts and techniques, tax theory and policy, user charges, inter-governmental transfers, debt administration and risk management in a political environment.

**Prerequisite(s):** PADM 218.
**Grading:** Graded

**PADM 220 - Non-Profit Management**

3 unit(s)
Focuses primarily on internal nonprofit management issues in the U.S. context; course exposes students to core and emerging theories for a range of topics related to nonprofit management, including leadership, governance, accountability, performance management, resource development and financial management.
**Prerequisite(s):** PADM 210, PADM 218  
**Grading:** Graded

**PADM 223 - Law and Public Administration**

*3 unit(s)*  
An overview of legal and political processes affecting relationships among the public, government institutions, administrative agencies and the courts. Focus on major cases related to administrative agency use of rules and orders to implement public policy.

**Prerequisite(s):** POLS 1 and PADM 210  
**Grading:** Graded

**PADM 228 - Urban Community Development**

*4 unit(s)*  
The role, objectives and policies of the urban community development process; the social, economic, political and physical implications underlying community development programs; and relationships of these programs to comprehensive urban planning.

**Grading:** Graded

**PADM 240 - Environmental Planning**

*4 unit(s)*  
Examination of the fundamental concepts and issues related to urban environment that planners face. Focus on land use and open space planning, planning and use of urban resources, interactions of urban residents and the physical environment, and the role of government in formulating appropriate policies and strategies.

**Grading:** Graded

**PADM 281 - Public Administration Internship**

*3 unit(s)*  
Supervised practical experience in public administration. Focus on integrating student work experiences with the academic program by means of seminars and consultation.

**Prerequisite(s):** Instructor consent.  
**Grading:** Credit/No Credit

**PADM 284 - Directed Reading**

*1-3 unit(s)*  
Program of reading and writing created through student/faculty consultation in areas not covered by other courses. Repeatable for credit for a maximum of 6 units.

**Course may be repeated for credit for up to 6 units.**

**Prerequisite(s):** Appropriate courses, instructor consent and department chair consent.  
**Grading:** Graded
PADM 295 - Topics in Public Administration

3 unit(s)
An exploration of current theories, problems and techniques in a selected major topic of current importance in public administration.

**Grading:** Graded

PADM 297 - Advanced Seminar in Public Management

3 unit(s)
This course serves as the "capstone" of the MPA program. It uses an analysis of real world cases to relate principles and theories of public administration to concrete, real world problems. The individual subject papers dealing with the main class topic that earn a grade of A- or better will be published as an electronic journal. The culminating project for this class is the approved prospectus for the PADM 298 project.

**Prerequisite(s):** Classified standing.
**Grading:** Graded

PADM 298 - Special Problems

3 unit(s)
Advanced individual research and projects.

**Prerequisite(s):** PADM 210, PADM 212, PADM 213, PADM 214, PADM 218; instructor consent; consent of the chair.
**Grading:** Mandatory CR/NC/RP

PADM 299 - Master's Thesis

3 unit(s)
Independent research conducted under the supervision of a permanent faculty member and two other qualified persons. Emphasis on applying administrative concepts and analytical skills to actual problems of policy and administration in the public sector.

*Course may be repeated for credit for up to 6 units.*

**Grading:** Mandatory CR/NC/RP

**Note(s):** Repeatable once for credit.

PADM 1290R - Culminating Experience Supervision

1 unit(s)
Continued work on thesis or project.

*Course may be repeated for credit for up to 16 units.*

**Prerequisite(s):** Outstanding RP grade in a preceding semester in a project class
**Grading:** CR/NC, No Degree Credit

**Note(s):** No Degree Credit.
POLS 1 - American Government

3 unit(s)

Satisfies American Institutions US2+3: US Constitution and California Government

Grading: Graded

Note(s): Satisfies American Institutions requirements in American and California government.

POLS 2 - Introduction to Comparative Politics

3 unit(s)
Comparative analysis of different kinds of political systems; their political institutions, processes and policies; the environments in which they occur and their consequences.

Satisfies D2: Comparative Systems

Grading: Graded

POLS 3 - Introduction to Political Thought

3 unit(s)
Thinking critically about the classic problems of politics; learning how to interpret, discuss and write about historical and contemporary political thought.

Satisfies C2: Letters

Grading: Graded

POLS 4 - Introduction to International Relations

3 unit(s)
Introductory survey of major topics in international relations, including global, national and individual causes of war and peace, international cooperation, north-south relations and political economy.

Satisfies D3: Social Issues/Ethnic Studies

Grading: Graded

POLS 15 - Essentials of U.S. & California Government

3 unit(s)
Treatment of essentials of U.S. and California government. Satisfies the American Institutions requirements in U.S. Constitution (US2) and California Government (US3), and the Core GE requirement in Social Sciences: Social Issues (D3).

Grading: Graded
**POLS 20 - Controversial Legal Issues**

3 unit(s)
Basic concepts in critical thinking as demonstrated in legal reasoning and analysis of contemporary legal issues possibly including abortion, drug testing, offensive speech, affirmative action, gender and sexual preference discrimination, school prayer and pornography.

*Satisfies A3: Critical Thinking*

**Prerequisite(s):** Completion of GE Areas A1 and A2 each with grades of C- or better  
**Grading:** Graded

**POLS 92 - Int'l Program Studies**

1-12 unit(s)  
**Grading:** Mixed Grading

**POLS 100M - Political Inquiry**

4 unit(s)  
Introduction to the scope and methods of political science. Beginning with research design, measurement, and ethical considerations, and including a variety of research methods including surveys, experiments, interviews, fieldwork, content analysis, and an introduction to quantitative and qualitative analysis.

**Grading:** Graded

**Note(s):** Should be taken junior year.

**POLS 100W - Writing Workshop**

3 unit(s)  
Writing skills for majors in political science. Basic materials; research; memos and research reports, press releases, analyses of political/electoral behavior, political speeches. GE Area: Z.

*Satisfies SJSU Studies Z: Written Communication II.*

**Prerequisite(s):** A3 or equivalent second semester composition course (with a grade of C- or better); completion of core GE; satisfaction of Writing Skills Test or completion of ENGL 100A / LLD 100A with C or better; and upper division standing. Or Graduate or Postbaccalaureate level.  
**Grading:** Graded

**Note(s):** Must be passed with C or better to satisfy the CSU Graduation Writing Assessment Requirement (GWAR).

**POLS 101 - American Government for Teachers**

3 unit(s)  
Introduction to the institutions and processes of American and California governments with emphasis on meeting CCTC Teacher Preparation Standards. Topics include U.S. Constitution, federalism, political participation, civil rights and liberties, Congress, the presidency.

**Grading:** Graded
POLS 102 - State Government and Politics

4 unit(s)
This course examines the politics and institutions of U.S. state governments. The structure and powers of state legislatures, governors, and court systems are analyzed. The effect of states' racial, ideological, and economic characteristics on public policy is also explored. American Institutions Requirement: US3

Satisfies American Institutions US3: California Government

Grading: Graded

Note(s): Satisfies American Institutions requirement in California government.

POLS 103 - Local Government and Politics

4 unit(s)
Offers a theoretical and practical study of local politics and government. The structure, role, and functions of city and county governments are examined. Students gain knowledge of the resources and skills required for effective citizenship in their communities.

Grading: Graded

POLS 105 - Congress

4 unit(s)
Examines politics and policymaking in the U.S. Congress. Topics include party leadership, interest groups in Congress, congressional committees, political representation, redistricting and congressional elections, party polarization, and the process of how a bill becomes law.

Grading: Graded

POLS 106 - The United States Presidency

4 unit(s)
Examination of the American presidency. Topics include the historical emergence of the presidency as an institution, the formal and informal powers of the modern presidency, and the tension between the presidency and other federal institutions, most notably Congress.

Grading: Graded

POLS 107 - Politics and Public Opinion

4 unit(s)
Examines the measurement and impact of public opinion on the democratic political process. The effects of socialization, media, and ideology on public opinion are explored, as well as the state of American public opinion on current political issues.

Grading: Graded

POLS 108 - Political Participation
4 unit(s)
Explores various forms of political participation including voting, community engagement, and social change. Includes consideration of the roles that socialization, media, campaign and elections, and other social and technological factors play in shaping citizen participation.

**Grading:** Graded

**POLS 109 - Women and Politics**

4 unit(s)
Examines social movement strategies and theories of gender and power employed by differently situated women. Includes critical examination of the relationship between sex and gender, and intersections of race, class, gender, law and nation.

**Grading:** Graded

**POLS 110 - Race and Politics**

4 unit(s)
Examines race and politics in America by focusing on political participation and social movement strategies among minoritized groups. Explores theories of equality, diversity, and justice, and the changing legal relationship between states and citizens.

**Grading:** Graded

**POLS 114 - Introduction to Public Administration**

3 unit(s)
A broad overview of the theory and practice of public policy analysis and management in the modern context. Topics include aspects of organizational theory, leadership, budgeting, finance, personnel management, problem formulation, analysis and decision making in a political environment.

**Grading:** Graded

**POLS 120 - Law and Society**

3 unit(s)
Social and philosophical foundations of law and legal systems and development of legal institutions in various cultures. Anglo-American law and administration of justice in the U.S. emphasized. GE Area: S.

*Satisfies SJSU Studies S: Self, Society & Equality in US.*

**Prerequisite(s):** Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

**Grading:** Graded

**Note(s):** All of SJSU Studies courses require completion of the WST and upper division standing.
Exams the U.S. Supreme Court, its processes, and the role it plays in the American governing system. Examination of judicial policy making through cases on judicial review, separations of powers, federalism, commerce, and tax and treaty powers.

**Grading:** Graded

**POLS 121B - Constitutional Law: Civil Liberties**

Expects the constitutional basis for civil liberties in America. Application of methods of constitutional analysis to cases involving freedom of speech, religion, and the press. Examination of personal privacy rights including abortion, gun rights, and criminal procedures.

**Grading:** Graded

**POLS 121C - Constitutional Law: Civil Rights**

Expects the constitutional basis for civil rights in America. Application of methods of constitutional analysis to cases involving discrimination, equal protection, and due process. Examination of leading cases related to voting rights, affirmative action, criminal justice, and other issues.

**Grading:** Graded

**POLS 122 - Judicial Politics**

Examines the effects of political forces on judicial behavior. Includes consideration of the roles of interest groups, public opinion, methods of selecting judges, and the importance of judges' personal political beliefs, on judicial decisions.

**Grading:** Graded

**POLS 124 - Introduction to Environmental Law**

Development, interpretation, application and enforcement of environmental laws, regulations and legal policies by legislatures, courts, administrative agencies and citizens. Examination of air and water quality, hazardous materials, workplace, land use and wetlands regulation, international, ethical and efficacy issues.

**Prerequisite(s):** ENVS 1 or Instructor Consent.

**Grading:** Graded

**POLS 130 - American Public Policy**

Introduces students to the public policy making process in the American governing system. The politics of agenda setting, policy formulation, and policy implementation are examined. Students learn to analyze and evaluate public policy outcomes.

**Grading:** Graded
POLS 135 - U.S. Environmental Policy

3 unit(s)
Inquiry focuses on state of the environment, public attitudes toward the problem, interest groups involved in formulation of policy, the response of government leaders to the problem and what the future outlook is for addressing the agenda.

Grading: Graded

POLS 141 - Politics of Post-Communist Countries

4 unit(s)
Political development and change in countries that have transitioned from communist or socialist systems such as Russia, Eastern Europe, Central Asia, and the Caucasus; internal politics of these countries and relations with other countries.

Grading: Graded

POLS 142 - African Politics

4 unit(s)
Basic concepts, theoretical perspectives, and information to understand the evolution of contemporary African states. Begins with a study of colonialism, and proceeds to nationalism, personalistic and military rule, development, democratization, and inter-state and civil war.

Grading: Graded

POLS 144 - Middle Eastern Politics

4 unit(s)
Study of unfolding events in the Middle East. Themes include: the failure of democratic movements, nuclear proliferation and terrorism, US foreign policy towards the region, the Israel-Palestine conflict, urbanization, gender and human rights.

Grading: Graded

POLS 145 - Asian Politics

4 unit(s)
Study of unfolding events in Asia. Themes include: the Asian economic 'miracle,' the implications of China's rise for international security, nuclear proliferation and terrorism, and sustainability; specifically, energy, environment and human rights.

Grading: Graded

POLS 146 - Latin American Politics

4 unit(s)
Survey of the political systems of Latin American countries. Places Latin American countries in a global perspective. Major themes include: civil-military relations, democratization, economic development, social movements, and foreign relations both within and outside Latin America.
Grading: Graded

POLS 147 - Globalization

4 unit(s)
Considers the impact of economic and political globalization, focusing primarily on nations in Latin America, Asia and Africa. Issues include the effects of multinational production, migration, aid, international institutions and humanitarian intervention.

Grading: Graded

POLS 148 - Nationalism and Comparative Political Cultures

4 unit(s)
Comparative analysis of the origin, nature, and impact of nationalism on the politics of Western and non-Western states. Students examine cases where nationalism resulted in conflict, and those in which it supports a stable nation-state. Completion of POLS 2, POLS 3 and POLS 4 highly recommended before enrolling.

Grading: Graded

POLS 149 - Comparative Public Policy and Administration

4 unit(s)
Ideologies, institutions and public policy making in a comparative context. Policy making process in various countries, from emerging issues to choices to implementation and subsequent impact on political systems.

Grading: Graded

POLS 150 - War and Peace

3 unit(s)
Fundamental human questions about causes of war, definitions of peace and approaches toward achieving peace from perspectives of historical and contemporary thinkers, including philosophers, political leaders, military strategists and diplomats. GE Area: V.

Satisfies SJSU Studies V: Culture, Civil & Global Understanding.

Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing. Not counted as a core course in the international relations subfield.

POLS 152A - International Organizations and NGOs

4 unit(s)
Examines the structures and functions of different types of international organizations (such as the UN, NATO, regional organizations, and non-governmental organizations), and their role in maintaining international peace and security, promoting human rights and economic development, and protecting the environment.
**Grading:** Graded

**POLS 152B - Model United Nations**

*4 unit(s)*
Structure and operations of the United Nations explored and analyzed through participation in annual U.N. simulation.

*Course may be repeated for credit for up to 16 units.*

**Prerequisite(s):** POLS 152A

**Grading:** Credit/No Credit

**POLS 153 - European Union**

*4 unit(s)*
Surveys and analyzes the historical evolution, the institutions, as well as the process of policy making in the European Union. Examines key policy areas: agricultural, social, economic, environmental, and foreign policy.

**Grading:** Graded

**POLS 154 - U.S. Foreign Policy: Formulation and Administration**

*4 unit(s)*
Consideration of the factors that shape American foreign policy making, including ideology, organization, as well as partisanship, interest groups, and public opinion. Issues considered include relations with the Middle East and Russia, and economic diplomacy.

**Grading:** Graded

**POLS 155 - The Wealth of Nations**

*4 unit(s)*
This course examines how states, international and multinational bodies, and global social movements shape trade, financial, and labor relations. Topics include: international trade and protectionism, the International Monetary Fund and the World Bank, regional integration, and transnational corporations.

**Grading:** Graded

**POLS 156 - Islam, Politics and the West**

*3 unit(s)*
An in-depth look at the roots of Islamic tradition, law, politics, culture, and society. Emphasis on Islam's growing global prominence; relations with the West; stereotypes and misconception, as well as the nature of the Islamic state.

**Prerequisite(s):** Upper division standing or instructor consent.

**Grading:** Graded

**POLS 157 - International Security**

*4 unit(s)*
Examines theories of international security, debates over sources, conduct and termination of conflict, including but
not limited to inter-state war; security decision-making; military and economic strategy; crisis management; regional security; intelligence; new and complex security issues along the war-peace continuum.

Grading: Graded

POLS 160A - Classical Political Thought

3 unit(s)
Critical examination of the foundations of Western political thought and the continuing influence of these foundations; sources chosen from among a variety of pre-Renaissance traditions and include writers such as Plato, Aristotle, Augustine and Aquinas.

Grading: Graded

POLS 160B - Modern Political Thought

3 unit(s)
The basis of the modern state and society as interpreted by political thought between (and including) the Renaissance and the French Revolution; this key period includes writers such as Machiavelli, Hobbes, Locke and Rousseau.

Grading: Graded

POLS 160C - Recent Political Thought

3 unit(s)
The roots of today's politics in the ideas and writers of the nineteenth and twentieth centuries; sources drawn from a variety of recent traditions such as democratic theory, Marxism, political psychology and political sociology.

Grading: Graded

POLS 163 - American Political Thought

3 unit(s)
Critical examination of the origins and development of American politics as seen through theorists, concepts and forces which have shaped American political consciousness.

Grading: Graded

POLS 170V - American Politics in Global Perspective

3 unit(s)
A survey of U.S. and California political institutions and culture in comparison with political institutions and cultures outside the U.S. GE Area: V, as well as American Institutions Requirement: US2 and US3.

Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

Grading: Graded
Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

POLS 177 - Political Psychology

4 unit(s)
Introduction to the interdisciplinary field of political psychology, with a focus on topics including personality and leadership, political cognition, social identity, emotions and attitudes, voting and political behavior, racism and ethnocentrism, ethnic conflict and genocide, nationalism, terrorism, and conflict resolution.

Prerequisite(s): POLS 1 (or other US2-3), PSYC 1, or instructor consent
Grading: Graded

POLS 180 - Individual Studies

1-4 unit(s)
Individual study for advanced work in areas where no courses are offered.

Prerequisite(s): Appropriate courses, instructor consent and department chair consent.
Grading: Credit/No Credit

POLS 181 - Internships

4 unit(s)
Offers students the opportunity to connect knowledge of politics, government, and policy making learned in the classroom to real life application through internships with elected officials, non-profit organizations, government agencies, or political campaigns.

Prerequisite(s): POLS 100W and instructor consent.
Grading: Credit / No Credit

POLS 181C - Internship Capstone

4 unit(s)
Application of knowledge of politics, government, and policy making through internships with elected officials, non-profit organizations, government agencies, or political campaigns. Students complete a major capstone paper.

Prerequisite(s): POLS 100W and POLS 100M, and instructor consent. A minimum grade of C- is required to fulfill the BA Political Science capstone requirement.
Grading: Graded

POLS 184 - Directed Reading

1-4 unit(s)
Program of reading and writing created through student/faculty consultation in areas not covered by other courses. Course is not repeatable for credit.

Prerequisite(s): Appropriate courses, instructor consent and department chair consent.
Grading: Graded

POLS 190 - Senior Seminar
4 unit(s)
Culminating experience for the political science major. Seminar class with significant participation required. Specific course topics vary each semester.

Repeatable for credit.

Prerequisite(s): POLS 100W and POLS 100M, or instructor consent. A minimum grade of C- is required to fulfill the BA Political Science capstone requirement.
Grading: Graded

POLS 190H - Honors Thesis

1 unit(s)
Preparation and writing of an original project.

Prerequisite(s): Senior standing. 3.2 GPA and instructor consent.
Grading: Graded

POLS 192 - Int'l Program Studies

1-12 unit(s)
Grading: Mixed Grading

POLS 195 - Applied Research Methods

4 unit(s)
Applied research methods in the social sciences, with a focus on quantitative analysis. Survey methods, descriptive statistics and statistical inference, and the relationships between two or more variables. Quantitative research project (typically a project initiated in their Political Science 100M course).

Prerequisite(s): POLS 100W, POLS 100M and instructor approval.
Grading: Graded

Note(s): A minimum grade of C- is required to fulfill the BA Political Science capstone requirement.

POLS 199 - Current Political Issues

1-3 unit(s)
Major political issues of the day. Topics vary each semester. Course is repeatable for credit with instructor consent.

Grading: Graded

POLS 292 - Int'l Program Studies

1-6 unit(s)
Grading: Mixed Grading

Overview
The Department of Psychology seeks to develop skilled critical thinkers who use their knowledge of the principles of human behavior, cognition, and emotion to work and live effectively and fully in a multicultural global society. Our curriculum covers the major areas in the field of psychology to help students understand the complexities of human thought and behavior in a sociocultural context. In addition, the Department provides students with training in research methods, statistics, and scientific writing. Psychology students have opportunities to gain practical experience by working with our faculty in research labs, community outreach projects, Silicon Valley companies, and so on. The Department offers a BA in Psychology, a BS in Psychology, a minor in Human Systems Integration, a minor in Psychology, an MA in Research and Experimental Psychology, an MS in Clinical Psychology, and an MS in Industrial and Organizational Psychology. Detailed information about our faculty, students, and programs may be found on our website at www.sjsu.edu/psych.
Psychology Honors Program

Students requesting departmental honors in psychology will be evaluated against the following criteria at graduation: (1) a minimum aggregate GPA of 3.5 across all psychology course work; (2) evidence of distinguished scholarly work, as indicated by the completion of a BA thesis (PSYC 199), the honors seminar (PSYC 195), or work leading to a published paper or presentation at a professional meeting. Contact a psychology advisor for details.

Undergraduate

Psychology, BA

The undergraduate degree, offered by the Department of Psychology, assures a broad coverage of the major areas of content and methods in psychology identified by the American Psychological Association as the backbone of a strong degree program. The goal of the breadth part of the degree requirements is to provide a strong background in general psychology. In addition, sufficient flexibility is offered through choices in fulfilling these requirements and through the electives so that students, in consultation with their advisors, can design a program of study which focuses on each student's particular area of interest.

A carefully prepared multi-year program of study will ensure an appropriate sequencing of required courses (e.g., BIOL 21 or BIOL 65 is a prerequisite to PSYC 30, STAT 95 is a prerequisite for PSYC 100W, PSYC 100W is a prerequisite for PSYC 120, PSYC 120 is also a pre- or co-prerequisite for PSYC 190/PSYC 195). Use the advisor's expertise and the MyGPS planning tools for GE, SJSU Studies, and American Institutions course selection and to ensure a strong foundation for future coursework. Seeking advising is especially important to those at risk for probation, those in the honors program, and those planning to go on to graduate school in psychology. The two and four year planners give additional guidance in designing a particular program of study including suggestions about the order in which to take classes even if they are not governed by official prerequisite requirements. All of these materials as well as the extra coursework and other requirements for Departmental Honors are available on the department website www.sjsu.edu/psych or the department office.

Once declared as a psychology major, there are no minimum grade requirements for the major other than a C- or better for the lower division statistics requirement and an overall 2.0 average across the courses in the major (i.e., a D- can "count" towards meeting psychology requirements even if it does not count towards General Education requirements).

The lower division biology requirement cannot be met with BIOL 20 - Ecological Biology nor the online version of BIOL 650 - Human Anatomy.

University Requirements for Graduation
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Undergraduate Graduation Requirements section of the Policies and Procedures.

**Program Roadmaps**

The 4-Year Roadmap is available online. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Degrees (ADT) Pathways are also available online.

**General Education/American Institution Requirements**

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

**University Requirements (41 units)**

**Core Lower Division General Education (24 units)**

Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

**Note:** Students who have completed the ADT Transfer degree (under SB 1440) for this major will have completed all lower division GE requirements and should follow the 60 unit guarantee roadmap. Meet with an advisor prior to registering for your first semester for the 60 unit roadmap or Specific questions.

**Upper Division General Education (9 units)**

Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.

**American Institutions (6 units)**

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B, HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

**Complete One Sequence From:**

**African American Studies (6 units)**

- AFAM 2A - African Americans and the Development of America's History and Government 3 unit(s) (D2)
- AFAM 2B - African Americans and the Development of America's History and Government 3 unit(s) (M7)

**Asian American Studies (6 units)**

- AAS 33A - Asian Americans in U.S. History I 3 unit(s) (D2)
- AAS 33B - Asian Americans in U.S. History II 3 unit(s) (M7)
U.S. History and Government (6 units)

- HIST 15 - Essentials of U.S. History 3 unit(s) (M12)
- POLS 15 - Essentials of U.S. & California Government 3 unit(s) (M11)

Chicana and Chicano Studies (6 units)

- CCS 10A - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D2)
- CCS 10B - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (M7)

Physical Education (2 units)

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Major Preparation (3-4 units)

Complete one course from:

- BIOL 21 - Human Biology 3 unit(s) (B2+B3)
- BIOL 65 - Human Anatomy 4 unit(s) (B2+B3)

Major Requirements (48 units)

Lower Division Core (12 units)

- PSYC 1 - Introduction to Psychology 3 unit(s) (D1)
- PSYC 18 - Introduction to Research Methods 3 unit(s)
- PSYC 30 - Introductory Psychobiology 3 unit(s)
- STAT 95 - Elementary Statistics 3 unit(s) (B4) (UNVS 15F and UNVS 15S may be used in lieu of the statistics course required by this major. A grade of C- or better is required to meet this statistics requirement.)

Upper Division Core (27 units)

- PSYC 100W - Writing Workshop 3 unit(s) (Z)
- PSYC 118 - Advanced Research Methods in Psychology 3 unit(s)

Complete One Course From:

- PSYC 102 - Psychology of Childhood 3 unit(s)
- PSYC 112 - Psychology of Adolescence 3 unit(s)
- PSYC 114 - Psychology of Aging 3 unit(s)
Complete Two Courses From:

- PSYC 129 - Neuroscience 3 unit(s)
- PSYC 135 - Cognition 3 unit(s)
- PSYC 155 - Human Learning 3 unit(s)
- PSYC 158 - Perception 3 unit(s)

Complete One Course From:

- PSYC 110 - Adult Psychopathology 3 unit(s)
- PSYC 142 - Child Psychopathology 3 unit(s)

Complete One Course From:

- PSYC 139 - Psychology of Personality 3 unit(s)
- PSYC 154 - Social Psychology 3 unit(s)

Complete One Course From:

- PSYC 117 - Psychological Tests and Measures 3 unit(s)
- STAT 115 - Intermediate Statistics 3 unit(s)

Complete One Course From:

- PSYC 190 - Current Issues Capstone 3 unit(s)
- PSYC 195 - Honors Seminar in Psychology 3 unit(s)

Psychology Electives (9 units)

- Three units of upper or lower division psychology courses 3 unit(s)
- Six units of upper division psychology courses 6 unit(s)

University Electives (27-28 units)

Total Units Required (120 units)

**Psychology, BS**

The BS degree is a regimented degree plan for students who wish to develop a focused set of skills in research focused scientific and methodological training. The BS degree program, offered by the Department of Psychology, has more course requirements than the BA (i.e., fewer electives). Students should seek early and frequent advice from departmental advisors.

A carefully prepared multi-year program of study will ensure an appropriate sequencing of required courses (e.g., BIOL 21 or BIOL 65 is a prerequisite for PSYC 30, STAT 95 is a prerequisite for PSYC 100W, PSYC 100W is a prerequisite for PSYC 120, PSYC 120 is a prerequisite for PSYC 121A-PSYC 121E, and PSYC 120 is also a pre- or
co-prerequisite for PSYC 190/PSYC 195). Use the advisor's expertise for GE, SJSU Studies, and American Institutions course selection and to ensure a strong foundation for future coursework. Seeking advising is especially important for those in the honors program or those planning to go on to research-oriented graduate programs in psychology. The two and four-year planners give additional guidance in designing a particular program of study including suggestions about the order in which to take classes even if they are not governed by official prerequisite requirements. All these materials as well as the requirements for Departmental Honors (BA or BS Psychology) are available from www.sjsu.edu/psych or the department office.

There are no minimum grade requirements for coursework in the major other than a C- or better for the lower division statistics requirement and an overall 2.0 average across the courses in the major (i.e., a D- can "count" towards meeting psychology requirements even if it does not count towards General Education requirements).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Major Preparation (12-18 units)

Complete one course from:
- BIOL 21 - Human Biology 3 unit(s) (B2+B3)
- BIOL 65 - Human Anatomy 4 unit(s) (B2+B3)
Complete Three Courses From

Complete three courses from (no more than two from each department):

*CHEM 1A or CHEM 30A, but not both*

*CHEM 1B or CHEM 30B, but not both.*

- BIOL 101 - Origins of Life 3 unit(s) (R)
- BIOL 109 - Human Neuroanatomy and Physiology 4 unit(s)
- LING 123 - Sound and Communication 3 unit(s) (R)
- LING 161 - Psycholinguistics 3 unit(s)
- PHIL 110 - Science, Technology and Human Values 3 unit(s) (V)
- PHIL 133 - Ethics in Science 3 unit(s) (V)
- PHIL 160 - Philosophy of Science 3 unit(s) (R)
- CHEM 1A - General Chemistry 5 unit(s) (B1+B3)
- CHEM 1B - General Chemistry 5 unit(s) (B1+B3)
- CHEM 30A - Introductory Chemistry 3 unit(s) (B1+B3)
- CHEM 30B - Introductory Chemistry 3 unit(s)

Major Requirements (55 units)

Lower Division Core (9 units)

- PSYC 1 - Introduction to Psychology 3 unit(s) (D1)
- PSYC 30 - Introductory Psychobiology 3 unit(s)
- STAT 95 - Elementary Statistics 3 unit(s) (B4) *(UNVS 15F and UNVS 15S may be used in lieu of the statistics course required by this major.)*

Upper Division Core (41 units)

- PSYC 100W - Writing Workshop 3 unit(s) (Z)
- PSYC 102 - Psychology of Childhood 3 unit(s)
- PSYC 110 - Adult Psychopathology 3 unit(s)
- PSYC 117 - Psychological Tests and Measures 3 unit(s)
- PSYC 120 - Advanced Research Methods and Design 4 unit(s)
- PSYC 139 - Psychology of Personality 3 unit(s)
- PSYC 154 - Social Psychology 3 unit(s)
- STAT 115 - Intermediate Statistics 3 unit(s)

Complete One Course From:

- PSYC 129 - Neuroscience 3 unit(s)
- PSYC 160 - Clinical Psychology 3 unit(s)
- PSYC 170 - Industrial and Organizational Psychology 3 unit(s)
Complete Two Courses From:

- PSYC 135 - Cognition 3 unit(s)
- PSYC 155 - Human Learning 3 unit(s)
- PSYC 158 - Perception 3 unit(s)

Complete Two Courses From:

- PSYC 121A - Advanced Research Methods Social/Personality Laboratory 2 unit(s)
- PSYC 121B - Advanced Research Methods: Cognition/Perception 2 unit(s)
- PSYC 121C - Advanced Research Methods: Clinical Laboratory 2 unit(s)
- PSYC 121E - Advanced Research Methods: Psychophysiology Lab 2 unit(s)

Complete One Course From:

- PSYC 190 - Current Issues Capstone 3 unit(s)
- PSYC 195 - Honors Seminar in Psychology 3 unit(s)

Major Electives (5 units)

- One Upper Division Psychology Elective 2 unit(s)
- One Upper or Lower Division Psychology Elective 3 unit(s)

University Electives (15-21 units)

Total Units Required (120 units)

**Master**

**Psychology, Clinical Psychology Concentration, MS**

- Admission Requirements
- Degree Requirements
- Master's Requirements (60 units)
- Program Learning Outcomes

The Master of Science (MS) degree in Clinical Psychology, offered by the Department of Psychology, is designed to provide the student with both theoretical and practical training in the assessment, diagnosis, and treatment of a wide variety of individual (adult and children), couples’, and family mental health problems, and to prepare the student to work in private or public service agencies, independent practice, community mental health centers, or hospitals. The required academic course work and supervised fieldwork of 60 semester units meet the course work requirements for the California State Marriage and Family Therapist (MFT) license and most of the requirements for the Licensed Professional Clinical Counselor (LPCC) license (see www.bbs.ca.gov for requirements). An additional 2500-3000 hours of acceptable supervised experience is required for admission to the state MFT or LPCC licensing examination.
Admission Requirements

To be eligible for admission into the Clinical Psychology program, you must:

1. Meet all of the University graduate admission requirements.
2. Have a baccalaureate degree (BA or BS) in Psychology OR any baccalaureate degree (BA or BS) and a minimum of 30 semester units (45 quarter units) in Psychology.
3. Have taken the REQUIRED six courses in psychology from the list provided below. These are to be included in the minimum 30 semester units (10 semester courses).
4. Have a minimum GPA of 3.0 in all Psychology coursework AND a minimum of 3.0 the last 2 years of academic work attempted (60 semester or 90 quarter units).
5. Provide evidence of a minimum of 100 hours of paid or volunteer applied clinical experience working with persons in a counseling/helping capacity (e.g., volunteer in home for emotionally disturbed children, juvenile hall, suicide and crisis telephone hotline).
6. Provide three letters of recommendation. One reference MUST be from a clinical supervisor. Additional references may come from former instructors and from supervisors of previous work in volunteer placements in the clinical field.

Undergraduate Courses in Psychology Required for Admission

1. General or Introduction to Psychology (SJSU code PSYC 1)
2. Elementary Statistics (SJSU code STAT 95)
3. Introduction to Research Methods (SJSU code PSYC 18 or PSYC 120)
4. Psychobiology or equivalent (SJSU code PSYC 30)

Each of the above four (1-4) may be taken at the community college or university level and may be lower-division courses.

1. Upper-division course in Abnormal Psychology (SJSU code PSYC 110)
2. Upper-division course in Theory and Methods of Counseling, or Clinical Psychology (SJSU code PSYC 160, or PSYC 165)

Degree Requirements

General university requirements and procedures for completing the Master of Science degree are described in the Academic Regulations section of this catalog. In addition to these, the following departmental requirements must be fulfilled.

1. The student must complete a total of 60 units in clinical psychology as specified in the table below.
2. Candidates must demonstrate satisfactory performance on one or more final comprehensive examinations. These examinations are both written and oral.
3. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

Master's Requirements (60 units)

Core Courses (48 units)

- PSYC 203A - Clinical Assessment I 3 unit(s) (GWAR)
- PSYC 208 - Family Assessment and Intervention 3 unit(s)
- PSYC 209 - Psychology of Contemporary Families 3 unit(s)
- PSYC 210 - Advanced Psychopathology 3 unit(s)
- PSYC 211 - Child Psychopathology 3 unit(s)
- PSYC 212 - Life Span Development 3 unit(s)
- PSYC 222 - Gender and Ethnic Issues in Counseling and Therapy 3 unit(s)
- PSYC 224A - Clinical Psychology Practicum I 3 unit(s)
- PSYC 224B - Clinical Psychology Practicum II 3 unit(s)
- PSYC 225 - Advanced Group Dynamics 3 unit(s)
- PSYC 226 - Addictions and Treatment 3 unit(s)
- PSYC 228 - Professional Ethics for Psychologists 3 unit(s)
- PSYC 232 - Clinical Psychopharmacology 3 unit(s)
- PSYC 258 - Methods of Psychotherapy 3 unit(s)
- PSYC 260 - Crisis and Trauma Counseling 3 unit(s)
- PSYC 291 - Method and Design for Applied Research 3 unit(s)

Culminating Experience (6 units)

*Students will take PSYC 298 twice.*

- PSYC 298 - Special Problems 1-6 unit(s)

Field Work (6 units)

- PSYC 243 - Field Work in Psychology 1-6 unit(s)

Total Units Required (60 units)

**Psychology, Industrial/ Organizational Psychology Concentration, MS**

- Admission Requirements
- Degree Requirements
- Master's Requirements (30 units)
- Program Learning Outcomes

The Master of Science (MS) degree in Industrial/Organizational (I/O) Psychology program, offered by the Department of Psychology, is designed to provide students with a fundamental grounding in theory, research, and application in
the field of I/O Psychology and to prepare them to work in a wide range of settings including medium-to-large sized
organizations, government agencies, human resources or management consulting firms, and large research
organizations. The program places particular emphasis on the science-practitioner approach in which students
understand and appreciate theory and research as they apply their knowledge and skills to the needs and challenges
of organizations.

Admission Requirements

To be eligible for admission into the Industrial/Organizational Psychology program, you must:

1. Meet all of the University graduate admissions requirements
2. Have completed either a baccalaureate degree (BA/BS) in psychology or any baccalaureate degree and a
   minimum of 30 semester (45 quarter) units in psychology
3. Have a minimum GPA of 3.0 in the last 60 semester units (90 quarter units) of all college and/or university
   course work
4. Have a minimum GPA of 3.0 in all college and/or university psychology courses taken
5. Have taken the GRE Exam (General Test only), although we do not require a minimum score for your
   application to be considered.

Degree Requirements

General university requirements and procedures for completing the Master of Science degree are described in the
Academic Regulations section of this catalog. In addition to these, the following departmental requirements must be
fulfilled.

1. The student must complete a total of not less than 30 semester units for the industrial/organizational
   concentration as specified in the degree below.
2. Candidates in the MS Industrial/Organizational program must complete a thesis as part of their 30 semester
   unit degree requirement. The nature of the thesis is to be determined in consultation with a committee of at
   least three faculty members. The thesis ordinarily consists of a quantitative investigation or program design,
   trial and evaluation of some degree of originality. The topic should be relevant to the field of study in which
   the candidate plans to work. The thesis will generally constitute the final comprehensive examination.
3. The University requires that all graduate students complete the Graduation Writing Assessment
   Requirement (GWAR) as a condition for advancement to candidacy. For graduate courses that meet the
   GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

The Master of Science (MS) degree in Industrial/Organizational (I/O) Psychology program, offered by the Department

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

Master's Requirements (30 units)

Core Courses (15 units)

- PSYC 240 - Research Design and Applied Psychometrics 3 unit(s)
- PSYC 249 - Field Work in Industrial/Organizational Psychology 1-6 unit(s) (3 units required)
- PSYC 270 - Seminar in Industrial and Organizational Psychology 3 unit(s) (GWAR)
- PSYC 271 - Seminar in Personnel Psychology 3 unit(s)
- STAT 235 - Multivariate Analysis 3 unit(s)

Electives (9 units)

9 units of department advisor-approved electives
Culminating Experience (6 units)

Complete one course from:

- PSYC 298 - Special Problems 1-6 unit(s)
- PSYC 299 - Master's Thesis or Project 1-6 unit(s)

Total Units Required (30 units)

**Psychology, Research and Experimental Psychology Concentration, MA**

- Admission Requirements
- Degree Requirements
- Master's Requirements (30 units)
- Program Learning Outcomes

The Master of Arts Program in Psychology, offered by the Department of Psychology, affords its candidates an opportunity for advanced study of psychological theory and research techniques with the following objectives in mind:

- **To ultimately earn a doctorate in psychology** - the course work and experience obtained in the Psychology Program is designed to enhance students' credentials when applying to highly competitive doctoral programs.
- **To succeed in business, industry and or a research setting** - our program's emphasis on the mastery of statistical and methodological procedures, research experience, and critical thinking produces graduates that are well suited for many careers in business, government, and/or an array of research settings.

**Admission Requirements**

To be eligible for admission into our program, you must:

Meet all of the University's graduate admission requirements:

1. Have the equivalent of a U.S. baccalaureate degree
2. Have completed a minimum of 30 semester units in undergraduate psychology
3. Have a minimum GPA of 3.0 in the last 60 semester units (90 quarter units) of all college and/or university course work
4. Have a minimum GPA of 3.0 in all college and/or university psychology courses taken
5. Have taken the GRE Exam (General Test only), although we do not require a minimum score for your application to be considered

**Degree Requirements**

General university requirements and procedures for completing the Master of Arts degree are described in the Academic Regulations section of this catalog. In addition to these, the following departmental requirements must be fulfilled.
General Program Requirements

1. The student's combined total of approved undergraduate and graduate work in psychology must be at least 60 semester units, including 30 units for the MA Degree Program.
2. The student must complete at least 30 approved graduate units. At least 27 of these 30 units must be psychology or statistics units; of the 27, at least 24 must be 200-level courses, i.e., up to six units may be from 100-level courses with the program coordinator's approval.
3. The candidate must complete an acceptable thesis. This thesis will be a quantitative investigation of some degree of originality and of publication caliber.
4. Satisfactory performance on a final examination is required. This examination may be written, oral or both, as determined by the student's thesis advisory committee. This is typically satisfied through the oral defense of the student's thesis research.
5. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Evaluations website at www.sjsu.edu/gape (www.sjsu.edu/gradstudies).

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

Master's Requirements (30 units)

Core (12 units)

- PSYC 280 - General Seminar 3 unit(s) (GWAR)
- PSYC 220 - Seminar in Experimental Psychology 3 unit(s)
- STAT 245 - Advanced Statistics 3 unit(s)

Complete One Course From:

- PSYC 240 - Research Design and Applied Psychometrics 3 unit(s)
- STAT 235 - Multivariate Analysis 3 unit(s)

Breadth (12 units)

- PSYC 204 - Seminar in Developmental Psychology 3 unit(s)
- PSYC 230 - Seminar in Physiological Psychology 3 unit(s)

Complete One Course From:

- PSYC 235 - Seminar in Cognitive Psychology 3 unit(s)
- PSYC 256 - Seminar in Perception 3 unit(s)
• PSYC 200 - Seminar in Personality Theory 3 unit(s)
• PSYC 254 - Social Psychology Seminar 3 unit(s) (GWAR)

Culminating Experience (6 units)

• PSYC 299 - Master's Thesis or Project 1-6 unit(s)
• Elective 3 unit(s)

Total Units Required (30 units)

Thesis Requirement

The thesis serves as the culmination of a student's course work, research experience, and growth as a scholar and scientist. This process is guided closely by a thesis advisor; a tenured or tenure-track faculty member of the Department of Psychology. As the student's ideas develop into a full thesis proposal, a thesis advisory committee is formed in order to provide further guidance and expertise. Collection of the thesis data begins once the proposal has been approved by the committee and the proper animal care/ human subjects' approval has been obtained. The introduction, analysis, and interpretations of these data will form the core of the student's written master's thesis. These efforts all culminate in an oral presentation and defense before the thesis committee. A detailed statement of thesis policies is available in the Psychology Department Office and on the departmental website www.sjsu.edu/psych.

Minor

Human Systems Integration Minor

The Human Systems Integration (HSI) minor: (1) studies the cognitive, perceptual, and performance capabilities and limitations of people as they interact with sociotechnical systems and devices (e.g., energy and transportation systems, computers, mobile devices, workplaces); and (2) seeks to apply evidence-based principles in the development of human-centered systems and devices. The HSI minor aims to provide students with interdisciplinary training to prepare them to work in cross-functional teams to optimize human capabilities, increase system efficiency, reliability, and safety, and minimize error.

At least 12 units outside of preparation for the minor must be separate and distinct from the units used for the major program of the student. See a departmental advisor for approval of courses. Visit the Psychology Department Advising website for more information.

It is permissible for Psychology Majors to have a minor in Human Systems Integration.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Preparation (6 units)

• PSYC 1 - Introduction to Psychology 3 unit(s) (D1)

Complete One Course From:
Required Courses (9 units)

- PSYC 173 - Human Factors 3 unit(s)

Complete Two Courses From:

- PSYC 135 - Cognition 3 unit(s)
- PSYC 155 - Human Learning 3 unit(s)
- PSYC 158 - Perception 3 unit(s)

Minor Electives (6-8 units)

Complete at least two courses from:

- ART 108 - Introduction to Game Studies 3 unit(s)
- AVIA 2 - Private Pilot Ground 3 unit(s)
- AVIA 73 - Air Traffic Control 3 unit(s)
- AVIA 141 - Human Factors in the Aviation Environment 3 unit(s)
- BUS2 130 - Introduction to Marketing 3 unit(s)
- BUS4 92 - Introduction to Business Programming 3 unit(s)
- BUS4 111 - Networking and Data Communications 3 unit(s)
- CS 46A - Introduction to Programming 4 unit(s)
- CS 46B - Introduction to Data Structures 4 unit(s)
- DSID 121 - Industrial Design Process 3 unit(s)
- ENGR 120 - Programming Concepts for Behavioral and Social Science Applications 3 unit(s)
- ISE 164 - Computer and Human Interaction 3 unit(s)
- ISE 114 - Safety Engineering 3 unit(s)
- PSYC 170 - Industrial and Organizational Psychology 3 unit(s)
- STAT 115 - Intermediate Statistics 3 unit(s)

Total Units Required (21-23 units)

Psychology Minor

A minor in Psychology has a minimum of 18 units of PSYC and/or STAT. At least 12 of the 18 units must be upper division (i.e., courses numbered 100+ at SJSU). At least 12 units must be separate and distinct from the units used for the major program of the student. See a departmental advisor for approval of courses. Visit the Psychology Department Advising website for more information.

It is not permissible for a Psychology Major to also have a minor in Psychology.

University Graduation Requirements
To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

**Minor Requirements**

**Lower Division Electives (0-6 units)**
PSYC or STAT Prefix

**Upper Division Electives (12-18 units)**
PSYC or STAT Prefix

**Total Units Required (18 units)**

*PSYC 1 - Introduction to Psychology*

3 unit(s)
Psychology is the scientific study of behavior and mental processes. The content focuses on the exploration of major psychological theories and concepts, methods, and research findings in psychology. Topics include the biological bases of behavior, perception, cognition and consciousness, learning, memory, emotion, motivation, development, personality, social psychology, psychological disorders and therapeutic approaches to treatment, and applied psychology.

*Satisfies D1: Human Behavior*

**Grading:** Graded

*PSYC 2Q - Identity Development and Prejudice*

3 unit(s)
This seminar is designed to facilitate the transition to the university smoothly with a view to an increased understanding of one's cultural identity; and exploring mechanisms and consequences of prejudice and discrimination in American cultural groups.

*Satisfies E: Human Understanding & Development*

**Prerequisite(s):** First term freshmen only.
**Grading:** Graded

**Note(s):** All courses with a 'Q' suffix are designated as First Year Experience courses.

*PSYC 18 - Introduction to Research Methods*

3 unit(s)
Psychological research methods and design (experimental, quasi-experimental [correlational], and descriptive investigations) covering observation, instrumentation, and the collection, analysis, interpretation, and reporting of research data as illustrated through a review of original research in a variety of the subdisciplines of psychology.
**Prerequisite(s):** PSYC 1, and STAT 95.

**Grading:** Graded

**PSYC 30 - Introductory Psychobiology**

3 unit(s)
Biological approaches to understanding behavior: evolutionary, genetic, neural and hormonal influences on normal and abnormal behavior.

**Prerequisite(s):** BIOL 21 or BIOL 65.

**Grading:** Graded

**PSYC 82 - Foundations of Developmental Psychology**

3 unit(s)
Psychological development of children from conception to adolescence.

**Grading:** Graded

**PSYC 92 - Int'l Program Studies**

1-12 unit(s)
**Grading:** Mixed Grading

**PSYC 96C - Introduction to Cognitive Science**

3 unit(s)
Focuses on the study of the mind and the nature of intelligence from interdisciplinary perspectives including computer science, philosophy, mathematics, psychology, neuroscience, and other disciplines. Specific topical coverage includes language acquisition, history of computer-based approaches to artificial intelligence and expertise, human learning, neuroscience, and mathematical, logical, and computational approaches to modeling cognitive process.

**Grading:** Graded

**PSYC 100W - Writing Workshop**

3 unit(s)
Practice in improvement of writing skills appropriate to the broad field of psychology, including essays, reports and scholarly communication. GE Area: Z.

**Satisfies SJSU Studies Z: Written Communication II.**

**Prerequisite(s):** PSYC 1; STAT 95 or senior standing; A3 or equivalent second semester composition course (with a grade of C- or better); completion of core GE; satisfaction of Writing Skills Test or completion of ENGL 100A / LLD 100A with C or better; and upper division standing. Allowed Declared Majors: Psychology Majors/Minors and Behavioral Science Majors only. Or Graduate or Postbaccalaureate level.

**Grading:** Graded

**Note(s):** Must be passed with C or better to satisfy the CSU Graduation Writing Assessment Requirement (GWAR).

**PSYC 102 - Psychology of Childhood**
3 unit(s)
Psychological development of children from conception to middle childhood emphasizing normative (typical) development in the context of cognitive, socioemotional, biological, and cultural processes.

Prerequisite(s): PSYC 1.
Grading: Graded

PSYC 105 - Special Topics in Developmental Psychology

3 unit(s)
Intensive examination of current research and theory in a specialized area of developmental psychology. Course is repeatable for credit when course content changes.

Course may be repeated for credit for up to 6 units.

Prerequisite(s): PSYC 102 or PSYC 112 or PSYC 114 or equivalent
Grading: Graded

PSYC 107 - Psychology of Women

3 unit(s)
Sex-role development of women in terms of bio-social factors involved in intellectual and personal-emotional functions. Psychological theory and research.

Prerequisite(s): PSYC 1.
Grading: Graded

PSYC 110 - Adult Psychopathology

3 unit(s)

Prerequisite(s): PSYC 1.
Grading: Graded

PSYC 112 - Psychology of Adolescence

3 unit(s)
Psychological development of adolescents’ and young (emerging) adults emphasizing normative (typical) development in the context of cognitive, socioemotional, biological, and cultural processes.

Prerequisite(s): PSYC 1.
Grading: Graded

PSYC 114 - Psychology of Aging

3 unit(s)
Psychological development of middle-aged and older adults emphasizing normative (typical) development in the context of cognitive, socioemotional, biological, and cultural processes. Course content also includes age-related health problems and their prevention.
Prerequisite(s): PSYC 1.
Grading: Graded

PSYC 117 - Psychological Tests and Measures

3 unit(s)
Test and questionnaire construction, evaluation and interpretation applied to intelligence and ability tests, personality and adjustment questionnaires, ratings and behavioral observation techniques.

Prerequisite(s): STAT 95.
Grading: Graded

PSYC 118 - Advanced Research Methods in Psychology

3 unit(s)
Descriptive, correlational, quasi-experimental, and experimental approaches: design, methodology, and analysis. Experience designing, conducting, analyzing, and presenting (verbal and written) research findings. Topics include: hypothesis testing, validity, reliability, scales of measurement, questionnaire development, power, statistical significance, and effect size.

Prerequisite(s): Lower division GE complete; STAT 95, PSYC 18, PSYC 100W with a "C" or better (or departmental approval), Upper division standing, Psychology or Behavioral Science majors only.
Grading: Graded

PSYC 120 - Advanced Research Methods and Design

4 unit(s)
Descriptive, correlational, quasi-experimental, and experimental approaches: design, methodology, and analysis. Experience designing, conducting, analyzing, and presenting (verbal and written) research findings. Topics will include: hypothesis testing, validity, reliability, scales of measurement, questionnaire development, power, statistical significance, and effect size.

Misc/Lab: Lecture 3 hours/activity 2 hours.

Prerequisite(s): lower division GE complete; STAT 95; PSYC 100W with 'C' or better (or department approval); Upper Division; Psychology or Behavioral Science Major
Grading: Graded

PSYC 121A - Advanced Research Methods Social/Personality Laboratory

2 unit(s)
Advanced treatment of research approaches used in social and personality psychology. The course focus is shared between traditional laboratory and fieldwork experimental designs and methods. Data collection and statistical data analysis facilitate experiential learning.

6 hours of Lab.

Prerequisite(s): PSYC 100W, and PSYC 118 or PSYC 120, and PSYC 139 or PSYC 154. Upper division standing. Psychology majors only.
Grading: ABC-/NC Grading

PSYC 121B - Advanced Research Methods: Cognition/Perception
2 unit(s)
Advanced treatment of research approaches used in cognition and/or perception through traditional laboratory experimental designs and methods. Laboratory-based data collection and analysis facilitate experiential learning.

Lecture 1 hour/lab 3 hours.

Prerequisite(s): PSYC 100W; and either PSYC 135, PSYC 155, or PSYC 158; and either PSYC 118 or PSYC 120.

Grading: Graded

Note(s): Instructor consent may allow PSYC 121B and PSYC 120 concurrently on a space-available basis.

PSYC 121C - Advanced Research Methods: Clinical Laboratory

2 unit(s)
Advanced research methods used in clinical research. The primary focus is on traditional field and laboratory research methodologies. Data collection and statistical data analysis facilitate experiential learning.

Prerequisite(s): PSYC 100W and PSYC 118 or PSYC 120, and PSYC 110 or PSYC 142.

Grading: Graded

PSYC 121E - Advanced Research Methods: Psychophysiology Lab

2 unit(s)
Intensive experiential introduction to applied laboratory work in human psychophysiology and hormonal influences on human behavior. Focus on experimental methodology.

Prerequisite(s): PSYC 100W and PSYC 118 or PSYC 120 and PSYC 129

Grading: Graded

PSYC 126 - Drugs, Brain and Behavior

3 unit(s)
Survey of psychoactive drugs, including prescription and street drugs; social, behavioral and physiological effects of drugs; neural mechanisms of drug action; history of drug use.

Prerequisite(s): PSYC 30 or 3 units of biology.

Grading: Graded

PSYC 129 - Neuroscience

3 unit(s)
Principles of brain organization and function underlying behavior. Topics include neuroanatomy and physiology of language, vision, sexual behavior, memory and abnormal behavior.

Prerequisite(s): Either PSYC 30 and 3 units of biology, or 9 units of biology.

Grading: Graded

Note(s): Not acceptable as an elective in the Biology major.

PSYC 135 - Cognition
3 unit(s)
The activity of knowing: acquisition, organization and use of knowledge. Processes involved in that activity, including perception, memory, thinking and language.

Prerequisite(s): PSYC 1.
Grading: Graded

PSYC 139 - Psychology of Personality

3 unit(s)
Current approaches to the study of personality and personality processes.

Prerequisite(s): PSYC 1.
Grading: Graded

PSYC 142 - Child Psychopathology

3 unit(s)

Prerequisite(s): PSYC 1.
Grading: Graded

PSYC 145 - Community Mental Health

3 unit(s)
Comprehensive analysis of community mental health using a socio-ecological framework. Intersection of race, socioeconomic status, gender, sexual orientation, and mental health is examined. Emphasis is on prevention and recovery.

Prerequisite(s): Any 100W or instructor consent.
Grading: Graded

PSYC 150 - Educational Psychology

3 unit(s)
Development of individuals and how they learn. Intelligence, emotions, interests, social relations as related to development and learning.

Prerequisite(s): PSYC 1.
Grading: Graded

Note(s): No credit for those who have taken EDSC 173.

PSYC 153 - Psychology in the Courtroom

3 unit(s)
Role of psychology in the legal system: legal procedure and adversary system, jury selection, jury decision-making, eyewitness testimony, mental health law, criminal responsibility and legal insanity, expert psychological testimony, role of forensic psychologists.
**Prerequisite(s):** PSYC 1.
**Grading:** Graded

*PSYC 154 - Social Psychology*

3 unit(s)
Theories, problems and issues in the study of human social behavior.

**Prerequisite(s):** PSYC 1.
**Grading:** Graded

*PSYC 155 - Human Learning*

3 unit(s)
Memory, forgetting, concept formation, language learning, reinforcement and related topics. Traditional learning concepts, theories and findings with reference to contemporary classroom management, behavior modification and other applications.

**Prerequisite(s):** PSYC 1.
**Grading:** Graded

*PSYC 156 - Applied Behavior Analysis*

3-6 unit(s)
Survey of applications of behavioral principles to problems of clinical and social importance. Topics include data-based decision making, approaches to promoting skill acquisition, and strategies for assessing and reducing problem behavior.

*Course may be repeated for credit for up to 6 units.*
**Grading:** Graded

*PSYC 157 - Psychology of Motivation*

3 unit(s)
Empirical findings and theoretical developments in motivation in relationship to concepts of need, arousal, drive and emotion.

**Prerequisite(s):** PSYC 1.
**Grading:** Graded

*PSYC 158 - Perception*

3 unit(s)
Empirical and theoretical approaches to the psychology of perception with an emphasis on vision. Topics include the perception of form, color, depth and motion as well as the effects of attention and experience.

**Prerequisite(s):** PSYC 1.
**Grading:** Graded

*PSYC 160 - Clinical Psychology*
3 unit(s)
Survey of clinical psychology as a profession. Emphasis placed on training models, specializations within the field, the scientific study of psychological interventions, and the graduate school admissions process for masters and doctoral level psychotherapists.

**Prerequisite(s):** PSYC 1.
**Grading:** Graded

**PSYC 165 - Theory and Methods of Counseling**

3 unit(s)
A survey of theories focused on helping and behavior change. Course covers both historical and contemporary psychotherapeutic interventions found in clinical and counseling psychology and evidence based practice approaches in psychotherapy.

**Prerequisite(s):** PSYC 1.
**Grading:** Graded

**PSYC 167 - Sports Psychology**

3 unit(s)
Psychological aspects of sports, including the value of sports, psychological factors involved in competitive as well as non-competitive athletic activities and the role of sports psychologists.

**Prerequisite(s):** PSYC 1.
**Grading:** Graded

**PSYC 170 - Industrial and Organizational Psychology**

3 unit(s)
Application of psychological theory, research and methodology to the work environment. Topics covered include leadership, power, group processes, motivation, satisfaction and issues in personnel psychology.

**Prerequisite(s):** PSYC 1.
**Grading:** Graded

**PSYC 173 - Human Factors**

3 unit(s)
Human psychology and physiological characteristics and methods for taking these into account in designs and development of human-machine systems. Current human factor engineering efforts in lab, design process and operational environment.

**Prerequisite(s):** PSYC 1.
**Grading:** Graded

**PSYC 175 - Management Psychology**

3 unit(s)
Theory and practice of psychology in organizations and management. Topics include learning, motivation, perception, attitudes, personality, stress, groups, culture, careers, communication, leadership, politics, conflict, cooperation, decision-making and organizational change.
**Prerequisite(s):** PSYC 1.
**Grading:** Graded

*PSYC 177 - Political Psychology*

4 unit(s)
Introduction to the interdisciplinary field of political psychology, with a focus on topics including personality and leadership, political cognition, social identity, emotions and attitudes, voting and political behavior, racism and ethnocentrism, ethnic conflict and genocide, nationalism, terrorism, and conflict resolution.

**Prerequisite(s):** POLS 1 (or other US2-3), PSYC 1, or instructor consent
**Grading:** Graded

*PSYC 180 - Individual Studies*

1-4 unit(s)
Research project in psychology.

**Prerequisite(s):** 12 units of psychology and instructor and department chair consent.
**Grading:** Credit/No Credit

*PSYC 184 - Directed Reading*

1-4 unit(s)
Directed reading on a specific psychological topic.

**Prerequisite(s):** 12 units of psychology and instructor and department chair consent.
**Grading:** Credit/No Credit

*PSYC 186 - Psychology Field Work*

1-4 unit(s)
Supervised field work in a selected area of psychology. Course is repeatable for 4 unit maximum.

*Course may be repeated for credit for up to 4 units.*

**Prerequisite(s):** Instructor and department chair consent.
**Grading:** Credit/No Credit

*PSYC 190 - Current Issues Capstone*

3 unit(s)
Integrative survey of current issues in psychology, how they developed and likely future directions. Completion of the research methods requirement prior to enrollment in this course is recommended.

**Prerequisite(s):** PSYC 100W and senior standing.
**Pre/Corequisite(s):** PSYC 118 or PSYC 120
**Grading:** Graded

*PSYC 191 - The Psychology of Prejudice*
3 unit(s)
Provides an examination of psychological theory and research related to prejudice and discrimination from the perspectives of both the holders and targets of prejudice. Includes individual and small group exercises to provide experiential learning. GE Area: S.

Satisfies SJSU Studies S: Self, Society & Equality in US.

Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

PSYC 192 - Int'l Program Studies

1-12 unit(s)
Grading: Mixed Grading

PSYC 193 - Behavioral Science in Practice

3 unit(s)
Capstone workshop for behavioral science majors. Students assess methods and knowledge of anthropology, psychology and sociology, and synthesize them by reflecting upon case studies of individual, organizational, community, and global issues. Emphasis is on cooperative learning, reflection and synthesis of skills and knowledge.

Prerequisite(s): Senior standing, declared major in Behavioral Science or Behavioral Science double major.
Grading: Graded

PSYC 195 - Honors Seminar in Psychology

3 unit(s)
Intensive examination of background and current status of student-selected problems.

Prerequisite(s): at least 18 units of PSYC/STAT, PSYC 100W, PSYC 118 or PSYC 120, overall PSYC/STAT GPA of 3.5, Senior Standing
Grading: Graded

PSYC 199 - Senior Honors Thesis

3 unit(s)
Supervised thesis open only to exceptional senior psychology majors.

Prerequisite(s): Senior or graduate standing and instructor consent.
Grading: Mandatory CR/NC/RP

PSYC 200 - Seminar in Personality Theory

3 unit(s)
A survey of contemporary approaches to personality study.
Prerequisite(s): PSYC 139 (or equivalent) plus a total of nine semester hours of upper division psychology courses.
Grading: Graded

PSYC 203A - Clinical Assessment I

3 unit(s)
An in-depth introduction to objective, projective and behavioral assessment techniques used in the clinical evaluation of the behavior and functioning of adults, children and families.

Satisfies GWAR: Graduation Writing Assessment Requirement.

Prerequisite(s): PSYC 117 (or equivalent).
Grading: Graded

Note(s): MS program priority. This course satisfies graduate-level GWAR in this master's program.

PSYC 204 - Seminar in Developmental Psychology

3 unit(s)
An examination of significant theories, perspectives, and research in developmental psychology.

Prerequisite(s): PSYC 102 (or equivalent).
Grading: Graded

PSYC 208 - Family Assessment and Intervention

3 unit(s)
An interdisciplinary exploration of how therapists can analyze and change interpersonal dynamics in couples and families.

Grading: Graded

PSYC 209 - Psychology of Contemporary Families

3 unit(s)
An overview of current family issues faced by psychotherapists in clinical settings. Emphasis will be placed on identification and conceptualization of these issues from a psychological perspective, stressing integration of issues into clinical practice. MS Clinical program priority.

Prerequisite(s): PSYC 208.
Grading: Graded

PSYC 210 - Advanced Psychopathology

3 unit(s)
Advanced course to provide knowledge and experience in the classification and treatment of disorders of childhood, adolescence and adulthood as they are identified in schools, family interactions and worksite settings. Critical review of research related to the evaluation of treatment strategies.

Prerequisite(s): PSYC 110.
Grading: Graded
Note(s): MS program priority.

PSYC 211 - Child Psychopathology

3 unit(s)
An overview on the nature, assessment and treatment of Child Psychopathology. Emphasis will be placed on understanding DSM-IV diagnoses from a developmental prospective. Objective methods of assessment and empirically supported treatments will be covered.

Grading: Graded

PSYC 212 - Life Span Development

3 unit(s)
Psychological, biological and social development throughout the life cycle. Interdisciplinary lecture course includes infancy, childhood, adolescence, young adulthood, middle age and old age. Topics include theories, research, influences, changes, problems and patterns of human development.

Grading: Graded

Note(s): MS program priority.

PSYC 219 - HCI for Cyber Security

3 unit(s)
The course covers HCI in cyber security that include: authentication and access control, trust, user privacy and data protections, cyber security in social networking, data protection and security in healthcare, cyber security in eCommerce, mobile, computing & cloud computing, compliance and regulation, visualization tools and techniques in cyber security and privacy.

Prerequisite(s): Graduate Standing
Grading: Graded

PSYC 220 - Seminar in Experimental Psychology

3 unit(s)
Applications of experimental method to current problems in psychology. Individual design and experimental work required.

Prerequisite(s): PSYC 120A.
Grading: Graded

PSYC 222 - Gender and Ethnic Issues in Counseling and Therapy

3 unit(s)
Theoretical and practical understanding of gender and ethnic issues in clinical practice, including issues arising from differing socialization, psychological structures, values and cultural assumptions that may affect therapeutic intervention within individuals, couples and families.

Grading: Graded
Note(s): MS program priority.

PSYC 223B - Clinical Psychology Theory I

3 unit(s)
Application of clinical theory to the treatment of behavioral problems of individuals and families.

Prerequisite(s): PSYC 223A.
Corequisite(s): PSYC 224B.
Grading: Graded

Note(s): MS program priority.

PSYC 224A - Clinical Psychology Practicum I

3 unit(s)
Supervised experience in the treatment of behavioral and emotional problems of individuals and families.

Prerequisite(s): Same as PSYC 223A.
Corequisite(s): PSYC 223A.
Grading: Graded

Note(s): MS program priority.

PSYC 224B - Clinical Psychology Practicum II

3 unit(s)
Advanced supervision in the treatment of behavioral and emotional problems of individuals and families.

Prerequisite(s): Same as PSYC 224A.
Corequisite(s): PSYC 223B.
Grading: Graded

Note(s): MS program priority.

PSYC 225 - Advanced Group Dynamics

3 unit(s)
Advanced study of the dynamics of small group interaction. Limited supervised training in group facilitation techniques.

Prerequisite(s): PSYC 125 (or equivalent).
Grading: Graded

Note(s): MS program priority.

PSYC 226 - Addictions and Treatment

3 unit(s)
Advanced course in assessment, diagnosis, and treatment, and prevention of substance abuse and dependence and co-occurring disorders in multiple settings. Critical review of research related to the evaluation of treatment strategies
are provided from recovery models, family, and individual perspectives.

**Prerequisite(s):** PSYC 203A and graduate standing in MS psychology program

**Grading:** Graded

**PSYC 228 - Professional Ethics for Psychologists**

3 unit(s)
Consideration of ethical and legal issues related to the professional application of psychology. Designed particularly for students involved in field work.

**Grading:** Graded

**Note(s):** MS program priority.

**PSYC 230 - Seminar in Physiological Psychology**

3 unit(s)
An advanced consideration of the neurophysiological correlates of behavior.

**Prerequisite(s):** PSYC 129 (or equivalent).

**Grading:** Graded

**PSYC 232 - Clinical Psychopharmacology**

3 unit(s)
Prepares counseling professionals to understand aspects of drug use, mechanisms of change and clinical outcomes.

**Prerequisite(s):** PSYC 126 or equivalent.

**Grading:** Graded

**PSYC 235 - Seminar in Cognitive Psychology**

3 unit(s)
Theories and current research in cognitive psychology with emphasis on components of cognitive processing from pattern recognition to problem solving. Substantial emphasis on cognitive development and mechanisms of cognitive change.

**Prerequisite(s):** Graduate standing.

**Grading:** Graded

**PSYC 240 - Research Design and Applied Psychometrics**

3 unit(s)
Advanced introduction to issues in psychological research (experimental, quasi-experimental and survey research), measurement and test construction (item analysis, test reliability and validity and development of norms).

**Prerequisite(s):** PSYC 117, STAT 115 or instructor consent.

**Grading:** Graded

**PSYC 243 - Field Work in Psychology**
1-6 unit(s)  
Supervised field work experience in outside agency settings. Open through consultation only to students in MS programs.

*Course may be repeated for credit for up to 36 units.*

**Grading:** Credit/No Credit

**PSYC 249 - Field Work in Industrial/Organizational Psychology**

1-6 unit(s)  
Supervised experience applying psychological and organizational theory and practice in business, industrial and other organizational settings.

**Prerequisite(s):** Instructor consent.  
**Grading:** Credit/No Credit

**PSYC 254 - Social Psychology Seminar**

3 unit(s)  
Theoretical and practical approaches to the understanding of human behavior within a social context.

*Satisfies GWAR: Graduation Writing Assessment Requirement*

**Prerequisite(s):** PSYC 154 (or equivalent).  
**Grading:** Graded

**Note(s):** This course satisfies graduate-level GWAR in this master's program.

**PSYC 255 - Seminar in Learning**

3 unit(s)  
Current problems in learning with primary emphasis on learning theory.

**Prerequisite(s):** PSYC 155 (or equivalent).  
**Grading:** Graded

**PSYC 256 - Seminar in Perception**

3 unit(s)  
Selected issues in visual sensation and perception. Topics include the perception of color, form, depth and motion. Emphasis on the relationship of perception to sensory physiology.

**Prerequisite(s):** PSYC 158 (or equivalent).  
**Grading:** Graded

**PSYC 258 - Methods of Psychotherapy**

3 unit(s)  
Survey of the theoretical background and practical application of various approaches to psychotherapy.

**Prerequisite(s):** PSYC 139.
Grading: Graded

Note(s): MS program priority.

**PSYC 260 - Crisis and Trauma Counseling**

3 unit(s)
Advanced course on trauma including strategies for assessing, managing, short and long term- treatment for acute and chronic stress reactions. Empirically supported risk and protective factors, and evidence-based treatments are covered. Resilience, personal, multidisciplinary, and community perspectives are emphasized.

**Prerequisite(s):** PSYC 203A and Graduate Standing in MS Psychology program
**Grading:** Graded

**PSYC 270 - Seminar in Industrial and Organizational Psychology**

3 unit(s)
Psychological theory, research and practice in organizations. Topics emphasized include motivation, job satisfaction, communication, leadership, group processes, decision-making, conflict, cooperation, power and organization development and change.

*Satisfies GWAR: Graduation Writing Assessment Requirement*

**Prerequisite(s):** Instructor consent.
**Grading:** Graded

Note(s): MS I/O program priority. This course satisfies graduate-level GWAR in this master's program.

**PSYC 271 - Seminar in Personnel Psychology**

3 unit(s)
In-depth introduction to relevant methodology, research, applications and issues. Topics include legal issues in personnel, test validation, selection, job analysis, performance appraisal and training and development.

**Prerequisite(s):** Instructor consent.
**Grading:** Graded

Note(s): MS I/O program priority.

**PSYC 272 - Training and Development in Organizations**

3 unit(s)
Course will address ‘classic’, current, and future issues in training and development. Topics covered include theories of learning, needs assessment, training methodology, program evaluation, management development, and trends that may influence future training and development programs.

**Prerequisite(s):** Instructor consent.
**Grading:** Graded

**PSYC 273 - Seminar in Human Factors**
3 unit(s)
Data and theory of sensory and cognitive psychology and their application to the design of systems used by humans.

**Prerequisite(s):** PSYC 135 and PSYC 158 (or equivalent).
**Grading:** Graded

*PSYC 275 - Professional Issues in I/O Psychology*

3 unit(s)
Address topics and issues faced by I/O psychologists working within organizational settings. Review and analysis of research regarding the application of psychological theory, concepts, and research methodologies. Evaluation and discussion of early career-related ethical issues and professional challenges and strategies.

*Course may be repeated for credit for up to 6 units.*

**Prerequisite(s):** PSYC 270 and graduate standing in MS I/O Psychology program
**Grading:** Graded

*PSYC 276 - Groups at Work*

3 unit(s)
Group process and performance, types of work groups and tasks, group development (norms, roles and strategies), group leadership approaches and skills, decision-making, team building, high performing and self managing teams.

**Prerequisite(s):** Instructor consent.
**Grading:** Graded

*PSYC 280 - General Seminar*

3 unit(s)
Current psychological literature in selected fields and the development of a specific topic by the student.

*Satisfies GWAR: Graduation Writing Assessment Requirement*

**Prerequisite(s):** Undergraduate major in psychology (or equivalent).
**Grading:** Graded

**Note(s):** This course satisfies graduate-level GWAR in this master's program.

*PSYC 291 - Method and Design for Applied Research*

3 unit(s)
Development and management of applied research programs based on contributions of psychological research and methodology. Criticizing existing and proposed research. Reporting and communicating research results.

**Prerequisite(s):** PSYC 18 or PSYC 120A; STAT 95 and STAT 115.
**Grading:** Graded

**Note(s):** MS program priority.
3 unit(s)
Theory and practice of organization development, including systems thinking; action research; organization assessment and diagnosis; survey development and feedback; individual, group, inter-group and organization-wide interventions; consultant roles; and ethics of practice in organizations.

Prerequisite(s): Instructor consent.
Grading: Graded

PSYC 295 - Substance Abuse, Human Sexuality, and Life-Span Issues for Therapists

3 unit(s)
An examination of current issues in marriage and family therapy related to substance use, sexual issues, and development across the lifespan. Course will cover theories and contemporary issues in these areas with an emphasis on application in treatment.

Grading: Graded

PSYC 298 - Special Problems

1-6 unit(s)
Advanced work in areas not covered in any regular course offering. Course is repeatable for a maximum of four units.

Course may be repeated for credit for up to 6 units.

Prerequisite(s): Instructor consent.
Grading: Mandatory CR/NC/RP

PSYC 299 - Master's Thesis or Project

1-6 unit(s)
Five units required for the M.A.; six units for the M.S.

Prerequisite(s): Admission to candidacy for the MA or MS degree and thesis chair permission.
Grading: Mandatory CR/NC/RP

PSYC 1290R - Culminating Experience Supervision

1 unit(s)
Continued work on thesis or project unless concurrently enrolled in another SJSU course

Course may be repeated for credit for up to 16 units.

Prerequisite(s): Outstanding RP grade in a preceding semester in a project or thesis class
Grading: CR/NC, No Degree Credit

Note(s): No Degree Credit.

STAT 95 - Elementary Statistics

3 unit(s)
Hypothesis testing and predictive techniques to facilitate decision-making; organization and classification of data, descriptive and inferential statistics, central tendency, variability, probability and sampling distributions, graphic
representation, correlation and regression, chi-square, t-tests, and analysis of variance. Computer use in analysis and interpretation.

*Satisfies B4: Mathematical Concepts*

**Prerequisite(s):** Math Enrollment Category M-I or M-II, or completion of a GE Area B4 course with a grade of C- or better.

**Grading:** Graded

**Note(s):** Intended for Psychology majors and minors as well as for programs in Behavioral Science, Child Development, Education, Health Science, Nursing, Nutritional Science, Social Science, and Social Work.

**STAT 115 - Intermediate Statistics**

3 unit(s)
Statistical analysis at the intermediate level; chi-square, analysis of variance, correlation and regression, and topics in experimental design; use of microcomputers for statistical calculations.

**Prerequisite(s):** STAT 95 (or equivalent).

**Grading:** Graded

**Note(s):** Intended for majors in education, nursing, personnel administration, psychology, social service and sociology, and psychology minors.

**STAT 235 - Multivariate Analysis**

3 unit(s)
Multivariate techniques for analyzing social science data with emphasis on multiple regression, multivariate analysis of variance, factor analysis, discriminant analysis and canonical correlation.

**Prerequisite(s):** STAT 115 or instructor consent.

**Grading:** Graded

**STAT 245 - Advanced Statistics**

3 unit(s)
Advanced problems in statistical analysis. Advanced consideration of hypothesis testing, estimation and analysis of variance.

**Prerequisite(s):** STAT 115 or instructor consent.

**Grading:** Graded

Overview

The Department of Sociology and Interdisciplinary Social Sciences educates students about the social processes that create, maintain, and transform our society. The major uses sociological foundations and applications as well as interdisciplinary approaches to the study of society and in teacher education training. Sociologists analyze how social institutions and social structures such as the economy, politics, education, the family, mass media, and the criminal justice system affect individuals in society. The major provides students with the skills and knowledge to navigate the social, political, economic, historical, and cultural issues that build and sustain effective leadership in our complex global society. The teacher preparation program is designed to ensure that teachers will excel in classrooms that are increasingly heterogeneous in terms of race and ethnicity.

We have two major degree program tracks: Sociology, Sociology with Concentrations (Community Change; Race and Ethnic Studies; Social Interaction; Women, Gender and Sexuality Studies); Social Science Teacher Preparation (Multiple and Single Subject). The department offers several minor courses of study: Asian American Studies, Sociology, Sociology of Education, and Women, Gender and Sexuality Studies. These degree programs lead to careers in education, government and public policy, criminal justice, nonprofit organizations, marketing research, human resource management, social work, and other areas.

Undergraduate

Sociology, BA
The BA in Sociology, offered by the Department of Sociology and Interdisciplinary Social Sciences, educates students about social processes that create, maintain, and transform social institutions and social identities. Sociology provides a framework for understanding social behavior in groups, social change and inequality in society, and solutions to social problems. Analytical and research skills speak to the needs of a changing world. The degree offers students the widest flexibility in terms of future career choices.

- Program Learning Outcomes

Summary of Degree Units

University Graduation Requirements 44

Major Requirements 39

University Electives 37

Total 120

University Requirements for Graduation

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Undergraduate Graduation Requirements section of the Policies and Procedures.

Program Roadmaps

The 4-Year Roadmap is available online. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Degrees (ADT) Pathways are also available online.

General Education/American Institution Requirements

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

University Requirements (44 units)

Core Lower Division General Education (27 units)

Of the 39 units required by the university, 12 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

Note: Students who have completed the ADT Transfer degree (under SB 1440) for this major will have completed all lower division GE requirements and should follow the 60 unit guarantee roadmap. Meet with an advisor prior to registering for your first semester for the 60 unit roadmap or specific questions.

Upper Division General Education (6 units)

Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions (6 units)
The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B, HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Complete One Sequence From:

African American Studies (6 units)

- AFAM 2A - African Americans and the Development of America’s History and Government 3 unit(s) (D2)
- AFAM 2B - African Americans and the Development of America’s History and Government 3 unit(s) (M7)

Asian American Studies (6 units)

- AAS 33A - Asian Americans in U.S. History I 3 unit(s) (D2)
- AAS 33B - Asian Americans in U.S. History II 3 unit(s) (M7)

U.S. History and Government (6 units)

- HIST 15 - Essentials of U.S. History 3 unit(s) (M12)
- POLS 15 - Essentials of U.S. & California Government 3 unit(s) (M11)

Chicana and Chicano Studies (6 units)

- CCS 10A - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D2)
- CCS 10B - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (M7)

Physical Education (2 units)

Graduation Writing Assessment Requirement (3 units)

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

- SOCI 100W - Writing Workshop 3 unit(s) (Z)

Major Requirements (39 units)

Core Courses (24 units)

- SOCI 1 - Introduction to Sociology 3 unit(s) (D1)
- SOCI 80 - Social Problems 3 unit(s) (D3)
- SOCI 101 - Social Theory 3 unit(s)
- SOCI 104 - Quantitative Research Methods 3 unit(s)
- SOCI 105 - Qualitative Research Methods 3 unit(s)
• SOCI 116 - Global Society 3 unit(s)

Complete One Course From:

• SOCI 102 - Introduction to Statistics 3 unit(s)
• SOCI 15 - Statistical Applications in the Social Sciences 3 unit(s) (B4) (UNVS 15F and UNVS 15S may be used in lieu of the statistics course required by this major.)

Complete One Course From:

• SOCI 104B - Advanced Quantitative Research Methods 3 unit(s)
• SOCI 105B - Advanced Qualitative Research Methods 3 unit(s)
• SOCI 181B - Sociology Career Capstone 3 unit(s)

Additional Requirements (15 units)

Complete One Course From:

• SOCI 118 - Sociology of Human Rights and Social Justice 3 unit(s)
• SOCI 140 - Sociology of Media 3 unit(s)
• SOCI 146 - Work, Power, and Leisure 3 unit(s)
• SOCI 160 - Immigration and Identity 3 unit(s)
• SOCI 161 - City Life 3 unit(s)
• SOCI 162 - Race and Ethnic Relations 3 unit(s) (S)
• SOCI 163 - Social Change 3 unit(s)
• SOCI 164 - Social Action 3 unit(s)
• SOCI 165 - Poverty, Wealth and Privilege 3 unit(s)
• SOCI 166 - Medical Sociology 3 unit(s)
• SOCI 169 - Political Sociology 3 unit(s)
• SOCI 177 - Sociology of Education 3 unit(s)

Complete One Course From:

• SOCI 151 - Violence in the Family 3 unit(s)
• SOCI 154 - Sociology and Non-Conforming Behavior 3 unit(s)
• SOCI 170 - Sociology of Family 3 unit(s)
• SOCI 171 - Person and Society 3 unit(s)
• SOCI 172 - Lesbian, Gay, Bi, Transgender Studies 3 unit(s)
• SOCI 173 - Socialization and Identity 3 unit(s)
• SOCI 174 - Sexualities 3 unit(s)
• SOCI 175 - Sociology of Masculinities and Femininities 3 unit(s)
• SOCI 176 - Sociology of Everyday Life 3 unit(s)
• SOCI 178 - Sociology of Childhood 3 unit(s)
• Select any additional three upper division Sociology courses including those listed above* 9 unit(s)
University Electives (37 units)

A minor is strongly recommended.

Total Units Required (120 units)

*SOCI 120, SOCI 180, SOCI 196 (Experimental Courses) and SOCI 199H may be applied to the major when they have direct relevance; such relevance is determined by advisor.

Double major or double concentration requirements: contact the Department of Sociology and Interdisciplinary Social Sciences for an appointment with the department chair.

U.S. History and Government (6 units)

- HIST 15 - Essentials of U.S. History 3 unit(s) (M12)
- POLS 15 - Essentials of U.S. & California Government 3 unit(s) (M11)

Chicana and Chicano Studies (6 units)

- CCS 10A - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D2)
- CCS 10B - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (M7)

Physical Education (2 units)

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

A grade of C or better (C- not accepted) is required to meet graduation requirement.
Major Requirements (42-43 units)

Core Courses (27 units)

- SOCI 1 - Introduction to Sociology 3 unit(s) (D1)
- SOCI 15 - Statistical Applications in the Social Sciences 3 unit(s) (B4) *(UNVS 15F and UNVS 15S may be used in lieu of the statistics course required by this major.)*
- SOCI 80 - Social Problems 3 unit(s) (D3)
- SOCI 100W - Writing Workshop 3 unit(s) (Z)
- SOCI 101 - Social Theory 3 unit(s)
- SOCI 104 - Quantitative Research Methods 3 unit(s)
- SOCI 105 - Qualitative Research Methods 3 unit(s)
- SOCI 116 - Global Society 3 unit(s)

Complete One Course From:

- SOCI 104B - Advanced Quantitative Research Methods 3 unit(s)
- SOCI 105B - Advanced Qualitative Research Methods 3 unit(s)
- SOCI 181B - Sociology Career Capstone 3 unit(s)

Additional Requirements (15-16 units)

Concentration Core (3 units)

Complete one course from:

- AAS 185 - Multicultural Perspectives within American Society 3 unit(s)
- SOCI 162 - Race and Ethnic Relations 3 unit(s) (S)

Race and Ethnic Studies Breadth (12-13 units)

Complete One Course from Each of the Following Areas

Area 1- Asian American Studies (3-4 units)

- AAS 125 - Filipino Experience in the United States 3 unit(s)
- AAS 133 - Introduction to Social Issues in Planning 4 unit(s)
- AAS 170 - Special Topics in Asian American Studies 3 unit(s)
- AAS 175 - Asian American Communities 3 unit(s) (S)
- AAS 186 - The Vietnamese Experience in America 3 unit(s)

Area 2- African American Studies (3 units)

- AFAM 112 - African Immigrant Communities in the U.S. 3 unit(s)
- AFAM 120 - Sociology of African American Communities 3 unit(s)
- AFAM 125 - The Black Family: Historical/Contemporary Realities 3 unit(s)
• AFAM 134 - The Black Civil Rights Movements 3 unit(s)

Area 3- Chicana and Chicano Studies (3 units)

• CCS 115 - Chicana/o Families 3 unit(s)
• CCS 120 - Political Economy and Chicana/o Communities 3 unit(s)
• CCS 125 - Chicana/o Community Studies 3 unit(s)
• CCS 127 - Chicanas/os and the Criminal Justice System 3 unit(s)
• CCS 130 - Chicanas and Chicanos in American Society 3 unit(s) (S)
• CCS 135 - Contemporary Chicana/o Issues 3 unit(s)

Area 4- Native American Studies (3 units)

• ANTH 164 - North America before 1492 3 unit(s)
• ANTH 175 - Anthropology of Native America 3 unit(s)
• ANTH 176 - Native California: Past and Present 3 unit(s)
• SOCI 142 - Critical Native American Studies 3 unit(s)

University Electives (36-37 units)

A minor is strongly recommended.

University Requirements for Graduation

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Undergraduate Graduation Requirements section of the Policies and Procedures.

Program Roadmaps
The 4-Year Roadmap is available online. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Degrees (ADT) Pathways are also available online.

**General Education/American Institution Requirements**

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

**University Requirements (41 units)**

**Core Lower Division General Education (27 units)**

Of the 39 units required by the university, 12 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

**Note:** Students who have completed the ADT Transfer degree (under SB 1440) for this major will have completed all lower division GE requirements and should follow the 60 unit guarantee roadmap. Meet with an advisor prior to registering for your first semester for the 60 unit roadmap or specific questions.

**Upper Division General Education (6 units)**

Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.

**American Institutions (6 units)**

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B, HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

**Complete One Sequence From:**

**African American Studies (6 units)**

- AFAM 2A - African Americans and the Development of America's History and Government 3 unit(s) (D2)
- AFAM 2B - African Americans and the Development of America's History and Government 3 unit(s) (M7)

**Asian American Studies (6 units)**

- AAS 33A - Asian Americans in U.S. History I 3 unit(s) (D2)
- AAS 33B - Asian Americans in U.S. History II 3 unit(s) (M7)

**U.S. History and Government (6 units)**

- HIST 15 - Essentials of U.S. History 3 unit(s) (M12)
- POLS 15 - Essentials of U.S. & California Government 3 unit(s) (M11)
Chicana and Chicano Studies (6 units)

- CCS 10A - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D2)
- CCS 10B - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (M7)

Physical Education (2 units)

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Major Requirements (42 units)

Core Courses (27 units)

- SOCI 1 - Introduction to Sociology 3 unit(s) (D1)
- SOCI 80 - Social Problems 3 unit(s) (D3)
- SOCI 100W - Writing Workshop 3 unit(s) (Z)
- SOCI 101 - Social Theory 3 unit(s)
- SOCI 104 - Quantitative Research Methods 3 unit(s)
- SOCI 105 - Qualitative Research Methods 3 unit(s)
- SOCI 116 - Global Society 3 unit(s)

Complete One Course From:

- SOCI 15 - Statistical Applications in the Social Sciences 3 unit(s) (B4) (UNVS 15F and UNVS 15S may be used in lieu of the statistics course required by this major.)
- SOCI 102 - Introduction to Statistics 3 unit(s)

Complete One Course From:

- SOCI 104B - Advanced Quantitative Research Methods 3 unit(s)
- SOCI 105B - Advanced Qualitative Research Methods 3 unit(s)
- SOCI 181B - Sociology Career Capstone 3 unit(s)

Social Interaction Concentration (15 units)

- SOCI 173 - Socialization and Identity 3 unit(s)

Complete Three Courses From:

- SOCI 140 - Sociology of Media 3 unit(s)
- SOCI 151 - Violence in the Family 3 unit(s)
• SOCI 154 - Sociology and Non-Conforming Behavior 3 unit(s)
• SOCI 171 - Person and Society 3 unit(s)
• SOCI 174 - Sexualities 3 unit(s)
• SOCI 176 - Sociology of Everyday Life 3 unit(s)
• SOCI 178 - Sociology of Childhood 3 unit(s)

Complete One Course From:

• SOCI 160 - Immigration and Identity 3 unit(s)
• SOCI 161 - City Life 3 unit(s)
• SOCI 162 - Race and Ethnic Relations 3 unit(s) (S)
• SOCI 166 - Medical Sociology 3 unit(s)
• SOCI 177 - Sociology of Education 3 unit(s)

University Electives (37 units)

A minor is strongly recommended.

Total Units Required (120 units)

SOCI 120, SOCI 180, SOCI 196, and SOCI 199H may be applied to the major when they have direct relevance to the concentration; such relevance is determined by approval of an advisor.

**Sociology, Women, Gender, and Sexuality Studies Concentration, BA**

The Women, Gender, and Sexuality Studies Program, offered by the Department of Sociology and Interdisciplinary Social Sciences at San Jose State, is committed to interdisciplinary scholarship and teaching based on global feminist frameworks. WGSS curriculum investigates how lives are shaped by gender and gender identity, race, class, sexuality, and nation. The program emphasizes the importance of understanding gender as integral to social and political structures of power. Students will obtain skills to cultivate critical thinking, cultivation of dialogue, coalition building, appreciation of diversity, and contribution to social change based on feminist frameworks. The goal of the WGSS program includes integrating the academic and experiential, thereby contributing to social change and justice.

Master

Sociology, MA (Not Accepting Students)

• Admissions Requirements
• Requirements for Advancement to Graduate Candidacy
• Requirements for Graduation
• Master's Requirements (30 units)
• Program Learning Outcomes

Admissions Requirements

The Department of Sociology and Interdisciplinary Social Sciences at San José State University offers a General MA Degree in Sociology. The program is designed to prepare students for entry into PhD programs and to provide skills and training necessary for employment as professional sociologists and other related occupations. We are looking for students who are curious about the social world, academically dedicated, and committed to the examination of society. Information about the program can be found on the department website: sjsu.edu/siss/academics/grad.

Applicants must meet all of the university admission requirements as established by the university catalog. The Department of Sociology and Interdisciplinary Social Sciences sets criteria for admission into the Sociology Master of Arts Program that are higher than the base standards established by the university. The requirements of the Department of Sociology and Interdisciplinary Social Sciences are as follows:

• An earned baccalaureate at an accredited college or university with a grade point average of 3.0 (on a 4-point scale).
• Completion of the following prerequisite coursework with a grade of "B" or better: sociological theory (SOCI 101 or equivalent), research methods (SOCI 104 or equivalent), and social science statistics (SOCI 15 or SOCI 102 or equivalent).

• An approximately 1,000-word statement of purpose discussing the applicant's purpose for pursuing an MA degree in Sociology, the applicant's areas of interest and previous academic/professional experience, and the applicant's career goals.

• Two letters of recommendation from faculty members who can assess the applicant's potential for graduate level work in Sociology. In certain cases, one letter may be from an employer who can attest to the applicant's ability and potential for graduate work.

• A writing sample that consists of a 6- to 10-page paper (or portion of a paper) that highlights the applicant's writing ability and analytical skills.

Depending on whether or not they have completed the prerequisite requirements, applicants can be admitted in either classified or conditionally classified standing. Students admitted in conditionally classified standing will need to complete any missing prerequisite courses and pass them with a grade of "B" or better within 2 semesters of being admitted. Students who do not do meet this requirement will be disqualified from the program.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE.

Requirements for Advancement to Graduate Candidacy

After completing a minimum of 9 units of letter-graded instruction at the graduate level (with at least a "B" average), students may apply to candidacy. Additionally, admission to candidacy requires:

• An approved program of study consisting of 30 units, developed in consultation with the graduate advisor and in conformity with university and departmental requirements; and

• Completion of the Graduation Writing Assessment Requirement (GWAR). The university requires that all graduate students complete the GWAR as a condition for advancement to candidacy. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Further requirements of the department for advancement to candidacy include submission of a declaration of a plan of study to the department's Graduate Committee, detailing the student's intent to complete either a special study project (SOCI 298) or a thesis (SOCI 299). If the plan is deemed satisfactory, the student will be advanced to candidacy.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Department Graduation Requirements
Requirements for the MA in Sociology include 30 units of graduate level course work. All students are required to complete SOCI 200, SOCI 201, SOCI 204, and SOCI 205 with a grade of "B" or better. With approval of the department's graduate coordinator, up to 9 units of upper-division undergraduate course work in Sociology, graduate-level non-sociology course work, or a combination of the two, may count toward the total 30-unit requirement.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

This requirement is satisfied by passing SOCI 201.

Culminating Experience

Plan A (Thesis)

Students selecting the thesis option must demonstrate research and writing competency and show the ability to conduct independent research. Upon successful completion of the four required core courses and after receiving approval from the Graduate Committee for the declared program of study, the student selects a thesis committee consisting of at least three members, two of whom must be from the faculty in the Sociology Department. The chair of the committee must also be a tenured or tenure-track faculty member in the department. The student may enroll in up to 6 units of thesis/research hours (SOCI 299) with the professor designated as chair of the committee. The student must successfully pass a final oral defense of the thesis and the thesis must meet university requirements as stipulated in this catalog and in the SJSU Master's Thesis and Doctoral Dissertation Guidelines.

Plan B (Project)

After the successful completion of the four required core courses and after receiving approval from the graduate committee for the declared program of study, the student enrolls in 3 units of SOCI 298 with the professor who is selected as the student's advisor. The Project option involves a written paper that investigates or analyzes some facet of a social problem; the exact nature and scope of the project is determined by the student in consultation with his or her advisor.

Master's Requirements (30 units)

Core Courses (12 units)

- SOCI 200 - Sociological Practice 3 unit(s)
- SOCI 201 - Graduate Sociological Theory 3 unit(s) (GWAR)
- SOCI 204 - Quantitative Data Analysis 3 unit(s)
- SOCI 205 - Seminar in Qualitative Research Methods 3 unit(s)

Electives (12-15 units)

12 units 200-level Sociology electives planned in consultation with the Graduate Coordinator. Up to 6 units may be approved 100-level courses in Sociology or 200-level courses in another department. Students in the Plan B (Project) option take 15 units of elective coursework.

Culminating Experience (3-6 units)
Complete One Option (Plan A Thesis or Plan B Project):

Plan A (Thesis) (6 units)
- SOCI 299 - Master's Thesis or Project 1-6 unit(s)
- Oral Thesis Defense

Plan B (Project) (3 units)
- SOCI 298 - Special Study 1-4 unit(s)

Total Units Required (30 units)

Elective courses must be planned in consultation with the Graduate Coordinator.

In all plans, students may have only 12 units of C/NC courses.

The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 15.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

**Minor**

**Asian American Studies Minor**

**University Graduation Requirements**

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

**Minor Requirements (15 units)**

**Required Courses (9 units)**
- AAS 33A - Asian Americans in U.S. History I 3 unit(s) (D2)
- AAS 33B - Asian Americans in U.S. History II 3 unit(s) (M7)
- AAS 175 - Asian American Communities 3 unit(s) (S)

**Additional Course (3 units)**

Complete one course from:
- AAS 185 - Multicultural Perspectives within American Society 3 unit(s)
- WOMS 160 - Queering Gender, Race, and Class 3 unit(s)

**Electives (3 units)**
Complete one course from:

- AAS 125 - Filipino Experience in the United States 3 unit(s)
- AAS 170 - Special Topics in Asian American Studies 3 unit(s)
- AAS 186 - The Vietnamese Experience in America 3 unit(s)

Total Units Required (15 units)

**Sociology Minor**

The minor in sociology complements a large number of majors including any of the social sciences, business, journalism, radio and TV, child development, justice studies, kinesiology, education, social work and others. SOCI 1 and any other five sociology courses, at least three of which must be upper division = 18 total semester units required for the minor.

**University Graduation Requirements**

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

**Minor Requirements (18 units)**

- SOCI 1 - Introduction to Sociology 3 unit(s) (D1)
- Other courses approved by the minor advisor, at least three of which must be upper division*

Total Units Required (18 units)

*SOCI 120, SOCI 180, SOCI 196 Experimental Courses and SOCI 199H may be applied to the major when they have direct relevance; such relevance is determined by advisor.

**Sociology of Education Minor**

**Program Coordinator:** Professor Peter Chua  
**Office:** DMH 223  
**Phone:** 408-924-5330  
**Email:** peter.chua@sjsu.edu

California's K-12 public school population has undergone a major demographic change in the last decade. Educational policy leaders are concerned with educational equity, graduation rates, attrition, retention, and increasingly segregated schools. Preparation for the changing landscape of K-12 education includes analyzing, assessing, and developing sound policy recommendations to ensure that public schools are meeting the needs of the diverse student population. The Sociology of Education minor provides students with the latest research and reports on the status of education on a local, state, national, and international level.

**University Graduation Requirements**

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

**Minor Requirements (18 units)**
In the course listings below, click on the course title to view the course description. GE areas are shown in parentheses. See General Education Course Attributes in the SJSU Catalog for definitions of codes.

Required Courses (6 units)

- SOCI 1 - Introduction to Sociology 3 unit(s)
- SOCI 177 - Sociology of Education 3 unit(s)

Minor Electives (12 units)

Complete four courses:

- SOCI 143 - Feminist Perspectives on Gender and Education 3 unit(s)
- SOCI 144 - Education for Liberation 3 unit(s)
- SOCI 147 - Education and Global Justice 3 unit(s)
- SOCI 148 - Current Topics and Trends in Education 3 unit(s)
- SOCI 162 - Race and Ethnic Relations 3 unit(s)
- SOCI 179 - Sociology of Higher Education 3 unit(s)
- CCS 185 - Teaching in a Diverse Society 3 unit(s)

Total Units Required (18 units)

Women, Gender, and Sexuality Studies Minor

Overview

The Women, Gender, and Sexuality Studies Program at San Jose State is committed to interdisciplinary scholarship and teaching based on global feminist frameworks. WGSS curriculum investigates how lives are shaped by gender and gender identity, race, class, sexuality, and nation. The program emphasizes the importance of understanding gender as integral to social and political structures of power. Students will obtain skills to cultivate critical thinking, cultivation of dialogue, coalition building, appreciation of diversity, and contribution to social change based on feminist frameworks. The goal of the WGSS program includes integrating the academic and experiential, thereby contributing to social change and justice.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Requirements (15 units)

Required Courses (12 units)

- WOMS 10 - Women, Gender, and Sexuality Studies 3 unit(s) (D1)

Complete Nine Units From:
WOMS 20 - Women of Color in the US 3 unit(s) (D2)
WOMS 101 - Sex, Power, and Politics 3 unit(s) (S)
WOMS 102 - The Global Study of Women 3 unit(s) (V)
WOMS 112 - Women in the Global Economy 3 unit(s)
WOMS 114 - Politics of Mothering and Reproduction 3 unit(s)
WOMS 160 - Queering Gender, Race, and Class 3 unit(s)
WOMS 169 - Sexualities and the Body 3 unit(s)
WOMS 189 - Islamic Perspectives on Gender 3 unit(s)

Electives (3 units)

Complete one course from:

- CCS 160 - Gender and Sexuality in the Chicana/o Community 3 unit(s) (S)
- SOCI 172 - Lesbian, Gay, Bi, Transgender Studies 3 unit(s)
- SOCI 174 - Sexualities 3 unit(s)
- WOMS 107 - Psychology of Women 3 unit(s)
- WOMS 131 - Gender, Sexuality, and Religion 3 unit(s)
- WOMS 156 - Black Women Writers: Race, Culture and Resistance 3 unit(s)
- WOMS 175 - Sociology of Masculinities and Femininities 3 unit(s)
- WOMS 180 - Individual Studies 1-4 unit(s)
- WOMS 187 - Feminist Perspectives on Gender and Education in the U.S. 3 unit(s)
- WOMS 190 - Internship 1-4 unit(s)

Total Units Required (15 units)

AAS 20 - Women of Color in the US

3 unit(s)
Constructs knowledge of the historical and contemporary experience of women of color. Focuses on Native American, African American, Latina, and Asian American women and considers contributions they have made to the shaping of the nation.

Satisfies D2: Comparative Systems

Grading: Graded

AAS 25 - The Changing Majority: Power and Ethnicity in America

3 unit(s)
Comparative and historical analysis of racial minorities. Focus on Euro American response to American Indians, Asian Americans, African Americans and Mexican Americans to provide understanding of minority experience in the U.S. as well as American culture.

Satisfies D2: Comparative Systems

Grading: Graded

AAS 33A - Asian Americans in U.S. History I
3 unit(s)
Historical and political processes shaping U.S. culture, institutions and society from before European expansion to
the Civil War. Focus on the roles of workers, immigrants, and people of color from a comparative perspective.

Satisfies D2: Comparative Systems

Grading: Graded

Note(s): Must complete the entire sequence (AAS 33A and AAS 33B) to satisfy U.S. History, U.S. Constitution and
California Government (US1,2,3).

AAS 33B - Asian Americans in U.S. History II

3 unit(s)
Historical and political factors that shaped U.S. culture, institutions and society from the mid-nineteenth century to the
current era. Focus on experiences of Asian Americans as well as other immigrants and people of color.

Satisfies D3 + US123: Social Issues and American Institutions

Prerequisite(s): AAS 33A

Grading: Graded

Note(s): Must complete the entire sequence (AAS 33A and 33B) to satisfy U.S. History, U.S. Constitution and
California Government (US1,2,3).

AAS 125 - Filipino Experience in the United States

3 unit(s)
Filipinos in the United States beginning with immigration and culminating with analysis of past and contemporary
issues facing Filipino Americans.

Grading: Graded

AAS 133 - Introduction to Social Issues in Planning

4 unit(s)
Contemporary social issues related to urban and regional planning. Assessment of community social needs and
resident planning. Focus on ethnic areas such as African, Asian and Mexican American neighborhoods.

Prerequisite(s): Upper division standing or instructor consent.

Grading: Graded

AAS 145 - Urban Policy and Its Impact on Inner City Residents

4 unit(s)
Effects of public policy decisions on inner city populations. Implications of urban planning processes for differential
consumption costs of public goods and services.

Prerequisite(s): Upper division standing.

Grading: Graded

AAS 170 - Special Topics in Asian American Studies
Focus varies each semester and is announced in the schedule of classes. Repeatable for credit with program coordinator approval.

**Grading:** Graded

**AAS 175 - Asian American Communities**

3 unit(s)
Asian American demography, institutions and contemporary issues.

*Satisfies SJSU Studies S: Self, Society & Equality in US*

**Prerequisite(s):** Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

**Grading:** Graded

**Note(s):** All of SJSU Studies courses require completion of the WST and upper division standing.

**AAS 180 - Individual Studies**

1-4 unit(s)
Individual study and research.

**Prerequisite(s):** Not available to Open University Students.

**Grading:** Credit/No Credit

**AAS 185 - Multicultural Perspectives within American Society**

3 unit(s)
Examination of historical and sociocultural perspectives of American ethnic minorities. Theoretical and methodological approaches to the study of American ethnic minorities.

**Prerequisite(s):** Upper division or Graduate/PBAC standing.

**Grading:** Graded

**AAS 186 - The Vietnamese Experience in America**

3 unit(s)
The experience of Vietnamese refugees from their exodus after the end of the Vietnam War in 1975 to their resettlement in America, emphasizing processes by which a new immigrant group is incorporated into the society.

**Prerequisite(s):** Upper division standing.

**Grading:** Graded

**AAS 190 - Internship**

1-4 unit(s)
On-site experience with an Asian American community organization. Regular class meetings scheduled to discuss knowledge, skills and ideas related to the internship experience. Repeatable for credit with program coordinator approval.
Prerequisite(s): AAS 33B or instructor consent.

Grading: Credit/No Credit

AAS 192 - History of Japanese Americans

3 unit(s)
The Japanese in America from approximately 1800. Includes relocation, wartime conditions, post-war history and contemporary situations.

Grading: Graded

SOCI 1 - Introduction to Sociology

3 unit(s)
How does society affect individual behavior and how does individual behavior affect society? Influence of social institutions and arrangements (family, school, workplace, politics, etc.) on roles, groups, values. Basic sociological theories and methods. Careers, specializations. Required for majors, minors.

Satisfies D1: Human Behavior

Grading: Graded

SOCI 15 - Statistical Applications in the Social Sciences

3 unit(s)
Introduction to statistical applications, particularly statistical inference, including central tendency, variation, normal distributions, probability, estimation, hypothesis testing, measures of association, correlation, linear regression and the analysis of variance.

Satisfies B4: Mathematical Concepts

Prerequisite(s): Math Enrollment Category M-I, M-II, or M-III, or completion of a GE Area B4 course with a grade of C- or better. Corequisite weekly supported instruction required for Enrollment Category M-III, and recommended for M-II.

Grading: Graded

SOCI 80 - Social Problems

3 unit(s)
Sociological analysis of selected contemporary social problems such as housing and homelessness, economy and employment, environment and consumerism, family and divorce, crime and drugs, politics and media, race and gender, wealth and poverty, war and peace. Required for majors.

Satisfies D3: Social Issues/Ethnic Studies

Grading: Graded

SOCI 92 - International Program Studies

1-12 unit(s)
Grading: Mixed Grading
SOCI 100W - Writing Workshop

3 unit(s)
Practice in improvement of writing and research skills appropriate to the field of sociology, including formal reports, journals and articles. GE Area: Z.

Satisfies SJSU Studies Z: Written Communication II.

Prerequisite(s): SOCI 1; A3 or equivalent second semester composition course (with a grade of C- or better); completion of core GE; satisfaction of Writing Skills Test or completion of ENGL 100A / LLD 100A with C or better; and upper division standing. Allowed Declared Majors: Sociology, Behavioral Science, and Chicana Chicano Studies majors only. Or Graduate or Postbaccalaureate level.

Grading: Graded

Note(s): Required for Sociology Majors. Must be passed with C or better to satisfy the CSU Graduation Writing Assessment Requirement (GWAR).

SOCI 101 - Social Theory

3 unit(s)
Comparative analysis of micro and macro sociological theories and their origins, including, but not limited to, conflict theories, consensus theories, structural functionalism, symbolic interaction and recent theoretical developments. Required for majors.

Prerequisite(s): SOCI 1 (or equivalent) and upper division standing.
Pre/Corequisite(s): SOCI 100W.

Grading: Graded

SOCI 102 - Introduction to Statistics

3 unit(s)
Introduction to measures of central tendency, variation, correlation and regression, probability, estimation and hypothesis testing.

Prerequisite(s): SOCI 1 (or equivalent).

Grading: Graded

SOCI 103 - SPSS Computer Analysis

1 unit(s)
Statistical analysis of social science data using SPSS. Online course with periodic required on-campus meetings.

Misc/Lab: Activity 2 hours.

Prerequisite(s): SOCI 1 (or equivalent) and must have completed or be concurrently enrolled in an introductory statistics course.

Grading: Graded

SOCI 104 - Quantitative Research Methods

3 unit(s)
Quantitative research methods including survey research design, hypothesis formulation, questionnaire and interview
design, scaling, sampling and data preparation and SPSS analysis. Completion of a class research project plus individual research reports. Required for majors.

**Prerequisite(s):** SOCI 1 or equivalent, SOCI 15 or SOCI 102 or approved Statistics course from another school; SOCI 100W, SOCI 101 and upper division standing.

**Grading:** Graded

**SOCI 104B - Advanced Quantitative Research Methods**

3 unit(s)
Quantitative research project, typically applied, focused on a particular topic. Emphasis is given to research on local issues. Students will define research problems, design appropriate data gathering methods, collect data, conduct data analyses, and submit written research reports in professional formats.

**Prerequisite(s):** SOCI 1, SOCI 15 or SOCI 102, SOCI 100W, SOCI 101, SOCI 104.

**Grading:** Graded

**SOCI 105 - Qualitative Research Methods**

3 unit(s)
Philosophy and logic of research design, interviewing techniques, field methods, issues of participant observation, theoretical perspectives, content analysis and qualitative microcomputer techniques. Required for Sociology majors.

**Prerequisite(s):** SOCI 1 or equivalent, SOCI 100W, SOCI 101 and upper division standing.

**Grading:** Graded

**SOCI 105B - Advanced Qualitative Research Methods**

3 unit(s)
Involves planning and conducting an in-depth research project utilizing interviews and/or participant observation. Students will design research project, collect data and take field-notes, code and analyze data, and write-up results. Project may involve exploration of a local issue.

**Prerequisite(s):** SOCI 1, SOCI 100W, SOCI 101 and SOCI 105.

**Grading:** Graded

**SOCI 116 - Global Society**

3 unit(s)
Examination of global social issues, evaluation of the impact of change on world communities and analysis of the response of specific groups to emerging problems and opportunities. Required for majors.

**Prerequisite(s):** SOCI 1 or equivalent.

**Grading:** Graded

**SOCI 118 - Sociology of Human Rights and Social Justice**

3 unit(s)
Analyze meanings and practices of human rights violation and promotion by exploring the social consequences of issues such as war crime, sexism, migrant rights, and social displacement and by reflecting on prevailing and alternative institutions for social justice.
**Prerequisite(s):** SOCI 1 or equivalent  
**Grading:** Graded

**SOCI 120 - Contemporary Social Issues**

3 unit(s)  
A current issue in contemporary society. Content differs each semester. Repeatable for 6 unit maximum of SOCI 120, SOCI 123 or any combination.

**Prerequisite(s):** SOCI 1 or equivalent  
**Grading:** Graded

**SOCI 122 - Women in the Second Half of Life**

3 unit(s)  
The roles and problems of the older woman in a changing society. Societal attitudes, stereotypes, employment and interaction patterns. Opportunity for focus on specific areas of interest.

**Prerequisite(s):** Upper division standing  
**Grading:** Graded

**SOCI 127 - Community-Based Participatory Research**

3 unit(s)  
This course integrates interdisciplinary theory and practice in developing a situated understanding of community-based participatory research (CBPR) toward redressing environmental inequities. Students will apply these theories and practices in their own environmental research and advocacy projects regarding local environmental issues.

**Prerequisite(s):** Upper Division Standing  
**Grading:** Graded

**SOCI 140 - Sociology of Media**

3 unit(s)  
Examines the historical development of popular mass media and its role in contemporary society. Explores the relationship between culture, social behavior, and various media forms. Analyzes how gender, race, class, and sexuality have been depicted and represented in media images.

**Prerequisite(s):** SOCI 1.  
**Grading:** Graded

**SOCI 141 - Environmental Sociology**

3 unit(s)  
This course will will analyze how human beings interact with their environment from both macro and micro sociological perspectives. The course will address a number of other relevant topics, including environmental classism, environmental racism and policy responses to environmental problems.

**Prerequisite(s):** Upper Division Standing  
**Grading:** Graded

**SOCI 142 - Critical Native American Studies**
Investigation of current and historical issues Indigenous peoples in the United States face or have faced. Unpacks the complex relationship Native nations have developed with the United States, and the impact the government-to-government relationship has on Indigenous societies.

**Grading:** Graded

**SOCI 143 - Feminist Perspectives on Gender and Education**

The role of gender in the educational system in the United States from both a historical and contemporary context. Focus on the significance of schools as the primary socializing institution for boys and girls.

**Prerequisite(s):** Junior standing or instructor consent.

**Grading:** Graded

**SOCI 144 - Education for Liberation**

Critical and sociological examination of attempts to address inequalities and disparities within community-oriented learning programs and movements. Focus on nonformal learning programs associated with workers¿ education, adult and lifelong education (including anti-literacy and popular theater), and pro-people popular education (related to national liberation, pro-democracy, human rights, antiracist, pro-migrant, feminist, and youth movements).

**Grading:** Graded

**SOCI 145 - Community Mental Health**

Comprehensive analysis of community mental health using a socio-ecological framework. Intersection of race, socioeconomic status, gender, sexual orientation, and mental health is examined. Emphasis is on prevention and recovery.

**Prerequisite(s):** Any 100W or instructor consent.

**Grading:** Graded

**SOCI 146 - Work, Power, and Leisure**

Explores power in organizational settings where we work and play, and how those settings affect the family, the economy and communities. Settings examined may include corporations, cooperatives, social change organizations, community organizations, non-profit organizations such as hospitals and schools.

**Prerequisite(s):** SOCI 1 or equivalent.

**Grading:** Graded

**SOCI 147 - Education and Global Justice**

Exploration of the relationship between formal education and social justice issues, as well as formulation and evaluation of solutions to educational problems and inequalities. Using global, comparative, cross-national, and Third World development evidence.
Grading: Graded

**SOCI 148 - Current Topics and Trends in Education**

3 unit(s)
Analysis of the current environment of sociology of education from both a macro and micro perspective through sociological, political, philosophical and economic perspectives. Includes the study of qualitative descriptions and quantitative trends of contemporary issues in the field of sociology of education.

Grading: Graded

**SOCI 151 - Violence in the Family**

3 unit(s)
A sociological examination of violence in families focusing on the causes and consequences of violence and on the ways in which various social institutions and community agencies respond to violence among intimates.

Prerequisite(s): SOCI 1.
Grading: Graded

**SOCI 154 - Sociology and Non-Conforming Behavior**

3 unit(s)
Sociological analysis of behavior outside of social conventions including crime, mental illness, suicide and chemical dependency.

Prerequisite(s): SOCI 1 or equivalent.
Grading: Graded

**SOCI 160 - Immigration and Identity**

3 unit(s)
Examination of topics related to immigration and population movements. Includes the historical context of major migrations, legal, political and social issues and debates, opportunities, prejudices, immigrant communities, intergenerational tensions, and social and personal identity pressures.

Prerequisite(s): SOCI 1 or equivalent.
Grading: Graded

**SOCI 161 - City Life**

3 unit(s)
The city as a setting for diverse lifestyles. Challenges facing urban dwellers and adaptive strategies they take. Comparison of city, suburb and rural countryside as social environments.

Prerequisite(s): Upper Division or instructor consent
Grading: Graded

**SOCI 162 - Race and Ethnic Relations**
3 unit(s)
Analysis of racial and ethnic groups in American society; contacts and conflicts; prejudice and discrimination; dominant and subordinate group status; social structure of racial and ethnic inequality within society. Comparison of global race and ethnic relations. GE Area: S.

Satisfies SJSU Studies S: Self, Society & Equality in US.

Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

SOCI 163 - Social Change

3 unit(s)
Analysis of causes, consequences and the role of individuals, organizations and social structures in producing social change.

Prerequisite(s): SOCI 1 or equivalent.
Grading: Graded

SOCI 164 - Social Action

3 unit(s)
The tactics and strategies of social action. Topics may include applying social action to the local community, studying current and past U.S. and international social action organizations, or examining theories of social movements. Repeatable once when content changes.

Prerequisite(s): SOCI 1 or equivalent.
Grading: Graded

SOCI 164SL - Social Action

3 unit(s)
The tactics and strategies of social action. Topics may include applying social action to the local community, studying current and past U.S. and international social action organizations, or examining theories of social movements. Repeatable once when content changes.

Prerequisite(s): SOCI 1 or equivalent.
Grading: Graded

SOCI 165 - Poverty, Wealth and Privilege

3 unit(s)
An examination of the causes and consequences of inequality along the dimensions of social class, race/ethnicity, gender, citizenship status, and/or sexualities. Approach may be local, national or global.

Prerequisite(s): SOCI 1 or equivalent.
Grading: Graded
SOCI 166 - Medical Sociology

3 unit(s)
Sociological analysis of medical and mental health institutions, values and roles. Patient-doctor interaction, influence of hospital structure on health care, social class and illness, cultural determinants of illness and related areas of old age (gerontology) and death.

Prerequisite(s): SOCI 1 or equivalent.
Grading: Graded

SOCI 169 - Political Sociology

3 unit(s)
Analysis of cultural, social and institutional foundations of political policies and actions. Emphasis on patterns affecting political behavior and processes in the industrialized and developing countries.

Prerequisite(s): SOCI 1 or equivalent.
Grading: Graded

SOCI 170 - Sociology of Family

3 unit(s)
Examines the historical development of family in the context of social, cultural, political, and economical inequalities, and how intersections of gender, race, class, nationality, sexuality, and age impact understandings of family and intimacy. Explores relationships within families and new family forms.

Prerequisite(s): SOCI 1.
Grading: Graded

SOCI 171 - Person and Society

3 unit(s)
Analyzes our "self" as socially created and maintained through everyday interactions. Explores how individuals manage and protect self identity in settings, e.g. school, family, work. Effects of race/ethnicity, gender, sexuality, and age on definitions of self and reality.

Prerequisite(s): SOCI 1 or instructor consent.
Grading: Graded

SOCI 172 - Lesbian, Gay, Bi, Transgender Studies

3 unit(s)
Explores lesbian, gay, bisexual, transgender, and intersex communities. Analyzes sexual behavior, attitudes, and identities from historical, cross-cultural, and "insider" and "outsider" perspectives. Presents social reactions to LGBT movements and persons. Includes current stereotypes, misinformation, and movements to achieve equality.

Prerequisite(s): SOCI 1.
Grading: Graded

SOCI 173 - Socialization and Identity
Personality formation in the context of family, social interaction and institutions of socialization such as workplace, family and community. Emphasis on childhood and the social processes that mold basic beliefs and values in the formation of adult identity.

Prerequisite(s): SOCI 1.
Grading: Graded

SOCI 174 - Sexualities

Examines diverse social constructions of sexual intimacy, meanings, identities, practices, and power embedded in relationships, communities and organizations. Sociological themes of morality, control, sexual citizenship, science and the production of sexual subjects, and the political economy of sex may be examined.

Prerequisite(s): SOCI 1.
Grading: Graded

SOCI 175 - Sociology of Masculinities and Femininities

Examination and analysis of social construction of gender through interaction and social institutions. Explores gender-based identities and how intersections of gender, race, class, and sexuality shape men's and women's experiences. Examines theories of gender and gender-based social movements.

Prerequisite(s): SOCI 1.
Grading: Graded

SOCI 176 - Sociology of Everyday Life

Examination of micro-sociology, small group processes, and interactions. Using the framework of Everyday Life, this includes studies of power, status, communication, cooperation, conflict resolution, task performance. Provides understanding of small formal and informal groups, work groups and intimate relationships.

Prerequisite(s): SOCI 1 or instructor consent
Grading: Graded

SOCI 177 - Sociology of Education

This course applies sociology of education theory to the analysis of the relationship between society and education. The course focuses on race/ethnicity, class and gender in the U.S. educational system.

Prerequisite(s): Upper division standing or instructor consent.
Grading: Graded

SOCI 178 - Sociology of Childhood

Examination of sociological issues, theories, and research on childhood from infancy to adolescence, including the role of social institutions in shaping the childhood experience and the emergence of peer cultures that change
societies.

**Prerequisite(s):** SOCI 1.

**Grading:** Graded

**SOCI 179 - Sociology of Higher Education**

3 unit(s)
This course will examine the institution of higher education and its relationship to and with society. The course will address a number of other relevant topics, including educational inequalities, student debt and consequences of policy.

**Prerequisite(s):** Upper division Standing

**Grading:** Graded

**SOCI 180 - Individual Studies**

1-4 unit(s)
**Prerequisite(s):** Instructor consent and department chair approval.

**Grading:** Credit/No Credit

**SOCI 181 - Service Internship**

1-6 unit(s)
Supervised placement in practical situations where sociologists are employed, including correctional services, community planning, industry, research, social action and social welfare agencies.

**Prerequisite(s):** SOCI 1 or equivalent, SOCI 100W, SOCI 101 and upper division standing, or graduate standing. Department Chair approval.

**Grading:** Credit/No Credit

**SOCI 181B - Sociology Career Capstone**

3 unit(s)
Capstone course to expand undergraduate senior opportunities and options. Analyzes trends in sociology; explores employment and careers, reflection and assessment of learning in the major.

**Prerequisite(s):** SOCI 1, SOCI 100W, SOCI 101, and SOCI 104 or SOCI 105.

**Grading:** Graded

**Note(s):** Students must have taken at least one of the required research method courses before enrolling in the capstone course.

**SOCI 192 - Int'l Program Studies**

1-12 unit(s)

**Grading:** Mixed Grading

**SOCI 193 - Behavioral Science in Practice**

3 unit(s)
Capstone workshop for behavioral science majors. Students assess methods and knowledge of anthropology,
psychology and sociology, and synthesize them by reflecting upon case studies of individual, organizational, community, and global issues. Emphasis is on cooperative learning, reflection and synthesis of skills and knowledge.

**Prerequisite(s):** Senior standing, declared major in Behavioral Science or Behavioral Science double major.
**Grading:** Graded

**SOCI 199H - Senior Honors Thesis**

*1-4 unit(s)*
Preparation and writing of an original project. Repeatable for a total of 4 units.

*Course may be repeated for credit for up to 4 units.*

**Prerequisite(s):** Sociology Honors Program student.
**Grading:** Mandatory CR/NC/RP

**SOCI 200 - Sociological Practice**

*3 unit(s)*
Introduces graduate students to the theoretically informed practice of sociology with a particular emphasis on the analysis of social problems. Covers topics such as program evaluation, community and institutional research, and policy advocacy.

**Prerequisite(s):** Graduate Standing
**Grading:** Graded

**SOCI 201 - Graduate Sociological Theory**

*3 unit(s)*
Introduction to the theories and concepts sociologists use in the study of society. The course emphasizes contemporary social theories, grounded in the classical canon of Marx, Durkheim, and Weber. Application of theory to contemporary social problems. Content may vary with instructor.

*Satisfies GWAR: Graduation Writing Assessment Requirement*

**Prerequisite(s):** Graduate Standing.
**Grading:** Graded

**Note(s):** This course satisfies graduate-level GWAR in this master's program.

**SOCI 204 - Quantitative Data Analysis**

*3 unit(s)*
Covers foundations of statistical analyses as well as the statistical techniques most commonly practiced by quantitative social science researchers such as univariate descriptive statistics, bivariate relationships, and multivariate modeling.

**Prerequisite(s):** Graduate Standing
**Grading:** Graded

**SOCI 205 - Seminar in Qualitative Research Methods**
3 unit(s)
Involves planning and conducting an in-depth research project utilizing interviews and/or participant observation. Students will design research project, collect data and take field-notes, code and analyze data, and write-up results. Project may involve exploration of a local issue.

**Prerequisite(s):** Graduate Standing
**Grading:** Graded

**SOCI 216 - Seminar in Global Topics**

3 unit(s)
Explores selected areas of interest in the sociological study of social processes, institutions, and organizations globally, transnationally, and internationally. Course content varies.

*Course may be repeated for credit for up to 6 units.*

**Prerequisite(s):** Graduate Standing
**Grading:** Graded

**SOCI 223 - Seminar in Sociological Issues**

3 unit(s)
Analysis of a current issue in sociology which is not covered by other graduate seminars. Content differs each semester. Repeatable once with advisor consent when content changes.

**Grading:** Graded

**SOCI 254 - Seminar in Deviance and Social Control**

3 unit(s)
Historical and comparative theories of deviance, its function in society and its relation to formal and informal systems of regulation and control.

**Grading:** Graded

**SOCI 262 - Seminar in Race and Ethnic Relations**

3 unit(s)
Analysis of sociological theories of race relations and racism, social structural conditions of race and racial identity formation, society's institutional policies and practices that affect racial inequality.

**Prerequisite(s):** Graduate Standing
**Grading:** Graded

**SOCI 263 - Seminar in Social Change**

3 unit(s)
Theories of the origins and processes of social change. Analysis of efforts to control or to produce social change. Problems of research on the causes, effects and prediction of social change.

**Grading:** Graded
SOCI 270 - Seminar in Sociology of Family

3 unit(s)
Comparative analysis of institutional forms and family small group systems including alternative life styles and minority families. Problems of the family. Changes in family roles and in family law.

**Prerequisite(s):** Graduate Standing  
**Grading:** Graded

SOCI 275 - Seminar in Gender Issues

3 unit(s)
Analysis of contemporary gender issues including an examination of existing gender theories and ways in which gender intersects with other forms of inequality. Focus on social institutions such as family, media, and workplace in order to examine the social, economic, and cultural factors that create gender and shape understandings of femininity and masculinity.

Course may be repeated for credit for up to 6 units.

**Prerequisite(s):** Graduate Standing  
**Grading:** Graded

SOCI 281 - Internship in Sociology

1-6 unit(s)
Supervised placement in practical situations where sociologists are employed: correctional services, community planning, industry, counseling agencies and others. Course is repeatable for a total of 6 units.

Course may be repeated for credit for up to 6 units.

**Grading:** Credit/No Credit

**Note(s):** Open to graduate students by arrangement with the department.

SOCI 298 - Special Study

1-4 unit(s)
Advanced individual research and projects. May not be related to thesis topic. Course is repeatable for a total of 4 units.

Course may be repeated for credit for up to 4 units.

**Prerequisite(s):** Consent of instructor and approval by graduate advisor or department chair.  
**Grading:** Mandatory CR/NC/RP

SOCI 299 - Master's Thesis or Project

1-6 unit(s)
Course may be repeated for credit for up to 6 units.

**Prerequisite(s):** Consent of thesis committee chair and approval by graduate advisor or department chair.  
**Grading:** Mandatory CR/NC/RP
SOCI 1290R - Culminating Experience Supervision

1 unit(s)
Continuing analysis of data and writing of thesis.

Course may be repeated for credit for up to 16 units.

Prerequisite(s): Outstanding RP in a preceding semester for a Thesis or Special Project course.
Grading: CR/NC, No Degree Credit

Note(s): No Degree Credit.

SOCS 15 - Statistical Applications in the Social Sciences

3 unit(s)
Introduction to statistical applications, particularly statistical inference, including central tendency, variation, normal distributions, probability, estimation, hypothesis testing, measures of association, correlation, linear regression and the analysis of variance.

Satisfies B4: Mathematical Concepts

Prerequisite(s): Math Enrollment Category M-I, M-II, or M-III, or completion of a GE Area B4 course with a grade of C- or better. Corequisite weekly supported instruction required for Enrollment Category M-III, and recommended for M-II.
Grading: Graded

SOCS 92 - Int'l Program Studies

1-12 unit(s)
Grading: Mixed Grading

SOCS 177 - Sociology of Education

3 unit(s)
This course applies sociology of education theory to the analysis of the relationship between society and education. The course focuses on race/ethnicity, class and gender in the U.S. educational system.

Prerequisite(s): Upper division standing or instructor consent.
Grading: Graded

SOCS 192 - International Program Studies

1-6 unit(s)
Grading: Mixed Grading

WOMS 5Q - Gender, Race & Sexuality in Media

3 unit(s)
This course uses a cultural studies approach to explore the production and consumption of contemporary media in our everyday lives with a focus on race, class, gender, sexuality, and nation.

Satisfies D1: Human Behavior
**Prerequisite(s):** First term freshmen only.
**Grading:** Graded

**Note(s):** All courses with a ‘Q’ suffix are designated as First Year Experience courses.

**WOMS 10 - Women, Gender, and Sexuality Studies**

3 unit(s)
Interdisciplinary introduction to core concepts and analytical tools addressing the diversity of human experience cross cut by gender, sexuality, embodiment, and class location. Students will become familiar with key contemporary and historical debates in both global and local contexts.

*Satisfies D1: Human Behavior*

**Grading:** Graded

**WOMS 20 - Women of Color in the US**

3 unit(s)
Constructs knowledge of the historical and contemporary experience of women of color. Focuses on Native American, African American, Latina, and Asian American women and considers contributions they have made to the shaping of the nation.

*Satisfies D2: Comparative Systems*

**Grading:** Graded

**WOMS 92 - Int'l Program Studies**

1-12 unit(s)
**Grading:** Mixed Grading

**WOMS 101 - Sex, Power, and Politics**

3 unit(s)
Multidisciplinary introduction to traditional and new images, roles, experiences, ethnic similarities and differences, and contemporary problems of American women. GE Area: S.

*Satisfies SJSU Studies S: Self, Society & Equality in US.*

**Prerequisite(s):** Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

**Grading:** Graded

**Note(s):** All of SJSU Studies courses require completion of the WST and upper division standing.

**WOMS 102 - The Global Study of Women**

3 unit(s)
Survey of literature on the interaction of gender and forces of globalism. GE Area: V.
Satisfies SJSU Studies V: Culture, Civil & Global Understanding.

**Prerequisite(s):** Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

**Grading:** Graded

**Note(s):** All of SJSU Studies courses require completion of the WST and upper division standing.

**WOMS 107 - Psychology of Women**

*3 unit(s)*
Sex-role development of women in terms of bio-social factors involved in intellectual and personal-emotional functions. Psychological theory and research.

**Prerequisite(s):** PSYC 1.
**Grading:** Graded

**WOMS 112 - Women in the Global Economy**

*3 unit(s)*
Women's participation in the economy, US and internationally: paid employment, consumption, subsistence labor, reproduction, volunteerism. It connects daily life activities with international economic trends, with particular attention to race, class, implications for families and strategies for equity.

**Prerequisite(s):** WOMS 10, WOMS 20, WOMS 101 or instructor consent.
**Grading:** Graded

**WOMS 114 - Politics of Mothering and Reproduction**

*3 unit(s)*
Explore contemporary definitions and values inscribed in issues pertaining to mothers and reproduction. It will be built upon three literatures: discourses of law and legality, discourses of nature and science, and discourses based in feminist thinking.

**Prerequisite(s):** Upper Division standing or instructor consent.
**Grading:** Graded

**WOMS 120 - Special Topics in Women's Studies**

*3 unit(s)*
Focus announced in the schedule of classes. Repeatable for credit with program coordinator approval.

**Prerequisite(s):** WOMS 10, WOMS 20, WOMS 101 or instructor consent.
**Grading:** Graded

**WOMS 121 - Philosophy and Feminism**

*3 unit(s)*
A philosophical examination of writings that deal with issues of special concern to women, with emphasis on feminist writings.
**WOMS 122 - Women in the Second Half of Life**

3 unit(s)
The roles and problems of the older woman in a changing society. Societal attitudes, stereotypes, employment and interaction patterns. Opportunity for focus on specific areas of interest.

**Prerequisite(s):** Upper division standing.
**Grading:** Graded

**WOMS 131 - Gender, Sexuality, and Religion**

3 unit(s)
Women's roles and gendered categories within diverse religions. Feminist critiques, reforms, and creations of religious institutions. The political and feminist dimensions of women's religious experience. Understanding the roles of sexuality in religion.

**Prerequisite(s):** Upper division standing or instructor consent.
**Grading:** Graded

**WOMS 156 - Black Women Writers: Race, Culture and Resistance**

3 unit(s)
Comparative analysis of the meaning and developmental stages of womanhood for women of African ancestry as depicted in the fiction of women of African ancestry. Emphasis on the role of race and culture in shaping contemporary conceptions of womanhood among Black women.

**Prerequisite(s):** Upper division standing or instructor consent.
**Grading:** Graded

**WOMS 160 - Queering Gender, Race, and Class**

3 unit(s)
Queer analysis of race and class diversity; social, political, and economic hierarchies of race, class, and gender in the U.S. Topics may include sexuality, racism, LGBT experience, the welfare system.

**Grading:** Graded

**WOMS 169 - Sexualities and the Body**

3 unit(s)
This course explores the social construction of sexuality and the body from a feminist perspective. It investigates various aspects of sexuality and gendered bodies including identity, community, and social movements based on intersections of race, gender, sexuality, culture, and nation.

**Prerequisite(s):** Upper Division Standing or instructor consent.
**Grading:** Graded

**WOMS 175 - Sociology of Masculinities and Femininities**
3 unit(s)
Examination and analysis of social construction of gender through interaction and social institutions. Explores gender-based identities and how intersections of gender, race, class, and sexuality shape men's and women's experiences. Examines theories of gender and gender-based social movements.

Prerequisite(s): SOCI 1.
Grading: Graded

WOMS 180 - Individual Studies

1-4 unit(s)
Individual work on special topics by arrangement.

Prerequisite(s): Minor or emphasis in women's studies.
Grading: Credit/No Credit

WOMS 182 - Women in Literature

4 unit(s)
Image of women in literature or works of significant women writers.

Prerequisite(s): Upper division standing.
Grading: Graded

WOMS 187 - Feminist Perspectives on Gender and Education in the U.S.

3 unit(s)
The role of gender in the educational system in the United States from both a historical and contemporary context. We will focus on the significance of schools as the primary socializing institution for boys and girls.

Prerequisite(s): Junior standing or instructor consent.
Grading: Graded

WOMS 189 - Islamic Perspectives on Gender

3 unit(s)
Contemporary feminist theories analyze premises of gender roles in Islamic cultures and variety of sexual expressions. This class will sensitize students to the diversity of Islamic cultures and communities, in addition to geographical, political, and social locations, like ethnicity and class affect the gender debate in Islamic perspectives.

Prerequisite(s): Upper division standing or Instructor Consent.
Grading: Graded

Note(s): Required for topical major and minor in Women's Studies.

WOMS 190 - Internship

1-4 unit(s)
On-site experience with community or campus organization or other agency involved with women's issues. Individual and group advising augments the experiential learning. Repeatable for credit with program coordinator approval.
Prerequisite(s): WOMS 101 or instructor consent.
Grading: Credit/No Credit

WOMS 192 - Int'l Program Studies
1-12 unit(s)
Grading: Mixed Grading

Department Overview

The Department of Urban and Regional Planning at SJSU offers undergraduate and graduate degrees in Geography, and an accredited Master in Urban Planning degree. The department also offers minors in Geography, Geographic Information Science, and Urban Studies. In addition, the department offers seven advanced graduate certificates emphasizing different focus areas such as affordable housing, community development, environmental planning, geographic information science, real estate development, transportation, and urban design. Planning and geography are multi-disciplinary fields and our world class faculty have diverse disciplinary backgrounds including architecture, economics, history, geography, sociology and urban planning. Our programs emphasize experiential learning and career-oriented academic preparation, enhanced by our downtown San Jose location. The department has cultivated long-standing relationships with industry partners, government agencies, and community-based organizations. Our graduates go onto rewarding careers in Silicon Valley companies such as Apple, Facebook and Google as well as government agencies and non-profit organizations in the Bay Area.
Certificates

The Department of Urban and Regional Planning at San José State University offers seven advanced certificates (listed below).

The certificate programs are open to graduate degree students enrolled in any program at San José State University (SJSU). Members of the public who hold an undergraduate degree may also complete any of the graduate certificate programs through SJSU's Open University. To earn a certificate, students must complete a total of nine to sixteen units of course work, depending on the certificate. If course work is taken through Open University, the maximum number of units allowed by SJSU policy may be applied towards the MUP degree. In addition, the student must:

- Maintain a minimum GPA of 3.0 over all semester credits of coursework applied towards the certificate.
- Earn a minimum grade of "B Minus" in every course applied towards the certificate.
- Complete all the course work within seven years.

For detailed information on these programs, see the department website or contact the department's Graduate Student Advisor.

Geography Program Overview

Geographers study places to understand and explain what makes places special and unique. Geographers study the natural environment, the built environment, and the socio-demographic characteristics of people. Geographic Information Science (GIS) uses the power of location integrated with computing technologies to analyze large volumes of data to make informed decisions. As the only Geography degree-granting program in Silicon Valley, the program takes advantage of its downtown San Jose location to emphasize urban and cultural geography, economic geography, and geospatial methods. The program has developed and cultivated long-standing relationships with government agencies, other universities, and the City of San Jose. GIS is a rapidly growing field and our courses will give students the analytic and problem-solving abilities necessary to begin rewarding careers immediately after graduation. Prospective students are encouraged to consult the department website for additional information.

Departmental Honors Program in Geography

Graduation with departmental honors in geography can be achieved by successful completion of any geography graduate seminar open to those seniors with a 3.5 GPA in geography, or completion of an Honors Thesis under supervision of a department faculty member. Students must have a 3.5 GPA in geography to qualify for an Honors Thesis option.

Urban Planning Program Overview

Urban planning began at SJSU in 1970 and SJSU offers the only accredited Master in Urban Planning degree in Silicon Valley. Urban planners balance visionary thinking with pragmatic problem solving - working in partnership with multiple stakeholders to address challenges related to growth and change. Urban planners work within the frameworks of formal and informal institutions to solve problems related to affordable housing, climate change, economic development, environmental protection, public health, and transportation. The program has a long history of working in partnership with local communities to address their planning needs. As a graduate program, Urban Planning attracts a diverse student body, including many non-traditional students who come to the program with a wealth of knowledge and experience. The program has a strong network of alumni who work in the region in city, county, and state government agencies, private sector firms, and nonprofit organizations.

Summary of Degree Units

University Graduation Requirements 44

Major Preparation 3

Major Requirements 73

Total 120

University Requirements for Graduation

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Undergraduate Graduation Requirements section of the Policies and Procedures.

Program Roadmaps

The 4-Year Roadmap is available online. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Degrees (ADT) Pathways are also available online.

General Education/American Institution Requirements

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

University Requirements (44 units)

Core Lower Division General Education (24 units)

Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

Note: Students who have completed the ADT Transfer degree (under SB 1440) for this major will have completed all lower division GE requirements and should follow the 60 unit guarantee roadmap. Meet with an advisor prior to registering for your first semester for the 60 unit roadmap or Specific questions.

Upper Division General Education (9 units)

Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.
American Institutions (6 units)

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B, HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Complete One Sequence From:

African American Studies (6 units)

- AFAM 2A - African Americans and the Development of America's History and Government 3 unit(s) (D2)
- AFAM 2B - African Americans and the Development of America's History and Government 3 unit(s) (M7)

Asian American Studies (6 units)

- AAS 33A - Asian Americans in U.S. History I 3 unit(s) (D2)
- AAS 33B - Asian Americans in U.S. History II 3 unit(s) (M7)

U.S History and Government (6 units)

- HIST 15 - Essentials of U.S. History 3 unit(s) (M12)
- POLS 15 - Essentials of U.S. & California Government 3 unit(s) (M11)

Chicana and Chicano Studies (6 units)

- CCS 10A - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D2)
- CCS 10B - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (M7)

Physical Education (2 units)

Graduation Writing Assessment Requirement (3 units)

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

- GEOG 100W - Writing Workshop 3 unit(s) (Z)

Major Preparation (3 units)

- STAT 95 - Elementary Statistics 3 unit(s) (B4) (UNVS 15F and UNVS 15S may be used in lieu of the statistics course required by this major.)

Major Requirements (73 units)
Core Geography Courses (21 units)

- GEOG 1 - Geography of Natural Environments 3 unit(s) (B1)
- GEOG 10 - Cultural Geography 3 unit(s) (D1)
- GEOG 12 - Global Geography 3 unit(s) (D2)
- GEOG 105 - Urban Geography 3 unit(s)
- GEOG 135 - Qualitative Methods in Geographical Research 3 unit(s)
- GEOG 170 - Introduction to Mapping and Geographic Information Systems 3 unit(s)

Complete One Course From:

FLP Study Abroad can be substituted for the Field Study Requirement.

- GEOG 186 - Field Study in Physical Geography 3 unit(s)
- GEOG 187 - Field Study in Human and Historical Geography 3 unit(s)

Upper Division Breadth Requirements (36 units)

Human Geography (9 units)

Complete three unique courses from:

- GEOG 110 - Urbanization in the Global South 3 unit(s)
- GEOG 112 - Nations, Cultures, and Territorial Disputes 3 unit(s) (V)
- GEOG 113 - Global Cities 3 unit(s)
- GEOG 115 - Global Development 3 unit(s)
- GEOG 117 - Advanced Economic Geography 3 unit(s)
- GEOG 125 - Selected Topics in Human Geography 3 unit(s)
- GEOG 161 - City Life 3 unit(s)

Physical Geography (9 units)

Complete three unique courses from:

- GEOG 120 - Food Supply and Agricultural Systems 3 unit(s)
- GEOG 121 - Population and Global Change 3 unit(s)
- GEOG 124 - Topics in Physical Geography 3 unit(s)
- GEOG 130 - Natural Resources 3 unit(s)
- GEOG 165 - National Parks 3 unit(s)

Geospatial Techniques and GIS (6 units)

Complete two unique courses from:

- GEOG 107 - Mapping the World 3 unit(s)
- GEOG 171 - Advanced Geographic Information Systems 3 unit(s)
- GEOG 172 - Cartography: Compilation and Presentation 3 unit(s)
- GEOG 173 - Cartography: Dynamic and Interactive Mapping 3 unit(s)
- GEOG 175 - Geographic Information Systems: Project Development 3 unit(s)
• GEOG 181 - Remote Sensing: Basic Theory and Image Interpretation 3 unit(s)
• GEOG 182 - Remote Sensing: Digital Analysis 3 unit(s)
• GEOG 195 - Spatial Analysis 3 unit(s)

Regional Synthesis (9 units)

Complete three unique courses from:
• GEOG 110 - Urbanization in the Global South 3 unit(s)
• GEOG 113 - Global Cities 3 unit(s)
• GEOG 115 - Global Development 3 unit(s)
• GEOG 117 - Advanced Economic Geography 3 unit(s)
• GEOG 145 - California 3 unit(s)
• GEOG 150 - Central and South America and the Caribbean 3 unit(s)
• GEOG 155 - Europe 3 unit(s)
• GEOG 160 - East and South Asia 3 unit(s)
• GEOG 165 - National Parks 3 unit(s)
• GEOG 168 - Sub-Saharan Africa 3 unit(s)

Capstone Course (3 units)
• GEOG 199 - Senior Seminar 3 unit(s)

Major Electives (16 units)

Total Units Required (120 units)

Master

Geography, MA

The MA in Geography is offered by the Department of Urban and Regional Planning. Admission to the graduate program is flexible, and potential students are evaluated on a case-by-case basis. A strong record based on either undergraduate performance or employment experience is expected. Graduate students without a geography degree can expect added course work in geographic literature and theory. More information can be found on our web site: www.sjsu.edu/geography.

Admissions Requirements

All graduate applicants must submit a complete graduate application by applying through the CSU Cal State Apply system. Additional information regarding university admission requirements in this catalog. Applicants from countries in which the native language is not English must achieve a minimum Englishlanguage proficiency test score as indicated on the Graduate Program Test Requirement webpage at GAPE.

Admissions to Classified Standing
Basic requirements for admission to the Graduate Division are outlined in the Admissions section. In addition, the department requires the following for admission to classified standing:

1. An undergraduate degree in geography or a reasonably related field from an accredited institution.
2. A 3.0 (“B”) overall grade point average for the last 60 semester units of academic study.
3. The capability, in the opinion of the Department Graduate Committee, of successfully completing the degree requirements.
4. The removal of deficiencies if preparation differs markedly from the BA - Geography at San José State University.

Admissions to Conditionally Classified Standing

If not accepted into classified standing, the applicant may qualify for conditionally classified status for which the following will be required:

1. The ability, in the opinion of the Department Graduate Committee, to remove deficiencies which do not exceed the equivalent of one full-time semester of course work.
2. The qualifications to be accepted to classified standing within a reasonable length of time, and the background to conduct studies at the graduate level.

Requirements for Advancement to Candidacy

The student may be admitted to candidacy for the MA - Geography by complying with requirements of the university as outlined in the Academic Regulations section of this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape. In addition, students must obtain their thesis advisor's approval for their thesis proposal.

Students will complete a course of study designed to prepare them for professional work in their chosen subfield. Accordingly, they will need to take specific courses to support research and project work in that field.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

Culminating Experience
In consultation with the department advisor, the candidate will develop and pursue a program of study outlined in Plan A or Plan B. The candidate must successfully complete all requirements of the selected plan including the course work specified in the Master's Degree Approved Program.

**Plan A (with Thesis)**

1. A minimum of eighteen units in geography.
2. The thesis, based on independent research, is to be conducted under the direction of a thesis advisor and must be acceptable to and approved by the Thesis Committee. The Committee consists of the thesis advisor (committee chair), an additional member from the university faculty, and an additional member who may be from outside the university. The thesis topic shall be developed within the departmental foci in consultation with the thesis advisor. The thesis must conform to the university standards of style and form.
3. Final Examination: The thesis must be successfully defended orally before the thesis committee.

**Plan B (without Thesis)**

1. A minimum of twenty-one units in geography, with at least 50% of the units in graduate-level courses.
2. Project: The student shall present the results of a project in one of the areas of departmental focus. Appropriate projects include research completed for a geography graduate seminar or an independent study conducted under the supervision of a faculty advisor. The results will be reported in a written paper and other materials submitted to the department, and will be presented formally to a geography faculty and student colloquium for acceptance.

**Master's Requirements (30 units)**

**Plan A (with Thesis) (30 units)**

**Core Seminar (3 units)**

- GEOG 290 - Seminar in Research Design for Geographic Information Science 3 unit(s)

**Geography Seminars (6 units)**

Complete two courses from:

*Courses can be repeated twice if topic changes.*

- GEOG 239 - Geographic Information Technology 3 unit(s) (GWAR)
- GEOG 240 - Qualitative Research Methods 3 unit(s) (GWAR)
- GEOG 279 - Geographic Information Science Applications 3 unit(s) (GWAR)
- GEOG 282 - Advanced Geographic Techniques 3 unit(s) (GWAR)

**Culminating Experience (6 units)**

- GEOG 299 - Master's Thesis or Project 1-6 unit(s)

**Electives (15 units)**

100 or 200-level courses in geography or related fields selected with advisor's approval. Students should take the following courses, depending on their area of focus:
• GEOG 282 - Advanced Geographic Techniques 3 unit(s)
• GEOG 195 - Spatial Analysis 3 unit(s)

Three Additional Units

• GEOG 173 - Cartography: Dynamic and Interactive Mapping 3 unit(s)
• GEOG 175 - Geographic Information Systems: Project Development 3 unit(s)
• GEOG 183

Plan B (without Thesis) (30 units)

Core Seminar (3 units)

• GEOG 290 - Seminar in Research Design for Geographic Information Science 3 unit(s)

Geography Seminars (9 units)

Complete three courses from:

• GEOG 239 - Geographic Information Technology 3 unit(s) (GWAR)
• GEOG 240 - Qualitative Research Methods 3 unit(s) (GWAR)
• GEOG 279 - Geographic Information Science Applications 3 unit(s) (GWAR)
• GEOG 282 - Advanced Geographic Techniques 3 unit(s) (GWAR)

Electives (18 units)

At least 3 units must be 200-level.

100 or 200-level courses in geography or related fields selected with advisor's approval. Students should take the following courses, depending on their area of focus:

• GEOG 282 - Advanced Geographic Techniques 3 unit(s)
• GEOG 195 - Spatial Analysis 3 unit(s)

Three Additional Units

• GEOG 173 - Cartography: Dynamic and Interactive Mapping 3 unit(s)
• GEOG 175 - Geographic Information Systems: Project Development 3 unit(s)
• GEOG 182 - Remote Sensing: Digital Analysis 3 unit(s)

Total Units Required (30 units)

Elective courses must be planned in consultation with the Graduate Advisor. The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 15. Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate.

Urban Planning, MUP
The MUP program trains skilled professionals who graduate with a strong education in general planning practice and theory as well as specialized training in planning subfields. The program allows students to develop professional skills in an area of specialization such as Affordable Housing and Community Development Finance, Applications of Technology in Planning, Community Design and Development, Environmental Planning, Real Estate Development, or Transportation and Land Use Planning.

Graduates leave the program prepared with practical skills and theoretical knowledge that they can employ in jobs working to improve the quality of life and economic opportunity for all residents of urban regions as well as improving the quality of the natural environment.

A special mission of the program is to provide planning education opportunities for a diverse student population, including working students who prefer to attend the program on a part-time basis.

The MUP is an accredited professional degree program nationally recognized by the Planning Accreditation Board.

Information about the program and important dates can be obtained at the department website: www.sjsu.edu/urbanplanning.

Admissions Requirements

Candidates must meet all the university admissions requirements. To complete your application, you must submit materials to two distinct bodies: the SJSU Graduate Admissions and Program Evaluation (GAPE) Office through the online CSU application process and the Urban and Regional Planning Admissions Committee. Each has its own timetable. Approval by both offices is necessary to gain admission to the program. Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE.

1. Materials to be submitted to the SJSU Graduate Admissions and Program Evaluations Office
   - Fill out the on-line application form. The Master of Urban Planning (MUP) program at SJSU is listed on the online application form under Urban Planning.
   - Domestic Students - Submit one set of official transcripts from all higher educational institutions attended (even those where you did not get a degree) to the Graduate Admissions Office. Do not send transcripts to the Department of Urban & Regional Planning.
   - International Students - International students are advised to closely follow guidelines for submitting transcripts and any other supporting documents, including demonstrating competence in English, available on the Graduate Admissions & Program Evaluation website.

2. Materials to be submitted to the Department of Urban and Regional Planning (Admissions Committee)
   - Three original, signed letters of recommendation that come from either university instructors who taught you or supervisors who managed you in paid or volunteer work. It is highly recommended that at least one letter come from a university instructor. If this is not possible, ask your letter writers to include an evaluation of your writing and analysis skills. These letters must be submitted to the Urban and Regional Planning Admissions Committee, not to the SJSU GAPE Office. The department will accept only original, signed letters; faxed or emailed letters will not be accepted.
   - A short biographical statement of purpose (approximately 1.5 single-spaced typed pages) that indicates how a Master of Urban Planning degree will help you to achieve your career objectives. This can be the same statement as included on your online application.
   - Graduate Record Examination (GRE) scores are required for applicants with a GPA below 3.0. Original scores from the testing office must be submitted in a sealed, unopened envelope or sent directly by ETS (the code for SJSU is 4687).

Requirements for Advancement to Candidacy
Students must complete all university requirements for advancement to candidacy for the master's degree as outlined in the Graduate Policies and Procedures section. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website. In addition, candidates must pass the Writing Skills Test (WST) at SJSU. Candidates with a previous degree from a California State University campus are exempt from the WST requirement.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Masters Requirements (48 units)

Core Courses (26 units)

- URBP 200 - Seminar on Urban and Regional Planning 4 unit(s) (GWAR)
- URBP 204 - Quantitative Methods 4 unit(s)
- URBP 225 - Land Use Planning and Law 4 unit(s)
- URBP 236 - Urban and Regional Planning Policy Analysis: Tools and Methods 4 unit(s) (GWAR)
- URBP 241 - Planning Sustainable Cities 2 unit(s)
- URBP 275G - Geographic Information Systems Overview: Urban Planning Applications 1 unit(s)
- URBP 295 - Capstone Studio: Community Planning 6 unit(s)
- URBP 297P - Planning Report Preliminary Proposal 1 unit(s)

Electives (16 units)

Sixteen units of coursework chosen from Urban and Regional Planning courses. Students are strongly encouraged to take at least 12 units from within a single MUP specialization. Electives from outside the Urban & Regional Planning Department (either upper-division undergraduate or graduate courses) may be taken, but must first be approved by the Graduate Advisor.

- URBP 103 - Local Government and Politics 4 unit(s)
- URBP 125 - Urban Anthropology 3 unit(s)
- URBP 132 - Creating Built Worlds 3 unit(s)
- URBP 145 - Urban Policy and Its Impact on Inner City Residents 4 unit(s)
- URBP 163 - Twentieth Century Urban Design 3 unit(s)
- URBP 185 - Environmental Impact Analysis 4 unit(s)
- URBP 190 - Advanced Environmental Impact Assessment 4 unit(s)
• URBP 203 - Collaborative Neighborhood Planning 4 unit(s)
• URBP 205 - Private Development and Urban Planning 3 unit(s)
• URBP 206 - Market Analysis, Appraisal, & Finance of Real Estate Development 3 unit(s)
• URBP 208 - Urban Real Estate Development Studio 3 unit(s)
• URBP 214 - Introduction to Public Management 3 unit(s)
• URBP 223 - Housing Economics and Policy 4 unit(s)
• URBP 226 - Regional Transportation Planning 4 unit(s)
• URBP 231 - Urban Design in Planning 4 unit(s)
• URBP 232 - Urban Design Studio 4 unit(s)
• URBP 233 - Social Issues in Planning 4 unit(s)
• URBP 240 - Environmental Planning 4 unit(s)
• URBP 248 - Spatial Visualization Tech in Urb Plan 1-4 unit(s)
• URBP 250 - Urban Planning Public Finance 4 unit(s)
• URBP 255 - Urban and Regional Growth Management 4 unit(s)
• URBP 256 - Sustainable Transportation Planning 4 unit(s)
• URBP 260 - Environmental Planning Topics 4 unit(s)
• URBP 275 - Urban Planning Topics 1-4 unit(s)
• URBP 276 - Social Media in Planning 1-4 unit(s)
• URBP 278 - Introduction to GIS for Urban Planning 4 unit(s)
• URBP 279 - Advanced GIS for Urban Planning 4 unit(s)
• URBP 280 - Planning Research Topics 1-4 unit(s)

Culminating Experience (Plan B Only) (6 units)

• URBP 298A - Special Study: Planning Report 3 unit(s)
• URBP 298B - Special Study: Planning Report Completion 3 unit(s)

Total Units Required (48 units)

All electives must be 100-level or 200-level courses as arranged and approved in conference with the student's advisor. Electives to be taken will depend on the student's background and interests.

Students must earn a "B" or better grade in 100-level classes in order for the department to give credit for those classes towards the MUP degree.

URBP 298A and URBP 298B are graded on a Credit/No credit (CR/NC) basis. Receiving an NC in URBP 298A or URBP 298B has the following implications:

• An "NC" is the equivalent of failing the class. The "NC" will remain permanently on the student's record, although the student GPA is not affected by the "NC."
• Students who receive an "NC" in URBP 298A or URBP 298B can enroll again in the class only if there is space available, with the department giving enrollment priority to students who meet the prerequisites and have not previously taken the class.
• Students who receive an "NC" in URBP 298A or URBP 298B will be placed on administrative-academic probation. To return to good standing, a student must re-enroll in the class and receive a grade of "CR."
• Students who receive a second "NC" in URBP 298A or URBP 298B will be disqualified from the MUP program.

The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 15.
Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

Certificate

**Advanced Certificate in Geographic Information Systems (GIS) Certificate (Graduate)**

Certificate Prerequisite (3 units)
- GEOG 170 - Introduction to Mapping and Geographic Information Systems 3 unit(s)

Certificate Requirements (15 units)
- GEOG 171 - Advanced Geographic Information Systems 3 unit(s)
- GEOG 290 - Seminar in Research Design for Geographic Information Science 3 unit(s)
- Advisor-approved 100- or 200-level elective 3 unit(s)

Complete One Course From:
- GEOG 239 - Geographic Information Technology 3 unit(s) (GWAR)
- GEOG 279 - Geographic Information Science Applications 3 unit(s) (GWAR)

Complete One Course From:
- GEOG 282 - Advanced Geographic Techniques 3 unit(s) (GWAR)
- GEOG 286 - Geographic Information Systems: Project Management 3 unit(s)
- URBP 279 - Advanced GIS for Urban Planning 4 unit(s)

Total Units Required (15 units)

**Affordable Housing and Community Development Finance Certificate (Graduate)**

In this certificate program, students gain domain-specific knowledge as well as a deep understanding of interrelationships between urban & regional development, housing markets (especially affordable housing market), and financing of public infrastructure and services.

Certificate Core (12 units)
- URBP 223 - Housing Economics and Policy 4 unit(s)
- URBP 225 - Land Use Planning and Law 4 unit(s)
• URBP 250 - Urban Planning Public Finance 4 unit(s)

Electives (3-4 units)

Complete one course from:

• URBP 205 - Private Development and Urban Planning 3 unit(s)
• URBP 255 - Urban and Regional Growth Management 4 unit(s)
• PADM 220 - Non-Profit Management 3 unit(s)

Total Units Required (15-16 units)

**Applications of Technology in Planning Certificate (Graduate)**

In this certificate program, students develop their knowledge and skills at using information technologies in the planning process. Classes and studies draw on the rich agglomeration of technical applications and skills available in the Silicon Valley region.

**Core Courses (8 units)**

• URBP 225 - Land Use Planning and Law 4 unit(s)
• URBP 278 - Introduction to GIS for Urban Planning 4 unit(s)

**Electives (1-4 units)**

Complete one course from:

• URBP 232 - Urban Design Studio 4 unit(s)
• URBP 248 - Spatial Visualization Tech in Urb Plan 1-4 unit(s)
• URBP 276 - Social Media in Planning 1-4 unit(s)
• URBP 279 - Advanced GIS for Urban Planning 4 unit(s)

Total Units Required (9-12 units)

**Community Design and Development Certificate (Graduate)**

In this certificate program, students gain the knowledge and skills required to address a community's needs through the design of the physical environment. Courses examine the interactions among social, economic, political, and cultural factors, and the built environment.

**Core Courses (8 units)**
• URBP 225 - Land Use Planning and Law 4 unit(s)
• URBP 231 - Urban Design in Planning 4 unit(s)

Electives (1-6 units)

Complete one courses from:
• URBP 232 - Urban Design Studio 4 unit(s)
• URBP 233 - Social Issues in Planning 4 unit(s)
• URBP 248 - Spatial Visualization Tech in Urb Plan 1-4 unit(s)
• URBP 255 - Urban and Regional Growth Management 4 unit(s)
• URBP 295 - Capstone Studio: Community Planning 6 unit(s)

Total Units Required (9-14 units)

Environmental Planning Certificate (Graduate)

In this certificate program, students develop the knowledge and skills needed to successfully carry out planning and development activities with consideration of the environmental impacts and a goal to achieve more sustainable development.

Core (8 units)

• URBP 225 - Land Use Planning and Law 4 unit(s)
• URBP 240 - Environmental Planning 4 unit(s)

Electives (4 units)

Complete one course from:
• URBP 185 - Environmental Impact Analysis 4 unit(s)
• URBP 260 - Environmental Planning Topics 4 unit(s)

Total Units Required (12 units)

Real Estate Development Certificate (Graduate)

In this certificate program, students develop the knowledge and skills needed to initiate, navigate, and manage real estate development projects, with a special emphasis on Northern California.

Certificate Requirements (13 units)

• URBP 205 - Private Development and Urban Planning 3 unit(s)
• URBP 206 - Market Analysis, Appraisal, & Finance of Real Estate Development 3 unit(s)
• URBP 208 - Urban Real Estate Development Studio 3 unit(s)
• URBP 225 - Land Use Planning and Law 4 unit(s)
Total Units Required (13 units)

**Transportation and Land Use Planning Certificate (Graduate)**

In this certificate program, students learn the principles of transportation and land-use planning at the location and regional levels. In today's rapidly growing regions, planners recognize that transportation and land use planning are intricately connected and must be planned together to allow residents and freight carriers to access destinations quickly and efficiently, improve accessibility options for residents who cannot or choose not to drive, and build economically and environmentally sustainable communities.

**Certificate Core (8 units)**

- URBP 225 - Land Use Planning and Law 4 unit(s)
- URBP 226 - Regional Transportation Planning 4 unit(s)

**Electives (4 units)**

Complete one course from:

- URBP 250 - Urban Planning Public Finance 4 unit(s)
- URBP 255 - Urban and Regional Growth Management 4 unit(s)
- URBP 256 - Sustainable Transportation Planning 4 unit(s)

Total Units Required (12 units)

**Minor**

**Geographic Information Science Minor**

**University Graduation Requirements**

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

**Minor Requirements (15 units)**

- GEOG 170 - Introduction to Mapping and Geographic Information Systems 3 unit(s)
- GEOG 171 - Advanced Geographic Information Systems 3 unit(s)

Complete Three Courses From:

*Cartography Sequence*
• GEOG 172 - Cartography: Compilation and Presentation 3 unit(s)
• GEOG 173 - Cartography: Dynamic and Interactive Mapping 3 unit(s)
• GEOG 175 - Geographic Information Systems: Project Development 3 unit(s)
• GEOG 178 - Geographic Information Systems Project 3 unit(s)
• GEOG 181 - Remote Sensing: Basic Theory and Image Interpretation 3 unit(s)
• GEOG 182 - Remote Sensing: Digital Analysis 3 unit(s)
• GEOG 195 - Spatial Analysis 3 unit(s)

Total Units Required (15 units)

**Geography Minor**

**University Graduation Requirements**

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

**Minor Requirements (15 units)**

**Required Courses (9 units)**

• GEOG 1 - Geography of Natural Environments 3 unit(s) (B1)
• GEOG 170 - Introduction to Mapping and Geographic Information Systems 3 unit(s)

**Complete One Course From:**

• GEOG 10 - Cultural Geography 3 unit(s) (D1)
• GEOG 12 - Global Geography 3 unit(s) (D2)

**Elective Courses (6 units)**

Students must select six units from one of the Geography upper division breadth areas.

**Total Units Required (15 units)**

**Urban Studies Minor**

The minor in Urban Studies is a professionally oriented program designed to: 1) familiarize students with the social, economic, political and physical aspects of the major urban issues of our time; and 2) introduce students to basic professional skills and strategies used to improve our urban environment.

**University Graduation Requirements**

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).
Minor Requirements (14 units)

Required Courses (7 units)

- URBP 101 - The City 3 unit(s) (S)
- URBP 136 - Intro to Land Use and Urban Planning 4 unit(s)

Minor Electives (4 units)

Complete four units from:

Other courses may be substituted with permission of advisor

- URBP 120 - Intro to Housing Economics and Policy 4 unit(s)
- URBP 133 - Introduction to Social Issues in Planning 4 unit(s)
- URBP 142 - Introduction to Environmental Planning 4 unit(s)
- URBP 143 - Intro Private Development and Planning 3 unit(s)
- URBP 148 - Intro Spatial Vis Tech in Urb Plan 1-4 unit(s)
- URBP 151 - Introduction to Urban Design 4 unit(s)
- URBP 152 - Introduction to Urban Design Studio 4 unit(s)
- URBP 156 - Introduction to Local Transportation Planning 4 unit(s)
- URBP 160 - Topics in Environmental Planning 4 unit(s)
- URBP 175 - Urban Studies Topics 1-4 unit(s)
- URBP 178 - Intro to Regional Transport Planning 4 unit(s)
- URBP 179A - Fundamentals of GIS for Urban Planning 4 unit(s)
- URBP 179B - Advanced GIS for Urban Planning 4 unit(s)
- URBP 185 - Environmental Impact Analysis 4 unit(s)

Additional Electives (3 units)

Complete one course from:

Other courses may be substituted with permission of advisor

- AFAM 145 - Urban Policy and Its Impact on Inner City Residents 4 unit(s)
- ANTH 125 - Urban Anthropology 3 unit(s)
- ANTH 132 - Creating Built Worlds 3 unit(s)
- ARTH 163 - Twentieth Century Urban Design 3 unit(s)
- CE 121 - Transportation Engineering 3 unit(s)
- ECON 166 - Urban Economics 4 unit(s)
- ENVS 10 - Life on a Changing Planet 3 unit(s) (B2)
- ENVS 124 - Introduction to Environmental Law 3 unit(s)
- ENVS 187 - Environmental Restoration 4 unit(s)
- GEOG 105 - Urban Geography 3 unit(s)
- POLS 103 - Local Government and Politics 4 unit(s)
- STAT 95 - Elementary Statistics 3 unit(s) (B4)
- SOCI 161 - City Life 3 unit(s)
Total Units Required (14 units)

GEOG 1 - Geography of Natural Environments

3 unit(s)
Atmospheric, biologic and geologic processes that create the natural environments of the world. Discovery of local, regional and global patterns in the location and distribution of environmental phenomena, and the human modifications of natural environments.

Satisfies B1: Physical Science

Grading: Graded

GEOG 10 - Cultural Geography

3 unit(s)
The human population studied through the perspective of cultural groups, their institutions and geographic distributions, how different people occupy, use, and modify their environment, and the interaction of individuals from one group with those of another.

Satisfies D1: Human Behavior

Grading: Graded

GEOG 12 - Global Geography

3 unit(s)
Comparative geography of our world: regions and countries, natural environments and resources, settlements and land use, cultural diversity, economic and political patterns.

Satisfies D2: Comparative Systems

Grading: Graded

GEOG 92 - Int'l Program Studies

1-6 unit(s)
Grading: Mixed Grading

GEOG 100W - Writing Workshop

3 unit(s)
Development of skills required for geographical research and writing.

Satisfies SJSU Studies Z: Written Communication II

Prerequisite(s): A3 or equivalent second semester composition course (with a grade of C- or better); completion of core GE; satisfaction of Writing Skills Test or completion of ENGL 100A or LLD 100A with C or better; and upper division standing. Or Graduate or Postbaccalaureate level.

Grading: Graded

Note(s): Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).
**GEOG 105 - Urban Geography**

*3 unit(s)*
Spatial patterns in the urban environment: City function and morphology; population patterns and functional zonation; analysis of recent changes.

**Prerequisite(s):** Upper division standing or instructor consent.
**Grading:** Graded

**GEOG 107 - Mapping the World**

*3 unit(s)*
Finding, preparing, and using maps, satellite and aerial images, and spatial data to create effective presentations. Includes a basic introduction to geographic visualization through cartography, geographic information systems, and remote sensing for professionals outside geography.

**Prerequisite(s):** Upper division standing or instructor consent.
**Grading:** Graded

**GEOG 110 - Urbanization in the Global South**

*3 unit(s)*
This course explores issues and debates that relate to urbanization in the developing world. Students will gain a general understanding of the concept of urbanization in the developing world, and what are some of the issues, challenges, and policy responses found in these urban environments.

**Prerequisite(s):** Completion of the WST and core GE. Upper division standing
**Pre/Corequisite(s):** 100w
**Grading:** Graded

**GEOG 112 - Nations, Cultures, and Territorial Disputes**

*3 unit(s)*
In a world with rapidly diminishing resources new conflicts are emerging based on factors such as ethnicity, economic opportunity, religion, and nationalism. Explore global circumstances leading to conflict. GE Area: V.

*Satisfies SJSU Studies V: Culture, Civil & Global Understanding.*

**Prerequisite(s):** Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
**Grading:** Graded

**Note(s):** All of SJSU Studies courses require completion of the WST and upper division standing.

**GEOG 113 - Global Cities**

*3 unit(s)*
This course introduces various aspects of global cities, including debates over global cities, urban culture, new urban landscapes, and class/socio-economic disparity. The class includes case studies regarding global cities throughout the world that aim to explore the diversity and/or similarities of the global city formation process.
Grading: Graded

GEOG 115 - Global Development

3 unit(s)
Exploration of contemporary global economy using variety of analytical approaches developed by geographers. Provides geographic perspective on world economy and environmental issues within a spatial context.

Prerequisite(s): Upper division standing. GEOG 101 recommended.
Grading: Graded

GEOG 117 - Advanced Economic Geography

3 unit(s)
This is an advanced course in Economic Geography that explores the contemporary insights provided by geographers researching various dimensions of economy and space.

Prerequisite(s): Junior or Senior Standing
Grading: Graded

GEOG 120 - Food Supply and Agricultural Systems

3 unit(s)
Geography of world agriculture and nutritional needs of a growing world population. Comparison of traditional and modern agricultural systems in their use of resources and technologies. Effectiveness in meeting demands and sustainability.

Prerequisite(s): Upper division standing or instructor consent.
Grading: Graded

GEOG 121 - Population and Global Change

3 unit(s)
Impact of population changes on countries, regions, and their environments. Demographic comparisons of developed and developing societies from perspectives of land use, economics and politics.

Prerequisite(s): Upper division standing.
Grading: Graded

GEOG 123 - Geography for K-12 Teachers

3 unit(s)
Geography for future K-12 teachers. Topics include mapping, places, and regions, and themes of human, physical and historical geography. Overview of geography in the California K-12 Frameworks as well as the geography in the California teacher credential examinations.

Prerequisite(s): Upper division standing or instructor consent.
Grading: Graded

GEOG 124 - Topics in Physical Geography
Interactions between humans and environment from a geographical perspective.

**Prerequisite(s):** GEOG 1 or instructor consent.
**Grading:** Graded

**GEOG 125 - Selected Topics in Human Geography**

3 unit(s)
Changing topics in human geography.

*Course may be repeated for credit for up to 9 units.*

**Prerequisite(s):** Upper division standing.
**Grading:** Graded

**GEOG 130 - Natural Resources**

3 unit(s)
Geography of economic, environmental, political and technological factors that define natural resources and affect their availability and use. Focus on water, food-producing and energy resources.

**Prerequisite(s):** Upper division standing or instructor consent.
**Grading:** Graded

**GEOG 132 - Creating Built Worlds**

3 unit(s)
Cross-cultural exploration of material expressions of culture. Analysis of production and consumption of places, shelters, and goods. Implications for design and policy.

**Prerequisite(s):** Upper division standing.
**Grading:** Graded

**GEOG 135 - Qualitative Methods in Geographical Research**

3 unit(s)
Development of skills required for geographical research and writing. Library research, oral presentations, variety of writing assignments dealing with diverse geographic problems.

**Prerequisite(s):** ENGL 2.
**Grading:** Graded

**GEOG 140 - The United States**

3 unit(s)
Geography of the U.S. emphasizing the continuing changes of America's places and regions. Themes include environmental, culture, economic, and social geographies at community, regional and national scales.

**Prerequisite(s):** Upper division standing or instructor consent.
**Grading:** Graded
GEOG 145 - California

3 unit(s)
Origins and patterns of California's diverse landscapes, including the geography of natural environments and resources, economic regions, land use, cultural patterns, political trends and the future.

Grading: Graded

GEOG 150 - Central and South America and the Caribbean

3 unit(s)
Geography of Mexico, Central America, Caribbean, and South America. Themes include environmental, historical, political, and economic geographies at the scales of the region, its countries, and selected cities.

Prerequisite(s): Upper division standing or instructor consent.
Grading: Graded

GEOG 155 - Europe

3 unit(s)
Geography of Western and Central Europe. Themes include environmental, historical, political, and economic geographies at the scales of the region, its countries, and selected cities. Particular emphasis is given to the increasing economic and political unity through the European Union.

Prerequisite(s): Upper division standing or instructor consent.
Grading: Graded

GEOG 160 - East and South Asia

3 unit(s)
Geography of Eastern, Southeastern, and Southern Asia. Themes include environmental, historical, political, and economic geographies at the scales of the region, its countries, and selected cities. Particular emphasis is given to comparing and analyzing the variable rates of economic progress across the region.

Prerequisite(s): Upper division standing or instructor consent.
Grading: Graded

GEOG 161 - City Life

3 unit(s)
The city as a setting for diverse lifestyles. Challenges facing urban dwellers and adaptive strategies they take. Comparison of city, suburb and rural countryside as social environments.

Prerequisite(s): Upper Division or instructor consent
Grading: Graded

GEOG 165 - National Parks

3 unit(s)
An exploration of the history, philosophy, and science of park and wilderness preservation. Includes site visits to selected parks and wilderness areas.
Prerequisite(s): Upper division standing or instructor consent.
Grading: Graded

GEOG 168 - Sub-Saharan Africa
3 unit(s)
Regional study of environments, as well as cultural, economic and political geography of Africa south of the Sahara. Special attention given to geographic factors in the progress of less developed countries.
Grading: Graded

GEOG 170 - Introduction to Mapping and Geographic Information Systems
3 unit(s)
Foundations of the mapping sciences and geographic information systems. Basics of earth measurement, location and mapping. Thematic map display and analysis. Application through a variety of laboratory experiences.
Misc/Lab: Lecture 2 hours/lab 3 hours.

Prerequisite(s): GEOG 1 or instructor consent.
Grading: Graded

GEOG 171 - Advanced Geographic Information Systems
3 unit(s)
Maps as tools of geographic expression and research. Introduction to spatial analysis through geographic information systems. Data collection and description; measuring absolute and relative location, patterns, interaction and association.
Misc/Lab: Lecture 2 hours/lab 3 hours.

Prerequisite(s): GEOG 1, GEOG 170 or instructor consent.
Grading: Graded

GEOG 172 - Cartography: Compilation and Presentation
3 unit(s)
Techniques of compilation, design, construction and production. Lab projects applying computer graphics and geographic information systems to the effective presentation of geographic themes and information.
Misc/Lab: Lecture 2 hours/lab 3 hours.

Prerequisite(s): GEOG 1 and GEOG 170 or instructor consent.
Grading: Graded

GEOG 173 - Cartography: Dynamic and Interactive Mapping
3 unit(s)
Design and implementation of dynamic and interactive presentations for visualizing geographic information. Lab projects creating animated and multimedia presentations. Designing user-interfaces for interactive mapping systems.
Misc/Lab: Lecture 2 hours/lab 3 hours.
**Prerequisite(s):** GEOG 170, GEOG 172 or instructor consent.

**Grading:** Graded

**GEOG 175 - Geographic Information Systems: Project Development**

3 unit(s)
Creation of geographic information system databases and application software to solve specific problems in such areas as resource and facilities management, demographic analysis and planning.

*Misc/Lab: Lecture 2 hours/lab 3 hours.*

**Prerequisite(s):** GEOG 170 or instructor consent.

**Grading:** Graded

**GEOG 178 - Geographic Information Systems Project**

3 unit(s)
Develop geographic database, web mapping, interactive mapping, and/or remote sensing solutions to a GIS problem. Identification of appropriate methods, and design, implementation, testing, and documentation of solution.

*Misc/Lab: Lecture 3 hours/lab 4 hours.*

**Prerequisite(s):** GEOG 170 and GEOG 171; 3 units from GEOG 173, GEOG 175, GEOG 181, or GEOG 182; or instructor consent.

**Grading:** Graded

**GEOG 180 - Individual Studies**

1-4 unit(s)
Student-initiated in-depth study of a mutually agreeable topic conducted under faculty guidance.

**Prerequisite(s):** Supervisor and department chair approval.

**Grading:** Credit/No Credit

**GEOG 181 - Remote Sensing: Basic Theory and Image Interpretation**

3 unit(s)
Acquisition, interpretation and applications of imagery obtained from both airborne and satellite platforms. Includes visual interpretation and analysis of airphotos and non-photographic images, such as radar and thermal infrared. Remotely-sensed imagery as a source for mapping and geographic information systems.

*Misc/Lab: Lecture 2 hours/lab 3 hours.*

**Prerequisite(s):** GEOG 170 or instructor consent.

**Grading:** Graded

**GEOG 182 - Remote Sensing: Digital Analysis**

3 unit(s)
Digital image systems and application to earth resource problems. Emphasis on non-photographic sensors, including digital manipulation and image enhancement. Integration of digital imagery with geographic information systems.
Misc/Lab: Lecture 2 hours/lab 3 hours/field trips.

**Prerequisite(s):** GEOG 170 or instructor consent.
**Grading:** Graded

GEOG 186 - Field Study in Physical Geography

3 unit(s)
Field research methods in physical geography, including biogeography, hydrology, soils, geomorphology, and human-environment studies. Mapping, GPS, landscape remote sensing, and field measurements. Local field trips and projects tailored to class interests.

**Prerequisite(s):** 6 units of upper division geography courses.
**Grading:** Credit/No Credit

GEOG 187 - Field Study in Human and Historical Geography

3 unit(s)
Introduction to field methods in human and historical geography. Field trips, archival research, and student projects provide practical and applied skills and an informed view of the relationships between people and their environments.

**Prerequisite(s):** 6 units of upper division geography courses.
**Grading:** Credit/No Credit

GEOG 192 - Int'l Program Studies

1-6 unit(s)
**Grading:** Mixed Grading

GEOG 195 - Spatial Analysis

3 unit(s)
Quantitative analysis of geographic information, including spatial statistics and analytical mapping; application of descriptive and inferential statistics to geographic problems.

**Prerequisite(s):** GEOG 170 and GEOG 171 or instructor consent.
**Grading:** Graded

GEOG 197 - Geography Internship

1-6 unit(s)
Work/activity with professional application in off-campus establishment or agency. Course requirements and units determined in consultation with faculty advisor and work/activity supervisor.

*Course may be repeated for credit for up to 12 units.*

**Prerequisite(s):** 12 units of geography.
**Grading:** Credit/No Credit

GEOG 199 - Senior Seminar
3 unit(s)
Capstone course examining the history of geographic thought and themes with emphasis on critical assessment of issues affecting current trends; objective of placing undergraduate experience in a professional context.

**Prerequisite(s):** Senior standing in geography.  
**Grading:** Credit/No Credit

**GEOG 210 - Geographic Thought and Theory**

3 unit(s)
Critical inquiry into the historical and philosophical development of modern geographical concepts and theories.

**Grading:** Graded

**GEOG 239 - Geographic Information Technology**

3 unit(s)
Research in application of technology to the design and implementation of computer mapping, remote sensing, and geographic information systems. Includes spatial database design issues, spatial processing algorithms, and cartographic visualization. Research project and paper. May be repeated for credit when offered as a different technology.

*Satisfies GWAR: Graduation Writing Assessment Requirement*

**Prerequisite(s):** Instructor consent.  
**Grading:** Graded

**Note(s):** This course satisfies graduate-level GWAR in this master's program.

**GEOG 240 - Qualitative Research Methods**

3 unit(s)
Rigorous analysis of methods used by social scientists in assessing notions of human and physical geography. Application of determined qualitative techniques including participant observation, semi-structured interviews, focus groups, participatory action, oral histories, textual analysis, social survey. Project development and evaluation.

*Satisfies GWAR: Graduation Writing Assessment Requirement*

**Prerequisite(s):** Graduate level or instructor permission  
**Grading:** Graded

**GEOG 279 - Geographic Information Science Applications**

3 unit(s)
Research in applications of geographic information science in such areas as urban spatial analysis, environmental analysis, geo-demographic analysis, regional analysis, facilities management, and geographic education. Research project and paper. May be repeated for credit when offered as a different technology.

*Satisfies GWAR: Graduation Writing Assessment Requirement*

**Prerequisite(s):** Instructor consent.  
**Grading:** Graded
GEOG 282 - Advanced Geographic Techniques

3 unit(s)
Specific topics in display and analysis of geographic information. Possible topics include advanced spatial analysis, cartographic representation, user-interface design, internet map server technology. May be repeated for credit when offered as a different technique.

Satisfies GWAR: Graduation Writing Assessment Requirement

Prerequisite(s): GEOG 170 or instructor consent.
Grading: Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

GEOG 286 - Geographic Information Systems: Project Management

3 unit(s)
Principles of project management applied to geographic information systems projects. Requirements assessment, estimating, scheduling, system design, and acceptance testing. Students will negotiate, plan and execute projects for outside agencies. May be repeated when course content changes.

Prerequisite(s): GEOG 175 or instructor consent.
Grading: Graded

GEOG 290 - Seminar in Research Design for Geographic Information Science

3 unit(s)
Introduction to research in geographic information science. Includes definition of research problems, design of research project, identification of appropriate methodologies for acquiring, organizing and analyzing data, and presentation of research results. Research paper.

Prerequisite(s): Instructor consent.
Grading: Graded

GEOG 298 - Special Study

1-4 unit(s)
Advanced individual research and projects unavailable in other department offerings conducted under the supervision of a faculty member.

Prerequisite(s): Approval of supervising faculty member and department chair.
Grading: Mandatory CR/NC/RP

GEOG 299 - Master's Thesis or Project

1-6 unit(s)
Prerequisite(s): Approved master's degree candidate.
Grading: Mandatory CR/NC/RP

URBP 92 - Int'l Program Studies
URBP 101 - The City

3 unit(s)
History and organization of the city, emphasizing contemporary issues and strategies for influencing urban policy. GE Area: S.

Satisfies SJSU Studies S: Self, Society & Equality in US.

Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

URBP 102 - Introductory Community Planning and Development Studio

4 unit(s)
This course introduces students to the tools and techniques of working directly with diverse local communities to develop priorities and recommendations for improving neighborhood quality of life. Students learn about collaborative planning techniques via lectures, comparative studies, and group discussion.

Prerequisite(s): Upper Division Standing
Grading: Graded

URBP 103 - Local Government and Politics

4 unit(s)
Offers a theoretical and practical study of local politics and government. The structure, role, and functions of city and county governments are examined. Students gain knowledge of the resources and skills required for effective citizenship in their communities.

Grading: Graded

URBP 107 - Introduction to Real Estate Development Business and Planning

3 unit(s)
This course will introduce students to the business of real estate development and how the field of urban planning intersects with the development process. Topics addressed include development approval feasibility, land use regulation reform, and development during business cycles.

Prerequisite(s): Upper Division Standing
Grading: Graded

URBP 110 - Urbanization in the Global South

3 unit(s)
This course explores issues and debates that relate to urbanization in the developing world. Students will gain a general understanding of the concept of urbanization in the developing world, and what are some of the issues,
challenges, and policy responses found in these urban environments.

**Prerequisite(s):** Completion of the WST and core GE. Upper division standing  
**Pre/Corequisite(s):** 100w  
**Grading:** Graded

**URBP 120 - Intro to Housing Economics and Policy**  
4 unit(s)  
Historic and policy aspects of housing, focusing on housing characteristics and public sector intervention. Topics may vary. Course may be repeated for credit when topic changes.

**Prerequisite(s):** Upper division standing or instructor consent.  
**Grading:** Graded  
**Note(s):** Offered only occasionally.

**URBP 125 - Urban Anthropology**  
3 unit(s)  
Anthropological theories and methods in analyzing the global effects of urban growth. Relevance of anthropological approach in understanding our local multiethnic metropolitan area.

**Prerequisite(s):** ANTH 11 or instructor consent.  
**Grading:** Graded

**URBP 132 - Creating Built Worlds**  
3 unit(s)  
Cross-cultural exploration of material expressions of culture. Analysis of production and consumption of places, shelters, and goods. Implications for design and policy.

**Prerequisite(s):** Upper division standing.  
**Grading:** Graded

**URBP 133 - Introduction to Social Issues in Planning**  
4 unit(s)  
Contemporary social issues related to urban and regional planning. Assessment of community social needs and resident planning. Focus on ethnic areas such as African, Asian and Mexican American neighborhoods.

**Prerequisite(s):** Upper division standing or instructor consent.  
**Grading:** Graded

**URBP 136 - Intro to Land Use and Urban Planning**  
4 unit(s)  
Land use and facilities planning practices in the context of American cities, emphasizing interrelationships between various land uses and public facilities and service requirements. Study of the role of public law in addressing urban growth and environmental change issues.
Prerequisite(s): Upper division standing or instructor consent.
Grading: Graded

URBP 142 - Introduction to Environmental Planning

4 unit(s)
Environmental sustainability and its application to local planning. Review of regulatory tools and legislation that underlie most environmental planning and current environmental planning topics. Course may be repeated for credit when topic changes.

Prerequisite(s): Upper division standing or instructor consent.
Grading: Graded

URBP 143 - Intro Private Development and Planning

3 unit(s)
Introduction to the real estate development process from preliminary product analysis through planning, construction, and marketing.

Prerequisite(s): Upper division standing or instructor consent.
Grading: Graded

URBP 145 - Urban Policy and Its Impact on Inner City Residents

4 unit(s)
Effects of public policy decisions on inner city populations. Implications of urban planning processes for differential consumption costs of public goods and services.

Prerequisite(s): Upper division standing.
Grading: Graded

URBP 148 - Intro Spatial Vis Tech in Urb Plan

1-4 unit(s)
Lab-based course in digital visualization for urban spatial representation using industry standard software such as Adobe Photoshop, Adobe Illustrator and Trimble Sketch-Up.

Prerequisite(s): Upper division standing or instructor consent.
Grading: Graded

URBP 150 - Introduction to Municipal Finance

4 unit(s)
An introduction to the theory and practice of municipal finance. Topics include public goals and externalities, the function of the budget, sources of revenues, finance tools, expenditure types, the planning programming-budgetary system (PPBS), and methods of project evaluation.

Prerequisite(s): Upper Division Standing
Grading: Graded

URBP 151 - Introduction to Urban Design
4 unit(s)
Principles, goals and methods of the urban design process. Urban design as the comprehensive treatment of the human-made environment.

**Prerequisite(s):** Upper division standing or instructor consent.
**Grading:** Graded

**URBP 152 - Introduction to Urban Design Studio**

4 unit(s)
Introduction to the analysis of alternative urban design policies to direct urban form development. Course may be repeated for credit when topic changes.

**Misc/lab:** Activity 6 hours.

**Prerequisite(s):** URBP 151 or instructor consent.
**Grading:** Graded

**URBP 156 - Introduction to Local Transportation Planning**

4 unit(s)
Examination of transportation planning issues addressed at the neighborhood and municipal level such as bicycle and pedestrian planning, traffic calming, and parking policy.

**Prerequisite(s):** Upper division standing or instructor consent.
**Grading:** Graded

**URBP 160 - Topics in Environmental Planning**

4 unit(s)
In-depth examination of selected topics specifically related to environmental planning. Consult department for current offerings. Course may be repeated for credit when topic changes.

*Course may be repeated for credit for up to 8 units.*

**Prerequisite(s):** Upper division standing or instructor consent
**Grading:** Graded

**URBP 163 - Twentieth Century Urban Design**

3 unit(s)
History of urban design since 1900, covering theories and practices of urban design in the industrialized world; includes Camillo Sitte, Le Corbusier and Frank Lloyd Wright.

**Prerequisite(s):** ARTH 70B or URBP 151 or instructor consent.
**Grading:** Graded

**URBP 169 - Introduction to Social Media in Planning**

1-4 unit(s)
An introduction to social media tools and their use in urban planning, with a particular emphasis on public participation.
Prerequisite(s): Upper division standing
Grading: Graded

URBP 175 - Urban Studies Topics
1-4 unit(s)
In depth examination of selected topics. Consult schedule of classes for current offerings. Course may be repeatable for credit with different topic.

Course may be repeated for credit for up to 8 units.

Prerequisite(s): Upper division standing or instructor consent.
Grading: Graded

URBP 178 - Intro to Regional Transport Planning
4 unit(s)
Principles and concepts relevant to transportation planning and policy at the regional level, such as historical and current regional transportation planning processes, the relationship between regional travel demand and transportation infrastructure, and travel demand modeling practices.

Prerequisite(s): Upper division standing
Grading: Graded

URBP 179A - Fundamentals of GIS for Urban Planning
4 unit(s)
Exploration of Geographic Information Systems (GIS) area analysis techniques for spatial information management in local government: planning support systems, needs analysis, envisioning neighborhoods utilizing multiple maps, charts, photos and the Internet. Course may be repeated for credit when topic changes.

Prerequisite(s): Upper division standing or instructor consent.
Grading: Graded

URBP 179B - Advanced GIS for Urban Planning
4 unit(s)
Continued study of how geographic information systems (GIS) can be applied to urban and regional planning topics.

Prerequisite(s): URBP 179A or instructor consent.
Grading: Graded

URBP 180 - Individual Studies
1-4 unit(s)
Individual work on special topics by arrangement.

Prerequisite(s): Instructor consent and department chair approval.
Grading: Credit/No Credit

URBP 185 - Environmental Impact Analysis
4 unit(s)
Current environmental impact reports subjected to critical review; determination of alternative procedures and mitigating opportunities; extensive field analysis and practice.

Misc/Lab: Lecture 3 hours/lab 2 hours.

Prerequisite(s): ENVS 1, ENVS 124 or instructor consent.
Grading: Graded

URBP 190 - Advanced Environmental Impact Assessment

4 unit(s)
Advanced work in the field of environmental impact assessment. Analysis of EIA documents for regulatory adequacy, consistency with local planning documents and technical accuracy.

Misc/Lab: Lecture 3 hours/lab 2 hours.

Prerequisite(s): ENVS 185 or instructor consent.
Grading: Graded

URBP 192 - Int'l Program Studies

1-12 unit(s)
Grading: Mixed Grading

URBP 200 - Seminar on Urban and Regional Planning

4 unit(s)
Overview of the historical development of urban and regional planning in the United States, as well as prominent theories of urban planning practice. Emphasizing the connection between the theoretical and historical material and current planning practice.

Satisfies GWAR: Graduation Writing Assessment Requirement.

Grading: Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

URBP 203 - Collaborative Neighborhood Planning

4 unit(s)
Through fieldwork and laboratory assignments, the student applies community-based participatory planning methods to develop recommendations for improving neighborhood quality of life through planning and design.

Prerequisite(s): URBP 295 or instructor consent.
Grading: Graded

URBP 204 - Quantitative Methods

4 unit(s)
Urban research design, measurement, selected statistical research tools and introduction to computer processing. Extensive treatment of survey research.
**URBP 205 - Private Development and Urban Planning**

3 unit(s)
Study of the entire process of private development from preliminary product analysis through planning, construction and marketing.

**Grading:** Graded

**URBP 206 - Market Analysis, Appraisal, & Finance of Real Estate Development**

3 unit(s)
Students will be taught the real estate capital markets and the mix of the necessary financing sources required of developments. Students will evaluate criteria used by developers, real estate lenders and capital providers looking to minimize risk and maximize returns on real estate investments.

**Grading:** Graded

**URBP 207 - Real Estate Development Business and Planning**

3 unit(s)
This course will introduce students to the California planning system, real estate development entitlement process, and contemporary issues in urban and regional planning.

**Grading:** Graded

**URBP 208 - Urban Real Estate Development Studio**

3 unit(s)
This is a capstone studio course designed to immerse students in the real world of urban property development. Students will explore this world by taking part in a major mock-development project of an actual site in the San Francisco Bay Area.

**Prerequisite(s):** URBP 205, URBP 206 and URBP 207, or instructor consent

**Grading:** Graded

**URBP 211 - Regional Analysis and Planning**

4 unit(s)
Students learn the major concepts and techniques of regional analysis and apply these to assess and solve current planning problems.

**Prerequisite(s):** Instructor consent.

**Grading:** Graded

**URBP 214 - Introduction to Public Management**

3 unit(s)
A study of current principles and practices of effectively managing public service organizations. Emphasis on critical thinking, project management, and implementation processes.
Prerequisite(s): Statistics.
Grading: Graded

URBP 223 - Housing Economics and Policy

4 unit(s)
Overview of the housing situation in the United States; examination of the theory of housing markets and framework for analyzing housing policies; in-depth study of the problem of affordable housing and critical examination of the steps that the public, private, and non-profit sectors have taken to alleviate the problem.

Grading: Graded

URBP 225 - Land Use Planning and Law

4 unit(s)
Study of contemporary growth and land use management techniques used by local, state and federal governments. Examination of the role of public law in addressing urban growth and environmental change issues, and the legal aspects of preparing and administering planning controls and incentives.

Grading: Graded

URBP 226 - Regional Transportation Planning

4 unit(s)
Overview of the evolution of key transportation institutions and policies at the metropolitan, state, and federal levels. Assessment of the current challenges facing regional transportation systems and evaluation of different planning and policy approaches proposed to improve the performance of regional transportation systems.

Prerequisite(s): Instructor consent.
Grading: Graded

URBP 228 - Urban Community Development

4 unit(s)
The role, objectives and policies of the urban community development process; the social, economic, political and physical implications underlying community development programs; and relationships of these programs to comprehensive urban planning.

Grading: Graded

URBP 231 - Urban Design in Planning

4 unit(s)
Urban design as part of the planning process; contemporary and historic urban design thought and ways of improving design quality in the urban environment.

Grading: Graded

URBP 232 - Urban Design Studio
4 unit(s)
Through fieldwork and laboratory assignments, the student applies urban design theories, methods and principles to a current urban development issue.

**Prerequisite(s):** URBP 231 or instructor consent.
**Grading:** Graded

**URBP 233 - Social Issues in Planning**

4 unit(s)
Multi-disciplinary study of the principles that guide the growth of a community so all members have equal access to the benefits of living in an urban environment. The course examines the coordination of citizen groups and government bodies to secure needed social services and facilities, champion initiatives that improve quality of life in our community, and engage issues important to underrepresented groups.

**Grading:** Graded

**URBP 234 - Field Study Seminar**

1 unit(s)
Discussion and analysis of experience in the planning field under internship programs. May not be counted towards the Master of Urban Planning program of study. Repeatable for credit with approval of the Graduate Student Advisor.

**Prerequisite(s):** Instructor consent and enrollment in the Master of Urban Planning degree program.
**Grading:** Graded

**URBP 236 - Urban and Regional Planning Policy Analysis: Tools and Methods**

4 unit(s)
Analytical approaches to explain and evaluate the public policy making process with particular reference to urban and regional planning and development. Apply quantitative methods such as extrapolation techniques, population and economic projection models, and spatial interaction models for policy analysis.

**Satisfies GWAR:** Graduation Writing Assessment Requirement.

**Grading:** Graded

**Note(s):** This course satisfies graduate-level GWAR in this master's program.

**URBP 240 - Environmental Planning**

4 unit(s)
Examination of the fundamental concepts and issues related to urban environment that planners face. Focus on land use and open space planning, planning and use of urban resources, interactions of urban residents and the physical environment, and the role of government in formulating appropriate policies and strategies.

**Grading:** Graded

**URBP 241 - Planning Sustainable Cities**

2 unit(s)
An overview of urban sustainability covering topics such as the origins of urban sustainability, tools for sustainability
planning, global dimensions of sustainability (including different approaches to planning across world regions), and visions for creating sustainable futures.

Course may be repeated for credit for up to 6 units.

Grading: Graded

URBP 248 - Spatial Visualization Tech in Urb Plan

1-4 unit(s)
Lab-based course in digital visualization for urban spatial representation using industry standard software such as Adobe Photoshop, Adobe Illustrator and Trimble Sketch-Up.

Grading: Graded

URBP 250 - Urban Planning Public Finance

4 unit(s)
An investigation of both the theory and practice of local public finance with emphasis on applications relevant to urban and regional planning. Topics include: public goals and externalities; the function of the budget; sources of revenue and expenditure; the planning programming-budgetary system (PPBS); methods of project evaluation; and traditional as well as innovative methods of public finance including property tax, user fee, impact fee, tax increment financing and use of special districts.

Grading: Graded

URBP 255 - Urban and Regional Growth Management

4 unit(s)
Extensive study of causes, consequences and costs of sprawl; study of growth management and smart growth programs at the state, regional and local level, including the rationale, techniques, and economic, political, and organizational implications.

Grading: Graded

URBP 256 - Sustainable Transportation Planning

4 unit(s)
Examination of transportation planning issues addressed at the neighborhood and municipal level such as bicycle and pedestrian planning, traffic calming, and parking policy, with a focus on promoting sustainable communities.

Course may be repeated for credit for up to 9 units.

Grading: Graded

URBP 260 - Environmental Planning Topics

4 unit(s)
In-depth examination of selected topics specifically related to environmental planning. Consult department for current offerings. Course may be repeated for credit when topic changes.

Course may be repeated for credit for up to 8 units.
Grading: Graded

URBP 275 - Urban Planning Topics

1-4 unit(s)
In-depth examination of selected topics introduced in the core seminars for the Master of Urban Planning degree. Consult schedule of classes for current offerings. Course may be repeated for credit when topic changes.

Course may be repeated for credit for up to 8 units.

Grading: Graded

URBP 275G - Geographic Information Systems Overview: Urban Planning Applications

1 unit(s)
An overview of Geographic Information Systems with a focus on applications to urban planning, including demographic data analysis, land use mapping, cartographic techniques and methods for determining the most appropriate display of quantitative data for a variety of intended audiences.

Grading: Graded

URBP 276 - Social Media in Planning

1-4 unit(s)
An overview of social media tools and their use in urban planning, with a particular emphasis on public participation.

Grading: Graded

URBP 278 - Introduction to GIS for Urban Planning

4 unit(s)
Examination of geographic information systems (GIS) applications to urban and regional planning topics. Course may be repeated for credit when topic changes.

Course may be repeated for credit for up to 8 units.

Grading: Graded

URBP 279 - Advanced GIS for Urban Planning

4 unit(s)
Further examination of advanced geographic information systems (GIS) applications to urban and regional planning topics

Course may be repeated for credit for up to 8 units.

Prerequisite(s): URBP 278 or instructor consent.

Grading: Graded

URBP 280 - Planning Research Topics
1-4 unit(s)
In-depth examination of selected planning research topics introduced in core seminars for the Master of Urban Planning degree, such as the social and environmental impacts of planning policies.

Course may be repeated for credit for up to 12 units.

Grading: Graded

URBP 292 - Int'l Program Studies

1-6 unit(s)
Grading: Mixed Grading

URBP 295 - Capstone Studio: Community Planning

6 unit(s)
Through fieldwork and laboratory assignments, the student applies theories and techniques of analysis to identify the assets, problems, and opportunities of an urban community.

Prerequisite(s): Instructor consent.
Grading: Graded

URBP 297P - Planning Report Preliminary Proposal

1 unit(s)
Advanced research and proposal writing. Students conduct background research and develop a preliminary research proposal that demonstrates their capacity to do independent research, analysis, and writing about a complex planning problem.

Grading: Graded

URBP 298A - Special Study: Planning Report

3 unit(s)
Advanced research and report writing. Students develop a plan and complete the initial research to write a planning report that demonstrates their capacity to do independent research, analysis, and writing about a complex planning problem.

Prerequisite(s): Graduate Adviser approval. Passage of URBP 297P with a grade of B or better.
Grading: Mandatory CR/NC/RP

URBP 298B - Special Study: Planning Report Completion

3 unit(s)
Advanced individual research and report writing. Students work with a faculty advisor to complete a professional planning report that demonstrates their capacity to do independent research, analysis, and writing about a complex planning problem.

Prerequisite(s): Passage of URBP 298A and Graduate Student Advisor approval.
Grading: Mandatory CR/NC/RP

Overview

San José is at the center of Silicon Valley, known worldwide for its research institutes and industries that set the standard for scientific and technological innovation. San José State is the metropolitan university of the region, and the academic programs of the College of Science prepare students for rewarding careers through our bachelor's and master's level degree programs in the biological sciences, physical sciences, mathematics and computer science fields. Our departments have established partnerships with local employers where students find training and employment opportunities.

The College of Science provides the lower division core biology, chemistry, mathematics and physics courses supporting majors in other technical disciplines (such as engineering). As part of the university general education requirements, we offer courses in quantitative reasoning, the physical universe and its life forms, and earth and the environment. Furthermore, we teach the discipline-specific courses for the science and mathematics teacher credential programs.

Successful science students come from many backgrounds. Some enter the university immediately upon graduation from high school. Others, who have worked or have various life experiences, enroll as either full or part-time students in order to continue their education and better their career opportunities. The maturity, laboratory skills and experience of these students enrich our programs. We have several programs to increase the participation of women and underrepresented students in professional level science. Our College of Science Advising Center (COSAC) is available to assist students with their academic advising questions as well as to provide tutoring for key science and math courses.

There are active student clubs associated with each major, several of which have won national recognition for their professional and community service activities. Club members provide mutual support and are able to network with professionals in their field. A list of programs and courses can be found on each department page in the catalog.

- Department of Biological Sciences
- Department of Chemistry
- Department of Computer Science
- Department of Geology
College of Science Advising Center (COSAC)

Special Centers

The College of Science has several unique interdisciplinary instructional research centers and programs: the Biotechnology Education and Research Institute (BERI), the Master of BioTechnology (MBT), the Medical Product Development Management (MS), the Clinical Lab Scientist Certificate Program, the Center for Applied Mathematics, Computation and Statistics, the Institute for Modern Optics, the Materials Characterization and Metrology Center, the Flow Cytometry Core Facility, the W.M. Keck Facility for Chemical Research, the laboratory for Conservation Genetics, the Moss Landing Marine Laboratories, and the Nuclear Science Facility. Partially funded by external grants and contracts, these centers provide our students opportunities to participate in sponsored research projects. Cooperative programs with local industries and government laboratories are additional sources of professional experience and financial support for our science majors.

Teaching Credential Programs

Two single subject credential programs are coordinated by the College of Science, in collaboration with the Connie L. Lurie College of Education. The single subject professional programs are designed for individuals who are interested in teaching science or mathematics in middle schools or high schools. The Science Education Program offers single subject credential programs in biology, chemistry, earth science and physics. The Department of Mathematics and Statistics offers a mathematics single subject credential program. For detailed information, contact the appropriate program coordinator.

Through the Science Education Program, the College of Science supports the Science Education Resource Center, which provides hands-on science materials, textbooks, reference materials and technical assistance to pre-service and in-service teachers.

Data Science, MS

Website: www.sjsu.edu/science/special-programs/ms-data-science

Professors

Martina Bremer (Statistics)
Teng Moh, Program Coordinator (Computer Science)
Chris Pollett (Computer Science)
Overview

The Department of Computer Science and the Department of Mathematics and Statistics have combined their existing talents and resources to offer a MS in Data Science. This degree is designed for students with an undergraduate degree in the sciences or engineering, and it provides both mathematical and algorithmic foundational knowledge and practical programming skills for data science careers. Upon completion of this program, students will be able to:

- Design and implement complete solutions using massive amounts of data based on artificial-intelligence, machine-learning, or statistical-analysis methods.
- Design and implement new methods to capture and analyze massive amounts of data.
- Use and improve existing tools for capturing and analyzing massive amounts of data.

This degree assists those with a baccalaureate degree in the sciences or engineering to pursue a data science career by providing them with a rigorous and affordable education in mathematics, statistics, computer science and machine learning. Graduates will appeal to a number of data-based careers including but not limited to data scientist, data analyst, data mining specialist, machine learning engineer, and data and analytics manager.

Overview

The Masters of Science degree in Medical Product Development Management (MPDM) is offered by SJSU’s College of Science, in collaboration with the College of College of Professional Global Education and the Lucas Graduate
School of Business. The MPDM MS program combines clinical research, regulatory affairs, bioinformatics and customized technical classes with MBA-level business and management courses. The industry-relevant curriculum was designed in collaboration with experts from biomedical companies in the greater San Francisco Bay area to prepare students for careers in the biopharmaceutical, medical devices and in-vitro diagnostics industries. To accommodate students who work full-time, courses are offered during evenings or weekends, and several classes are offered online for scheduling flexibility.

**Nuclear Science Program**

**Office:** Duncan Hall (DH), Room 180

**Telephone:** 408-924-4954

**Professors**

Victor Maraschino, Radiation Safety Officer

**Overview**

The Nuclear Science Facility of San José State University is the unique focus of all related teaching and research activity on campus.

Undergraduate students have an opportunity to work in the facility as part of their general education classes in chemistry and physics. Students majoring in chemistry, physics, and biology come to the facility for some of their classes or for undergraduate research projects. The Department of Physics and Astronomy offers its major with a concentration in Nuclear Science. Consult the department listings for degree requirements and course descriptions.

SJSU also offers MS degrees in Chemistry and Physics. The course of study could emphasize nuclear chemistry or nuclear physics depending on the student's particular interest. Consult the chemistry or physics listings respectively for degree requirements and course descriptions.

**Resources**

The university's Nuclear Science Facility is a unique physical plant specifically designed and built for classroom, laboratory and research work in nuclear science and technology. The Nuclear Science Facility is a freestanding 10,000 square foot, three-story building contiguous to the university's other science and classroom facilities. It is comprised of a briefing room, administrative and faculty offices, four undergraduate wet labs, two undergraduate counting rooms, five graduate wet labs, a high activity storage room, plant and animal experiment rooms, a waste water collection and sampling system, an ambient air sampling system and storerooms. The facility is staffed full-time by a director, an office manager, senior technologists and a radiation safety officer.

The reference library within the facility is comprised of approximately 300 volumes of standard science reference works and texts covering basic and advanced nuclear physics science and technology, radiobiology, health physics and standards and procedures. This collection supplements the university library, comprised of 900,000 volumes and more than 2,100 science and engineering periodicals.

**Research**

Research in the Nuclear Science Facility is sponsored through grants from DOE, NASA, NSF, and others. Most research is done in collaboration with other universities and national laboratories.
Master

Data Science, MS

- Admissions Requirements
- Advancement to Candidacy
- Requirements for Graduation
- Master's Requirements (36 units)
- Program Learning Outcomes

The Master of Science in Data Science program (pending final approval from the CSU Chancellor's Office), offered by the College of Science, provides students with a Bachelor's degree in the sciences or engineering with foundational knowledge, experience, and skills that are crucial for a data science career. It features a multidisciplinary curriculum in applied math, statistics, computer science, and their intersection - machine learning. Its rigorous, balanced coursework provides students with strong mathematical, computing, and data skills, as well as project experience. Graduates of this program will have the necessary theoretical knowledge, practical data analysis and coding skills for solving complex real-world problems based on massive amounts of data and also meet the qualifications for various data scientist positions in industry and government.

Program Learning Outcomes (PLOs)

Students will be able to:

1. Apply computer science knowledge and tools to assist in performing data science tasks.
2. Summarize and evaluate statistical and machine learning concepts, models, and techniques.
3. Integrate multidisciplinary knowledge and software to tackle challenging, complex data science tasks.
4. Communicate effectively, both orally and in writing, data science concepts, algorithms, and results to a broad audience.
5. Identify ways in which data scientists can contribute to the cultural and economic well-being of diverse societies in local, national, and global scopes.

Admission Requirements

Candidates must meet all of the university admission requirements. Students can be admitted in either classified or conditionally classified standing.

To be admitted to classified standing, applicants must have earned a Bachelor's degree in the sciences or engineering from a regionally accredited institution with a minimum GPA of 3.0 (based on a 4.0 scale), and have completed all program prerequisites listed below. Two to three letters of recommendation are also required. The GRE General Test score must also be submitted along with the packet. There is no minimum requirement, but the GRE score will be used to compare and rank applicants. To enter this program with classified standing, a student must have passed the following prerequisites courses (with the listed required grades in some cases):

1. A multivariable calculus course (e.g., MATH 32 at SJSU), with a grade of B or better.
2. A linear algebra course (e.g., MATH 39 at SJSU), with a grade of B or better.
3. A calculus-based upper-division statistics course (e.g., MATH 161A at SJSU), with a grade of B or better.
4. A data structures and algorithms course (e.g., CS 146 at SJSU), with a grade of B or better.
5. A probability theory course (e.g., MATH 163 at SJSU).
6. An advanced course in object-oriented programming (e.g., CS 151 or CMPE 135 at SJSU) or two semesters of statistical programming coursework, such as the following at SJSU:
 Applicants from countries in which the native language is not English must submit TOEFL scores. Minimum TOEFL scores acceptable for admission are 600 (Paper-based), 250 (Computer-based), or 100 (Internet-based).

**Advancement to Candidacy**

Students may advance to candidacy after completing all admission conditions and all prerequisites for the culminating experience including the Graduation Writing Assessment Requirement (GWAR).

**Requirements for Graduation**

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

**Master's Requirements (36 units)**

**Core Courses (27 units)**

- CS 156 - Introduction to Artificial Intelligence 3 unit(s)
- CS 157A - Introduction to Database Management Systems 3 unit(s)
- CS 200W - Graduate Technical Writing 3 unit(s)
- CS 274 - Topics in Web Intelligence 3 unit(s)
- MATH 164 - Mathematical Statistics 3 unit(s)
- MATH 261A - Regression Theory and Methods 3 unit(s)
- MATH 250 - Mathematical Methods for Data Visualization 3 unit(s)
- MATH 252 - Cluster Analysis 3 unit(s)
- MATH 251 - Statistical and Machine Learning Classification 3 unit(s)
  or CS 271 - Topics in Machine Learning 3 unit(s)

**Elective Course (3 units)**

The elective can be selected from the list of courses offered in the Department of Computer Science and Department of Mathematics and Statistics and requires approval from the program coordinator.

Overall, students must take at least 4 MATH courses and 4 CS courses, not counting the writing course (CS 200W) and the project/thesis courses (CS 297/MATH 297A, CS 298/MATH 298).

**Culminating Experience (6 units)**

Both plans require two semesters of enrollment in 6-unit coursework in order to conduct the proposed project or thesis study. The student is responsible for securing the commitment of a full-time tenured or tenure-track faculty member who agrees to serve as his or her advisor. The student must also secure the commitments of two additional
members, one of whom must be a full-time tenured or tenure-track faculty member, to serve as the student's committee. Topics and committee selections must be approved by the MS Data Science Coordinator. Either plan requires writing a manuscript in a formal format describing original data science research, which is submitted for review by the student's committee. In addition, the student must successfully pass a comprehensive oral examination by the student's committee based on the conducted project or thesis study.

Plan A (Thesis)

- MATH 297A - Preparation for Writing Project, Research Project or Thesis 3 unit(s) or
- CS 297 - Preparation for Writing Project or Thesis 3 unit(s)
  and
- CS 299 - Master's Thesis 3 unit(s) or
- MATH 299 - Master's Thesis 1-4 unit(s)

Plan B (Project)

- MATH 297A - Preparation for Writing Project, Research Project or Thesis 3 unit(s) or
- CS 297 - Preparation for Writing Project or Thesis 3 unit(s)
  and
- CS 298 - Master's Writing Project 3 unit(s) or
- MATH 298 - Special Study 1-4 unit(s)

Total Units Required (36 units)

Students who enter the program having already completed courses equivalent in level and content to any of those required for the degree may be allowed to substitute an appropriate alternative course upon advanced approval by the MS Data Science Coordinator. The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 9.

Medical Product Development Management, MS

Overview

The Masters of Science degree in Medical Product Development Management (MPDM) is offered by SJSU's College of Science, in collaboration with the College of Professional and Global Education and the Lucas Graduate School of Business. The MPDM MS program combines clinical research, regulatory affairs, bioinformatics and customized technical classes with MBA-level business and management courses. The industry-relevant curriculum was designed in collaboration with experts from biomedical companies in the greater San Francisco Bay area to prepare students for careers in the biopharmaceutical, medical devices and in-vitro diagnostics industries. To accommodate students who work full-time, courses are offered during evenings or weekends, and several classes are offered online for scheduling flexibility.

Students in the Master of Science in Medical Product Development Management degree program develop proficiency in applying leadership, management and decisionmaking skills in a regulated environment; understanding and conversing with others in a multi-disciplinary field; and understanding ethical, business, financial, global, and strategic implications in medical product development. The MPDM program prepares students to enrich their communities as ethical and socially responsible graduates in a field in which the highest levels of integrity are a fundamental necessity.
Requirements for Admission to Classified Standing

Applying for graduate school at San José State University is a two-step process. Apply to the university through Cal State Apply to obtain approval for university-level admission, and to the department to obtain admission into the MS, Medical Product Development Management program. Please visit the admission requirements page for more information. Applicants may come from a wide variety of undergraduate (or postgraduate) areas of study including but not limited to nursing, pre-med, biology, chemistry, mathematics, science education, pharmacy, engineering, business, computer science, psychology, social sciences, and pre-law.

To be accepted into the program in classified standing, an applicant must:

1. Meet all University requirements.
2. Hold a baccalaureate degree from an accredited four-year college or university.
3. Have a grade point average (GPA) of at least 2.5 (3.0 or above preferred) in the last 60 semester or 90 quarter units of coursework.
4. Satisfactory completion of a 3-unit undergraduate course in introductory statistics and probability from an accredited college or university is recommended.
5. Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirement webpage at GAPE.

Applicants should note that a high degree of proficiency in both written and oral communications in English is a fundamental skill required both to complete the degree program and for success in the field.

The program does not accept students in conditionally classified standing.

Requirements for Advancement to Candidacy

Students must meet the university requirements for candidacy. General university requirements for advancement to candidacy for the master's degree are detailed in the Graduate Policies and Procedures section. Candidacy includes the successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website. The program GWAR course is SMPD 281A. Requirements for advancing to candidacy in the MS, Medical Product Development Management are successful completion of SMPD 281A and 9 units of overall program credits.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Program Graduation Requirements
The general requirements for the course completion as outlined below.

**Graduation Writing Assessment Requirement**

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

*SMPD 281A will satisfy the graduation writing requirement for MPDM.*

**Culminating Experience**

**Plan B (Project)**

The culminating project challenges the student to demonstrate leadership, teamwork and decision-making skills. The student will write or prepare a publication-worthy paper or presentation for a biomedical professional journal, conference or event. The paper or presentation must demonstrate depth of knowledge of the processes, methods, and procedures used in clinical research and development or in the management of medical product development on a topic selected by the student (with advisor approval).

This degree is listed with the College of Science.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate.

**Special Session Program Information**

Academic Programs offered through Special Session are operated by the College of Professional and Global Education (CPGE). Registration and enrollment in a Special Session course or program must use the special session application form and will follow the special session fees and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or the program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the CPGE website for more information.

**Master's Requirements (35 units)**

- SMPD 283A - Regulatory Affairs I, Biopharmaceutical 3 unit(s)
- SMPD 283B - Regulatory Affairs II Device-Diagnostics 3 unit(s)
- SMPD 286 - Statistical Methods in Clinical Trials 3 unit(s)
- SMPD 287 - Informatics in Drug and Device Development 3 unit(s)

**Management Courses (12 units)**

- BUS 210 - Developing and Managing People 3 unit(s) (GWAR)
- BUS 284C - Managing Medical Product Development 3 unit(s)
- BUS 286 - Project Management 3 unit(s)

Choose one course (3 units):

- SMPD 202T - MPDM Seminars: Biomedical Business 3 unit(s)
- BUS 250 - Law and Ethics 3 unit(s)
Core Courses (11 units)

Clinical Development (6 units)

- SMPD 281A - Clinical Development Seminar I 3 unit(s) (GWAR)
- SMPD 285 - MPDM Research / Practicum 1 unit(s)
- SMPD 281B - Clinical Development Seminar II 2 unit(s)

Clinical Trials (2 units)

- SMPD 289A - Special Topics in Clinical Trials Management I 2 unit(s)

Culminating Experience (3 units)

Plan B Project

- SMPD 289B - Clinical Trials Seminar II 3 unit(s)

Total Units Required (35 units)

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate.

SCI 1 - Academic Excellence Workshop

1-2 unit(s)
Cooperative learning activity to accompany selected College of Science courses and sections.

Misc/Lab: Activity 4 hours.

Corequisite(s): Enrollment in course and section accompanying workshop.
Grading: Credit/No Credit

Note(s): No credit toward requirements of the major or requirements of the minor for any science major or minor. May be used for university electives.

SCI 2 - Success in Science

3 unit(s)
Emphasis on development of study skills, time management, and personal growth needed to transition from high school to university. Orientation to SJSU policies and procedures; and degree and career options in science. Guest lecturers, peer advisors, and community building.

Misc/Lab: Lecture 2 hour/activity 2 hours.

Satisfies E: Human Understanding & Development

Grading: Graded
SCI 75 - Fundamentals of Leadership and Career Accelerator

3 unit(s)
This course is a foundational course designed to begin preparing students in their sophomore year or first year of transfer to SJSU to practice the leadership habits of mind and workplace skills needed to thrive in 21st century workplaces once they graduate from school. Given the increasingly competitive, and globalized job marketplace, this course enables participants to cycle through rounds of interactive experiences and practice to acquire "hard" and "soft" skills needed to succeed. Students will apply these skills in real-life leadership situations and build meaningful networks of peers and adults, all while activating their personal assets and deepening their sense of self and community.

Misc/Lab: 2 hours lecture/ 2 hours lab

Prerequisite(s): ENGL 1A
Grading: Graded

SCI 90 - Success as Transfer Students

2-3 unit(s)
Emphasis on development of study skills, time management, and personal growth needed to transition from community college to university. Orientation to SJSU policies and procedures; and degree and career options. Guest lecturers, peer advisors, and community building.

Misc/Lab: Lecture 1 hour/activity 2 hours/recitation 1 hour.

Grading: Graded

SCI 101 - Leadership and Career Accelerator

3 unit(s)
Prepares students for the increasingly competitive, globalized job marketplace. Through online, peer learning, interactive experiences, and reflection, students build meaningful networks, discover their innate leadership, and cultivate the hard" and "soft" skills and habits of mind needed to thrive in twenty-first century workplaces and make positive impact through their careers upon graduation. Aimed at students in their sophomore or junior year or first year of transfer, though all students of all majors can participate.

2 hours Lecture/2 hours Activity.

Prerequisite(s): ENGL 1A or ENGL 1AS with a grade of "C-" or better or complete GE Area A2 with a grade of "C-" or better.
Grading: Graded

SCI 105 - Integrated Science Teacher Enhancement

1-3 unit(s)
A thematic approach to the study of relevant topics and concepts in integrated science. Development of inquiry-based, hands-on classroom activities in integrated science.

Prerequisite(s): Teacher credential and/or instructor consent.
Grading: Credit/No Credit

SCI 110 - Global Themes of Science
The themes of energy, evolution, and systems & interactions are used to examine conceptual connections between biological, earth and physical sciences. Emphasis on strategies best suited to teach these unifying global themes of science.

**Prerequisite(s):** BIOL 21; GEOL 103 or Instructor consent.

**Grading:** Graded

---

**SCI 157SL - Community Action/Community Service**

3 unit(s)
A campus-wide service learning program with opportunities for direct involvement with local community services, both off campus and on campus. Weekly seminars held on campus or at the field site, plus four to six hours of community service work per week at the field site.

*Satisfies SJSU Studies S: Self, Society & Equality in US*

**Prerequisite(s):** Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

**Grading:** Graded

**Note(s):** All of SJSU Studies courses require completion of the WST and upper division standing.

---

**SCI 180 - Individual Studies**

1-4 unit(s)
Work, under guidance, in special fields. Repeatable: Repeatable for credit.

**Prerequisite(s):** Instructor consent.

**Grading:** Credit/No Credit

---

**SCI 184 - Directed Reading**

1-4 unit(s)
Assigned readings of selected books, journals and special papers chosen to fill gaps in training or to introduce new fields. Evaluation through weekly reports and conferences.

**Prerequisite(s):** Instructor consent.

**Grading:** Credit/No Credit

---

**SCI 299 - Master's Thesis**

1-6 unit(s)
Thesis development for Plan A MA Natural Science students, to be carried out under direct supervision of a faculty member and committee. Seminar presentation required upon final completion of thesis. Repeatable: Repeatable for credit.

*Course may be repeated for credit for up to 6 units.*

**Prerequisite(s):** Admission to candidacy for the master's degree and selection of a thesis committee.

**Grading:** Mandatory CR/NC/RP
SCI 1003 - Workshop Facilitator Training

1 unit(s)
Practical collaborative education theory and techniques for academic excellence workshop facilitators. Repeatable: Repeatable for credit.

Prerequisite(s): Current appointment as AEW Facilitator.
Grading: CR/NC, No Degree Credit

Note(s): No Degree Credit.

SMPD 202T - MPDM Seminars: Biomedical Business

3 unit(s)
Special Topics seminar in the management principles and practices of medical product development. Repeatable for credit when topic changes.

Course may be repeated for credit for up to 6 units.

Prerequisite(s): Graduate Standing
Grading: Graded

SMPD 281A - Clinical Development Seminar I

3 unit(s)
Provides a comprehensive overview of the regulated medical product development process. Topics include initial drug development/device invention to drug/device approval and post-market surveillance. Discussions include non-clinical and clinical studies, regulations, clinical indication determination, research methodology and ethical conduct.

Satisfies GWAR: Graduation Writing Assessment Requirement.

Prerequisite(s): Admission to MPDM program or certificate.
Grading: Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

SMPD 281B - Clinical Development Seminar II

2 unit(s)
Current practices for medical product development and the clinical and regulatory pathways required for approval in the USA; including non-clinical study design and GMP process. Emphasis on oral and written communication. Presentations from experts in the field.

Misc/Lab: Lecture 2 hour/Activity 4 hours.

Prerequisite(s): Admission to the Medical Product Development Management program and completion of SMPD 281A.
Grading: Graded

SMPD 283A - Regulatory Affairs I, Biopharmaceutical
3 unit(s)
Provide foundational knowledge of the pharmaceutical, biotechnology and biomedical industries with focus on company organization, product development and commercialization-associated activities such as chemical synthesis, device prototyping, quality assurance, regulatory affairs, manufacturing, control, marketing, and post-marketing surveillance.

Grading: Graded

SMPD 283B - Regulatory Affairs II Device-Diagnostics

3 unit(s)
Overview of laws and regulations enforced by the US Food and Drug Administration (FDA) and other Regulatory Agencies as they relate to biotechnology, medical device and diagnostic industries

Prerequisite(s): Admission to the MPDM program.
Grading: Graded

SMPD 285 - MPDM Research / Practicum

1 unit(s)
Independent research project / practicum to explore deeper understanding or breadth of experience in medical product development management.

Course may be repeated for credit for up to 5 units.

Prerequisite(s): Admission to MPDM program.
Grading: Credit/No Credit

SMPD 286 - Statistical Methods in Clinical Trials

3 unit(s)
Overview of statistical methods used in the design and interpretation of clinical trials of drugs and medical devices.

Prerequisite(s): Admission to the MPDM program.
Grading: Graded

SMPD 287 - Informatics in Drug and Device Development

3 unit(s)
Provides business and regulatory perspectives on electronic information technologies, processes and standards in the conduct of clinical trials. Special emphasis: data collection, clinical trial & data management randomization and drug supply, statistical processes, safety databases and electronic regulatory submission, electronic records and signatures, sys validation processes, and data standards.

Prerequisite(s): Admission to the MPDM program and completion of SMPD 286.
Grading: Graded

SMPD 289A - Special Topics in Clinical Trials Management I

2 unit(s)
Seminar focusing on critical issues in clinical development. This programmatic capstone series of seminars challenges the students to demonstrate a mature, professional manner and technical proficiency in the field.
Emphasis on oral and written communications. Course includes numerous presentations by industry experts.

Misc/Lab: Lecture 2 hour/Activity 4 hours

Prerequisite(s): Admission to MPDM program and completion of SMPD 285.
Grading: Graded

SMPD 289B - Clinical Trials Seminar II

3 unit(s)
Capstone course of the MPDM program

Prerequisite(s): Admission to MPDM program.
Grading: Graded

Overview

As leaders in the education of a highly trained and diverse scientific workforce, our mission is to provide a dynamic educational experience by engaging students in hands-on, inquiry-based learning activities at the bench and in the field. Through these experiences our students will gain a conceptual and experiential understanding of the biological sciences spanning from molecules to ecosystems.

Our Program goals are to:

- Serve the diverse student population of our region.
- Educate students to be intellectually agile and technologically proficient.
- Provide students with intensive, rigorous laboratory and field experiences within the context of their regular coursework.
- Create individualized mentoring opportunities and state-of-the-art learning experiences within the context of our faculty research programs.
- Foster creativity, a sound theoretical foundation, and the ability to communicate effectively and interact cooperatively.
- Make substantial contributions to the scientific community through our research efforts and that of our students.

Honors Program

Students may apply for the honors program in Biology in BS - Biological Sciences (all concentrations). Students wishing to complete the honors program must:

1. Have a GPA of 3.5 or higher in courses required in the major,
2. Have an overall SJSU GPA of 3.0 or higher, and
3. Complete BIOL 186, BOT 186, or ZOOL 186 - Senior Thesis.

Senior thesis courses involve the student in the completion of a research project under the direct supervision of a faculty member. As such, the research project must be on a mutually agreed upon topic. It is recommended that the student submit a proposal for research to the faculty member and have that proposal approved in the last semester of his/her junior year. The student is required to present the results of the research in written form and as a seminar.

Summary of Degree Units

University Graduation Requirements 38

Major Preparation 35-41
Major Requirements 33-35
University Electives 6-14
Total 120

University Requirements for Graduation

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Undergraduate Graduation Requirements section of the Policies and Procedures.

Program Roadmaps

The 4-Year Roadmap is available online. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Degrees (ADT) Pathways are also available online.

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the General Education (GE) section to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

Students in this major must complete all lower division courses in the Requirements of the Major with a "C- or better" to graduate.

Prerequisite Requirements

Enrollment in any chemistry course requires that the prerequisite courses be passed with a grade of "C or better" (C- not accepted). Exceptions may be made only with instructor consent or if not explicitly stated in the course description. Refer to the SJSU Course Catalog for specific information regarding course prerequisites.

General Education/American Institution Requirements

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

University Requirements (38 units)

Core Lower Division General Education (24 units)

Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

Note: Students who have completed the ADT Transfer degree (under SB 1440) for this major will have completed all lower division GE requirements (except for 1 course in GE Area C and 1 course in GE Area D) and should follow the 60 unit guarantee roadmap (which include the missing GE in Area C and D). Meet with an advisor prior to registering for your first semester for the 60 unit roadmap or specific questions.

Upper Division General Education (6 units)
Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions (6 units)

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B, HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Complete One Sequence From:

African American Studies (6 units)

- AFAM 2A - African Americans and the Development of America’s History and Government 3 unit(s) (D2)
- AFAM 2B - African Americans and the Development of America’s History and Government 3 unit(s) (M7)

Asian American Studies (6 units)

- AAS 33A - Asian Americans in U.S. History I 3 unit(s) (D2)
- AAS 33B - Asian Americans in U.S. History II 3 unit(s) (M7)

U.S. History and Government (6 units)

- HIST 15 - Essentials of U.S. History 3 unit(s) (M12)
- POLS 15 - Essentials of U.S. & California Government 3 unit(s) (M11)

Chicana and Chicano Studies (6 units)

- CCS 10A - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D2)
- CCS 10B - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (M7)

Physical Education (2 units)

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Major Preparation (35-41 units)

- BIOL 100W - Scientific Communication Workshop 3 unit(s) (Z)
- BIOL 155 - Hypothesis Testing 3 unit(s)
- CHEM 1A - General Chemistry 5 unit(s) (B1+B3)
- CHEM 1B - General Chemistry 5 unit(s) (B1+B3)
• PHYS 2A - Fundamentals of Physics 4 unit(s) (B1+B3)
• PHYS 2B - Fundamentals of Physics 4 unit(s) (B1+B3)

Complete One Sequence From:

Organic Chemistry A

• CHEM 8 - Organic Chemistry 3 unit(s)
• CHEM 9 - Organic Chemistry Lab 1 unit(s)

Organic Chemistry B

• CHEM 112A - Organic Chemistry 3 unit(s)
• CHEM 112B - Organic Chemistry 3 unit(s)
• CHEM 113A - Organic Chemistry Lab 2 unit(s)

Complete One Course From:

• CHEM 132 - Introductory Biochemistry 4 unit(s)
• CHEM 135 - General Biochemistry 4 unit(s)

Complete One Course From:

• MATH 19 - Precalculus 5 unit(s) (B4)
• MATH 30 - Calculus I 3 unit(s) (B4)

Major Requirements (33-35 units)

Core Courses (14-16 units)

• BIOL 30 - Principles of Biology I 4 unit(s) (B2+B3)
• BIOL 31 - Principles of Biology II 4 unit(s) (B2+B3)

Complete One Course From:

• BIOL 115 - General Genetics 4 unit(s)
• BIOL 118 - Evolutionary Genetics 4 unit(s)

Complete One Course From:

• BIOL 135B - Eukaryotic Cell and Molecular Biology II 3 unit(s) (R)
• BIOL 159 - Integrative Biology 3 unit(s) (R)
• BIOL 160 - Ecology 4 unit(s) (R)
• BIOL 178 - Integrative Physiology 3 unit(s) (R)
• MICR 127 - Microbial Physiology 3 unit(s) (R)

Major Preparation (17 units)

Note: MATH 30P  (5 units) or MATH 060 (5 units) or Calculus A/B or B/C Advanced Placement Exam with a score of 3 or higher is also acceptable

• BIOL 55 - Biostatistics 3 unit(s)
• BIOL 100W - Scientific Communication Workshop 3 unit(s) (Z)
• PHYS 2A - Fundamentals of Physics 4 unit(s) (B1+B3)
• PHYS 2B - Fundamentals of Physics 4 unit(s) (B1+B3)
• MATH 30 - Calculus I 3 unit(s) (B4) (Note: MATH 30P  (5 units), or MATH 30X (3 units), or MATH 60 (5 units), or Precalculus Proficiency Assessment with a score of 3 or higher is also acceptable.)

Major Requirements (42 units)

• BIOL 30 - Principles of Biology I 4 unit(s) (B2+B3)
• BIOL 31 - Principles of Biology II 4 unit(s) (B2+B3)
• BIOL 107 - Immunology 3 unit(s)
• MICR 101 - General Microbiology 5 unit(s)
• MICR 127 - Microbial Physiology 3 unit(s) (R)
• MICR 141 - Pathogenic Microbiology I 3 unit(s)
• MICR 166 - Bacterial Genetics 4 unit(s)

Laboratory Courses (7 units)

Complete at least 7 units of laboratory courses from:

• BIOL 107L - Immunology Laboratory 2 unit(s)
• BIOL 116L - Genetics Laboratory 3 unit(s)
• BIOL 180 - Individual Studies 1-4 unit(s)
• MICR 122L - Bacterial Diversity Laboratory 2 unit(s)
• MICR 123L - Food Microbiology Laboratory 2 unit(s)
• MICR 127L - Microbial Physiology Laboratory 2 unit(s)
• MICR 140L - Hematology Laboratory 2 unit(s)
• MICR 141L - Pathogenic Microbiology I Laboratory 3 unit(s)
• MICR 142L - Pathogenic Microbiology II Laboratory 3 unit(s)

Additional Laboratory Courses (9 units)

Complete 9 additional units from lab courses above or:

• BIOL 115 - General Genetics 4 unit(s)
• BIOL 116 - Molecular Genetics 4 unit(s)
• BIOL 118 - Evolutionary Genetics 4 unit(s)
• BIOL 124 - Systems Physiology 3 unit(s)
• BIOL 125 - Systems Physiology Laboratory 2 unit(s)
• BIOL 134 - Vertebrate Histology 4 unit(s)
• BIOL 135A - Eukaryotic Cell and Molecular Biology I 3 unit(s)
• BIOL 135L - Molecular Cell Biology Lab 3 unit(s)
• BIOL 156 - Ecological Sampling Design and Analyses 3 unit(s)
• CHEM 55 - Quantitative Analysis 2 unit(s)
• MICR 122 - Bacterial Diversity 2 unit(s)
• MICR 123 - Food Microbiology 1 unit(s)
• MICR 140 - Hematology 3 unit(s)
• MICR 142 - Pathogenic Microbiology II 3 unit(s)
• MICR 170 - General Virology 3 unit(s)

Chemistry Minor Requirements (23 units)

• CHEM 1A - General Chemistry 5 unit(s) (B1+B3)
• CHEM 1B - General Chemistry 5 unit(s) (B1+B3)
• CHEM 112A - Organic Chemistry 3 unit(s)
• CHEM 112B - Organic Chemistry 3 unit(s)
• CHEM 113A - Organic Chemistry Lab 2 unit(s)
• CHEM 120S - Chemical Safety Seminar 1 unit(s)
• CHEM 135 - General Biochemistry 4 unit(s)

Total Units Required (120 units)

Students pursuing the California State Clinical Laboratory Science license should consult an advisor for additional requirements.

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

A grade of C or better (C- not accepted) is required to meet graduation requirement.
Major Preparation (17 units)

- BIOL 55 - Biostatistics 3 unit(s)
- BIOL 100W - Scientific Communication Workshop 3 unit(s) (Z)
- PHYS 2A - Fundamentals of Physics 4 unit(s) (B1+B3)
- PHYS 2B - Fundamentals of Physics 4 unit(s) (B1+B3)
- MATH 30 - Calculus I 3 unit(s) (B4) (Note: MATH 30P (5 units), or MATH 30X (3 units), or MATH 60 (5 units), or Precalculus Proficiency Assessment with a score of 3 or higher is also acceptable)

Major Requirements (42 units)

- BIOL 30 - Principles of Biology I 4 unit(s) (B2+B3)
- BIOL 31 - Principles of Biology II 4 unit(s) (B2+B3)
- BIOL 115 - General Genetics 4 unit(s)
- BIOL 116 - Molecular Genetics 4 unit(s)
- BIOL 116L - Genetics Laboratory 3 unit(s)

**University Requirements for Graduation**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Undergraduate Graduation Requirements section of the Policies and Procedures.

**Program Roadmaps**

The 4-Year Roadmap is available online. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Degrees (ADT) Pathways are also available online.

**Major Exceptions**

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the General Education (GE) section to identify the specific adjustments for this degree program or contact your major advisor for more details.

**Major-Specific Graduation Requirements**

Students in this major must complete all lower division courses in the Requirements of the Major with a "C- or better" to graduate.

**Prerequisite Requirements**
Enrollment in any chemistry course requires that the prerequisite courses be passed with a grade of "C or better" (C- not accepted). Exceptions may be made only with instructor consent or if not explicitly stated in the course description. Refer to the SJSU Course Catalog for specific information regarding course prerequisites.

General Education/American Institution Requirements

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

University Requirements (38 units)

Core Lower Division General Education (24 units)

Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

Note: Students who have completed the ADT Transfer degree (under SB 1440) for this major will have completed all lower division GE requirements (except for 1 course in GE area C and 1 course in GE area D) and should follow the 60 unit guarantee roadmap (which include the missing GE in area C and D). Meet with an advisor prior to registering for your first semester for the 60 unit roadmap or specific questions.

Upper Division General Education (6 units)

Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions (6 units)

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B, HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

**Master**

**Biological Sciences, Ecology and Evolution Concentration, MS**

The master's program in Biological Sciences with a concentration in Ecology and Evolution, offered by the Department of Biological Sciences, offers students training in the pursuit of rigorous scientific investigation with an emphasis on ecological and evolutionary processes. Students in this degree program emphasize botany, entomology, zoology, or conservation biology through choice of advisor, committee, course work, and thesis or project. Our graduates have an excellent grasp of theory and application of ecological and evolutionary principles.

In addition, students with our degree will have gained experience in critical thinking, problem solving, research methodology (e.g., experimental design, sampling techniques, and analysis), and both written and oral communication. Our alumni are successful applicants for doctoral degree programs and generally attain high-level academic and nonacademic positions in both the private and public sectors.

For more information visit [http://www.sjsu.edu/biology](http://www.sjsu.edu/biology).

**Admissions Requirements**

Candidates must meet all the university admission requirements.

In addition, applicants must submit to the Graduate Coordinator for the Department of Biological Sciences a 1-2 page personal statement that includes the following sections: an explanation of why the student wants to earn an MA or MS, their long-term goals and how will the degree help facilitate those goals, the names of up to three tenure-track faculty members whose research interests them, and two letters of recommendation. **Applicants must also be accepted by a tenured or tenure-track faculty member in the Department of Biological Sciences prior to acceptance by the program.** It is the student's responsibility to contact any potential faculty advisors. For complete details on the student approval process, please visit: [www.sjsu.edu/biology/graduate-programs/prospective-ms-students/index.html](http://www.sjsu.edu/biology/graduate-programs/prospective-ms-students/index.html).

Students can be admitted in either classified or conditionally classified standing. Conditional acceptance means that the candidate must fulfill specific requirements in order to be eligible to apply for advancement to candidacy. These
conditions will be stipulated as part of the acceptance agreement between the faculty adviser and the applicant. Failure to fulfill these requirements will result in disqualification from the program.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE.

**Requirements for Advancement to Graduate Candidacy**

Each semester, students should consult with their graduate advisor to develop a schedule of courses. Students admitted as conditionally classified must satisfy the requirements listed in their acceptance agreement before advancing to candidacy. Students who have comp achieved classified standing in the master's degree curriculum must next advance to candidacy for the degree. A student may advance to candidacy after completing a minimum of 9 units of letter-graded work as a graduate student in 100- or 200-level courses acceptable to the department as well as fulfilling the other university requirements for advancement to candidacy, as detailed in the Graduate Policies and Procedures section. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR), which is satisfied in this degree by completion of BIOL 202 with a grade of "B" or higher.

**Requirements for Graduation**

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

**MS Biological Sciences, Concentration in Ecology and Evolution, Graduation Requirements**

As shown below, the program consists of 30 semester units of approved work. The student consults with his or her advisor to select a thesis or project topic.

**Graduation Writing Assessment Requirement**

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

*A grade of "B" or better in BIOL 202 will satisfy the graduate competency in writing requirement.*

**Culminating Experience Requirements**

**Plan A (Thesis)**

Thesis: The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master's Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate's thesis committee.
chair with the assistance of the thesis committee. The MS thesis document must be approved by the student's thesis research committee before submission. Typically, the thesis committee will provide the candidate feedback during the Thesis Defense and may request changes to the thesis before final approval.

Oral Thesis Defense: All MS candidates are required to present a public seminar based on their research project.

**Plan B (Project)**

Written Project: The written project must be a manuscript describing the student's research project, written following a professional journal's format for submission. It will be written under the guidance of the candidate's graduate committee chair with the assistance of their graduate committee. The manuscript must be approved by the student's graduate committee. Typically, the committee will provide the candidate feedback during the Project Defense and may request changes to the manuscript before final approval.

Oral Project Defense: All MS candidates are required to present a public seminar based on their research project.

**Masters Requirements (30 units)**

**Core Courses (15 units)**

- BIOL 201 - Graduate Seminar in Biological Sciences 1 unit(s)
- BIOL 202 - Graduate Studies in Biology 3 unit(s) (GWAR)
- BIOL 220 - Science Communication 3 unit(s)
- BIOL 297 - Graduate Research 1-4 unit(s) (Students take a total of 8 core units of this class.)

**Concentration Courses (9 units)**

- BIOL 218 - Evolution 3 unit(s)
- BIOL 256 - Advanced Experimental Design and Analysis 3 unit(s)
- BIOL 255E - Advanced Topics: Ecology and Evolution 1-4 unit(s) (3 units required)

**Electives (5 units)**

*Elective courses must be planned in consultation with the Graduate Advisor.*

- BIOL 255E - Advanced Topics: Ecology and Evolution 1-4 unit(s) (3 units required)
- BIOL 255L - Advanced Biology Laboratory 1-4 unit(s) (3 units required)
- BIOL 255M - Advanced Topics: Molecular & Microbiology 1-4 unit(s) (3 units required)
- BIOL 255P - Seminar in Advanced Biology: Physiology 1-4 unit(s) (3 units required)
- 100- or 200-level courses chosen with advisor consent

**Culminating Experience (1 unit)**

**Complete One Option (Plan A or Plan B):**

**Plan A (Thesis)**

- BIOL 299 - Master's Thesis 1-4 unit(s) (1 unit required)
• Seminar- Thesis Defense

Plan B (Project)

• BIOL 298 - MS Project Culminating Experience 1 unit(s)
• Seminar- Project Defense

Total Units Required (30 units)

Elective courses must be planned in consultation with the Graduate Advisor.

The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 15.

A public seminar on the thesis or project must be given.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

**Biological Sciences, MA**

The MA in Biological Sciences, offered by the Department of Biological Sciences, offers students broad training in areas of science that may include general biology, plant biology, cell biology, ecology, entomology, genetics, microbiology, immunology, systems physiology, toxicology, zoology, or, under special circumstances, marine biology. Students with an MA in Biological Sciences go on to careers in research, biotechnology, medical and health sciences, and teaching.

For more information visit the program website at: www.sjsu.edu/biology.

**Admissions Requirements**

**University Admissions**

Candidates must apply through the CSU admissions portal, Cal State Apply, and meet all university admission requirements. Applicants will need to apply separately to the university to obtain approval for university-level admission and to the department to obtain admission into the MA in Biological Sciences.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE. The program does not currently require the GRE for admission.

**Admission to the Program**

In addition, applicants must submit to the Graduate Coordinator for the Department of Biological Sciences a personal statement and two letters of recommendation from people who can evaluate your potential to succeed in a graduate program.
Note: Applicants' admission into the program is contingent upon their being accepted by a tenured or tenure-track faculty member in the Department of Biological Sciences who will become their major advisor. Applicants must contact tenured or tenure-track faculty members.

**Requirements for Admission to Classified Standing**

Students can be admitted in either classified or conditionally classified standing. To be admitted to the MA in Biological Sciences program in Classified status, an applicant must meet all of the minimum university and departmental requirements for admission.

**Admission to Conditionally Classified Standing**

If an applicant's preparation for advanced graduate work is considered inadequate to meet the course prerequisites or other departmental and/or faculty requirements, the conditions will include passing additional courses (specified by the student's major advisor) in the first semester of the program with a grade of B or better. The program admissions letter will explain terms and requirements.

**Requirements for Advancement to Candidacy**

Each semester, students should consult with their graduate advisor as to develop a schedule of courses. Students admitted as conditionally classified must satisfy the requirements listed in their acceptance agreement before advancement to candidacy. Students who have completed matriculation and achieved classified standing in the master's degree curriculum must next advance to candidacy for the degree. A student may advance to candidacy after completing a minimum of 9 units of graded work as a graduate student in letter-graded 100- or 200-level courses acceptable to the AE Department as well as fulfilling the other university requirements for advancement to candidacy, as detailed in the Graduate Policies and Procedures section. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR), which is satisfied in this degree by the completion of BIOL 202 with a "B" or higher.

**Requirements for Graduation**

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

**Graduation Writing Assessment Requirement**

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

**Culminating Experience**

Students in the MA, Biological Sciences may complete the program Culminating Experience through either a comprehensive exam or graduate project. Students who have advanced to candidacy, and who have completed or
are in the final semester of completing the 30 units of required coursework will choose, in consultation with their major
advisor, one of two options for their Culminating Experience. The program does not offer a thesis option.

Plan B (Comprehensive Exam)

Students choosing the Plan B (Comprehensive Exam) will enroll in BIOL 298M - MA Culminating Experience, and
successfully complete written exam, followed by an oral exam as their culminating experience. The advising
committee determines the format of the written and oral exams. Once the written portion of the exam is passed,
students take a two- to three-hour oral examination. Successful completion of both exams is required for award of the
MA Biological Sciences degree. Students who are not successful in their first attempt will have one opportunity to
retake one or both exams. Written and oral exams will include material from graduate-level coursework taken by the
student. Successful completion of both the written and oral exam is determined by a majority vote of the student's
graduate committee.

Plan B (Project)

The student choosing the Plan B (Project) must enroll in the 1-unit BIOL 298M - MA Culminating Experience and
complete a research project that has been approved and supervised by their major advisor. This culminating
experience option requires students to complete a written report in the style of a manuscript for publication that
describes the project and to deliver an oral presentation describing the project to the advising committee. Research
projects for the MA Biological Sciences are typically 1-2 semesters in duration. Successful completion of both the
manuscript and the oral presentation is determined by a majority vote of the student's graduate committee.

As shown below, the program consists of 30 semester units of approved work. The student consults with his or her
advisor to select coursework.

Masters Requirements (30 units)

Core Courses (15 units)

- BIOL 201 - Graduate Seminar in Biological Sciences 1 unit(s) (2 units required)
- BIOL 202 - Graduate Studies in Biology 3 unit(s) (GWAR)

Foundations in Biology (3 units)

Complete one course:

- BIOL 215 - Seminar in Advanced Genetics 3 unit(s)
- BIOL 218 - Evolution 3 unit(s)
- BIOL 230 - Comparative Animal Physiology 3 unit(s)

Current Trends in Biology (3 units)

Complete one course:

- BIOL 255E - Advanced Topics: Ecology and Evolution 1-4 unit(s)
- BIOL 255M - Advanced Topics: Molecular & Microbiology 1-4 unit(s)
- BIOL 255P - Seminar in Advanced Biology: Physiology 1-4 unit(s)

Supervised Studies (4 units)
Complete 4 units:

- BIOL 280 - Individual Studies 1-3 unit(s)
- BIOL 284 - Master's Directed Reading 1-3 unit(s)

Electives (14 units)

*Students may enroll in a maximum combination of 4 units in BIOL 280 and BIOL 284.*

- BIOL 205 - Advanced Molecular Techniques 4 unit(s)
- BIOL 215 - Seminar in Advanced Genetics 3 unit(s)
- BIOL 218 - Evolution 3 unit(s)
- BIOL 220 - Science Communication 3 unit(s)
- BIOL 227 - Advanced Physiology 3 unit(s)
- BIOL 233 - Immunological Techniques 3 unit(s)
- BIOL 230 - Comparative Animal Physiology 3 unit(s)
- BIOL 255E - Advanced Topics: Ecology and Evolution 1-4 unit(s) (3 units required)
- BIOL 255L - Advanced Biology Laboratory 1-4 unit(s) (3 units required)
- BIOL 255M - Advanced Topics: Molecular & Microbiology 1-4 unit(s) (3 units required)
- BIOL 255P - Seminar in Advanced Biology: Physiology 1-4 unit(s) (3 units required)
- BIOL 256 - Advanced Experimental Design and Analysis 3 unit(s)
- BIOL 280 - Individual Studies 1-3 unit(s)
- BIOL 284 - Master's Directed Reading 1-3 unit(s)
- 100- or 200-level courses chosen with advisor consent

Culminating Experience (1 unit)

Choose One Option:

Plan B (Project)

- BIOL 298M - MA Culminating Experience 1 unit(s)
- Comprehensive Written Examination 0 unit(s)
- Comprehensive Oral Examination 0 unit(s)

Plan B (Comprehensive Exam)

- BIOL 298M - MA Culminating Experience 1 unit(s)
- Comprehensive Written Examination 0 unit(s)
- Comprehensive Oral Examination 0 unit(s)

Total Units Required (30 units)

Elective courses must be planned in consultation with the Graduate Advisor.

The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 15.
Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate.

**Biological Sciences, Molecular Biology and Microbiology Concentration, MS**

The Master of Science program in Biological Sciences with a concentration in Molecular Biology and Microbiology, offered by the Department of Biological Sciences, offers students training in the pursuit of rigorous scientific investigation with an emphasis on discovering the molecular mechanisms that underlie biological processes such as behavior, cell biology, immunology, microbial diversity, microbial engineering, pathogenesis, and neural development. During their research experience, students acquire the skills necessary to successfully address a variety of research questions under the guidance of faculty.

In addition, students with our degree will have gained experience in critical thinking, problem-solving, research methodology (e.g., experimental design, sampling techniques, and analysis), and both written and oral communication. Our alumni are successful applicants for doctoral degree programs and generally attain high level academic and non-academic positions in both the private and public sectors.

For more information visit www.sjsu.edu/biology.

**Admissions Requirements**

Candidates must meet all the university admission requirements.

In addition, applicants must submit to the Graduate Coordinator for the Department of Biological Sciences an explanation of why the student wants to earn an MS or MA, their long-term goals and how the degree will help facilitate those goals, the names of up to three tenured or tenure-track faculty members whose research interests them, and two letters of recommendation. **Applicants must also be accepted by a tenured or tenure-track faculty member in the Department of Biological Sciences prior to acceptance by the program.** It is the student's responsibility to contact any potential faculty advisors. For complete details on the student approval process, please visit: www.sjsu.edu/biology/graduate-programs/prospective-ms-students/index.html.

Students can be admitted in either classified or conditionally classified standing. Conditional acceptance means that the candidate must fulfill specific requirements in order to be eligible to apply for advancement to candidacy. These conditions will be stipulated as part of the acceptance agreement between the faculty adviser and the applicant. Failure to fulfill these requirements will result in disqualification from the program.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE.

**Requirements for Advancement to Graduate Candidacy**

Each semester, students should consult with their graduate advisor to develop a schedule of courses. Students admitted as conditionally classified must satisfy the requirements listed in their acceptance agreement before advancing to candidacy. Students who have achieved classified standing in the master's degree curriculum must next advance to candidacy for the degree. A student may advance to candidacy after completing a minimum of 9 units of letter-graded work as a graduate student in 100- or 200-level courses acceptable to the department as well as
fulfilling the other university requirements for advancement to candidacy, as detailed in the Graduate Policies and Procedures section. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR), which is satisfied in this degree by the completion of BIOL 202 with a grade of "B" or better.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

MS Biological Sciences, Concentration in Ecology and Evolution, Graduation Requirements

As shown below, the program consists of 30 semester units of approved work. The student consults with his or her advisor to select a thesis or project topic.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

A grade of "B" or better in BIOL 202 will satisfy the graduate competency in writing requirement.

Culminating Experience Requirements

Plan A (Thesis)

Thesis: The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master's Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate's thesis committee chair with the assistance of the thesis committee. The MS thesis document must be approved by the student's thesis research committee before submission. Typically, the thesis committee will provide the candidate feedback during the Thesis Defense and may request changes to the thesis before final approval.

Oral Thesis Defense: All MS candidates are required to present a public seminar based on their research project.

Plan B (Project)

Written Project: The written project must be a manuscript describing the student's research project, written following a professional journal's format for submission. It will be written under the guidance of the candidate's graduate committee chair with the assistance of their graduate committee. The manuscript must be approved by the student's graduate committee. Typically, the committee will provide the candidate feedback during the Project Defense and may request changes to the manuscript before final approval.

Oral Project Defense: All MS candidates are required to present a public seminar based on their research project.

Masters Requirements (30 units)
Core Courses (15 units)

- BIOL 201 - Graduate Seminar in Biological Sciences 1 unit(s)
- BIOL 202 - Graduate Studies in Biology 3 unit(s) (GWAR)
- BIOL 220 - Science Communication 3 unit(s)
- BIOL 297 - Graduate Research 1-4 unit(s) (Students take a total of 8 core units of this class.)

Concentration Courses (9 units)

- BIOL 205 - Advanced Molecular Techniques 4 unit(s)
- BIOL 215 - Seminar in Advanced Genetics 3 unit(s)
- BIOL 255M - Advanced Topics: Molecular & Microbiology 1-4 unit(s) (Students take at least 2 units of this class)

Electives (5 units)

Elective courses must be planned in consultation with the Graduate Advisor.

- BIOL 233 - Immunological Techniques 3 unit(s)
- BIOL 255L - Advanced Biology Laboratory 1-4 unit(s)
- BIOL 255M - Advanced Topics: Molecular & Microbiology 1-4 unit(s) (3 units required)
- Other 100- or 200-level courses chosen with advisor consent

Culminating Experience (1 unit)

Complete One Option (Plan A or Plan B):

Plan A (Thesis)

- BIOL 299 - Master's Thesis 1-4 unit(s) (1 unit required)
- Seminar- Thesis Defense

Plan B (Project)

- BIOL 298 - MS Project Culminating Experience 1 unit(s)
- Seminar- Project Defense

Total Units Required (30 units)

Elective courses must be planned in consultation with the Graduate Advisor.

The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 15.

A public seminar on the thesis or project must be given.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.
Biological Sciences, Physiology Concentration, MS

The master's program in Biological Sciences with a concentration in Physiology, offered by the Department of Biological Sciences, offers students training in the pursuit of rigorous scientific investigation with an emphasis on the integrative nature of physiology across levels of organization from molecule to organism. During their research experience, students acquire the skills necessary to successfully address a variety of research questions under the guidance of faculty.

In addition, students with our degree will have gained experience in critical thinking, problem-solving, research methodology (e.g., experimental design, sampling techniques, and analysis), and both written and oral communication. Our alumni are successful applicants for doctoral degree programs and generally attain high level academic and non-academic positions in both the private and public sectors.

For more information visit: www.sjsu.edu/biology.

Admissions Requirements

Candidates must meet all the university admission requirements.

In addition, applicants must submit to the Graduate Coordinator for the Department of Biological Sciences a 1-2 page personal statement that includes the following sections: an explanation of why the student wants to earn an MS or MA, their long-term goals and how the degree will help facilitate those goals, the names of up to three tenured or tenure-track faculty members whose research interests them, and two letters of recommendation. Applicants must also be accepted by a tenured or tenure-track faculty member in the Department of Biological Sciences prior to acceptance by the program. It is the student's responsibility to contact any potential faculty advisors. For complete details on the student approval process, please visit: www.sjsu.edu/biology/graduate-programs/prospective-ms-students/index.html.

Students can be admitted in either classified or conditionally classified standing. Conditional acceptance means that the candidate must fulfill specific requirements in order to be eligible to apply for advancement to candidacy. These conditions will be stipulated as part of the acceptance agreement between the faculty adviser and the applicant. Failure to fulfill these requirements will result in disqualification from the program.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE.

Requirements for Advancement to Graduate Candidacy

Each semester, students should consult with their graduate advisor to develop a schedule of courses. Students admitted as conditionally classified must satisfy the requirements listed in their acceptance agreement before advancing to candidacy. Students who have achieved classified standing in the master's degree curriculum must next advance to candidacy for the degree. Oral Project Defense: All MS candidates are required to present a public seminar based on their research project.

Masters Requirements (30 units)

Core Courses (15 units)
• BIOL 201 - Graduate Seminar in Biological Sciences 1 unit(s)
• BIOL 202 - Graduate Studies in Biology 3 unit(s) (GWAR)
• BIOL 220 - Science Communication 3 unit(s)
• BIOL 297 - Graduate Research 1-4 unit(s) (Students take a total of 8 core units of this class.)

Concentration Courses (9 units)

• BIOL 227 - Advanced Physiology 3 unit(s)
• BIOL 230 - Comparative Animal Physiology 3 unit(s)
• BIOL 255P - Seminar in Advanced Biology: Physiology 1-4 unit(s) (Students take at least 3 units of this course.)

Electives (5 units)

Elective courses must be planned in consultation with the Graduate Advisor.

• BIOL 255E - Advanced Topics: Ecology and Evolution 1-4 unit(s)
• BIOL 255L - Advanced Biology Laboratory 1-4 unit(s)
• BIOL 255M - Advanced Topics: Molecular & Microbiology 1-4 unit(s)
• BIOL 255P - Seminar in Advanced Biology: Physiology 1-4 unit(s)
• 100- or 200-level courses chosen with advisor consent

Culminating Experience (1 unit)

Complete One Option (Plan A or Plan B):

Plan A (Thesis)

• BIOL 299 - Master's Thesis 1-4 unit(s) (1 unit required)
  • Seminar- Thesis Defense

Plan B (Project)

• BIOL 298 - MS Project Culminating Experience 1 unit(s)
  • Seminar- Project Defense

Total Units Required (30 units)

Elective courses must be planned in consultation with the Graduate Advisor.

The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 15.

A public seminar on the thesis or project must be given.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.
Biotechnology, MBT

The Master of Biotechnology (MBT) program, offered by the Department of Biological Sciences, integrates advanced, hands-on training in laboratory-based molecular biology courses with MBA-level business courses from the College of Business. The core courses provide an introduction to aspects of the biotechnology industry including drug development, marketing, finance, and intellectual property. The required internship experience allows the students to apply what they have learned in real-life settings.

Through elective choices, students supplement the core program with additional hands-on science or MBA courses in support of their career goals. MBT program graduates are highly trained individuals who have had direct exposure to the biotechnology corporate world and are ready to make immediate contributions to biotechnology companies. Graduates work in a variety of positions in research, product development, marketing, regulatory affairs, clinical affairs, project management, quality, and others.

For more information visit: www.sjsu.edu/biology.

Admissions Requirements

University Admissions

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at calstate.edu/apply and meet all the university admission requirements. Applicants apply separately to the department to obtain admission into the Master in Biotechnology degree program. See the GAPE Graduate Admissions website and this Catalog for general information about graduate admissions at SJSU.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE.

Admission to the Program

Applicants must submit to the Program Director their unofficial transcripts, GRE and TOEFL scores, two letters of recommendation, a statement of purpose and a resume. Potential candidates will be interviewed during the spring semester. Admission is based on the acceptance to the university and the outcome of the interview.

Requirements for Advancement to Candidacy

All students will submit their Advancement to Candidacy petitions during the fall of their second year, after having fulfilled all University requirements for advancement to candidacy, as detailed in the Graduate Policies and Procedures section. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR), which is satisfied in this degree by the completion of BIOL 202TA and BIOL 202TB with grades of "B" or higher.

Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

**Graduation Requirements**

The Master of Biotechnology program consists of 36 semester units of approved work. It includes a 2-unit internship in the biotechnology industry.

**Special Session Program Information**

Academic Programs offered through Special Session are operated by the College of Professional and Global Education (CPGE). Registration and enrollment in a Special Session course or program must use the special session application form and will follow the special session fees and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or the program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the IES website for more information.

**Graduation Writing Assessment Requirement**

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

*This requirement is satisfied by passing BIOL 202TA and BIOL 202TB.*

**Culminating Experience**

**Plan B (Project)**

The culminating experience is the Biotechnology Colloquium (BIOL 285T), which includes the preparation of a business plan for a biotechnology startup company.

**Master's Requirements (36 units)**

**Core Courses (29 units)**

- BIOL 202TA - Biotech Seminar: Biotech Products 3 unit(s) (GWAR)
- BIOL 202TB - Biotech Seminar: Drug Development Process 3 unit(s) (GWAR)
- BIOL 202TC - Biotech Seminar: Biotech Business I 2 unit(s)
- BIOL 202TD - Biotech Seminar: Biotech Business II 2 unit(s)
- BIOL 205T - Advanced Molecular Techniques for Biotechnology 4 unit(s)
- BIOL 280T - Internship in the Biotechnology Industry 2 unit(s)
- BIOL 282C - Biotechnology Company Management 3 unit(s)
- BUS 282A - Essentials of Management and Organizational Behavior 3 unit(s)
- BUS 282B - Essentials of Operations Management 3 unit(s)

Complete One Course From:

- BIOL 221T - Advanced Bioinformatics for Biotechnology 4 unit(s)
- BIOL 255T - Introduction to Stem Cell Techniques 4 unit(s)

Electives (6 units)

Students must take any two of the following 200-level science and/or business courses:

Science Electives

- BIOL 227T - Principles of Pharmacology 3 unit(s)
- BIOL 229T - Biotechnology Instrumentation 3 unit(s)
- BIOL 233T - Immunological Techniques for Biotechnology 3 unit(s)
- BIOL 283T - Topics in Biotech Regulatory Affairs 3 unit(s)
- BIOL 281T - Individual Studies in Biotechnology 1-4 unit(s)

Business Electives

- 200-level Business electives chosen in consultation with the Program Director

Culminating Experience (Plan B) (1 unit)

- BIOL 285T - Colloquium in Biotechnology 1 unit(s)

Total Units Required (36 units)

Elective courses must be planned in consultation with the Graduate Advisor.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

Certificate

Clinical Lab Scientist Certificate (Graduate)

The Clinical Laboratory Scientist Training Program at San Jose State University is a 12 month training program that prepares students to take the ASCP national exam for Clinical Laboratory Scientists and obtain a California State Clinical Laboratory Scientist license.

The training program is a 40 hour per week commitment with an emphasis on hands-on learning in the hospital setting. Most weeks, students will spend 32 hours training at a clinical site and 8 hours in lecture. For more information on the program, please visit our website at www.sjsu.edu/cls.

As part of the application process, a group of applicants will participate in interviews which include representatives from our clinical affiliates. Students are admitted to the program based on a weighted score which takes into account the documents in their application, their performance during interview and an essay written on the day of the interview.

Admission Policies and Prerequisites
To be admitted to the program you must have:

- A bachelor's degree in biology or a related science
- 18 semester units of Biology including instruction in Immunology, Hematology, Medical Microbiology
- 16 semester units of Chemistry including instruction in Biochemistry and Quantitative Analysis
- 3 semester units of Physics including instruction in optics and electromagnetism
- 3 semester hours of mathematics (statistics or calculus)
- A minimum G.P.A. of 2.8 on a 4 point scale
- A minimum G.P.A. of 3.0 in last 60 units
- Completion of Hematology, Immunology and Medical Microbiology courses with a grade of B or better within 5 years of application
- Coursework in Human or Mammalian Physiology and Human or General Genetics
- Three (3) letters of recommendation
- Acceptance by the SJSU CLS Program Selection Committee and a Clinical Affiliate
- All applicants must have completed 12 semester units of upper-division science course work at an United States university before applying to the program
- All applicants must have the legal right to work in the United States
- For students with a degree from a foreign university, TOEFL (minimum score of 100 or equivalent IELTS score)
- Meet admission requirements for San Jose State University (do not apply until AFTER you have been accepted to SJSU CLS Training Program and have been given instructions on how to proceed)
- Hold CLS Training license granted by State of California, Laboratory Field Services (apply AFTER you have been accepted to SJSU CLS Training Program)

**Interview and Matching Process**

A committee comprised of SJSU Biology Department faculty members review and score each candidate's application and then meet to determine which candidates they will be inviting to interview. Candidates who are invited to interview receive the contact information for the education coordinators at the various clinical sites. They are invited to arrange tours of the participating facilities before they come to interview. We like to give at least a month for the candidates to make these arrangements. Candidates are asked to come to interview prepared to rank the clinical sites in their order of preference.

The interviews are conducted over two days, with each day having a morning and an afternoon interview session. Each session begins with a short essay (topic to be revealed at that time). Following that, there is a brief opportunity to speak with the education coordinators and CLS Training Program staff at a meet & greet breakfast (or lunch). Candidates will then have an opportunity to interview with the education coordinators, scheduled in 15-minute increments. There are generally 8-12 education coordinators seated around the conference table with the candidate sitting at the head of the table. Candidates are all asked the same questions, with time at the end for additional discussion as desired. The education coordinators score each candidate on their interview.

At the end of the two days of interviews, the education coordinators are asked to fill out a form indicating which candidates they would be willing to train. They do not rank the candidates, they merely check "Yes" next to the names of candidates that are acceptable to them.

The CLS Training Program compiles all of the scores (application 50%, interview 40%, and essay 10%) to determine a ranking. With that ranking in hand, we take the preference sheet from the highest ranked candidate and determine his/her 1st choice of training facility. We then look to the form filled out by the education coordinator to see if they had indicated a willingness to train them. If they checked "yes", we have a match. If there was no match, we go to the candidate's 2nd choice of training facility, continuing until we have a match. We then continue down the list matching candidates in order of their ranking until all training positions have been filled.

We announce matches in coordination with the other training schools to allow candidates the opportunity to weigh their options from each school at the same time. We send out emails notifying the candidates of their matches.
Candidates who are not matched are notified of their alternate status. If a candidate chooses to decline a match to accept a position at another school, we then go to the highest ranked candidate in our alternate list and go through the matching process again.

Candidates not placed stay in our alternate pool until training begins. If they do not receive a placement, we are happy to move letters and transcripts forward to a new application cycle, but a new application must be submitted.

Certificate Core (24 units)

- MICR 291A - Advanced Hematology 4 unit(s)
- MICR 291B - Advanced Pathophysiology 4 unit(s)
- MICR 291C - Advanced Human Immunology 4 unit(s)
- MICR 291D - Advanced Medical Microbiology 4 unit(s)
- MICR 291E - Advanced Immunohematology 4 unit(s)
- MICR 291F - Molecular Based Diagnostic Techniques 4 unit(s)

Additional Core (21 units)

Three semesters of the following course:

- MICR 291G - Clinical Laboratory Management 4 unit(s)
- MICR 292 - Topics and Demonstrations in Clinical Laboratory Science 3 unit(s)

Total Units Required (45 units)

Minor

Bioinformatics Minor

Insights into many areas of biology, including genomics, molecular biology, neuroscience, physiology, microbiology, ecology and evolution, can be gained using computational methods. Bioinformatics is the use of computational tools to understand important questions in the biological sciences. The minor in bioinformatics gives students a background in the biological sciences, computation skills, and experience using these skills to address biological questions. The minor requires 8 units of biology courses, 6 units of introductory courses in a programming language (either Python or Java), and 6 units of courses in bioinformatics.

At least 12 of units must be distinct from the requirements of the student's major. At least six units must be completed at SJSU. The minimum aggregate GPA for all coursework required for the minor must be at least 2.0. A grade of "C-" or better is required for courses being used to meet any requirement in the minor.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Requirements (20 units)

Lower Division (14 units)
- BIOL 30 - Principles of Biology I *4 unit(s) (B2B3)*
- BIOL 31 - Principles of Biology II *4 unit(s) (B2B3)*
- CS 22A - Python Programming for Non Majors I *3 unit(s)*
- CS 22B - Python Programming for Non Majors II *3 unit(s)*

Upper Division (6 units)

- BIOL 123A - Bioinformatics I *3 unit(s)*
- BIOL 123B - Bioinformatics II *3 unit(s)*

Total Units Required (20 units)

**Biological Science Minor**

Environmental Studies students should consult a Biology Advisor.

**University Graduation Requirements**

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

**Minor Requirements (18 units)**

*At least six (6) units, selected in consultation with the Biological Sciences Department advisor for minors, must be taken at San Jose State University.*

- BIOL 20 - Ecological Biology *3 unit(s) (B2+B3)*
- BIOL 21 - Human Biology *3 unit(s) (B2+B3)*
- Ten to twelve (10-12) additional units in biological sciences courses of which six (6) units must be upper division *10-12 unit(s)*

Total Units Required (18 units)

**Science Minor**

The science minor does not qualify for a science teaching minor. See the Science Education Program advisor for the supplementary science credential requirements. This minor is not open to majors in College of Science, except mathematics and computer science.

**University Graduation Requirements**

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major, and a minimum of 6 units of coursework must be upper-division (University Policy S16-4).

**Minor Requirements (22 units)**

Prerequisite (6 units)
Additional Courses (16 units)

Select at least 3 Units per Category; Complete at Least One of Each Category:

Biological Science

Complete one course from:

- BIOL 20 - Ecological Biology 3 unit(s) (B2B3)
- BIOL 21 - Human Biology 3 unit(s) (B2B3)
- BIOL 54 - Human Understanding 3 unit(s) (E)
- BIOL 65 - Human Anatomy 4 unit(s) (B2B3)
- BIOL 66 - Human Physiology 5 unit(s) (B2B3)
- BIOL 101 - Origins of Life 3 unit(s) (R)
- BIOL 109 - Human Neuroanatomy and Physiology 4 unit(s)
- BIOL 110 - Biodiversity and Biopolitics 3 unit(s) (R)
- BIOL 140 - Human Sexuality 3 unit(s) (S)
- MICR 20 - General Bacteriology 5 unit(s) (B2B3)

Physical Science

Complete one course from:

- CHEM 1A - General Chemistry 5 unit(s) (B1+B3)
- CHEM 8 - Organic Chemistry 3 unit(s)
- CHEM 30B - Introductory Chemistry 3 unit(s)
- PHYS 1 - Elementary Physics 3 unit(s) (B1)
- PHYS 1L - Elementary Physics Lab 1 unit(s) (B3)
- PHYS 2A - Fundamentals of Physics 4 unit(s) (B1+B3)
- PHYS 2B - Fundamentals of Physics 4 unit(s) (B1+B3)

Earth Science

Complete one course from:

- ASTR 101 - Modern Astronomy 3 unit(s) (R)
- ASTR 102 - Astronomy Lab 1 unit(s) (B3)
- AVIA 110 - Aviation Meteorology 3 unit(s)
- GEOL 1 - General Geology 4 unit(s) (B1+B3)
- GEOL 6 - Geology of California 3 unit(s) (B1)
- GEOL 111 - Geology and the Environment 3 unit(s) (R)
- METR 112 - Global Climate Changes 3 unit(s) (R)

Total Units Required (22 units)
For all courses for the minor, the instructor may accept related course work or experimental learning in lieu of stated prerequisites.

**BIOL 10 - The Living World**

3 unit(s)
Provides students with an understanding of the most fundamental concepts of modern biology including ecology (the interaction between organisms and their environment), human inheritance, the structure and function of living organisms, evolution, strategies for survival and reproduction, and biotechnology.

*Satisfies B2: Life Science*

**Grading:** Graded

**Note(s):** Not an elective in the department majors.

**BIOL 20 - Ecological Biology**

3 unit(s)
Introduction to diversity, ecology, evolution and behavior. In conjunction with BIOL 21 a more complete survey of biology.

*Misc/Lab: Lecture 2 hours/lab 3 hours/field trips.*

*Satisfies B2B3: Life Science & Lab*

**Grading:** Graded

**Note(s):** Not an elective in the department majors.

**BIOL 21 - Human Biology**

3 unit(s)
Introduction to physiology, reproduction, development, heredity and aging. With BIOL 20 a more complete survey of biology.

*Misc/Lab: Lecture 2 hours/Lab 3 hours.*

*Satisfies B2B3: Life Science & Lab*

**Grading:** Graded

**Note(s):** Not an elective in the department majors.

**BIOL 30 - Principles of Biology I**

4 unit(s)
Cellular and physiological aspects of biological diversity. Concepts include: biomolecules, cellular structures/function, cell-cell communication, cellular energetics, molecular evolution, gene expression, enzymes, and animal physiological systems.

*Misc/Lab: Lecture 3 hours/Lab 3 hours.*
Satisfies B2B3: Life Science & Lab

**Prerequisite(s):** Writing Enrollment Group W-I or W-II, or ENGL 1AF with a grade of CR, or ENGL 1A with a grade of C- or better; Math Enrollment Group M-I or M-II, or completion of a GE Area B4 course. Must be majoring in Biology (all), Biomedical Eng, Biochemistry, ENVS (all), Forensic Science (all), Nutritional Science, Meteorology-CS, Kinesiology, Computer Science, and Communicative Disorders.

**Grading:** Graded

**BIOL 31 - Principles of Biology II**

4 unit(s)
The diversity of life and the mechanisms by which that diversity has arisen. Concepts include: scientific method, origins of life, adaptation of organisms to different environments, ecology, and evolution.

*Lecture 3 hours/Lab 3 hours*

Satisfies B1 + B3: Physical + Lab Science.

**Prerequisite(s):** BIOL 30 (with a grade of "C-" or better for all Biology majors). Must be majoring in Biology (all), Biomedical Eng, Biochemistry, Forensic Science (all), Environmental Studies (all), Nutritional Science, Meteorology - Climate Science Concentration, Kinesiology, Computer Science, and Communicative Disorders.

**Grading:** Graded

**BIOL 54 - Human Understanding**

3 unit(s)
Major issues in health and disease, learning and memory, maturation and aging (such as diet, exercise, mind-body medicine, and addictions). Emphasis on learning how to understand and apply physiologic information for personal growth and lifelong learning.

Satisfies E: Human Understanding & Development

**Grading:** Graded

**BIOL 55 - Biostatistics**

3 unit(s)
Introductory experimental design and statistical analysis of biological data from manipulated experiments. Experience in designing and analyzing experiments utilizing both univariate and multivariate tests.

*Lecture 2 hours/Lab 3 hours*

**Prerequisite(s):** BIOL 30 or BIOL 31 with a grade of C- or better, or instructor consent. Must be a declared Biology Major (all) or Environmental Studies Major (all).

**Grading:** Graded

**BIOL 65 - Human Anatomy**

4 unit(s)
Introductory study of gross and microscopic human anatomy including corresponding pathology. For majors in nursing and kinesiology.

*Misc/Lab: Lecture 3 hours/lab 3 hours.*
Satisfies B2B3: Life Science & Lab

Grading: Graded

Note(s): Not an elective in the department majors.

BIOL 65L - Anatomy Lab for Transfer Students

1 unit(s)
Anatomy Lab for Transfer Students entering the Kinesiology or Occupational Therapy departments without adequate lab experience. Not an elective for Biology department majors.

Misc/Lab: Lab 3 hours.

Satisfies B3: Laboratory Science

Prerequisite(s): Restricted to Occupational Therapy and Kinesiology majors.

Grading: Graded

BIOL 65O - Human Anatomy

4 unit(s)
Introductory study of gross and microscopic human anatomy including corresponding pathology. For majors in nursing and kinesiology. This online anatomy course is not intended for students pursuing degrees in kinesiology, recreation (therapeutic recreation) or to meet the anatomy prerequisite for occupational therapy at SJSU. Students who intend to transfer the human anatomy course to another institution which requires an "in class" lab should enroll in BIOL 65.

Misc/Lab: Lecture 3 hours/lab 3 hours.

Satisfies B2B3: Life Science & Lab

Grading: Graded

Note(s): Not an elective in the department majors.

BIOL 66 - Human Physiology

5 unit(s)
Explanation of physiological principles from the molecular and cellular-levels to organ systems. Neural and endocrine controls and integration among systems. Health care orientation.

Misc/Lab: Lecture 3 hours/lab 3 hours/seminar 1 hour.

Satisfies B2B3: Life Science & Lab

Prerequisite(s): High school algebra. Recommended: Human Anatomy, CHEM 30A.

Grading: Graded

Note(s): Not an elective in the major departments. A grade of "C" or better is required to receive B2 and B3 GE credit.
BIOL 100W - Scientific Communication Workshop

3 unit(s)
Analysis and communication of scientific research to both scientific and general audiences. Satisfies upper division writing requirement.

Satisfies SJSU Studies Z: Written Communication II

Prerequisite(s): BIOL 30 and BIOL 31 (with grades of "C-" or better); A3 or equivalent second semester composition course (with a grade of C- or better); completion of core GE; Satisfaction of Writing Skills Test or completion of ENGL 100A or LLD 100A with C or better; and upper division standing. Or Graduate level. Allowed Declared Majors: Biology (all). Or Graduate or Postbaccalaureate Level.

Grading: Graded

Note(s): Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).

BIOL 101 - Origins of Life

3 unit(s)
Process of evolution, fossil evidence for life origins, and the place of humans in nature.

Satisfies SJSU Studies R: Earth & Environment

Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A or LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing. Not an elective in the Biological Sciences Department majors.

BIOL 105 - Principles of Developmental Biology

3 unit(s)
Emphasis on human development. Other animal systems (fly, frog, chick, mouse) will also be studied to aid in understanding anatomical, physiological, genetic and molecular mechanisms operating during gametogenesis, fertilization, cleavage, gastrulation and organogenesis.

Prerequisite(s): BIOL 30 and BIOL 31 (with a grade of "C-" or better in each), or instructor consent; BIOL 115 (with a grade of "C" or better). Must be a declared Biology Major (all).

Grading: Graded

BIOL 106 - Physiological Ecology

3 unit(s)
Study of the interaction of an organism with its environment. Looking at both plants and animals, students examine how both structure and function interact to enable an organism to survive under particular environmental conditions.

Prerequisite(s): BIOL 113 or BIOL 114 (with a grade of "C" or better); BIOL 100W; CHEM 8 or CHEM 112A and CHEM 112B (with a grade of "C-" or better), upper division standing, or instructor consent. Must be a declared Biology Major (all).

Grading: Graded
BIOL 106L - Physiological Ecology Lab

1 unit(s)
Experimental labs that illustrate/demonstrate key physiological concepts of plant and animal adaptations to their environment, as discussed in the lecture section, BIOL 106 - Physiological Ecology.

3 hours lab.

Prerequisite(s): BIOL 113 or BIOL 114 (with a grade of "C" or better); BIOL 100W; CHEM 8 or CHEM 112A and CHEM 112B (with a grade of "C-" or better), upper division standing, or instructor consent. Must be a declared Biology Major (all).
Corequisite(s): BIOL 106.
Grading: Graded

BIOL 107 - Immunology

3 unit(s)
Provides information about all areas of immunology with emphasis on the basic concepts of immune mechanisms of the acquired and innate immune systems. Uses the basic information to study immune disorders and the immune response to infectious agents.

Prerequisite(s): MICR 101 (with a grade of "C" or better), or instructor consent. Must be a declared Biology Major (all).
Grading: Graded

BIOL 107L - Immunology Laboratory

2 unit(s)
The experiments in this beginning immunology laboratory are designed to study both the innate and acquired immune systems. Experimentation into the formation, function and detection of antibodies provides students with skills in basic immunologic techniques. Flow cytometry is used in identification of immune cells as well as functional assays of complement mediated phagocytosis.

3 hour lab.

Corequisite(s): BIOL 107, or instructor consent. Must be a declared Biology Major (all).
Grading: Graded

BIOL 109 - Human Neuroanatomy and Physiology

4 unit(s)
Gross and microscopic structure and function of the human nervous system. Introduction to experimental and clinical techniques.

Misc/Lab: Lecture 3 hours/lab 3 hours.

Prerequisite(s): BIOL 65 or instructor consent
Grading: Graded

Note(s): Not an elective in the department majors.

BIOL 110 - Biodiversity and Biopolitics
3 unit(s)
Application of ecological principles to the conservation of biodiversity and the management of ecosystems. Analysis of biological, economic, social and political interrelationships involved in conservation.

Satisfies SJSU Studies R: Earth & Environment

Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

Grading: Graded

Note(s): Not an elective in the department majors (all). All of SJSU Studies courses require completion of the WST and upper division standing.

BIOL 113 - Comparative Taxonomy

3 unit(s)
Students gain the understanding and skills needed to taxonomically study biodiversity, including the use of morphological and DNA sequence characters to examine phylogeny, and use of a range of biodiversity research techniques and tools.

Lecture 2 hours/Lab 3 hours.

Prerequisite(s): BIOL 115 or BIOL 118 (with a grade of "C" or better), or instructor consent. Must be a declared Biology Major (all).

Grading: Graded

BIOL 114 - Functional Morphology

3 unit(s)
Develops understanding and skills needed to taxonomically study biodiversity, including the use of morphological and DNA sequence characters to examine phylogeny, and use of a range of biodiversity research techniques and tools.

Lecture 2 hours/Lab 3 hours.

Prerequisite(s): BIOL 115 or BIOL 118 (with a grade of "C" or better), or instructor consent. Must be a declared Biology Major (all).

Grading: Graded

BIOL 115 - General Genetics

4 unit(s)
Principles and methods of microbial, plant and animal genetics. Mendelism, cytogenetics, molecular genetics, mutation, quantitative genetics and genetic aspects of evolution.

Lecture 3 hours/Discussion 1 hour.

Prerequisite(s): BIOL 30 and BIOL 31 (with a grade of "C-" or better in each), or instructor consent; CHEM 1A and CHEM 1B (with a grade of "C" or better in each). Must be a declared Biology or Chemistry Major (all).

Grading: Graded

BIOL 116 - Molecular Genetics
4 unit(s)
Molecular genetics of eukaryotes. Replication, repair, mutation, regulation of gene expression, gene organization and methods of recombinant DNA research.

Prerequisite(s): BIOL 115 or MICR 166, and CHEM 135 (all with a grade of "C" or better). Must be a declared Biology Major (all).
Grading: Graded

BIOL 116L - Genetics Laboratory

3 unit(s)
Selected experiments to demonstrate genetic concepts using Drosophila, bacteria and other organisms. Techniques include those of classical, bacterial and molecular genetics.

Lecture 1 hours/Lab 6 hours.
Prerequisite(s): BIOL 115 or MICR 127 with a grade of "C" or better. Must be a declared Biology Major (all).
Grading: Graded

BIOL 117 - Human Genetics

3 unit(s)
Mendelian traits, classical and molecular cytogenetics, DNA variation, sex determination, gene mapping, mutation, population genetics, multifactorial inheritance, genetic counseling and prenatal diagnosis.

Prerequisite(s): BIOL 115 (with a grade of "C" or better). Must be a declared Biology Major (all).
Grading: Graded

BIOL 118 - Evolutionary Genetics

4 unit(s)
Principles of molecular and population genetics from an evolutionary perspective. Application of DNA analyses and other techniques to conservation biology, evolution, ecology and systematics.

Lecture 3 hours/Seminar 1 hour.
Prerequisite(s): BIOL 30 and BIOL 31 (with a grade of "C-" or better in each for Biology Majors). Must be a declared Biology or Chemistry Major (all).
Grading: Graded

BIOL 119 - Neurogenetics

3 unit(s)
Cellular and molecular neuroscience at the neuron, synapse and circuit level, including electrical and chemical signaling. Neurophysiology of development, maintenance and modification of neural circuits. Molecular genetics of neurological disorders such as autism, schizophrenia, Alzheimer's disease, and mood disorders.

Prerequisite(s): BIOL 115 (with a grade of "C" or better). Must be a declared Biology Major (all).
Grading: Graded

BIOL 122 - Bacterial Diversity
2 unit(s)
Study of the characteristics and microecology of unusual prokaryotes. Molecular and traditional approaches will be discussed.

Prerequisite(s): MICR 101 (with a grade of "C" or better), or instructor consent. Must be a declared Biology Major (all).
Grading: Graded

BIOL 122L - Bacterial Diversity Laboratory

2 unit(s)
Laboratory techniques in bacterial diversity.

6 hours Lab

Prerequisite(s): MICR 101 (with grade of "C" or better) or Instructor Consent. Must be a declared Biology Major (all).
Grading: Graded

BIOL 123A - Bioinformatics I

3 unit(s)
Introduction to the main public domain tools, databases and methods in bioinformatics. Analysis of algorithms behind the most successful tools, such as the local and global sequence alignment packages, and the underlying methods used in fragment assembly packages. Solution of complex biological questions requiring modification of standard code.

Prerequisite(s): BIOL 30 and BIOL 31, or CS 46A and CS 46B Allowed Declared Majors: Biology, Chemistry, Computer Science
Grading: Graded

BIOL 123B - Bioinformatics II

3 unit(s)
Computational methods used for searching, classifying, analyzing, and modeling protein sequences. Tools for analyzing DNA and RNA sequences. More advanced topics, such as genetic algorithms and simulated annealing, which can be used to address folding problems.

Prerequisite(s): CS 123A.
Grading: Graded

BIOL 124 - Systems Physiology

3 unit(s)
Physiology of organ systems with emphasis on the human. Neural & hormonal communication, muscle, cardiovascular, respiratory, urinary, digestive, endocrine, and reproductive physiology.

Prerequisite(s): BIOL 115; PHYS 2A, PHYS 2B; CHEM 112A, CHEM 112B; All courses with a "C or better". Must be a declared Biology Major (all).
Corequisite(s): BIOL 125 highly recommended.
Grading: Graded

BIOL 125 - Systems Physiology Laboratory
2 unit(s)
Selected lab units to demonstrate complex physiological mechanisms and the physiology of organ systems. Methods include animal experiments and physiological recording and stimulation.

Lab 6 hours.

Prerequisite(s): Must be a declared Biology Major (all).
Pre/Corequisite(s): BIOL 124 (with grade of "C-" or better), or instructor consent.
Grading: Graded

BIOL 129 - Neuroscience

3 unit(s)
Principles of brain organization and function underlying behavior. Topics include neuroanatomy and physiology of language, vision, sexual behavior, memory and abnormal behavior.

Prerequisite(s): Either PSYC 30 and 3 units of biology, or 9 units of biology.
Grading: Graded

Note(s): Not acceptable as an elective in the Biology major.

BIOL 131 - Endocrine Physiology

3 unit(s)
Emphasis on mammalian systems. Mechanisms of hormone action, secretion and physiological effects; hormone assay techniques.

Prerequisite(s): BIOL 124 (with grade of "C-" or better), or instructor consent. Must be a declared Biology Major (all).
Grading: Graded

BIOL 134 - Vertebrate Histology

4 unit(s)
Light and electron microscopic structure of vertebrate tissues with consideration of related functions. Emphasis on the examination of human tissues including corresponding pathology.

Lecture 2 hours/Lab 6 hours.

Prerequisite(s): BIOL 124 (with grade of "C-" or better), or instructor consent. Must be a declared Biology Major (all).
Grading: Graded

BIOL 135A - Eukaryotic Cell and Molecular Biology I

3 unit(s)
First semester of a year-long cell and molecular biology course. Topics include membrane structure, signal transduction, cytoskeletal structure, cell migration, and gene expression.

Prerequisite(s): BIOL 115; CHEM 112A, CHEM 112B, CHEM 135 (with a grade of "C" or better in each). Must be a declared Biology Major (all).
Grading: Graded

BIOL 135B - Eukaryotic Cell and Molecular Biology II
3 unit(s)
BIOL 135B is the second semester of a year-long cell and molecular biology course. Topics covered include chromosome structure and maintenance, stem cell biology, cell death, and cancer biology.

Satisfies SJSU Studies R: Earth & Environment

Prerequisite(s): BIOL 115; BIOL 135A; BIOL 100W (with a grade of "C" or better in each). Must be a declared Biology Major (all).
Grading: Graded

BIOL 135L - Molecular Cell Biology Lab

3 unit(s)
Lab experience in nucleic acid and protein purification, enzyme assay, bacterial and mammalian cell culture, immunofluorescence, radioisotopic labeling, column chromatography, agarose and polyacrylamide gel electrophoresis, spectrophotometry, liquid scintillation counting, etc.

Lecture 1 hour/Lab 6 hours.

Prerequisite(s): BIOL 135A (with grade of "C" or better), or instructor consent. Must be a declared Biology Major (all).
Grading: Graded

BIOL 136 - Vertebrate Neurophysiology

3 unit(s)
Review of topics from the molecular to the organismal level. Chemical and electrotonic phenomena of membranes, neurochemistry, sensory transduction, information coding, neural control, and additional rotating topics.

Prerequisite(s): BIOL 124 (with a grade of "C-" or better), or instructor consent. Must be a declared Biology Major (all).
Grading: Graded

BIOL 136L - Vertebrate Neurophysiology Laboratory

1 unit(s)
Course-based undergraduate research experience using electrophysiological techniques to study nervous system function. Topics include chemical and electrotonic phenomena of membranes, information coding, and additional rotating topics.

Lab 3 hours.

Prerequisite(s): BIOL 124 with a C- or better.
Corequisite(s): BIOL 136. Must be a declared Biology Major (all).
Grading: Graded

BIOL 137 - Introduction to Principles of Toxicology

3 unit(s)
Emphasis on basic principles of toxicology. Toxicity of several classes of compounds covered in depth. Focus on basic chemical principles and appropriate applications.

Course is repeatable for up to 3 units.
**Prerequisite(s):** BIOL 124; CHEM 112B (all with a grade of "C-" or better). Must be a declared Biology Major (all).

**Grading:** Graded

**BIOL 138 - Stem Cell Biology**

3 unit(s)
Topics in the growing field of stem cell biology. Topics include: properties of embryonic and adult stem cells, use of stem cells in scientific research, regulation of stem cells, and invertebrate and vertebrate models of stem cell research.

**Prerequisite(s):** BIOL 115 with a C or better. Must be a declared Biology Major (all).

**Grading:** Graded

**BIOL 139 - Cancer Biology**

3 unit(s)
Basic principles of cancer biology needed to gain an overall understanding of cellular and molecular events that lead to the formation and progression of cancer. Topics include normal and abnormal cell behaviors, the steps leading to the development of malignancy, in-depth discussions of specific cancers, such as breast, colon, and myeloid leukemias, and the development of diagnostic tools and therapies.

**Prerequisite(s):** BIOL 115 with a C or better, or instructor consent. Must be a declared Biology Major (all).

**Grading:** Graded

**BIOL 140 - Human Sexuality**

3 unit(s)
Biological and sociocultural facets of human sexuality. Evolution and physiology of sex, reproductive biology/ethics and cross-cultural expression of sexual behavior.

Satisfies SJSU Studies S: Self, Society & Equality in US

**Prerequisite(s):** Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

**Grading:** Graded

**Note(s):** All of SJSU Studies courses require completion of the WST and upper division standing. Not acceptable as an elective in the Biology major.

**BIOL 142 - Paleontology**

4 unit(s)
Study of the major groups of invertebrate fossils and their use in geological studies; principles of stratigraphy, including seismic stratigraphy.

*Misc/Lab: Lecture 2 hours/lab and field trips 3 hours.*

**Prerequisite(s):** GEOL 1 and GEOL 7.

**Grading:** Graded
BIOL 143 - Biogeography

3 unit(s)
Examination of the patterns of biodiversity over space and through time. Using data and models from a variety of sources including botany, zoology, ecology, evolutionary biology, paleontology, and geology, effects of isolation, elevation, and latitude are examined to understand spatial patterns of biodiversity.

Prerequisite(s): BIOL 31 or equivalent (with a grade of "C-" or better), or instructor consent. Must be a declared Biology Major (all).
Grading: Graded

BIOL 145 - Advanced Undergraduate Biology Seminar

1-3 unit(s)
Undergraduate Seminar in Biology. May be taken concurrently with BIOL 145L. Course is repeatable for credit when content changes.

Course is repeatable for up to 12 units.

Prerequisite(s): Completion of nine (9) units of upper division majors' coursework. Instructor Consent. Must be a declared Biology Major (all).
Grading: Graded

Note(s): Course is repeatable for credit when content changes.

BIOL 145L - Advanced Undergraduate Biology Lab

1-2 unit(s)
Advanced undergraduate laboratory or field experience. May be taken concurrently with BIOL 145. Course is repeatable for credit when content changes.

3 hours lab.

Course is repeatable for up to 12 units.

Prerequisite(s): Completion of nine (9) units of upper division majors' coursework. Instructor Consent. Must be a declared Biology Major (all).
Grading: Graded

BIOL 150 - Field Studies in Natural History

1-2 unit(s)
Field courses given on site, typically covering general ecology, botany, geology, zoology and specialized natural areas such as Baja California, Death Valley, seacoasts and mountains. Repeatable for up to a total of 3 units of credit when location or content changes.

Satisfies B3: Laboratory Science

Grading: Graded

Note(s): Not an elective in the department majors.

BIOL 155 - Hypothesis Testing
3 unit(s)
Experimental design and statistical analysis of biological data from manipulative experiments. Experience in designing and analyzing experiments using t-tests, 1- and 2-way ANOVA, Randomized Block ANOVA, Nested ANOVA, Linear Regression and Tests of Independence.

Lecture 2 hours/Lab 3 hours.

**Prerequisite(s):** BIOL 30 and BIOL 31 (with grade of "C-" or better), or instructor consent. Must be a declared Biology or Environmental Studies Major (all).

**Grading:** Graded

**BIOL 156 - Ecological Sampling Design and Analyses**

3 unit(s)
Sampling design and statistical analysis of biological patterns. In this course, students design and execute a field experiment (one required weekend field trip) that incorporates multivariate measurements. Students analyze the data with Log Linear analysis, Logistic Regression, Principal Components Analysis, Canonical Correlation and various Regression techniques.

Lecture 2 hours/Lab 3 hours.

**Prerequisite(s):** BIOL 113 or BIOL 114 (with a grade of "C" or better), or instructor consent. Must be a declared Biology or Environmental Studies or Business Majors (all).

**Grading:** Graded

**BIOL 159 - Integrative Biology**

3 unit(s)
Capstone course in the BA Biological Science degree. Critical reading of scientific literature, experimental design and scientific communication skills will be emphasized. Topics covered may vary for a given semester.

*Satisfies SJSU Studies R: Earth & Environment*

**Prerequisite(s):** BIOL 55 or BIOL 155 or equivalent biostatistics course; BIOL 115 or BIOL 118 and BIOL 100W (with grade of "C" or better); at least 6 units of upper division biology electives; senior standing. Allowed Declared Majors: Must be a declared Biology Major (all). Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses.

**Grading:** Graded

**Note(s):** All of SJSU Studies courses require completion of the WST and upper division standing.

**BIOL 160 - Ecology**

4 unit(s)
Factors that influence the distribution and abundance of organisms; some aspects of applied ecology.

Lecture 3 hours/Lab 3 hours.

*Satisfies SJSU Studies R: Earth & Environment for Biology Majors only.*

**Prerequisite(s):** BIOL 113 or BIOL 114 (with a grade of "C or better"); Allowed Declared Majors (Biology, Natural Science); Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted),
completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

**Pre/Corequisite(s):** BIOL 55 or BIOL 155 or BIOL 156 or equivalent Biostatistics course, or instructor consent.

**Grading:** Graded

**Note(s):** All of SJSU Studies courses require completion of the WST and upper division standing.

**BIOL 163 - Conservation Biology**

*3 unit(s)*

Principles of conservation biology, including management for the preservation of biodiversity and maintenance of viable populations. Examples from plants and animals

**Prerequisite(s):** BIOL 113 or BIOL 114 (with grade of "C" or better), or instructor consent. Must be a declared Biology Major (all).

**Grading:** Graded

**BIOL 164 - Ecological Field Methods**

*3 unit(s)*

Techniques for evaluating and managing the abundance and diversity of plants and animals.

*Lecture 1 hour/Lab 6 hours.*

**Prerequisite(s):** BIOL 113 or BIOL 114 (with a grade of "C" or better), or instructor consent. Must be a declared Biology Major (all).

**Grading:** Graded

**BIOL 165 - Advanced Human Anatomy**

*4 unit(s)*

Study of human anatomy, including clinical correlations, for pre-professional students. Not open to student who have completed BIOL 065.

*Lecture 2 hours/Lab 6 hours.*

**Prerequisite(s):** BIOL 30 and BIOL 31 (with a grade of "C-" or better in each), BIOL 115 (with a grade of "C" or better), or instructor consent. Must be a declared Biology Major (all).

**Grading:** Graded

**BIOL 167 - Cardiorespiratory Physiology**

*3 unit(s)*

Covers the normal anatomy and physiology of the cardiovascular and respiratory systems, as well as how they function following perturbations in homeostasis. Focuses on the mammalian system with some discussion of comparative physiology.

**Prerequisite(s):** BIOL 124 (with a grade of "C-" or better), or instructor consent. Must be a declared Biology Major (all).

**Grading:** Graded

**BIOL 168 - Reproductive Physiology**

...
Reproductive Physiology covers the anatomy and physiology of the reproductive system, as well as how deviations from the norm affect reproduction. Course focuses on the mammalian system with discussion of comparative physiology.

**Prerequisite(s):** BIOL 124 (with a grade of "C-" or better), or instructor consent. Must be a declared Biology Major (all).

**Grading:** Graded

**BIOL 170 - Cellular and Molecular Physiology**

3 unit(s)
Introduction to the structure and physiological function of cells. Topics include synthesis of cellular macromolecules such as DNA, RNA and proteins; internal cellular organization; biochemical reactions necessary for cell growth, death and cellular communication. Relevant pathophysiology examples of cellular dysfunction are presented.

**Prerequisite(s):** BIOL 124 (with a grade of "C-" or better), or instructor consent. Must be a declared Biology Major (all).

**Grading:** Graded

**BIOL 177 - Physiology for Engineers**

3 unit(s)
Structure and function of physiological systems and discussion of topics of particular importance to the design, development, construction and clinical application of biomedical devices. Practical laboratory application of technologies to monitor, repair, replace or augment physiological systems.

**Misc/Lab:** Lecture 2 hour/Lab 3 hours.

**Prerequisite(s):** BIOL 30, CHEM 1B, PHYS 50

**Grading:** Graded

**BIOL 178 - Integrative Physiology**

3 unit(s)
Integrative Physiology is the capstone course in the Systems Physiology concentration. The specific physiology topics covered may vary depending on the semester. Critical reading of scientific literature, experimental design and scientific communication skills will be emphasized.

**Satisfies SJSU Studies R: Earth & Environment for Biology Majors only**

**Prerequisite(s):** BIOL 100W and BIOL 115 (with a grade of "C" or better); BIOL 124 (with a grade of "C-" or better); at least one upper division systems physiology elective; Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended. Must be a declared Biology Major (all).

**Grading:** Graded

**BIOL 180 - Individual Studies**

1-4 unit(s)
Undergraduate advanced lab or field work in special fields.
Repeatable for credit.

Prerequisite(s): Instructor consent. Must be a declared Biology Major (all). Not available to Open University Students.
Grading: Credit / No Credit

BIOL 181 - Introduction to Health Care

1-3 unit(s)
Participation and observation with a medical doctor, dentist, optometrist, pharmacist, or veterinarian in private practice, hospital or retail setting.

Prerequisite(s): Instructor consent. Must be a declared Biology Major (all). Not available to Open University Students.
Grading: Credit / No Credit

Note(s): Hepatitis B or other vaccinations may be required in some settings.

BIOL 182 - Tutor Assistant in Biology

1-2 unit(s)
Supervised classroom or field experience as a tutor-assistant in experiments, demonstrations and discussion. Course may be repeated for credit.

Repeatable for credit.

Prerequisite(s): Sophomore or Upper division standing, instructor consent and appropriate academic background. Not available to Open University Students. Must be a declared Biology Major (all).
Grading: Credit / No Credit

BIOL 184 - Directed Reading

1-4 unit(s)
Assigned readings of selected books, journals and papers chosen to fill gaps in training or for contact with new fields. Evaluation through weekly reports and conferences.

Repeatable for credit.

Prerequisite(s): Instructor consent. Not available to Open University Students. Must be a declared Biology Major (all).
Grading: Credit / No Credit

BIOL 186 - Senior Thesis

2-4 unit(s)
Advanced library, laboratory or field research under the supervision of a faculty member, culminating in a senior thesis.

Prerequisite(s): Instructor consent. Not available to Open University Students. Must be a declared Biology Major (all).
Grading: Credit / No Credit
BIOL 190 - Field Studies in Biology

1-4 unit(s)
Field program involving planning and execution of a project. Course is repeatable for a maximum of 12 units.

Course is repeatable for up to 12 units.

Prerequisite(s): Instructor consent. Not available to Open University Students. Must be a declared Biology Major (all).
Grading: Credit / No Credit

BIOL 193 - Microbiological Techniques

1 unit(s)
Microbiological techniques for non-biologists.

Prerequisite(s): Upper division standing; lower division biology; or instructor consent. Must be a declared Biology Major (all).
Grading: Graded

BIOL 198 - Undergraduate Research

0.5-4 unit(s)
Field or laboratory biological research under the direction of a faculty member.

Course is repeatable for up to 8 units.

Prerequisite(s): Instructor consent. Must be a declared Biology Major (all).
Grading: Graded

BIOL 201 - Graduate Seminar in Biological Sciences

1 unit(s)
Seminar designed to introduce principles and topics in biological research. Mandatory during first semester of enrollment. Must be taken twice for credit.

Course may be repeated for credit for up to 4 units.

Grading: Graded

BIOL 202 - Graduate Studies in Biology

3 unit(s)
A seminar on current research and theory in the life sciences, emphasizing scientific writing and formal oral presentations.

Misc/Lab: Lecture/seminar/discussion 5 hours.

Satisfies GWAR: Graduation Writing Assessment Requirement

Prerequisite(s): Instructor consent.
Grading: Graded
Note(s): This course satisfies graduate-level GWAR in this master's program.

**BIOL 202TA - Biotech Seminar: Biotech Products**

3 unit(s)
BIOL 202TA is a seminar course in which students develop professional skills in writing, speaking, literature review, and critical thinking. Assignments are targeted at developing expertise and knowledge useful in the biotechnology industry. BIOL 202TA focuses on biotechnology products.

*Satisfies GWAR: Graduation Writing Assessment Requirement*

**Prerequisite(s):** Enrollment in the Master of Biotechnology Program.
**Grading:** Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

**BIOL 202TB - Biotech Seminar: Drug Development Process**

3 unit(s)
Biol 202 TB is a seminar course in which students develop their professional skills. Assignments are targeted at developing expertise and knowledge useful in the biotechnology industry. Biol 202TB focuses on the development of drugs and other biotechnology products.

*Satisfies GWAR: Graduation Writing Assessment Requirement*

**Prerequisite(s):** Enrollment in the Master of Biotechnology Program.
**Grading:** Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

**BIOL 202TC - Biotech Seminar: Biotech Business I**

2 unit(s)
BIOL 202TC is a seminar course in which students develop their professional skills. Assignments are targeted at developing expertise and knowledge useful in the biotechnology and pharmaceutical industries. BIOL 202TC focuses on the financial aspects of business development in biotechnology.

**Prerequisite(s):** Enrollment in the Master of Biotechnology Program.
**Grading:** Graded

**BIOL 202TD - Biotech Seminar: Biotech Business II**

2 unit(s)
Seminar course in which students develop their professional skills. Assignments target developing expertise and knowledge useful in the biotechnology and pharmaceutical industries. Focuses on business development in biotechnology and a team project in which students develop a business plan.

**Prerequisite(s):** BIOL 202TC or instructor consent
**Grading:** Graded

**BIOL 203 - Biology Teaching Forum**
3 unit(s)
Introduction to effective methods for teaching undergraduate biology laboratories, activities, seminars and/or lectures. Emphasis on pedagogy and application of best practices and strategies for teaching biology to a diverse audience. Course administration, student conduct and expectations, and assessment will also be covered.

Prerequisite(s): graduate standing or instructor consent
Grading: Graded

BIOL 205 - Advanced Molecular Techniques

4 unit(s)
Emphasizes the laboratory techniques of modern molecular biology. Depending on instructor, focus will be on animal, plant, yeast, bacterial or viral systems. Course is repeatable for credit if content changes.

Misc/Lab: Lecture 2 hours/lab 6 hours.

Prerequisite(s): BIOL 135L or instructor consent.
Grading: Graded

BIOL 205T - Advanced Molecular Techniques for Biotechnology

4 unit(s)
Emphasizes the laboratory techniques of modern molecular biology especially: report writing and communication of research results. Depending on instructor, focus will be on animal, plant, yeast, bacterial, or viral systems.

Misc/Lab: Lecture 2 hours/lab 6 hours.

Prerequisite(s): BIOL 135L and admission into the Master of Biotechnology program.
Grading: Graded

BIOL 215 - Seminar in Advanced Genetics

3 unit(s)
Selected topics of current interest in advanced genetics. Each semester will emphasize a particular field of genetics; e.g., molecular genetics, human genetics, developmental genetics, population genetics, etc.

Grading: Graded

BIOL 218 - Evolution

3 unit(s)
Integrated use of modern molecular techniques and classical evolutionary theory to address a broad array of questions in evolutionary biology.

Prerequisite(s): BIOL 115 and instructor consent.
Grading: Graded

BIOL 220 - Science Communication

3 unit(s)
This course will focus on learning to effectively present ongoing scientific research to a wide audience, with an emphasis on developing science communication skills, learning to place data within the context of a field, and
developing critical thinking skills.

**Pre/Corequisite(s):** BIOL 202  
**Grading:** Graded

*BIO 221T - Advanced Bioinformatics for Biotechnology*

4 unit(s)
Bioinformatics/computer applications to solve advanced problems in molecular and cell biology by manipulation and analysis of DNA, RNA, and protein sequences.

**Prerequisite(s):** BIOL 116 or either CHEM 130A, CHEM 135, or Chem 136 and admission into the Master of Biotechnology program.  
**Grading:** Graded

*BIO 227 - Advanced Physiology*

3 unit(s)
Integrated discussion of modern physiological techniques to address a broad array of questions in physiology. Each semester will emphasize a particular field of physiology.

**Prerequisite(s):** Graduate standing and completion of an upper division physiology course or instructor consent.  
**Grading:** Graded

*BIO 227T - Principles of Pharmacology*

3 unit(s)
Principles of pharmacology, especially as related to the pharmaceutical industry and clinical applications.

**Prerequisite(s):** BIOL 30 or equivalent; Physiology recommended  
**Grading:** Graded

*BIO 229T - Biotechnology Instrumentation*

3 unit(s)
Introduction to the principles of operation of common instruments used in the biotechnology and pharmaceutical industries. Includes understanding and experience with calibration, detection mechanisms, data output, trouble shooting and decision making process.

**Misc/Lab:** Lecture 2 hours / Lab 3 hours.

**Prerequisite(s):** Enrollment in the Master of Biotechnology program.  
**Grading:** Graded

*BIO 230 - Comparative Animal Physiology*

3 unit(s)
A seminar in the functional relationships of invertebrates and vertebrates. Evolutionary patterns and environmental adaptations are considered.

**Prerequisite(s):** An upper division course in physiology or instructor consent.  
**Grading:** Graded
BIOL 233 - Immunological Techniques

3 unit(s)
Principles, concepts and mechanisms relative to serological and other immunological procedures and reactions with emphasis on practical applications.

Misc/Lab: Lab 9 hours.

Prerequisite(s): Upper division microbiology or cell biology, or organic chemistry and instructor consent.
Grading: Graded

BIOL 233T - Immunological Techniques for Biotechnology

3 unit(s)
Principles, concepts, and mechanisms relative to serological and other immunological procedures and reactions with emphasis on applications in the biotechnology industry.

Prerequisite(s): Immunology laboratory (grade "B" or better) or equivalent experience and admission to the Master of Biotechnology program.
Grading: Graded

BIOL 242 - Advanced Paleontology

4 unit(s)
The lecture portion of this course will be conducted as a seminar; students will read and discuss classic and important newer papers on macroevolutionary theory and paleobiology. In the lab portion of this course, students will use fossil samples to develop and test scientific hypotheses that will be part of a semester-long project.

Misc/Lab: Lecture 4 hours/Lab 3 hours.

Prerequisite(s): Suitable background in geology or evolutionary biology.
Grading: Graded

BIOL 255E - Advanced Topics: Ecology and Evolution

1-4 unit(s)
Advanced Topics: Ecology and Evolution is a rotating topics course; each offering will have different content. The purpose of the seminar is to help students develop a deeper understanding of specific aspects of ecology and evolution through thorough examination of primary scientific literature, discussion and presentations. Enrollment in at least 3 units of BIOL 255E is mandatory for the MS Biological Sciences: concentration in Ecology and Evolution program.

Course may be repeated for credit for up to 16 units.

Prerequisite(s): Graduate standing or Instructor consent
Grading: Graded

BIOL 255L - Advanced Biology Laboratory

1-4 unit(s)
Laboratory or field experience in advanced biology. Course is repeatable for credit when content changes.
Course may be repeated for credit for up to 6 units.

Prerequisite(s): Instructor consent.

Grading: Graded

Note(s): May be taken concurrent with any 255 seminar.

BIOL 255M - Advanced Topics: Molecular & Microbiology

1-4 unit(s)
Advanced study in molecular and microbiology. Course is repeatable for credit when content changes.

Course may be repeated for credit for up to 16 units.

Prerequisite(s): Instructor consent.

Grading: Graded

BIOL 255P - Seminar in Advanced Biology: Physiology

1-4 unit(s)
Advanced study in plant or animal physiology. Course is repeatable for credit when content changes.

Course may be repeated for credit for up to 16 units.

Prerequisite(s): graduate standing or instructor consent

Grading: Graded

BIOL 255T - Introduction to Stem Cell Techniques

4 unit(s)
This laboratory/lecture course exposes students to the theoretical and practical aspects of contemporary stem cell techniques. Students will culture mouse embryonic stem cells on feeders and characterize them using immunofluorescence and flow cytometry, differentiate various lineages and observe genetic modifications. Students will prepare inducible pluripotent stem cells (iPSC) from primary cells. This includes both the theoretical and practical aspects of applied stem cell in regenerative approaches as well as models of disease for research purposes. Students are expected to keep a laboratory notebook and document their experiments and results. Additionally, students will present scientific papers on recent topics in stem cell basic research, as published in scientific journals of recent year. The goal of this course will be to provide students with basic experience in methods used in stem cell laboratories, so that they can transition to an internship in a stem cell laboratory (although many of these techniques are applicable in a number of diverse fields), and to provide students with the most current stem cell topics while practicing effective presentation and evaluation skills.

Grading: Graded

BIOL 256 - Advanced Experimental Design and Analysis

3 unit(s)
Provides training in advanced statistical procedures and experimental designs for graduate-level research. The content is tailored to research needs of enrolled students. Includes sampling schemes, randomization analyses, complex ANOVA and multivariate analyses.

Prerequisite(s): Upper division statistics course; graduate standing.

Grading: Graded
BIOL 280 - Individual Studies

1-3 unit(s)
Graduate level research projects designed in conjunction with faculty advisor.

Course is repeatable for up to 6 units.

Prerequisite(s): Graduate standing and instructor consent. Not available to Open University Students.
Grading: Credit / No Credit

BIOL 280T - Internship in the Biotechnology Industry

2 unit(s)
A 8-10 week internship at a Bay Area biotechnology company in R&D, quality control, manufacturing, human resources, marketing, or sales.

Course may be repeated for credit for up to 6 units.

Prerequisite(s): Admission to the Master of Biotechnology program.
Grading: Credit/No Credit

BIOL 281T - Individual Studies in Biotechnology

1-4 unit(s)
Supervised, advanced work in specialized fields relevant to biotechnology.

Prerequisite(s): Admission to the Master of Biotechnology program; instructor consent and Program Director.
Grading: Graded

BIOL 282C - Biotechnology Company Management

3 unit(s)
Provides general management perspectives of biotechnological innovation; focuses on challenges of managing the development of new technologies, products, and processes in biotech sectors; examines management concepts, industry practices, and cases relevant to the biotechnology sector.

Grading: Graded

BIOL 283T - Topics in Biotech Regulatory Affairs

3 unit(s)
Introduction to laws regulating the pharmaceutical, biotechnology, medical device industries. Discussions of company organization; product development and commercialization; Good Manufacturing Practice.

Misc/Lab: Lecture 3 hour/Activity 6 hours.

Prerequisite(s): Admission to the Master of Biotechnology program and consent of the Program director.
Grading: Graded

BIOL 284 - Master's Directed Reading
1-3 unit(s)  
Directed reading and discussion of biological literature and/or individualized preparation for culminating graduate experience. Not available to Open University Students.

**Prerequisite(s):** Graduate Standing in MA program; instructor consent  
**Pre/Corequisite(s):** Graduate standing in MA program and instructor consent.  
**Grading:** Mandatory CR/NC/RP

**BIOL 285 - Colloquium in Biological Sciences**

1 unit(s)  
Meetings for the presentation and discussion of advanced studies in special fields including original work by the faculty, guest investigators and graduate students. Topics will vary from year to year.

**Grading:** Credit/No Credit

**BIOL 285T - Colloquium in Biotechnology**

1 unit(s)  
Meetings for reporting, by written and oral presentations, progress through the MBT program.

**Prerequisite(s):** Admission to the Master of Biotechnology program.  
**Grading:** Credit/No Credit

**BIOL 291A - Introduction to Molecular Diagnostics I**

3 unit(s)  
Graduate level course which will include topics relevant to all tests and methods used to identify a disease or the predisposition for a disease through DNA, RNA, or protein analysis. Methods for isolation from human clinical samples.

**Prerequisite(s):** Instructor consent.  
**Grading:** Graded

**BIOL 291B - Introduction to Molecular Diagnostics II: Human Genetic Diseases and Detection**

3 unit(s)  
Graduate level course which will include topics relevant to all tests and methods used to identify a disease or the predisposition for a disease through DNA or RNA analysis of human samples.

**Prerequisite(s):** BIOL 291A or Instructor Consent.  
**Grading:** Graded

**BIOL 297 - Graduate Research**

1-4 unit(s)  
Advanced graduate lab or field research projects designed in conjunction with faculty advisor. Repeatable for credit, up to 10 units can be applied towards the degree.

*Course is repeatable for up to 10 units.*
Prerequisite(s): Graduate Standing and Instructor Consent.

Grading: Mandatory CR/NC/RP

**BIOL 298 - MS Project Culminating Experience**

1 unit(s)
Culminating experience for MS Project Option, consisting of the development of a manuscript describing student's research and following journal guidelines for manuscript preparation, followed by a public seminar defending the research project.

*Course may be repeated for credit for up to 2 units.*

Prerequisite(s): Admission to candidacy for the Master of Science degree

Grading: Mandatory CR/NC/RP

**BIOL 298M - MA Culminating Experience**

1 unit(s)
Advanced individual work toward program Plan B (Comprehensive Exam or Master's Project).

*Course may be repeated for credit for up to 4 units.*

Prerequisite(s): Advancement to candidacy for the MA in Biological Sciences and graduate advisor approval.

Grading: Mandatory CR/NC/RP

**BIOL 298T - Internship in the Biotechnology Industry**

3 unit(s)
A 6-8 week internship at a Bay Area biotechnology company in research and development, quality control, manufacturing, human resources, marketing, or sales.

Prerequisite(s): Admission into the MS Biology, Concentration in Biotechnology. Not available to Open University Students.

Grading: Mandatory CR/NC/RP

**BIOL 299 - Master's Thesis**

1-4 unit(s)
Prerequisite(s): Admission to candidacy for the Master of Science degree.
Pre/Corequisite(s): Not available to Open University Students

Grading: Mandatory CR/NC/RP

**BIOL 888 - test class association**

3 unit(s)
test class association

Grading: Graded

**BIOL 1290R - Culminating Experience Supervision**
This course covers the same topics and has the same objectives as BIOL 298/BIOL 298M/BIOL 299.

Course is repeatable for up to 16 units.

**Prerequisite(s):** Must have received an RP in BIOL 298/BIOL 298M/BIOL 299.

**Grading:** CR/NC, No Degree Credit.

**Note(s):** No Degree Credit.

**BOT 104 - Plant Taxonomy**

4 unit(s)

Taxonomic relations and classification of ferns, conifers and flowering plants, with practice in their collection and identification. Selected techniques of cytotaxonomy, chemotoxonomy, palynology and numerical taxonomy.

**Prerequisite(s):** Must be a declared Biology Major (all).

**Grading:** Graded

**BOT 113 - Comparative Taxonomy**

3 unit(s)

Students gain the understanding and skills needed to taxonomically study biodiversity, including the use of morphological and DNA sequence characters to examine phylogeny, and use of a range of biodiversity research techniques and tools.

*Lecture 2 hours/Lab 3 hours.*

**Prerequisite(s):** BIOL 115 or BIOL 118 (with a grade of "C" or better), or instructor consent. Must be a declared Biology Major (all).

**Grading:** Graded

**BOT 114 - Functional Morphology**

3 unit(s)

Develops understanding and skills needed to taxonomically study biodiversity, including the use of morphological and DNA sequence characters to examine phylogeny, and use of a range of biodiversity research techniques and tools.

*Lecture 2 hours/Lab 3 hours.*

**Prerequisite(s):** BIOL 115 or BIOL 115 (with a grade of "C" or better), or instructor consent. Must be a declared Biology Major (all).

**Grading:** Graded

**BOT 143 - Biogeography**

3 unit(s)

Examination of the patterns of biodiversity over space and through time. Using data and models from a variety of sources including botany, zoology, ecology, evolutionary biology, paleontology, and geology, effects of isolation, elevation, and latitude are examined to understand spatial patterns of biodiversity.

**Prerequisite(s):** BIOL 31 or equivalent (with a grade of "C-" or better), or instructor consent. Must be a declared
Biology Major (all).

**Grading:** Graded

**BOT 160 - Ecology**

4 unit(s)
Factors that influence the distribution and abundance of organisms; some aspects of applied ecology.

*Lecture 3 hours/Lab 3 hours.*

*Satisfies SJSU Studies R: Earth & Environment for Biology Majors only.*

**Prerequisite(s):** BIOL 113 or BIOL 114 (with a grade of "C or better"); Allowed Declared Majors (Biology, Natural Science); Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

**Pre/Corequisite(s):** BIOL 55 or BIOL 155 or BIOL 156 or equivalent Biostatistics course, or instructor consent.

**Grading:** Graded

**Note(s):** All of SJSU Studies courses require completion of the WST and upper division standing.

**BOT 165 - Plant Communities of California**

4 unit(s)

*Lecture 2 hours/Lab-Field 6 hours (some weekend field trips).*

**Prerequisite(s):** BIOL 113 or BIOL 114 (with a grade of "C" or better), or instructor consent. Must be a declared Biology Major (all).

**Grading:** Graded

**BOT 180 - Individual Studies**

1-4 unit(s)
Advanced work in special fields.

*Repeatable for credit.*

**Prerequisite(s):** Instructor consent. Must be a declared Biology Major (all).

**Grading:** Credit / No Credit

**BOT 186 - Senior Thesis**

2-4 unit(s)
Advanced laboratory or field research under supervision of faculty member, culminating in a senior thesis.

**Prerequisite(s):** Instructor consent. Must be a declared Biology Major (all).

**Grading:** Credit / No Credit

**BOT 255 - Advanced Botany**
1-3 unit(s)
Advanced aspects of morphology, mycology and other fields of botany. Course may be repeated for credit with advisor consent.

**Prerequisite(s):** Specialization in botany and instructor consent.
**Grading:** Graded

**BOT 298 - Research**

1-4 unit(s)
Independent investigations.

**Prerequisite(s):** Instructor consent.
**Grading:** Mandatory CR/NC/RP

**BOT 299 - Master's Thesis or Project**

1-4 unit(s)
**Prerequisite(s):** Admission to candidacy for the master's degree.
**Grading:** Mandatory CR/NC/RP

**ENT 101 - Insect Diversity**

4 unit(s)
Introduction to biology, ecology and behavior of insects. Ways in which insects affect humans and the environment. Students collect, curate and identify common families of insects.

*Lecture 3 hours/lab-field 3 hours.*

**Prerequisite(s):** BIOL 113 or BIOL 114 (with a grade of "C" or better); CHEM 1A, CHEM 1B. Or instructor consent. Must be a declared Biology Major (all).
**Grading:** Graded

**ENT 106 - Forensic Entomology**

3 unit(s)
Examines the science and methodology used to collect, analyze, and present information regarding insects and other arthropods that are important in legal investigations.

*Lecture 2 hours/Lab 3 hours.*

**Prerequisite(s):** BIOL 30 and BIOL 31 (with a grade of "C-" or better in each), or instructor consent. Must be a declared Biology or Forensic Science Major (all).
**Grading:** Graded

**ENT 113 - Comparative Taxonomy**

3 unit(s)
Students gain the understanding and skills needed to taxonomically study biodiversity, including the use of morphological and DNA sequence characters to examine phylogeny, and use of a range of biodiversity research techniques and tools.
**ENT 114 - Functional Morphology**

3 unit(s)
Develops understanding and skills needed to taxonomically study biodiversity, including the use of morphological and DNA sequence characters to examine phylogeny, and use of a range of biodiversity research techniques and tools.

**Prerequisite(s):** BIOL 115 or BIOL 118 (with a grade of "C" or better), or instructor consent. Must be a declared Biology Major (all).
**Grading:** Graded

**ENT 143 - Biogeography**

3 unit(s)
Examination of the patterns of biodiversity over space and through time. Using data and models from a variety of sources including botany, zoology, ecology, evolutionary biology, paleontology, and geology, effects of isolation, elevation, and latitude are examined to understand spatial patterns of biodiversity.

**Prerequisite(s):** BIOL 31 or equivalent (with a grade of "C-" or better), or instructor consent. Must be a declared Biology Major (all).
**Grading:** Graded

**ENT 180 - Individual Studies**

1-4 unit(s)
Advanced lab work in entomology.

*Course is repeatable for credit.*

**Prerequisite(s):** Instructor consent. Must be a declared Biology Major (all).
**Grading:** Credit / No Credit

**ENT 185 - Seminar in Entomology**

1 unit(s)
Current entomological literature and research and historical development of various entomological concepts.

**Prerequisite(s):** Must be a declared Biology Major (all).
**Grading:** Graded

**ENT 186 - Senior Thesis**

2-4 unit(s)
Advanced laboratory or field research under supervision of faculty member, culminating in a senior thesis.
Prerequisite(s): Instructor consent. Must be a declared Biology Major (all).
Grading: Credit / No Credit

**ENT 281 - Advanced Laboratory Skills in Entomology**

3 unit(s)
Advanced lab work in entomology.

Prerequisite(s): MA graduate standing.
Grading: Credit/No Credit

**ENT 282 - Entomology Internship**

3 unit(s)
Professional career development and/or individualized preparation for culminating graduate experience.

Prerequisite(s): Graduate standing.
Grading: Credit/No Credit

**ENT 283 - Directed Readings in Entomology**

2 unit(s)
Directed reading assignments in entomological literature including but not limited to: research, governmental guidelines/protocols/procedures and risk assessment/management.

Prerequisite(s): MA graduate standing.
Grading: Graded

**ENT 298 - Research**

1-4 unit(s)
Independent investigations.

Prerequisite(s): Instructor consent.
Grading: Mandatory CR/NC/RP

**ENT 299 - Master's Thesis or Project**

1-4 unit(s)
Prerequisite(s): Admission to candidacy for the master's degree.
Grading: Mandatory CR/NC/RP

**MICR 20 - General Bacteriology**

5 unit(s)
Morphology, physiology, genetics and diversity of bacteria; their control by chemical and physical means; and their role in disease. For majors in allied health professions.

Misc/Lab: Lecture 4 hours/lab 3 hours.

Satisfies B2B3: Life Science & Lab
Prerequisite(s): CHEM 1B, or CHEM 30A with a C or better or instructor consent.  
Grading: Graded

Note(s): Not an elective in the department majors.

MICR 92 - Int’l Program Studies

1-12 unit(s)  
Grading: Mixed Grading

MICR 101 - General Microbiology

5 unit(s)  
Fundamentals of basic microbiology emphasizing cell structure, cell metabolism, molecular genetics, microbial diversity and ecological relationships.  
Lab 6 hours; Lecture 3 hours.

Prerequisite(s): BIOL 30 and BIOL 31 (with a grade of “C-” or better in each); CHEM 8 or CHEM 112A (with a grade of “C” or better), or instructor consent. Must be a declared Biology Major (all).  
Grading: Graded

MICR 122 - Bacterial Diversity

2 unit(s)  
Study of the characteristics and microecology of unusual prokaryotes. Molecular and traditional approaches will be discussed.  
Prerequisite(s): MICR 101 (with a grade of “C” or better), or instructor consent. Must be a declared Biology Major (all).  
Grading: Graded

MICR 122L - Bacterial Diversity Laboratory

2 unit(s) 
Laboratory techniques in bacterial diversity.  
6 hours Lab.  
Prerequisite(s): MICR 101 (with grade of “C” or better) or Instructor Consent. Must be a declared Biology Major (all).  
Grading: Graded

MICR 123 - Food Microbiology

1 unit(s)  
Detection and enumeration of both normal microbiological flora and spoilage organisms of specific foods. Control of sanitation problems in food production and processing.  
Prerequisite(s): MICR 101 (with a grade of “C” or better), or instructor consent. Must be a declared Biology Major (all).  
Grading: Graded
MICR 123L - Food Microbiology Laboratory

2 unit(s)
Practical microbiological techniques for the detection and enumeration of both normal microbiological flora and spoilage organisms of specific foods; and for the control of sanitation problems in food production and processing. Field trips to local food industries and/or a water treatment plant may be required within lab hours.

6 hour Lab.

Prerequisite(s): MICR 101 (with a grade of "C" or better), or instructor consent. Must be a declared Biology Major (all).
Grading: Graded

MICR 127 - Microbial Physiology

3 unit(s)
Studies of the physiology of microbes specifically focusing on bacteria (growth, metabolism and regulation of gene expression); growth experiments and mutagenesis techniques. SJSU Studies Area: R for Biology Majors only.

Satisfies SJSU Studies R: Earth & Environment.

Prerequisite(s): CHEM 135, MICR 166, both with a C or better, or instructor consent. Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses.
Pre/Corequisite(s): BIOL 100W strongly recommended. Must be a declared Biology Major (all).
Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing. Biological Sciences Majors only.

MICR 127L - Microbial Physiology Laboratory

2 unit(s)
Laboratory experiments involve small and large-scale growth experiments (fermentation, continuous culture and batch culture), techniques used in mutagenesis and mutant characterization as well as construction and studies of reporter fusions.

Lab 6 hours.

Prerequisite(s): MICR 101 (with grade of "C" or better), or instructor consent. Must be a declared Biology Major (all).
Grading: Graded

MICR 140 - Hematology

3 unit(s)
Blood and blood forming organs. Theoretical and clinical aspects of normal and pathologic conditions of the erythrocytic, leukocytic, coagulation and blood group systems.

Course is repeatable for up to 3 units.

Prerequisite(s): MICR 101 (with grade of "C" or better), or instructor consent. Must be a declared Biology Major (all).
Grading: Graded
MICR 140L - Hematology Laboratory

2 unit(s)
Laboratory methodologies used to diagnose hematologic pathology. Prerequisite(s): MICR 101 (with grade of "C" or better), or instructor consent.

Lab 6 hours.

Pre/Corequisite(s): MICR 140. Must be a declared Biology Major (all).
Grading: Graded

MICR 141 - Pathogenic Microbiology I

3 unit(s)
Concepts and principles of medical microbiology, emphasizing the biology of host-parasite interactions and mechanisms of infectious disease pathogenesis.

Prerequisite(s): MICR 101, BIOL 107 (with a grade of "C" or better in each); CHEM 112A or CHEM 8, (with a grade of "C" or better in each); or instructor consent. Must be a declared Biology Major (all).
Grading: Graded

MICR 141L - Pathogenic Microbiology I Laboratory

3 unit(s)
Application of principles of medical microbiology to pathogen isolation, characterization and identification.

Lab 9 hours.

Prerequisite(s): MICR 101, BIOL 107, BIOL 107L (with a grade of "C" or better in each); CHEM 8 or CHEM 112A (with a grade of "C" or better in each), or instructor consent.
Corequisite(s): MICR 141. Must be a declared Biology Major (all).
Grading: Graded

MICR 142 - Pathogenic Microbiology II

3 unit(s)
Concepts and principles of medical microbiology, emphasizing the biology of host-parasite interactions and mechanisms of infectious disease pathogenesis. Continuation of MICR 141.

Lecture 3 hours.

Prerequisite(s): MICR 141 (with grade of "C" or better), or instructor consent. Must be a declared Biology Major (all).
Grading: Graded

MICR 142L - Pathogenic Microbiology II Laboratory

3 unit(s)
Application of principles of medical microbiology to pathogen isolation, characterization and identification.

Lab 9 hours.

Prerequisite(s): MICR 141 and MICR 141L and BIOL 107L (with grades of "C" or better in each), or instructor
MICR 166 - Bacterial Genetics

4 unit(s)
Fundamental prokaryotic genetic concepts and their incorporation into problem solving and experimental design. Emphasis on how and why someone might use genetic approaches to their benefit when addressing biological questions in bacteria.

Prerequisite(s): MICR 101 (with a grade of "C" or better), or instructor consent. Must be a declared Biology Major (all).
Grading: Graded

MICR 170 - General Virology

3 unit(s)
Molecular and biological aspects of animal, plant and microbial viruses and their relationships with their hosts.

Prerequisite(s): BIOL 30 and BIOL 31 (with a grade of "C-" or better in each), CHEM 8 or CHEM 112A (with a grade of "C" or better), or instructor consent. Must be a declared Biology Major (all).
Grading: Graded

MICR 180 - Individual Studies

1-4 unit(s)
Advanced lab work in special fields.

Repeatable for credit.

Prerequisite(s): Instructor consent. Must be a declared Biology Major (all).
Grading: Credit / No Credit

MICR 184 - Directed Reading

1-4 unit(s)
Assigned readings of selected books, journals and papers to fill gaps in training or for contact with new fields. Evaluation through weekly reports and conferences.

Repeatable for credit.

Prerequisite(s): Instructor consent. Must be a declared Biology Major (all).
Grading: Credit / No Credit

MICR 192 - Int'l Program Studies

1-6 unit(s)
Grading: Mixed Grading

MICR 291A - Advanced Hematology
Students will engage in advanced study of normal and abnormal hematologic conditions, including molecular diagnosis of disorders.

**Grading:** Credit/No Credit

**MICR 291B - Advanced Pathophysiology**

4 unit(s)
Students will engage in advanced study of normal and abnormal physiologic conditions, including but not limited to diseases of glucose metabolism, organ dysfunction, endocrine disorders and electrolyte balance.

**Grading:** Credit/No Credit

**Note(s):** Not an elective for Biology majors and not available to Open University students.

**MICR 291C - Advanced Human Immunology**

4 unit(s)
Students will engage in advanced study of normal and abnormal immunologic conditions in humans, including molecular diagnosis of those disorders.

**Grading:** Credit/No Credit

**Note(s):** Not an elective for Biology majors and not available to Open University students.

**MICR 291D - Advanced Medical Microbiology**

4 unit(s)
Students will engage in advanced study of bacteria, fungi, viruses and other organisms of significance in medical microbiology. Emphasis will be on experience through clinical practice.

**Grading:** Credit/No Credit

**Note(s):** Not an elective for Biology majors and not available to Open University students.

**MICR 291E - Advanced Immunohematology**

4 unit(s)
Students will engage in advanced study of immunohematology and the use of transfused products in medical treatment. Emphasis will be on experience through clinical practice.

**Grading:** Credit/No Credit

**Note(s):** Not an elective for Biology majors and not available to Open University students.

**MICR 291F - Molecular Based Diagnostic Techniques**

4 unit(s)
Students will engage in advanced study of application of molecular techniques for diagnostic purposes. Emphasis will be on advanced practical training.
Grading: Credit/No Credit

Note(s): Not an elective for Biology majors and not available to Open University students.

**MICR 291G - Clinical Laboratory Management**

4 unit(s)
Students will engage in advanced study of laboratory management skills, including finance, time management, team building, quality control, basic human resources management and other topics. Emphasis will be on practical training.

Grading: Credit/No Credit

Note(s): Not an elective for Biology majors and not available to Open University students.

**MICR 292 - Topics and Demonstrations in Clinical Laboratory Science**

3 unit(s)
Presentations and demonstrations of topics and selected clinical lab procedures.

Course may be repeated for credit for up to 36 units.

Prerequisite(s): Baccalaureate degree in a biological science, valid license as a CLS Trainee, admission into the CLS Traineeship, and instructor consent. Concurrent enrollment in MICR 291.

Grading: Graded

**MICR 298 - Research**

1-4 unit(s)
Advanced individual work in a specialized field of microbiology.

Prerequisite(s): Instructor consent.
Grading: Mandatory CR/NC/RP

**MICR 299 - Master's Thesis or Project**

1-4 unit(s)
Prerequisite(s): Admission to candidacy for the Master of Science degree and instructor consent.
Grading: Mandatory CR/NC/RP

**MICR 1291 - Field Work in Clinical Laboratory Science**

12 unit(s)
Fieldwork in affiliated hospital laboratories prerequisite to the California Licensing examination for Clinical Laboratory Science (CLS).

Course may be repeated for credit for up to 36 units.

Prerequisite(s): Baccalaureate degree in a biological science, valid license as a CLS Trainee, admission into the CLS Traineeship, and instructor consent. Concurrent enrollment in MICR 292.
Grading: CR/NC, No Degree Credit

Note(s): No Degree Credit.
ZOOL 113 - Comparative Taxonomy

3 unit(s)
Students gain the understanding and skills needed to taxonomically study biodiversity, including the use of morphological and DNA sequence characters to examine phylogeny, and use of a range of biodiversity research techniques and tools.

Lab/Act: Lecture 2 hours/Lab 3 hours.

Prerequisite(s): BIOL 115 or BIOL 118 (with a grade of "C" or better), or instructor consent. Must be a declared Biology Major (all).

Grading: Graded

ZOOL 114 - Functional Morphology

3 unit(s)
Develops understanding and skills needed to taxonomically study biodiversity, including the use of morphological and DNA sequence characters to examine phylogeny, and use of a range of biodiversity research techniques and tools.

Lecture 2 hours/Lab 3 hours.

Prerequisite(s): BIOL 115 or BIOL 118 (with a grade of "C" or better), or instructor consent. Must be a declared Biology Major (all).

Grading: Graded

ZOOL 115 - Invertebrate Zoology and Natural History

4 unit(s)
The evolution, distribution, structure, natural history and systematics of invertebrates other than insects.

Lecture 2 hours/lab-field trips 6 hours.

Prerequisite(s): BIOL 113 or BIOL 114 (with a grade of "C" or better), or instructor consent. Must be a declared Biology Major (all).

Grading: Graded

ZOOL 116 - Vertebrate Evolution and Natural History

4 unit(s)

Lecture 2 hours/lab 6 hours with several field trips.

Prerequisite(s): BIOL 113 or BIOL 114 (with a grade of "C" or better), or instructor consent. Must be a declared Biology Major (all).

Grading: Graded

ZOOL 143 - Biogeography

3 unit(s)
Examination of the patterns of biodiversity over space and through time. Using data and models from a variety of
sources including botany, zoology, ecology, evolutionary biology, paleontology, and geology, effects of isolation, elevation, and latitude are examined to understand spatial patterns of biodiversity.

**Prerequisite(s):** BIOL 31 or equivalent (with a grade of "C-" or better), or instructor consent. Must be a declared Biology Major (all).

**Grading:** Graded

**ZOOL 180 - Individual Studies**

1-4 unit(s)
Advanced lab work in special fields. Course is repeatable for credit.

*Repeatable for credit.*

**Prerequisite(s):** Instructor consent. Must be a declared Biology Major (all).

**Grading:** Credit / No Credit

**ZOOL 186 - Senior Thesis**

2-4 unit(s)
Advanced laboratory or field research under supervision of faculty member, culminating in a senior thesis.

**Prerequisite(s):** Instructor consent. Must be a declared Biology Major (all).

**Grading:** Credit / No Credit

**ZOOL 298 - Research**

1-4 unit(s)
Independent investigations.

*Repeatable for credit.*

**Prerequisite(s):** Instructor consent. Must be a declared Biology Major (all).

**Grading:** Mandatory CR/NC/RP

**ZOOL 299 - Master's Thesis or Project**

1-4 unit(s)
*Repeatable for credit.*

**Prerequisite(s):** Admission to candidacy for the master's degree. Must be a declared Biology Major (all).

**Grading:** Mandatory CR/NC/RP

Overview

Chemistry plays an integral role in solving everyday problems in areas such as energy production, pollution control and disease prevention. Our graduates go on to gain advanced degrees in chemistry, medicine, pharmacy and dentistry or enter the job market directly, building careers in the pharmaceutical, biotechnological, biomedical, energy and green technology sectors. We provide broad access, high quality education in the molecular sciences at both the bachelor’s degree and master's degree levels. Undergraduates may specialize in biochemistry. Graduate degree candidates focus on analytical chemistry, biochemistry, inorganic, organic or physical chemistry. Our curriculum, taught by experts in each of the subfields of chemistry, supplements traditional classroom courses with hands-on laboratory and research instruction. For teaching purposes, as well as to support the department's research mission, we maintain a large collection of state-of-the-art instrumentation, including mass spectrometers, spectrophotometers and lasers.

Undergraduate Honors Program

Student must be nominated by their research advisor and is selected for department honors by the Chemistry Department faculty. To be nominated chemistry majors need at least a 3.5 GPA in all chemistry course work required for the major and a minimum of two semesters of research by the time of graduation. The student would also have to submit, in electronic form, a written research report to support the nomination.

Non-Compliance with Safety Rules

Failure to comply with proper procedures and prescribed safety cautions shall subject the student to removal from the laboratory and/or disciplinary action.
1. Any student who engages in unauthorized experimentation or who seriously disregards safety, thereby endangering self or others shall be withdrawn immediately from the class with a grade of "F".

2. Any student who shows persistent disregard for safety may have his or her grade lowered, and may risk being withdrawn with a final grade of "F".

Prerequisites

To enroll in a Chemistry Course that has another Course as a prerequisite requires that a grade of "C or better" (C- not accepted) be earned in the prerequisite course. Exceptions may be made only with instructor consent or if not explicitly stated in the course description.

Undergraduate

Chemistry, BA

This program, offered by the Department of Chemistry, provides a fundamental chemistry background, while affording ample electives for developing a second specialty. The degree is designed for those wishing to work in scientific laboratories, or in fields allied to chemistry such as medicine, environmental monitoring, electronics, food processing, sales, pharmaceuticals, safety, literature search, or in a supervisory capacity in businesses dealing with chemical products.

Summary of Degree Units

University Graduation Requirements 38

Major Preparation 14

Major Requirements 52

University Electives 16

Total 120

University Requirements for Graduation

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Undergraduate Graduation Requirements section of the Policies and Procedures.

Program Roadmaps

The 4-Year Roadmap is available online. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Degrees (ADT) Pathways are also available online.

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the General Education (GE) section to identify the specific adjustments for this degree program or contact your major advisor for more details.
**Prerequisite Requirements**

Enrollment in any chemistry course requires that the prerequisite courses be passed with a grade of "C or better" (C- not accepted). Exceptions may be made only with instructor consent or if not explicitly stated in the course description. Refer to the SJSU Course Catalog for specific information regarding course prerequisites.

**General Education/American Institution Requirements**

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

**University Requirements (38 units)**

**Core Lower Division General Education (24 units)**

Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

**Note:** Students who have completed the ADT Transfer degree (under SB 1440) for this major will have completed all lower division GE requirements (except for 1 course in GE area C and 1 course in GE area D) and should follow the 60 unit guarantee roadmap (which include the missing GE in area C and D). Meet with an advisor prior to registering for your first semester for the 60 unit roadmap or specific questions.

**Upper Division General Education (6 units)**

Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.

**American Institutions (6 units)**

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B, HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

**Complete One Sequence From:**

**African American Studies (6 units)**

- AFAM 2A - African Americans and the Development of America's History and Government 3 unit(s) (D2)
- AFAM 2B - African Americans and the Development of America's History and Government 3 unit(s) (M7)

**Asian American Studies (6 units)**

- AAS 33A - Asian Americans in U.S. History I 3 unit(s) (D2)
- AAS 33B - Asian Americans in U.S. History II 3 unit(s) (M7)

**U.S. History and Government (6 units)**
• HIST 15 - Essentials of U.S. History 3 unit(s) (M12)
• POLS 15 - Essentials of U.S. & California Government 3 unit(s) (M11)

Chicana and Chicano Studies (6 units)

• CCS 10A - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D2)
• CCS 10B - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (M7)

Physical Education (2 units)

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Major Preparation (14 units)

PHYS 50 and PHYS 51 accepted for Transfers, in lieu of PHYS 2A/PHYS 2B.

• MATH 30 - Calculus I 3 unit(s) (B4)
  MATH 30X may be used instead of MATH 30.
• PHYS 2A - Fundamentals of Physics 4 unit(s) (B1+B3)
• PHYS 2B - Fundamentals of Physics 4 unit(s) (B1+B3)
• PHIL 133 - Ethics in Science 3 unit(s) (V)

Major Requirements (52 units)

Core Courses (33 units)

• CHEM 1A - General Chemistry 5 unit(s) (B1+B3)
• CHEM 1B - General Chemistry 5 unit(s) (B1+B3)
• CHEM 55 - Quantitative Analysis 2 unit(s)
• CHEM 55L - Quantitative Analysis Laboratory 2 unit(s)
• CHEM 100W - Writing Workshop: Chemical Communications 3 unit(s) (Z)
• CHEM 112A - Organic Chemistry 3 unit(s)
• CHEM 112B - Organic Chemistry 3 unit(s)
• CHEM 113A - Organic Chemistry Lab 2 unit(s)
• CHEM 113B - Organic Chemistry Lab 3 unit(s)
• CHEM 120S - Chemical Safety Seminar 1 unit(s)
• CHEM 160 - Physical Chemistry 4 unit(s)

Approved Upper Division Chemistry Electives (19 units)

Students must complete at least three Upper Division lab courses, including at least one capstone course.
Elective Lab Courses (4-6 units)

Complete two courses from:
- CHEM 131A - Biochemistry Lab 2 unit(s)
- CHEM 155 - Instrumental Analysis 4 unit(s)
- CHEM 162L - Physical Chemistry Lab 2 unit(s)

Capstone Course (3 units)

Complete one course from:
- CHEM 114 - Advanced Organic Chemistry Lab 3 unit(s)
- CHEM 131B - Biochemistry Lab 3 unit(s) (R)
- CHEM 146 - Physical-Inorganic Techniques 3 unit(s)

Other Upper Division Chemistry Electives (10-12 units)

Complete 10-12 units from:
- CHEM 101 - Chemistry and the Computer 3 unit(s)
- CHEM 121S - Radiation Safety 1-2 unit(s)
- CHEM 130A - Biochemistry 4 unit(s) (CHEM 135 or CHEM 130A may count toward the degree.)
- CHEM 130B - Biochemistry 4 unit(s)
- CHEM 130C - Biochemistry 3 unit(s)
- CHEM 135 - General Biochemistry 4 unit(s) (CHEM 135 or CHEM 130A may count toward the degree.)
- CHEM 145 - Inorganic Chemistry 3 unit(s)
- CHEM 170A - Foundations of Macromolecular Chemistry 1 unit(s)
- CHEM 180 - Individual Studies 1-4 unit(s)
- CHEM 191 - Undergraduate Seminar 0.5 unit(s)
- CHEM 212 - Natural Products 3 unit(s)
- CHEM 213 - Organic Synthesis 3 unit(s)
- CHEM 236 - Biophysical Methods 3 unit(s)
- CHEM 237 - Bioinorganic Chemistry 3 unit(s)
- CHEM 245 - Advanced Inorganic Chemistry 3 unit(s)
- CHEM 250 - Current Topics in Analytical Chemistry 3 unit(s)

University Electives (16 units)

A minor is strongly recommended.

Total Units Required (120 units)

Chemistry, Biochemistry Concentration, BS

The Biochemistry concentration, offered by the Department of Chemistry, is designed for students interested in graduate work in biochemistry, medicine or related fields, or for responsible positions in industrial or government laboratories.

Major Requirements (58 units)

Core Courses (29 units)

• CHEM 1A - General Chemistry 5 unit(s) (B1+B3)
• CHEM 1B - General Chemistry 5 unit(s) (B1+B3)
• CHEM 55 - Quantitative Analysis 2 unit(s)
• CHEM 55L - Quantitative Analysis Laboratory 2 unit(s)
• CHEM 100W - Writing Workshop: Chemical Communications 3 unit(s) (Z)
• CHEM 112A - Organic Chemistry 3 unit(s)
• CHEM 112B - Organic Chemistry 3 unit(s)
• CHEM 113A - Organic Chemistry Lab 2 unit(s)
• CHEM 113B - Organic Chemistry Lab 3 unit(s)
• CHEM 120S - Chemical Safety Seminar 1 unit(s)

Biochemistry Concentration Required Courses (29 units)

• CHEM 130A - Biochemistry 4 unit(s)
• CHEM 130B - Biochemistry 4 unit(s)
• CHEM 130C - Biochemistry 3 unit(s)
• CHEM 131A - Biochemistry Lab 2 unit(s)
• CHEM 160 - Physical Chemistry 4 unit(s)

Capstone Course (3 units)

• CHEM 131B - Biochemistry Lab 3 unit(s) (R)

Science Electives (9 units)

Complete 9 units from:
• BIOL 107 - Immunology 3 unit(s)
• BIOL 107L - Immunology Laboratory 2 unit(s)
• BIOL 116 - Molecular Genetics 4 unit(s)
• BIOL 116L - Genetics Laboratory 3 unit(s)
• BIOL 117 - Human Genetics 3 unit(s)
• BIOL 118 - Evolutionary Genetics 4 unit(s)
• BIOL 119 - Neurogenetics 3 unit(s)
• BIOL 123A - Bioinformatics I 3 unit(s)
• BIOL 123B - Bioinformatics II 3 unit(s)
• BIOL 124 - Systems Physiology 3 unit(s)
• BIOL 125 - Systems Physiology Laboratory 2 unit(s)
• BIOL 135A - Eukaryotic Cell and Molecular Biology I 3 unit(s)
• BIOL 135B - Eukaryotic Cell and Molecular Biology II 3 unit(s) (R)
• BIOL 135L - Molecular Cell Biology Lab 3 unit(s)
• BIOL 137 - Introduction to Principles of Toxicology 3 unit(s)
• BIOL 165 - Advanced Human Anatomy 4 unit(s)
• BIOL 170 - Cellular and Molecular Physiology 3 unit(s)
• CHEM 114 - Advanced Organic Chemistry Lab 3 unit(s)
• CHEM 145 - Inorganic Chemistry 3 unit(s)
• CHEM 155 - Instrumental Analysis 4 unit(s)
• CHEM 162L - Physical Chemistry Lab 2 unit(s)
• CHEM 180 - Individual Studies 1-4 unit(s)
• MICR 101 - General Microbiology 5 unit(s)

Total Units Required (120 units)

Chemistry, BS

This curriculum prepares students for graduate work in chemistry or for responsible positions in industrial or government laboratories. This degree, offered by the Department of Chemistry, meets all requirements for Certification by the American Chemical Society. It does not require a minor, although with judicious choice of electives, a minor may be obtained in biology, mathematics or physics.

• Program Learning Outcomes

Summary of Degree Units

University Graduation Requirements 35

Major Preparation 25

Major Requirements 60

Total 120

University Requirements for Graduation

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Undergraduate Graduation Requirements section of the Policies and Procedures.

Program Roadmaps

The 4-Year Roadmap is available online. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Degrees (ADT) Pathways are also available online.

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the General Education (GE) section to identify the specific adjustments for this degree program or contact your major advisor for more details.

Prerequisite Requirements
Enrollment in any chemistry course requires that the prerequisite courses be passed with a grade of "C or better" (C- not accepted). Exceptions may be made only with instructor consent or if not explicitly stated in the course description. Refer to the SJSU Course Catalog for specific information regarding course prerequisites.

**General Education/American Institution Requirements**

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

**University Requirements (35 units)**

**Core Lower Division General Education (15 units)**

Of the 39 units required by the university, 24 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

**Note:** students who have completed the ADT Transfer degree (under SB 1440) for this major will have completed all lower division GE requirements (except for 1 course in GE area C and 1 course in GE area D) and should follow the 60 unit guarantee roadmap (which include the missing GE in area C and D). Meet with an advisor prior to registering for your first semester for the 60 unit roadmap or specific questions.

**Upper Division General Education (6 units)**

Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.

**American Institutions (12 units)**

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B, HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Complete one sequence from:

- AMS 1A - American Cultures to 1877 6 unit(s) (M4)
- AMS 1B - American Cultures 1877 to present 6 unit(s) (M5)

**Physical Education (2 units)**

**Graduation Writing Assessment Requirement**

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

*A grade of C or better (C- not accepted) is required to meet graduation requirement.*

**Major Preparation (25 units)**
• MATH 30 - Calculus I 3 unit(s) (B4)
• MATH 31 - Calculus II 4 unit(s) (B4)
• MATH 32 - Calculus III 3 unit(s) (B4)
• PHYS 50 - General Physics/Mechanics 4 unit(s) (B1+B3)
• PHYS 51 - General Physics/Electricity and Magnetism 4 unit(s) (B1+B3)
• PHYS 52 - General Physics/Waves, Light, Heat 4 unit(s) (B1+B3)
• PHIL 133 - Ethics in Science 3 unit(s) (V)

Major Requirements (60 units)

Core Courses (29 units)

• CHEM 1A - General Chemistry 5 unit(s) (B1+B3)
• CHEM 1B - General Chemistry 5 unit(s) (B1+B3)
• CHEM 55 - Quantitative Analysis 2 unit(s)
• CHEM 55L - Quantitative Analysis Laboratory 2 unit(s)
• CHEM 100W - Writing Workshop: Chemical Communications 3 unit(s) (Z)
• CHEM 112A - Organic Chemistry 3 unit(s)
• CHEM 112B - Organic Chemistry 3 unit(s)
• CHEM 113A - Organic Chemistry Lab 2 unit(s)
• CHEM 113B - Organic Chemistry Lab 3 unit(s)
• CHEM 120S - Chemical Safety Seminar 1 unit(s)

Additional Required Courses (23 units)

• CHEM 101 - Chemistry and the Computer 3 unit(s)
• CHEM 130A - Biochemistry 4 unit(s)
• CHEM 145 - Inorganic Chemistry 3 unit(s)
• CHEM 155 - Instrumental Analysis 4 unit(s)
• CHEM 161A - Physical Chemistry 3 unit(s)
• CHEM 161B - Physical Chemistry 3 unit(s)
• CHEM 162L - Physical Chemistry Lab 2 unit(s)
• CHEM 170A - Foundations of Macromolecular Chemistry 1 unit(s)

Capstone Course (3 units)

• CHEM 146 - Physical-Inorganic Techniques 3 unit(s)

Science Electives (5 units)

Complete five units from:

• ASTR 117A - Astrophysics I 3 unit(s)
• CHEM 114 - Advanced Organic Chemistry Lab 3 unit(s)
• CHEM 121S - Radiation Safety 1-2 unit(s)
• CHEM 131A - Biochemistry Lab 2 unit(s)
• CHEM 180 - Individual Studies 1-4 unit(s)

**Total Units Required (120 units)**

**Master Chemistry, MA**

The MA Chemistry degree is designed for persons who seek to augment and enhance their knowledge of chemistry beyond the bachelor's level. It is intended for (1) those who are interested in teaching chemistry at community colleges, (2) high school teachers who are currently certified and have teaching experience, (3) those who are interested in chemical sales, technical librarianship, and scientific writing, or (4) those who already have a significant amount of research experience. The MA degree is not recommended to those who wish to conduct or direct chemical research and have no previous research experience in the private sector.

For more information visit the Chemistry Department's Graduate Programs webpage.

**Admissions Requirements**

The applicant must apply to and be admitted by both San José State University and the Department of Chemistry. Check the SJSU Graduate Admissions and Program Evaluations website (GAPE) and the Chemistry Department website for the most up-to-date instructions.

**Admission to the University**

Applicants are admitted to the program by the Chemistry Department Graduate Advisor after they have been admitted to the graduate school by the university. University admission requirements include a bachelor's degree (or equivalent), a minimum 2.5 GPA, and good standing at the last college or university attended. Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage of GAPE.
Admission to the Chemistry Department

The Chemistry Department requires that the bachelor's degree be in chemistry or an intimately related science (e.g., chemical physics, biochemistry, materials science). In all cases, however, incoming students must have had the equivalent of 40 semester units of undergraduate chemistry including at least 10 units of general chemistry, 10 units of organic chemistry, 4 units of analytical chemistry, and 4 units of physical chemistry. A grade point average of 3.0 or higher for the chemistry coursework is preferred. In addition, admission to the Chemistry MA program requires the general GRE and at least two, but preferably three, letters of recommendation.

Admissions Status

Admission may be with graduate classified standing, which means that the student is deemed qualified to enroll in the graduate curriculum. In some cases, students are admitted with conditionally classified standing, which means that they must complete specified prerequisite work and/or graduate work with acceptable grades before they can be moved to classified status. Students with conditionally classified status should complete the conditions of their acceptance as early as possible. Such students may take graduate courses at the same time they are fulfilling the conditions. Prerequisite work is assigned for one or more of the following reasons: (1) low chemistry course GPA in undergraduate work, (2) insufficient number of undergraduate units in chemistry, or (3) lack of coursework in particular areas of study. In order to change from conditionally classified to classified standing, a student must (1) fulfill the conditions, and (2) obtain the Graduate Advisor's signature on the Change of Classification in Graduate Program form. Only students in classified standing may petition for advancement to candidacy, a requirement for graduation.

Requirements for Advancement to Graduate Candidacy

After approximately two semesters of coursework and completion of a preliminary seminar based on a proposed, faculty-guided research project, students may apply for advancement to graduate candidacy for the MA degree. In addition, the student must have graduate classified status and must have completed CHEM 100W for the Graduation Writing Assessment Requirement (GWAR). The Preliminary Seminar Guidelines and Evaluation form may be found on the Chemistry Department Forms webpage. The 30-unit Proposed Graduate Degree Program is written by the Graduate Advisor in consultation with the student and entered on the Petition for Advancement to Graduate Candidacy to Graduate Candidacy Form 10.7.15.pdf form which must be approved and signed by both the student's Research Advisor and the Graduate Advisor. Students cannot enroll in CHEM 299 - Master's Thesis or apply for graduation until they are official candidates for a degree. See the Graduate Policies and Procedures section for further details regarding university requirements for advancement to candidacy for the master's degree.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.
Program Graduation Requirements

Note that the coursework requirements for the MA degree differ from the requirements for MS degree in Chemistry. In addition to completing the 30 units of coursework listed on the approved candidacy form, an MA degree candidate in Chemistry must complete the following activities as part of his or her culminating experience:

Final Seminar

All MA candidates are required to present a departmental seminar based on their research project. The seminar is scheduled through the faculty instructor for CHEM 285 and, therefore, must take place during the fall or spring semester.

Final Oral Examination

All MA candidates are required to pass a Final Oral Examination based on the research project as detailed in the thesis. The Final Oral Examination is administered by the thesis committee, and the candidate must provide the committee with a copy of the thesis for review at least two weeks prior to the exam date. The final exam may be scheduled on the same date as the Final Seminar if the two-week thesis delivery requirement is met.

Thesis (Plan A)

The MA thesis document must be approved by the student's thesis research committee before submission. Typically, the thesis committee will provide the candidate feedback during the Final Oral Examination and may request changes to the thesis before final approval. See the most current version of the SJSU Master's Thesis and Doctoral Dissertation Guidelines and the submission deadlines set by the College of Graduate Studies.

Masters Requirements (30 units)

Graduation Writing Assessment Requirement

Students must pass the Graduation Writing Assessment Requirement (GWAR). This requirement is satisfied in the core courses.

Core Courses (18 units)

- CHEM 100W - Writing Workshop: Chemical Communications 3 unit(s) (GWAR)
  If CHEM 100W was completed for an undergraduate degree, three additional units of electives must be substituted
- CHEM 120S - Chemical Safety Seminar 1 unit(s)
- CHEM 285 - Seminar 0.5 unit(s) (2 units required - complete course 4 times)
- CHEM 297 - MA Special Study 1-3 unit(s) (3 units required)
- Preliminary Seminar Presentation

Electives (7 units)
• Any 200-level CHEM course or any 100-level CHEM course with graduate advisor consent; one of the electives must be an advanced chemistry laboratory course

Culminating Experience (2 units) (Plan A only)

• CHEM 299 - Master's Thesis 1-6 unit(s) (2 units required)

Total Units Required (30 units)

Elective courses must be planned in consultation with the Graduate Advisor.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

Chemistry, MS

The MS Chemistry degree is designed for persons who seek greater competency in chemical research or for those who want an introduction to graduate work before starting a program for the PhD degree. Emphasis is placed upon, but not limited to, training in advanced laboratory techniques, operation of state-of-the-art instruments, data acquisition and interpretation, and strategies involved in designing and conducting research in chemistry.

For more information visit the Chemistry Department's Graduate Programs webpage.

Admissions Requirements

The applicant must apply to and be admitted by both San José State University and the Chemistry Department. Check the SJSU Graduate Admissions and Program Evaluations website (GAPE) and the Chemistry Department website for the most up-to-date instructions.

Admission to the University

Students are admitted to the program by the Chemistry Department Graduate Advisor after they have been admitted to the graduate school by the university. University admissions requirements include a bachelor's degree (or equivalent), a minimum 2.5 GPA, and good standing at the last college or university attended. Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage.

Admission to the Chemistry Department

The Department of Chemistry requires further that the bachelor's degree be in chemistry or an intimately related science (e.g., chemical physics, biochemistry, or materials science). In all cases, however, incoming students must have had the equivalent of 40 semester units of undergraduate chemistry including at least 10 units of general chemistry, 10 units of organic chemistry, 4 units of analytical chemistry, and 4 units of physical chemistry. A grade point average of 3.0 or higher for the chemistry coursework is preferred. In addition, admission to Chemistry requires the general GRE examination and at least two, but preferably three, letters of recommendation.
Admissions Status

Admission may be with graduate classified standing, which means that the student is deemed qualified to enroll in the graduate curriculum. In some cases, students are admitted with conditionally classified standing, which means that they must complete specified remedial work and/or graduate work with acceptable grades before they can be moved to classified status. Students with conditionally classified status should complete the conditions of their acceptance as early as possible. Such students may take graduate courses at the same time they are fulfilling the conditions. Prerequisite work is assigned for one or more of the following reasons: 1) low chemistry course GPA in undergraduate work, 2) insufficient number of undergraduate units in chemistry, or 3) lack of coursework in particular areas of study. In order to change from conditionally classified to classified standing, a student must 1) fulfill the conditions, and 2) obtain the Graduate Advisor's signature on the Change of Classification in Graduate Program form. Only students in classified standing may petition for advancement to candidacy, a requirement for graduation.

Requirements for Advancement to Graduate Candidacy

After approximately two semesters of coursework and completion of a preliminary seminar based on a proposed, faculty-guided research project, students may apply for advancement to graduate candidacy for the MS degree. In addition, the student must have graduate classified standing and must have completed CHEM 100W for the Graduation Writing Assessment Requirement (GWAR). The Preliminary Seminar Guidelines and Evaluation form may be found on the Chemistry Department Forms webpage. The 30-unit Proposed Graduate Degree Program is written by the Graduate Advisor in consultation with the student and entered on the Petition for Advancement to Graduate Candidacy form which must be approved and signed by both the student's Research Advisor and the Graduate Advisor. Students cannot enroll in CHEM 299 - Master's Thesis or apply for graduation until they are official candidates for a degree. See the Graduate Policies and Procedures section for further details regarding university requirements for advancement to candidacy for the master's degree.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Program Graduation Requirements

In addition to completing the 30 units of coursework listed on the approved Candidacy form, a MS degree candidate in Chemistry must complete the following activities as part of their culminating experience:

Final Seminar

All MS candidates are required to present a departmental seminar based on their research project. The seminar is scheduled through the faculty instructor for CHEM 285 and, therefore, must take place during the fall or spring semester.
Final Oral Examination

All MS candidates are required to pass a Final Oral Examination based on the research project as detailed in the thesis. The Final Oral Examination is administered by the thesis committee, and the candidate must provide the committee with a copy of the thesis for review at least two weeks prior to the exam date. The Final Oral Examination may be scheduled on the same date as the Final Seminar if the two-week thesis delivery requirement is met.

Thesis (Plan A)

The MS thesis document must be approved by the student's thesis research committee before submission. Typically, the thesis committee will provide the candidate feedback during the Final Oral Examination and may request changes to the thesis before final approval. See the most current version of the SJSU Master's Thesis and Doctoral Dissertation Guidelines and the submission deadlines set by the College of Graduate Studies.

Masters Requirements (30 units)

Graduation Writing Assessment Requirement

Students must pass the Graduation Writing Assessment Requirement (GWAR). This requirement is satisfied in the core courses.

Core Courses (19-25 units)

- CHEM 100W - Writing Workshop: Chemical Communications 3 unit(s)
  If COMM 100W was completed for an undergraduate degree, three additional units of electives must be substituted.
- CHEM 120S - Chemical Safety Seminar 1 unit(s)
- CHEM 285 - Seminar 0.5 unit(s) (2 units required - complete course 4 times)
- CHEM 298 - Research 1-6 unit(s) (4 units minimum required; 10 units maximum)
- CHEM 200-Level Courses 9 unit(s)
- Preliminary Seminar Presentation

Electives (3-9 units)

Any 200-level CHEM course or any 100-level CHEM course

From the following list with graduate advisor consent.

- CHEM 101 - Chemistry and the Computer 3 unit(s)
- CHEM 114 - Advanced Organic Chemistry Lab 3 unit(s)
- CHEM 121S - Radiation Safety 1-2 unit(s)
- CHEM 126 - Introduction to Nuclear Science 3 unit(s)
- CHEM 127 - Nuclear Science Lab 3 unit(s)
- CHEM 130A - Biochemistry 4 unit(s)
- CHEM 130B - Biochemistry 4 unit(s)
- CHEM 130C - Biochemistry 3 unit(s)
- CHEM 131A - Biochemistry Lab 2 unit(s)
• CHEM 135 - General Biochemistry 4 unit(s)
• CHEM 145 - Inorganic Chemistry 3 unit(s)
• CHEM 146 - Physical-Inorganic Techniques 3 unit(s)
• CHEM 155 - Instrumental Analysis 4 unit(s)
• CHEM 173 - Polymer Chemistry 3 unit(s)

Culminating Experience (Plan A Only) (2 units)

• CHEM 299 - Master's Thesis 1-6 unit(s)
• Department Seminar Presentation
• Oral Examination

Total Units Required (30 units)

Elective courses must be planned in consultation with the Graduate Advisor.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

**Minor**

**Chemistry Minor**

Courses prerequisite to all chemistry courses must be passed with a grade of "C" or better ("C-" not accepted).

**University Graduation Requirements**

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

**Minor Requirements (23 units)**

**Core Courses (11 units)**

• CHEM 1A - General Chemistry 5 unit(s) (B1+B3)
• CHEM 1B - General Chemistry 5 unit(s) (B1+B3)
• CHEM 120S - Chemical Safety Seminar 1 unit(s)

**Approved Upper Division Chemistry Electives (12 units)**

Approved courses from at least two areas beyond general chemistry, chosen from analytical chemistry, biochemistry, inorganic chemistry, organic chemistry and physical chemistry (including at least one lab course; minimum of six units must be upper division courses and can include CHEM 120S)

• CHEM 55 - Quantitative Analysis 2 unit(s)
• CHEM 55L - Quantitative Analysis Laboratory 2 unit(s)
• CHEM 112A - Organic Chemistry 3 unit(s)
• CHEM 112B - Organic Chemistry 3 unit(s)
• CHEM 113A - Organic Chemistry Lab 2 unit(s)
• CHEM 130A - Biochemistry 4 unit(s)
• CHEM 130B - Biochemistry 4 unit(s)
• CHEM 131A - Biochemistry Lab 2 unit(s)
• CHEM 135 - General Biochemistry 4 unit(s)
• CHEM 145 - Inorganic Chemistry 3 unit(s)
• CHEM 155 - Instrumental Analysis 4 unit(s)
• CHEM 160 - Physical Chemistry 4 unit(s)
• CHEM 161A - Physical Chemistry 3 unit(s)
• CHEM 161B - Physical Chemistry 3 unit(s)
• CHEM 162L - Physical Chemistry Lab 2 unit(s)

Total Units Required (23 units)

CHEM 1A - General Chemistry

5 unit(s)
Topics including stoichiometry, reactions, atomic structure, periodicity, bonding, states of matter, energy changes, solutions using organic and inorganic examples. Lab program complements lecture.

Misc/Lab: Lecture 3 hours/lecture 1 hour/lab 3 hours.

Satisfies B1 + B3: Physical + Lab Science

Prerequisite(s): Proficiency in high school chemistry or CHEM 10 (with a grade of "C" or better; "C-" not accepted) or instructor consent; proficiency in high school algebra and eligibility for MATH 19; Writing Enrollment Group W-I or W-II, or ENGL 1AF with a grade of CR, or ENGL 1A with a grade of C- or better.

Grading: Graded

CHEM 1B - General Chemistry

5 unit(s)
Topics including stoichiometry, colligative properties, kinetics, equilibria, thermodynamics and electrochemistry. Lab program complements lecture.

Misc/Lab: Lecture 3 hours/lab

Satisfies B1 + B3: Physical + Lab Science

Prerequisite(s): CHEM 1A (with a grade of "C" or better; "C-" not accepted).

Grading: Graded

CHEM 8 - Organic Chemistry

3 unit(s)
Introduction to the chemistry of carbon compounds for allied health majors and others requiring only 3 units of organic chemistry lecture.

Prerequisite(s): CHEM 1B (with a grade of "C" or better; "C-" not accepted).

Grading: Graded
Note(s): CHEM 008 is not a satisfactory prerequisite for CHEM 112B. No credit toward Chemistry major or minor.

CHEM 9 - Organic Chemistry Lab

1 unit(s)
Organic chemistry laboratory for allied health majors and others requiring only 1 unit of organic chemistry lab.

Misc/Lab: Lab 3 hours.

Pre/Corequisite(s): CHEM 8.
Grading: Graded

Note(s): No credit toward Chemistry major or minor.

CHEM 10 - Chemical Calculations and Concepts

3 unit(s)
Fundamental concepts in chemistry and problems in chemical symbolism and calculations. For students wishing to continue in chemistry, but lacking prerequisites for CHEM 1A.

Misc/Lab: Lecture 2 hours/activity 2 hours.

Prerequisite(s): One year high school algebra.
Grading: Graded

Note(s): No credit towards chemistry major or minor.

CHEM 30A - Introductory Chemistry

3 unit(s)
The physical world as seen by a chemist; the ways this world affects humans, other animals and plants used as illustrations of fundamental general chemistry.

Misc/Lab: Lecture 2 hours/lab 3 hours.

Satisfies B1 + B3: Physical + Lab Science

Grading: Graded

Note(s): No credit toward Chemistry major or minor.

CHEM 30B - Introductory Chemistry

3 unit(s)
Organic compounds produced both in nature and artificially and the reactions they undergo, particularly in the human.

Misc/Lab: Lecture 2 hours/lab 3 hours.

Prerequisite(s): CHEM 30A or CHEM 1A (with a grade of “C” or better; “C-” not accepted).
Grading: Graded

Note(s): No credit toward Chemistry major or minor.
CHEM 55 - Quantitative Analysis

2 unit(s)
Introduction to theories and techniques of chemical analysis.

Prerequisite(s): CHEM 1B (with a grade of "C" or better; "C-" not accepted)
Grading: Graded

CHEM 55L - Quantitative Analysis Laboratory

2 unit(s)
Introduction to chemical analysis techniques.

Misc/Lab: Lab 6 hours.

Pre/Corequisite(s): CHEM 55
Grading: Graded

CHEM 90 - Problem Solving for Chemistry

1 unit(s)
Supplemental course taken simultaneously with lower division chemistry lecture courses. Techniques for studying and problem solving emphasis. Preparation and active participation expected. Consult schedule of classes for current offering(s).

Grading: Credit/No Credit

Note(s): No credit toward chemistry major or minor.

CHEM 92 - Int'l Prgm Studies

1-6 unit(s)
Grading: Mixed Grading

CHEM 100W - Writing Workshop: Chemical Communications

3 unit(s)
Improvement of skills in scientific writing and speaking. GE Area: Z.

Satisfies SJSU Studies Z: Written Communication II.

Prerequisite(s): CHEM 55 or CHEM 112A (with grades of "C" or better; "C-" not accepted). A3 or equivalent second semester composition course (with a grade of C- or better); completion of core GE; satisfaction of Writing Skills Test or completion of ENGL 100A / LLD 100A with C or better; and upper division standing. Allowed Declared Majors: Chemistry, Biochemistry. Or Graduate or Postbaccalaureate level.

Grading: Graded

Note(s): Must be passed with "C or better" to satisfy the CSU Graduation Writing Assessment Requirement (GWAR).

CHEM 101 - Chemistry and the Computer
3 unit(s)
Analysis of chemical problems. Spreadsheets, mathematical software packages, computer programming, computational chemistry methods.

Misc/Lab: Lecture 2 hours/activity 2 hours.

Prerequisite(s): CHEM 55 and MATH 30 or MATH 30P or MATH 30PL or MATH 30X (with a grade of "C" or better; "C-" not accepted).
Grading: Graded

CHEM 112A - Organic Chemistry

3 unit(s)
Chemistry of the carbon compounds, both aliphatic and aromatic, emphasizing underlying concepts.

Prerequisite(s): CHEM 1B (with a grade of "C" or better; "C-" not accepted).
Grading: Graded

CHEM 112B - Organic Chemistry

3 unit(s)
Continuation of CHEM 112A.

Prerequisite(s): CHEM 112A (with a grade of "C" or better; "C-" not accepted).
Grading: Graded

CHEM 113A - Organic Chemistry Lab

2 unit(s)
Fundamental techniques for the isolation, characterization and synthesis of organic compounds.

Misc/Lab: Lab 6 hours.

Prerequisite(s): CHEM 112A (with a grade of "C" or better; "C-" not accepted). Chemistry, Biology, Forensic Science-Chemistry, Forensic Science-Biology, Biomedical Engineering and Chemical Engineering majors only, all others by department consent.
Grading: Graded

CHEM 113B - Organic Chemistry Lab

3 unit(s)
Continuation of CHEM 113A including more advanced work.

Misc/Lab: Lecture 1 hour/lab 6 hours.

Prerequisite(s): CHEM 113A (with a grade of "C" or better; "C-" not accepted). Chemistry majors only or instructor consent.
Pre/Corequisite(s): CHEM 112B.
Grading: Graded

CHEM 114 - Advanced Organic Chemistry Lab
3 unit(s)
A capstone course on special topics in laboratory experiments utilizing modern chemical, physical and spectrometric methods. A grade of "C" or better is required for majors.

Misc/Lab: Lecture 1 hour/lab 6 hours.

Prerequisite(s): CHEM 55, CHEM 100W, CHEM 112B and CHEM 113B (with grades of "C" or better; "C-" not accepted).
Grading: Graded

CHEM 118 - Special Topics in Organic Chemistry

1 unit(s)
Introduction to a wide range of subjects typically missing from the traditional organic chemistry sequence (CHEM 112A and CHEM 112B, CHEM 113A and CHEM 113B). Consult schedule of classes for current offering(s).

Course may be repeated for credit for up to 2 units.

Prerequisite(s): CHEM 112B (with a grade of "C" or better; "C-" not accepted).
Grading: Graded

CHEM 120S - Chemical Safety Seminar

1 unit(s)
Safety protocol appropriate to working with hazardous chemicals. Physical nature of hazards, biological effects, permissible exposures, safety precaution techniques. OSHA requirements.

Prerequisite(s): College level chemistry course. Upper division standing.
Grading: Credit/No Credit

CHEM 121S - Radiation Safety

1-2 unit(s)
Health hazards involved in working with radioactive substances. Physical nature of hazards, biological effects, standards of permissible exposures, safety precautions and protection techniques. Two units meet State of California recommendations.

Prerequisite(s): Lower division calculus, chemistry and physics.
Grading: Graded

CHEM 126 - Introduction to Nuclear Science

3 unit(s)
Properties of the atomic nucleus. Applications of nuclear science in biology, chemistry, engineering, geology and physics.

Prerequisite(s): Lower division calculus, chemistry and physics.
Grading: Graded

CHEM 127 - Nuclear Science Lab
3 unit(s)
Basic techniques and procedures used in nuclear science. Nuclear decay, nuclear reactions, radiation detection and measurements, nuclear analytical methods and tracer techniques.

Misc/Lab: Lecture 1 hour/lab 6 hours.

Prerequisite(s): NUCS 121S, CHEM 100W and CHEM 126 (with grades of "C" or better; "C-" not accepted); or instructor consent.
Grading: ABC-/NC Grading

CHEM 130A - Biochemistry

4 unit(s)
Chemistry of amino acids, carbohydrates, lipids and nucleotides. Studies of protein structure and function, protein isolation, enzyme kinetics and enzyme mechanisms.

Prerequisite(s): CHEM 112B (with grades of "C" or better; "C-" not accepted).
Grading: Graded

Note(s): CHEM 130A and CHEM 135 cannot both be applied towards a chemistry major or a chemistry minor.

CHEM 130B - Biochemistry

4 unit(s)
Continuation of CHEM 130A, Concepts of bioenergetics; biochemical pathways of degradation and synthesis; metabolic regulation.

Prerequisite(s): CHEM 130A and BIOL 30 (with grades of "C" or better; "C-" not accepted).
Grading: Graded

CHEM 130C - Biochemistry

3 unit(s)
Advanced biochemical topics selected from the fields of immunology, physiology, molecular and cell biology.

Prerequisite(s): CHEM 130A and BIOL 30 (with grades of "C" or better; "C-" not accepted).
Grading: Graded

CHEM 131A - Biochemistry Lab

2 unit(s)
Fundamental qualitative and quantitative techniques and methodology in modern biochemistry.

Misc/Lab: Lab 6 hours.

Prerequisite(s): CHEM 55, CHEM 55L and CHEM 113A (with a grade of "C" or better; "C-" not accepted).
Pre/Corequisite(s): CHEM 130A.
Grading: Graded

CHEM 131B - Biochemistry Lab
CHEM 131A - Advanced Isolation Techniques and Enzyme Methodology

3 unit(s)
A capstone course on advanced isolation techniques and enzyme methodology. A continuation of CHEM 131A. A grade of "C" or better is required for majors.

Misc/Lab: Lecture 1 hour/lab 6 hours.

Satisfies SJSU Studies R: Earth & Environment

Prerequisite(s): CHEM 100W, CHEM 130A, CHEM 131A (with grades of "C" or better; "C-" not accepted).
Pre/Corequisite(s): CHEM 130B or CHEM 130C.
Grading: Graded

CHEM 132 - Introductory Biochemistry

4 unit(s)
Cellular and nutritional biochemistry for those who do not plan to continue in biochemistry, such as nutritional science and other science majors.

Prerequisite(s): CHEM 30B or CHEM 8 (with grades of "C" or better; "C-" not accepted).
Grading: Graded

Note(s): No credit toward Chemistry major or minor.

CHEM 132L - Introductory Biochemistry Lab

1 unit(s)
Lab work associated with chemistry of foods and nutrition, cellular metabolism, biomacromolecules, vitamins and the structure of carbohydrates, lipids, proteins and nucleic acids.

Misc/Lab: Lab 3 hours.

Prerequisite(s): CHEM 30B or CHEM 8 (with a grade of "C" or better, "C-" not accepted).
Pre/Corequisite(s): CHEM 132.
Grading: Graded

Note(s): No credit toward Chemistry major or minor.

CHEM 135 - General Biochemistry

4 unit(s)
Survey course on structure/function of biological molecules such as amino acids, proteins including enzymes, lipids/membranes, carbohydrates, and nucleic. Course topics include intermediary metabolism, regulation, and molecular biology.

Prerequisite(s): BIOL 30, CHEM 112A, CHEM 112B (with a grade of "C" or better; "C-" not accepted).
Grading: Graded

Note(s): CHEM 135 and CHEM 130A cannot both be applied toward a chemistry major or a chemistry minor.

CHEM 145 - Inorganic Chemistry

3 unit(s)
Development of unifying principles to understand the chemistry of the elements. An introduction to the chemistry,
bonding theories and applications of coordination compounds.

**Prerequisite(s):** CHEM 112B (with grade of "C" or better; "C-" not accepted).
**Corequisite(s):** CHEM 113A (with grade of "C" or better; "C-" not accepted).
**Grading:** Graded

**CHEM 146 - Physical-Inorganic Techniques**

3 unit(s)
Application of advanced instrumental and preparative techniques to the study of structure, reactivity and spectroscopy of inorganic and organic substances including materials. This is a capstone course. A grade of "C" or better is required for majors.

**Misc/Lab:** Lecture 1 hour/lab 6 hours.

**Prerequisite(s):** CHEM 100W, CHEM 101, CHEM 145, CHEM 161A (with grades of "C" or better; "C-" not accepted) or instructor consent.
**Pre/Corequisite(s):** CHEM 155
**Grading:** Graded

**CHEM 155 - Instrumental Analysis**

4 unit(s)
Principles and practices in the use of instrumental methods in chemical analysis. Basic physical chemistry necessary to understand the operation and limitations of the instruments.

**Misc/Lab:** Lecture 3 hours/lab 3 hours.

**Prerequisite(s):** CHEM 100W, CHEM 160 or CHEM 161A (with grades of "C" or better, "C-" not accepted).
**Grading:** Graded

**CHEM 159 - Advanced Analytical Chemistry**

1-2 unit(s)
A lecture and problem course which considers advanced topics in chemical analysis. Consult schedule of classes for current offering(s).

**Prerequisite(s):** Upper division standing or instructor consent.
**Grading:** Graded

**Note(s):** A total of 6 units may apply toward degree.

**CHEM 160 - Physical Chemistry**

4 unit(s)
Introduction to the fundamental principles of physical chemistry. Thermodynamics, kinetics, quantum mechanics and spectroscopy.

**Prerequisite(s):** CHEM 55, PHYS 2B, and MATH 30 or MATH 30X (all with grades of "C" or better; "C-" not accepted).
**Grading:** Graded
CHEM 161A - Physical Chemistry

3 unit(s)
Principles of classical physical chemistry. Chemical thermodynamics, kinetics and electrochemistry.

Prerequisite(s): CHEM 55 (or CHEM 1B and upper division standing for engineering majors), PHYS 50, and MATH 32 or MATH 32X (all with grades of "C" or better; "C-" not accepted).
Grading: Graded

CHEM 161B - Physical Chemistry

3 unit(s)
Principles of modern physical chemistry. Quantum chemistry, spectroscopy and statistical mechanics.

Prerequisite(s): CHEM 161A and PHYS 52 (with grades of "C" or better; "C-" not accepted). Upper division standing.
Grading: Graded

CHEM 162L - Physical Chemistry Lab

2 unit(s)
Physical chemical measurements with data analysis and written reports.

Misc/Lab: Lab 6 hours.

Prerequisite(s): CHEM 100W or ENGR 100W; CHEM 161A or CHEM 160 (all prerequisites with grades of "C" or better; "C-" not accepted).
Grading: Graded

Note(s): If using CHEM 161A as a prerequisite, it requires either CHEM 161B or CHE 158 as a co-requisite.

CHEM 170A - Foundations of Macromolecular Chemistry

1 unit(s)
Introduction to macromolecular, supramolecular, mesoscale and nanoscale systems and the principles that govern them including preparation, characterization and physical properties.

Prerequisite(s): CHEM 112B with grade of "C" or better (C- not accepted)
Grading: Graded

CHEM 172 - Chemistry of Wine

1 unit(s)
Introduction to chemistry of important components (organic acids, pigments, tannins, flavor constituents, etc.) of grape wine. Chemical changes that occur during fermentation, maturation and aging.

Prerequisite(s): CHEM 1B (with a grade of "C" or better; "C-" not accepted) or instructor consent.
Grading: Graded

CHEM 173 - Polymer Chemistry

3 unit(s)
Chemistry of polymeric substances, both natural and synthetic, emphasizing polymers of current interest.
Prerequisite(s): CHEM 112B (with a grade of "C" or better; "C-" not accepted) or instructor consent.

Grading: Graded

CHEM 180 - Individual Studies
1-4 unit(s)
Advanced supervised lab work. Work and results described in written and oral reports as required by instructor. An honors course.

Prerequisite(s): CHEM 120S, instructor consent and "B" average. Not available to Open University Students

Grading: Credit/No Credit

CHEM 184 - Directed Reading
1-3 unit(s)
Assigned readings of selected books, journals and papers to fill gaps in training or for contact with new fields. Regular conferences with instructor. Written report required. An honors course.

Prerequisite(s): Instructor consent and CHEM 55. Not available to Open University Students

Grading: Credit/No Credit

CHEM 190 - Introduction to Research
1 unit(s)
Supplemental course taken simultaneously with lower and upper division chemistry lecture courses. Foundational techniques for doing research. Preparation and active participation expected.

Grading: Graded

CHEM 191 - Undergraduate Seminar
0.5 unit(s)
Problem solving and presentation of topics within specialized sub-areas of chemistry by students, faculty and guests. A total of 2 units may be repeated.

Course may be repeated for credit for up to 2 units.

Prerequisite(s): CHEM 1B.

Grading: Credit/No Credit

CHEM 192 - Int'l Program Studies
1-6 unit(s)

Grading: Mixed Grading

CHEM 199 - Senior Thesis or Project
1 unit(s)

Prerequisite(s): Minimum of 2 units of CHEM 180 or CHEM 184, instructor consent and CHEM 100W. Not available to Open University Students

Grading: Credit/No Credit
CHEM 201 - Graduate Studies in Chemistry

1 unit(s)
Principles and topics in contemporary chemical research. Open to senior undergraduates with instructor consent.

**Grading:** Credit/No Credit

CHEM 212 - Natural Products

3 unit(s)
Topics from the structure proof, synthesis and biosynthesis of secondary metabolites.

**Prerequisite(s):** CHEM 114 (or equivalent with a grade of "C" or better; "C-" not accepted) or other advanced organic course.

**Grading:** Graded

**Note(s):** Alternate years.

CHEM 213 - Organic Synthesis

3 unit(s)
Synthetic methods and their application to multistep organic syntheses. Emphasis will be placed on synthetic strategy and a mechanistic understanding of synthetic reactions.

**Prerequisite(s):** CHEM 112B (or equivalent with a grade of "C" or better; "C-" not accepted). Alternate years 3 units.

**Grading:** Graded

CHEM 216 - Physical Organic Chemistry

3 unit(s)
Application of molecular orbital theory to organic chemistry and related topics.

**Prerequisite(s):** CHEM 112B and CHEM 161B (or equivalents with grades of "C" or better; "C-" not accepted).

**Grading:** Graded

**Note(s):** Alternate years.

CHEM 218 - Organotransition Metal Chemistry

3 unit(s)
Structure and reaction chemistry of compounds which contain transition metal-carbon bonds. Applications to catalytic processes and to organic synthesis.

**Prerequisite(s):** CHEM 112B and CHEM 145 (or equivalents with grades of "C" or better; "C-" not accepted) or instructor consent.

**Grading:** Graded

**Note(s):** Alternate years.

CHEM 231 - Advanced Biochemistry
3 unit(s)
Chemistry of the amino acids, peptides and proteins, the chemistry of enzyme action and introduction to the metabolism of amino acids and related compounds.

**Prerequisite(s):** CHEM 130B or CHEM 135 (or equivalent with a grade of "C" or better; "C-" not accepted).

**Grading:** Graded

**Note(s):** Alternate years.

**CHEM 232 - Nucleic Acids**

3 unit(s)
Topics include structural features of DNA and RNA, protein-DNA or RNA interactions, chemical and enzymatic basis for gene expression, and recombinant DNA methods.

**Prerequisite(s):** CHEM 130C or CHEM 135 (or equivalent with a grade of "C" or better; "C-" not accepted).

**Grading:** Graded

**Note(s):** Alternate years.

**CHEM 234 - Enzymology**

3 unit(s)
Enzyme structure, function, classification, isolation and methodology, mechanisms, theory of catalysis, enzyme kinetics, pH effects, allosterism and regulation.

**Prerequisite(s):** CHEM 130B or CHEM 135 (or equivalent with a grade of "C" or better; "C-" not accepted).

**Grading:** Graded

**Note(s):** Alternate years.

**CHEM 236 - Biophysical Methods**

3 unit(s)
Advanced lectures on theory and methodology of biophysical measurements. Topics selected from spectroscopic, electromigration and hydrodynamic methods. Practice, limitations and data reduction procedures for each method examined.

**Prerequisite(s):** CHEM 130A or CHEM 135 (or equivalent with a grade of "C" or better; "C-" not accepted) or instructor consent.

**Grading:** Graded

**Note(s):** Alternate years.

**CHEM 237 - Bioinorganic Chemistry**

3 unit(s)
Provides an in-depth survey of the frontiers of bioinorganic chemistry from both biochemical and synthetic inorganic chemistry perspectives.

**Prerequisite(s):** CHEM 130A (or equivalent with a grade of "C" or better; "C-" not accepted) or instructor consent.

**Grading:** Graded
Note(s): Alternate years.

CHEM 245 - Advanced Inorganic Chemistry

3 unit(s)
Advanced topics of current interest in inorganic chemistry.

Prerequisite(s): CHEM 145 (or equivalent with grade of "C" or better; "C-" not accepted).
Grading: Graded

Note(s): Alternate years.

CHEM 250 - Current Topics in Analytical Chemistry

3 unit(s)
Lecture, discussion and reading assignments on special topics in analytical chemistry. Topics vary each semester. Course may be repeated for credit for different topics.

Prerequisite(s): CHEM 155 (or equivalent with a grade of "C" or better; "C-" not accepted).
Grading: Graded

CHEM 264 - Chemical Applications of Group Theory

3 unit(s)
The application of group theoretical principles to problems in quantum chemistry, molecular structure, spectroscopy and ligand field theory.

Prerequisite(s): CHEM 161B (or equivalent with grade of "C" or better; "C-" not accepted) or instructor consent.
Grading: Graded

Note(s): Alternate years.

CHEM 265 - Molecular Spectroscopy

3 unit(s)

Prerequisite(s): CHEM 161B (or equivalent with grade of "C" or better; "C-" not accepted).
Grading: Graded

Note(s): Alternate years.

CHEM 268 - Laser Spectroscopy

3 unit(s)
Importance of spectroscopy. Interaction of radiation with matter. Instrumentation for laser spectroscopy. Examples of various techniques, cw and pulsed.

Prerequisite(s): PHYS 110B, PHYS 158 or instructor consent.
Grading: Graded
CHEM 270 - Advanced Chemistry

1-5 unit(s)
Lectures, discussions and reading assignments in special fields of chemistry. Topics vary. Course may be repeatable for maximum of 10 units.

Course may be repeated for credit for up to 10 units.

Prerequisite(s): Satisfactory background in upper division chemistry and instructor consent.
Grading: Graded

CHEM 270L - Advanced Chemistry Laboratory

1-3 unit(s)
Advanced laboratory assignments in special fields of chemistry. Topics vary. Maximum of 4 units may be repeatable.

Course may be repeated for credit for up to 4 units.

Prerequisite(s): Satisfactory background in upper division chemistry, CHEM 120S and instructor consent.
Grading: Graded

CHEM 276 - Physical Polymer Chemistry

3 unit(s)
Techniques for characterizing molecular weights of polymers, their distribution functions, polymer chain statistics and solution thermodynamics.

Prerequisite(s): Satisfactory background in upper division chemistry or materials science or instructor consent.
Grading: Graded

Note(s): Alternate years.

CHEM 285 - Seminar

0.5 unit(s)
Presentation of chemical topics by graduate students, faculty and guests. A maximum of 3 units may be repeated.

Course may be repeated for credit for up to 3 units.

Grading: Graded

CHEM 291 - Divisional Seminar

0.5 unit(s)
Problem solving and presentation of topics in chemistry by graduate students, faculty and guests. A maximum of 1 unit may be repeated.

Course may be repeated for credit for up to 1 units.

Grading: Credit/No Credit

CHEM 293 - Applied Bioinformatics
3 unit(s)
Bioinformatics theory and applications including sequence search, proteomics, molecular modeling, and combinatorial chemistry. Students will work in teams and be guided in independent inquiry to solve practical bioinformatics problems.

Prerequisite(s): Senior or graduate standing in engineering or science.
Grading: Graded

CHEM 297 - MA Special Study

1-3 unit(s)
Supervised individual MA project. Maximum of 12 unit may be repeated.

Course may be repeated for credit for up to 12 units.

Pre/Corequisite(s): CHEM 201 and instructor consent. Not available to Open University Students
Grading: Credit/No Credit

CHEM 298 - Research

1-6 unit(s)
Supervised individual laboratory work or directed chemical field studies for the student with adequate preparation. Maximum of 12 unit may be repeated.

Course may be repeated for credit for up to 12 units.

Pre/Corequisite(s): CHEM 120S, CHEM 201 and instructor consent. Not available to Open University Students
Grading: Mandatory CR/NC/RP

CHEM 299 - Master's Thesis

1-6 unit(s)
Maximum of 6 unit may be repeated.

Course may be repeated for credit for up to 6 units.

Prerequisite(s): CHEM 298, instructor consent and admission to candidacy for the master's degree. Not available to Open University Students
Grading: Mandatory CR/NC/RP

Note(s): 1-2 units per semester.

CHEM 1290R - Culminating Experience Supervision

1 unit(s)
Continued work on thesis or project.

Course may be repeated for credit for up to 16 units.

Prerequisite(s): Outstanding RP grade in a preceding semester in CHEM 299, Master's Thesis
Grading: CR/NC, No Degree Credit

Note(s): No Degree Credit.
NUCS 121S - Radiation Safety

1-2 unit(s)
Health hazards involved in working with radioactive substances. Physical nature of hazards, biological effects, standards of permissible exposures, safety precautions and protection techniques. Two units meet State of California recommendations.

Prerequisite(s): Lower division calculus, chemistry and physics.
Grading: Graded

NUCS 126 - Introduction to Nuclear Science

3 unit(s)
Properties of the atomic nucleus. Applications of nuclear science in biology, chemistry, engineering, geology and physics.

Prerequisite(s): Lower division calculus, chemistry and physics.
Grading: Graded

NUCS 127 - Nuclear Science Lab

3 unit(s)
Basic techniques and procedures used in nuclear science. Nuclear decay, nuclear reactions, radiation detection and measurements, nuclear analytical methods and tracer techniques.

Misc/Lab: Lecture 1 hour/lab 6 hours.

Prerequisite(s): NUCS 121S, CHEM 100W and CHEM 126 (with grades of "C" or better; "C-" not accepted); or instructor consent.
Grading: ABC-/NC Grading

NUCS 298 - Research

1-6 unit(s)
Directed individual laboratory work or field studies in radiological health physics and nuclear science for students with adequate preparation. A maximum of 8 units may be repeated.

Course may be repeated for credit for up to 8 units.

Prerequisite(s): Instructor consent.
Grading: Mandatory CR/NC/RP

NUCS 299 - Master's Thesis

2-4 unit(s)
Prerequisite(s): NUCS 298, instructor consent and admission to candidacy for the master's degree.
Grading: Mandatory CR/NC/RP

Overview

Computer science is all about algorithms: inventing, testing, debugging and improving algorithms that might control a robot's brain, encrypt a stock trade, even simulate an ecosystem. Our bachelor's degree, accredited by the Computing Accreditation Commission of ABET, www.abet.org, provides a solid foundation in the basic theories that underpin computer software technology. For those who wish to pursue more advanced studies, our master's degree program offers convenient late afternoon and evening classes. Our prime Silicon Valley location fosters high-tech employment opportunities for our graduates, who currently make up a significant portion of the area's programmers, software architects, system analysts and computer scientists.

Honors Program

The requirements for computer science majors to graduate with departmental honors are: (1) at least a 3.0 G.P.A. overall, (2) at least a 3.5 G.P.A. in the major, (3) Completion of CS 180H - Individual Studies for Honors.
Minimum Grade Requirement

A grade of "C-" or better is required for courses being used to meet any requirement in any minor or major offered by the Department of Computer Science, including support courses.

Undergraduate

Computer Science, BS

This degree, offered by the Department of Computer Science, provides a solid background for a variety of careers in the computing profession. Entry level positions include jobs in programming, systems analysis, software engineering and customer support. Such positions are required by nearly every institution whether it is public or private. The Computer Science Program is accredited by the Computing Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET), 111 Market Place, Suite 1050, Baltimore, MD, 21202-4012, 410.347.7700. The program not only prepares students for graduate work in computer science, but also for advanced work in the related fields of management science and operations research.

• Program Learning Outcomes

Summary of Degree Units

University Graduation Requirements 44

Major Preparation 24

Major Requirements 52

Total 120

University Requirements for Graduation

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Undergraduate Graduation Requirements section of the Policies and Procedures.

Program Roadmaps

The 4-Year Roadmap is available online. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Degrees (ADT) Pathways are also available online.

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the General Education (GE) section to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

A grade of "C-" or better is required for courses being used to meet any requirement in any minor or major offered by the Department of Computer Science, including Preparation courses.

The Preparation for the Major and Requirements in the Major sections must include at least 37 units of upper division mathematics and computer science course work, excluding CS 100W.
General Education/American Institution Requirements

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

University Requirements (44 units)

Core Lower Division General Education (21 units)

Of the 39 units required by the university, 18 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

Note: Students who have completed the ADT Transfer degree (under SB 1440) for this major will have completed all lower division GE requirements and should follow the 60 unit guarantee roadmap. Meet with an advisor prior to registering for your first semester for the 60 unit roadmap or specific questions.

Upper Division General Education (6 units)

Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions (12 units)

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B, HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

- AMS 1A - American Cultures to 1877 6 unit(s) (M4)
- AMS 1B - American Cultures 1877 to present 6 unit(s) (M5)

Physical Education (2 units)

Graduation Writing Assessment Requirement (3 units)

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

- CS 100W - Technical Writing Workshop 3 unit(s) (Z)

Major Preparation (24 units)

For additional information, please see: www.sjsu.edu/cs/practicalities/science-requirements.

- MATH 30 - Calculus I 3 unit(s) (B4) (MATH 30X & MATH 30W (5-units) may be used in place of MATH 30.)
- MATH 31 - Calculus II 4 unit(s) (B4)
- MATH 42 - Discrete Mathematics 3 unit(s)
- MATH 39 - Linear Algebra I 3 unit(s)
- PHIL 134 - Computers, Ethics and Society 3 unit(s) (V)
- Approved Science Electives 5 unit(s)

Approved Science Electives

Approved science electives include

- BIOL 30 - Principles of Biology I 4 unit(s)
- BIOL 31 - Principles of Biology II 4 unit(s)
- CHEM 1A - General Chemistry 5 unit(s)
- GEOL 1 - General Geology 4 unit(s)
- GEOL 4L - Earth Systems Lab 1 unit(s)
- GEOL 7 - Earth, Time and Life 4 unit(s)
- METR 10 - Weather and Climate 3 unit(s)
- PHYS 50 - General Physics/Mechanics 4 unit(s)
- PHYS 51 - General Physics/Electricity and Magnetism 4 unit(s)
- Nine additional units of GE courses covering GE areas B1, B2, B3 and R are required.

Complete One Course From:

- MATH 32 - Calculus III 3 unit(s) (B4)
- MATH 142 - Introduction to Combinatorics 3 unit(s)
- MATH 161A - Applied Probability and Statistics I 3 unit(s)

Major Requirements (52 units)

Lower Division (11 units)

- CS 46A - Introduction to Programming 4 unit(s)
- CS 46B - Introduction to Data Structures 4 unit(s)
- CS 47 - Introduction to Computer Systems 3 unit(s)

Upper Division (24 units)

- CS 146 - Data Structures and Algorithms 3 unit(s)
- CS 147 - Computer Architecture 3 unit(s)
- CS 149 - Operating Systems 3 unit(s)
- CS 151 - Object-Oriented Design 3 unit(s)
- CS 152 - Programming Paradigms 3 unit(s)
- CS 154 - Formal Languages and Computability 3 unit(s)
- CS 160 - Software Engineering 3 unit(s)

Complete One Course From:
- CS 116B - Computer Graphics Algorithms 3 unit(s)
- CS 123B - Bioinformatics II 3 unit(s)
- CS 153 - Concepts of Compiler Design 3 unit(s)
- CS 157B - Database Management Systems II 3 unit(s)
- CS 157C - NoSQL Database Systems 3 unit(s)
- CS 158B - Computer Network Management 3 unit(s)
- CS 161 - Software Project 3 unit(s)

**Elective Computer Science Courses Not Counted Above (17 units)**

At least two courses should be chosen from the following list of electives:

*Qualifying courses include all upper division CS courses except CS 100W and courses counted below.*

- CS 116A - Introduction to Computer Graphics 3 unit(s)
- CS 116B - Computer Graphics Algorithms 3 unit(s)
- CS 122 - Advanced Programming with Python 3 unit(s)
- CS 123A - Bioinformatics I 3 unit(s)
- CS 123B - Bioinformatics II 3 unit(s)
- CS 134 - Computer Game Design and Programming 3 unit(s)
- CS 144 - Advanced C++ Programming 3 unit(s)
- CS 153 - Concepts of Compiler Design 3 unit(s)
- CS 155 - Introduction to the Design and Analysis of Algorithms 3 unit(s)
- CS 156 - Introduction to Artificial Intelligence 3 unit(s)
- CS 157A - Introduction to Database Management Systems 3 unit(s)
- CS 157B - Database Management Systems II 3 unit(s)
- CS 157C - NoSQL Database Systems 3 unit(s)
- CS 158A - Computer Networks 3 unit(s)
- CS 158B - Computer Network Management 3 unit(s)
- CS 159 - Introduction to Parallel Processing 3 unit(s)
- CS 161 - Software Project 3 unit(s)
- CS 166 - Information Security 3 unit(s)
- CS 174 - Server-side Web Programming 3 unit(s)
- CS 175 - Mobile Device Development 3 unit(s)
- CS 190I - Internship Project 3 unit(s)
  or
- CS 190 - Internship Project 1 unit(s) (at most 3 units of may be used)

- CS 85C - Practical Computing Topics 3 unit(s) (at most 3 units may be used)
- CS 185C - Advanced Practical Computing Topics 3 unit(s) (at most 3 units may be used)
- CS 180 - Individual Studies 1-3 unit(s) (may be used with prior approval)
- CS 180H - Individual Studies for Honors 3 unit(s) (may be used with prior approval)
- MATH 203 - Applied Mathematics, Computation, and Statistics Projects 3 unit(s) (may be used with prior approval)

**Qualifying Lower Division CS Courses Include:**
(CS 85C requires prior department approval. CS 49C and CS 49J can be used with department approval.)

- CS 85C - Practical Computing Topics 3 unit(s)

Qualifying Math Courses Include:

- MATH 142 - Introduction to Combinatorics 3 unit(s)
- MATH 161A - Applied Probability and Statistics I 3 unit(s)
- MATH 162 - Statistics for Bioinformatics 3 unit(s)
- MATH 177 - Linear and Non-Linear Optimization 3 unit(s)
- MATH 178 - Mathematical Modeling 3 unit(s)
- MATH 179 - Introduction to Graph Theory 3 unit(s)
- MATH 203 - Applied Mathematics, Computation, and Statistics Projects 3 unit(s)

Total Units Required (120 units)

Master

Bioinformatics, MS

The MS Bioinformatics, offered by the Department of Computer Science, features an interdisciplinary curriculum in bioinformatics, biology, computer science and mathematics. Questions in many areas of biology, including genomics, molecular biology, neuroscience, physiology, microbiology, ecology and evolution, must now be answered using mathematical and computational methods. New techniques allow the acquisitions of many thousands or millions of biological measurements, and the field of bioinformatics has developed to address this need. The MS Bioinformatics program will provide students with an understanding of biological questions, a background in mathematics, and the computational skills necessary to address complex problems in the biological sciences. Students will also gain experience utilizing these skills to answer biological questions, including those with biomedical applications. The goal of the MS in Bioinformatics program is to prepare students for careers in the growing field of bioinformatics both in academia and in the biotechnology industry.

For more information, please visit www.sjsu.edu/cs/programs/ms_bioinformatics.

Admissions Requirements

University Admission

Candidates must apply through the CSU admissions portal, Cal State Apply, and meet all university admissions requirements. Applicants will need to apply separately to the university to obtain approval for university-level admission and to the department to obtain admission into the MS in Bioinformatics.

Applicants from countries in which the native language is not English or from countries with multiple native languages including English, must submit TOEFL scores. Minimum TOEFL scores acceptable for admission are 250 (Computer Based), 100 (Internet Based). Additional information about the TOEFL is given on the university webpage: Graduate Program Test Requirement.
Admission to the Program

Candidates must meet all the university admission requirements. Students can be admitted in either classified or conditionally classified standing. To be admitted to classified standing, applicants must have a Bachelor's degree from an accredited college or university in the biological or computational sciences or in engineering, a minimum GPA of 3.0 on a 4.0 scale, and completion of all program prerequisites listed on the admission requirements webpage. Two letters of recommendation from academic instructors or advisors are also required. Currently, GRE exam results are not required.

To enter this program with classified standing, a student must have a minimum 3.0 GPA in the last 60 units of required degree course work and have completed each of the following courses with a grade of "C" or better:

- BIOL 30 - Principles of Biology I (4 units)
- BIOL 31 - Principles of Biology II (4 units)
- BIOL 115 - General Genetics (4 units)
- CS 22A - Python Programming for Non Majors I (3 units)
- CS 22B - Python Programming for Non Majors II (3 units)
- MATH 30 - Calculus I (3 units)
- MATH 31 - Calculus II (4 units)
- MATH 161A - Applied Probability and Statistics I (3 units)
- or equivalent courses

Students who meet the minimum university admission requirements can be conditionally classified if there is sufficient space in the program to accommodate them. Conditionally classified students will be required to complete undergraduate course work and prerequisite coursework (listed in "Requirements for Admission to Classified Standing"), as directed by the graduate coordinators.

Requirements for Advancement to Candidacy

To be admitted to candidacy for the MS degree, a student must meet the university requirements for advancement to candidacy for the master's degree as outlined in the Graduate Policies and Procedures section. University requirements include completion of 9 letter-graded units with a GPA of at least 3.0 and satisfaction of the Graduation Writing Assessment Requirement (GWAR). The GWAR is met in this program by a "B" grade in CS 200W.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). This requirement is satisfied by taking CS 200W.
Culminating Experience

Plan B (Project)

MS in Bioinformatics students will complete a written project as their culminating project. The project requires two consecutive semesters of enrollment in the 3-unit BIOL 298, CS 298B or MATH 298. Students not completing the project in one semester will be required to enroll in three additional units each semester until the project is completed. The student is responsible for identifying a project topic and for securing the commitment of a full-time tenured or tenure-track faculty member who agrees to serve as the project advisor. The student must also secure the commitments of two additional university faculty members, one of whom must be a full-time tenured or tenure-track faculty member, to serve as the student’s project committee. Topics and committee selections must be approved by the Bioinformatics Graduate Coordinator. The project requires writing a manuscript describing original bioinformatics research and formatted for publication in a professional journal. It must be approved by the student’s committee.

Master’s Requirements (31 units)

Core Courses (19 units)

- BIOL 123A - Bioinformatics I 3 unit(s)
- BIOL 123B - Bioinformatics II 3 unit(s)
- BIOL 205 - Advanced Molecular Techniques 4 unit(s)
- CS 200W - Graduate Technical Writing 3 unit(s) (GWAR)
- CS 223 - Bioinformatics 3 unit(s)
- MATH 162 - Statistics for Bioinformatics 3 unit(s)

Electives (9 units)

At least 6 units must be graduate level

- BIOL 135A - Eukaryotic Cell and Molecular Biology I 3 unit(s)
- BIOL 135B - Eukaryotic Cell and Molecular Biology II 3 unit(s) (R)
- BIOL 215 - Seminar in Advanced Genetics 3 unit(s)
- BIOL 298 - MS Project Culminating Experience 1 unit(s) (3 units required)
- CHE 293 - Applied Bioinformatics 3 unit(s)
- CS 122 - Advanced Programming with Python 3 unit(s)
- CS 255 - Design and Analysis of Algorithms 3 unit(s)
- CS 256 - Topics in Artificial Intelligence 3 unit(s)
- CS 257 - Database System Principles 3 unit(s)
- CS 267 - Topics in Database Systems 3 unit(s)
- CS 280 - Graduate Individual Studies 1-3 unit(s)
- MATH 39 - Linear Algebra I 3 unit(s)
- MATH 161B - Applied Probability and Statistics II 3 unit(s)
- MATH 163 - Probability Theory 3 unit(s)
- MATH 267A - Statistical Programming with R 3 unit(s)
- MATH 298 - Special Study 1-4 unit(s) (3 units required)
- 100- or 200-level courses chosen with advisor consent
Culminating Experience (3 units)

3 units of one of the following courses selected in consultation with the graduate advisor:

- BIOL 298 - MS Project Culminating Experience 1 unit(s)
- CS 298B - Bioinformatics Master's Project 3 unit(s) (1-3 units required)
- MATH 298 - Special Study 1-4 unit(s) (3 units required)

Total Units Required (31 units)

Elective courses must be planned in consultation with one of the Graduate Coordinators.

The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 12.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of at least 3.0 in order to graduate.

Computer Science, MS

The Master of Science in Computer Science degree, offered by the Department of Computer Science, provides greater depth in computer science for more advanced positions in industry or teaching at the community college level. Check the Department website for details at www.sjsu.edu/cs/programs/mscs.

Admissions Requirements

University Admissions

Applicants must submit a complete graduate application by applying through Cal State Apply and meet all the university admission requirements. Applicants apply separately to the department to obtain admission into the Computer Science program. See the GAPE Graduate Admissions website and this Catalog for general information about graduate admissions at SJSU.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirement webpage at GAPE. For TOEFL Requirements, see the Policies and Procedures section, Graduate and Post-Baccalaureate Information in this Catalog.

Requirements for Admission to Classified Standing

To enter this program with classified standing, a student must meet the minimum requirements for admission to the Graduate Division. In addition, entering students are expected to have a bachelor's degree in computer science or its equivalent, e.g., a degree presenting at least the breadth and depth of the SJSU BS, Computer Science program. An applicant holding a recent bachelor's degree in Computer Science from an ABET-accredited university will normally meet the course requirements for admission to the MSCS program.
Requirements for Admission to Conditionally Classified Standing

Applicants who meet the minimum requirements for admission to the Graduate Division but lack other prerequisite course knowledge can be admitted in conditionally classified status if there is sufficient space in the program to accommodate them. Conditionally classified students will be required to complete undergraduate coursework to attain Classified standing. The individual admission notification will explain the required terms and conditions for attaining Classified standing.

Transfer of Courses into the Major

Students may transfer nine credits into the program from coursework completed in the SJSU Computer Science Department. A maximum of 6 units may be from courses outside the SJSU Computer Science Department. All transfer credit must fulfill MS, Computer Science program requirements and be approved by the Graduate Coordinator.

Requirements for Advancement to Graduate Candidacy

The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. The Computer Science Department policy is that students should complete the GWAR requirement (usually by taking CS 200W) in their first year in the MS program and must complete it two semesters before graduation. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

This requirement is satisfied by taking CS 200W.

Culminating Experience

Students choose a Plan A (Thesis) or Plan B (Written Project) option as their program culminating experience.
Plan A (Thesis)

After being admitted to candidacy, the student choosing the thesis option must obtain a thesis director from among the tenured or tenure-track faculty of the Computer Science Department who then becomes his or her advisor. Before work can begin, the thesis topic must be approved by a three-member committee consisting of the thesis director, another professor from the CS Department, and a third member who is an expert in the field, selected by the thesis director and approved by the Department Chairperson. The candidate should register for the CS 297 - Preparation for Writing Project or Thesis before the final semester, and take CS 299 - Master's Thesis in the final semester of the program. Students who do not finish the thesis in that semester enroll in the 1290R for subsequent semesters until it is completed. Upon completion of the thesis, the candidate must pass a comprehensive oral examination in the area of his or her thesis, conducted by the thesis committee. The thesis must also meet university requirements as stipulated in this catalog and in the SJSU Master's Thesis and Doctoral Dissertation Guidelines.

Plan B (Written Project)

After being admitted to candidacy, the student must obtain a project director from the Computer Science Department who then becomes his or her advisor. Before work can begin, the project topic must be approved by a three-member committee consisting of the project director, another professor from the CS Department, and a third member who is an expert in the field, selected by the thesis director and approved by the Department Chairperson. The candidate should register for the CS 297 - Preparation for Writing Project or Thesis before the final semester, and take the CS 298 - Master's Writing Project in the final semester of the program. Students who do not finish the project in that semester enroll in the 1290R for subsequent semesters until it is completed. Upon completion of the project, the candidate must pass an oral examination in the area of his or her project conducted by the project committee.

Masters Requirements (33 units)

Core Courses (21 units)

- CS 200W - Graduate Technical Writing 3 unit(s) (GWAR)

Foundations (3 units)

Choose one of the following foundations courses:
- CS 252 - Advanced Programming Language Principles 3 unit(s)
- CS 254 - Theory of Computation 3 unit(s)
- CS 255 - Design and Analysis of Algorithms 3 unit(s)
- CS 262 - Randomized Algorithms and Applications 3 unit(s)
- MATH 279A - Graph Theory 3 unit(s)

Architecture (3 units)

Choose one of the following architecture courses:
- CS 247 - Advanced Computer Architecture 3 unit(s)
- CS 258 - Computer Communication Systems 3 unit(s)
- CS 259 - Advanced Parallel Processing 3 unit(s)
- CS 268 - Topics in Wireless Mobile Networking 3 unit(s)

Systems Software (3 units)

Choose one of the following systems software courses:
• CS 218 - Topics in Cloud Computing 3 unit(s)
• CS 249 - Distributed Computing 3 unit(s)
• CS 253 - Advanced Compiler Design 3 unit(s)
• CS 257 - Database System Principles 3 unit(s)
• CS 267 - Topics in Database Systems 3 unit(s)

Specialty Courses (9 units)

Select nine units of 200-level computer science courses from the foundations, architecture or systems software classes above or from the following list:

*Variable topic courses may be repeated for up to 6 units.*

• CS 216 - Geometric Modeling 3 unit(s)
• CS 223 - Bioinformatics 3 unit(s)
• MATH 243A - Numerical Solution of PDEs 3 unit(s)
• CS 243B - Advanced Topics in Numerical Analysis 3 unit(s)
• CS 256 - Topics in Artificial Intelligence 3 unit(s)
• CS 265 - Cryptography and Computer Security 3 unit(s)
• CS 266 - Topics in Information Security 3 unit(s)
• CS 271 - Topics in Machine Learning 3 unit(s)
• CS 274 - Topics in Web Intelligence 3 unit(s)
• CS 286 - Advanced Topics in Computer Science 3 unit(s)

Electives (6 units)

Select 6 units of permissible elective courses from the department list. Courses not on the list must be approved in advance by a graduate coordinator.

Electives may include three units from:

• CS 180 - Individual Studies 1-3 unit(s)
• CS 280 - Graduate Individual Studies 1-3 unit(s)

Culminating Experience (6 units)

Complete One Option (Plan A or Plan B)

Plan A (Thesis) (6 units)

• CS 297 - Preparation for Writing Project or Thesis 3 unit(s)
• CS 299 - Master's Thesis 3 unit(s)
• Comprehensive Oral Examination

Plan B (Project) (6 units)

• CS 297 - Preparation for Writing Project or Thesis 3 unit(s)
• CS 298 - Master's Writing Project 3 unit(s)
• Comprehensive Oral Examination

Total Units Required (33 units)

No more than 6 units may be taken from outside the Department of Computer Science.

Elective courses must be planned in consultation with a CS Graduate Advisor or your CS Thesis or CS Writing Project advisor.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

Certificate

Cybersecurity: Core Technologies Certificate (Graduate)

The Computer Science Department offers a 9-unit advanced (graduate) certificate program to students to advance knowledge of cyber security. The program aligns with nationally defined knowledge areas and prepares students to become a professional in cyber security and information assurance.

Certificate Core

With the permission, CS 158A may be substituted for one regular CS course that lists CS 158A as a prerequisite (including CS 158B, CS 258, and CS 268).

• CS 158A - Computer Networks 3 unit(s)
• CS 265 - Cryptography and Computer Security 3 unit(s)
• CS 266 - Topics in Information Security 3 unit(s)

Total Units Required (9 units)

Fundamentals of Cybersecurity Certificate (Graduate)

The certificate program aligns with the nationally defined knowledge areas in cyber security and information assurance, and prepares students with well-grounded fundamentals to become a professional in these areas.

Core Requirements (18 units)

• CS 146 - Data Structures and Algorithms 3 unit(s)
• CS 149 - Operating Systems 3 unit(s)
• CS 157A - Introduction to Database Management Systems 3 unit(s)
• CS 158B - Computer Network Management 3 unit(s)
• CS 166 - Information Security 3 unit(s)

Complete One Course From:
CS 158A - Computer Networks 3 unit(s)
CMPE 148 - Computer Networks I 3 unit(s)

Total Units Required (18 units)

**Minor**

**Computer Science Minor**

At least 12 of units must be distinct from the student's major. At least three units of upper division course work must be completed in the Computer Science Department at SJSU. Students are expected to have satisfied the prerequisites for any of the courses taken to fulfill the requirements for the Computer Science Minor. A grade of "C-" or better is required for courses being used to meet any requirement in the minor.

**University Graduation Requirements**

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

**Minor Preparation (3 units)**

- MATH 42 - Discrete Mathematics 3 unit(s)

**Minor Requirements (17 units)**

**Lower Division (8 units)**

- CS 46A - Introduction to Programming 4 unit(s)
- CS 46B - Introduction to Data Structures 4 unit(s)

**Upper or Lower Division Elective (3 units)**

Complete one course from:

- MATH 30 - Calculus I 3 unit(s) (B4)
- CS 47 - Introduction to Computer Systems 3 unit(s)
- CS 49C - Programming in C 3 unit(s) (Or any permitted Upper Division Elective)

**Upper Division Electives (6 units)**

Complete six units from:

- CS 116A - Introduction to Computer Graphics 3 unit(s)
- CS 116B - Computer Graphics Algorithms 3 unit(s)
- CS 122 - Advanced Programming with Python 3 unit(s)
- CS 123A - Bioinformatics I 3 unit(s)
- CS 123B - Bioinformatics II 3 unit(s)
- CS 134 - Computer Game Design and Programming 3 unit(s)
- CS 143C - Numerical Analysis and Scientific Computing 3 unit(s)
- CS 143M - Numerical Analysis and Scientific Computing 3 unit(s)
- CS 144 - Advanced C++ Programming 3 unit(s)
- CS 146 - Data Structures and Algorithms 3 unit(s)
- CS 147 - Computer Architecture 3 unit(s)
- CS 149 - Operating Systems 3 unit(s)
- CS 151 - Object-Oriented Design 3 unit(s)
- CS 152 - Programming Paradigms 3 unit(s)
- CS 153 - Concepts of Compiler Design 3 unit(s)
- CS 154 - Formal Languages and Computability 3 unit(s)
- CS 155 - Introduction to the Design and Analysis of Algorithms 3 unit(s)
- CS 156 - Introduction to Artificial Intelligence 3 unit(s)
- CS 157A - Introduction to Database Management Systems 3 unit(s)
- CS 157B - Database Management Systems II 3 unit(s)
- CS 157C - NoSQL Database Systems 3 unit(s)
- CS 158A - Computer Networks 3 unit(s)
- CS 158B - Computer Network Management 3 unit(s)
- CS 159 - Introduction to Parallel Processing 3 unit(s)
- CS 160 - Software Engineering 3 unit(s)
- CS 166 - Information Security 3 unit(s)
- CS 174 - Server-side Web Programming 3 unit(s)
- CS 175 - Mobile Device Development 3 unit(s)

**Total Units Required (20 units)**

**CS 22A - Python Programming for Non Majors I**

3 unit(s)
Introduction to Python programming in interesting, relevant, and practical contexts. Programming skills are developed to solve problems in such fields as life sciences, mathematics, and business. Fundamental programming constructs: data structures and algorithms, iterations, and functions.

**Prerequisite(s):** Course is intended for students who have no prior programming experience. Course is not open to computer science majors or minors or software engineering majors.

**Grading:** Graded

**CS 22B - Python Programming for Non Majors II**

3 unit(s)
Hands-on Python programming skills. Skills include casting a problem as an algorithm, translating an algorithm to executable code, and debugging and testing code. Applications focus on computational techniques to understand, analyze, and visualize data.

**Prerequisite(s):** CS 22A or consent of the instructor. This course is not open to computer science majors or minors or software engineering majors.

**Grading:** Graded

**CS 25 - The Digital World and Society**
The secure, effective and ethical use of information technology. The effect of such technology on people and institutions. Technology-related challenges to society and policy. Frameworks for the analysis of information technology with respect to its cultural, historical, environmental, and spatial contexts.

**Satisfies D1: Human Behavior**

**Grading:** Graded

**CS 40 - Introduction to Computers**

3 unit(s)
For students with little or no computer experience. Topics include: history of computing, user interfaces, computer applications, programming, hardware and software, computer networks.

**Grading:** Graded

**CS 42 - Discrete Mathematics**

3 unit(s)
Sets, logic, methods of proof including mathematical induction, functions, relations, elementary combinatorics, probability, Boolean algebras.

**Prerequisite(s):** Math Enrollment Category M-I or M-II and satisfactory score on the Precalculus Proficiency Assessment; MATH 19 with a grade of "B" or better to waive the exam; or MATH 18A and MATH 18B, with a grade of "B" or better in each to waive the exam.

**Grading:** Graded

**Note(s):** Students who are repeating MATH 42 and MATH 42X are not eligible for this class and must take MATH 42X.

**CS 42X - Discrete Mathematics**

3 unit(s)
Sets, logic, methods of proof including mathematical induction, functions, relations, elementary combinatorics, probability, Boolean algebras.

**Prerequisite(s):** Math Enrollment Category M-I, M-II, M-III and satisfactory score on the Precalculus Proficiency Assessment; MATH 19 with a grade of C- or better to waive the exam; or MATH 18A and MATH 18B with a grade of C- or better in each to waive the exam.

**Corequisite(s):** MATH 42W.

**Grading:** Graded

**CS 46A - Introduction to Programming**

4 unit(s)

**Lecture 4 hour/lab 3 hours.**

**Prerequisite(s):** Math Enrollment Category M-I, M-II, or M-III, or MATH 1 with a grade of C- or better; and a major of
Computer Science, Software Engineering, or Undeclared; or instructor consent.

**Grading:** Graded

**CS 46B - Introduction to Data Structures**

*4 unit(s)*  

*Lecture 3 hours/lab 3 hours.*

**Prerequisite(s):** Knowledge of Java equivalent to CS 46A (in Java) or CS 49J (with grade of C- or better). Math Enrollment Category M-I or M-II and satisfactory score on the Precalculus Proficiency Assessment (70 or higher), or MATH 19 with a C- or better, or MATH 18A and MATH 18B with C- or better.

**Grading:** Graded

**CS 47 - Introduction to Computer Systems**

*3 unit(s)*  
Instruction sets, assembly language and assemblers, linkers and loaders, data representation and manipulation, interrupts, pointers, function calls, argument passing, and basic gate-level digital logic design.

**Prerequisite(s):** CS 46B (with a grade of "C-" or better)

**Grading:** Graded

**CS 49C - Programming in C**

*3 unit(s)*  
Beginning course in the C language.

**Prerequisite(s):** Previous programming experience and completion of math GE.

**Grading:** Graded

**CS 49J - Programming in Java**

*3 unit(s)*  
Introduction to the Java programming language and libraries. Topics include fundamental data types and control structures, object-oriented programming, string processing, input/output, and error handling. Use of Java libraries for mathematics, graphics, collections, and for user interfaces.

**Prerequisite(s):** Previous programming experience in a language other than Java.

**Grading:** Graded

**CS 50 - Scientific Computing I**

*2 unit(s)*  
Computer systems and structured programming, emphasizing solutions of problems in the atmospheric sciences using Python programming. Includes the UNIX operating system, mass data handling and data visualization.

*Lecture 1 hour/Lab 3 hours.*

**Prerequisite(s):** MATH 30 or MATH 30X.
Corequisite(s): For METR majors: MATH 31 or MATH 30X, METR 60, PHYS 50. For Climate Science majors: METR 60 and CHEM 1A.
Grading: Graded

CS 85C - Practical Computing Topics

3 unit(s)
Computing topics of current interest in industrial practice. Emphasis on effective use and integration of software/hardware. Different topics may be offered at different times in a short-course lecture/lab format. Different versions of this course may be repeated for credit.

Prerequisite(s): Additional Varies with topic
Pre/Corequisite(s): eligibility for MATH 19
Grading: Graded

CS 92 - Int'l Program Studies

1-6 unit(s)
Grading: Mixed Grading

CS 100W - Technical Writing Workshop

3 unit(s)
Advanced writing through preparation of technical reports and presentations. Improving skills for writing subject-related reports, project proposals and personal resumes through practice and evaluation. Course assignments will be related to issues concerning careers in computer science. GE Area: Z.

Satisfies SJSU Studies Z: Written Communication II.

Prerequisite(s): A3 or equivalent second semester composition course (with a grade of C- or better); completion of core GE; satisfaction of Writing Skills Test or completion of ENGL 100A / LLD 100A with C or better; and upper division standing. Or Graduate or Postbaccalaureate level.
Grading: Graded

Note(s): Must be passed with C or better to satisfy the CSU Graduation Writing Assessment Requirement (GWAR).

CS 108 - Introduction to Game Studies

3 unit(s)
Introduction to the systems, design, history, and cultural analysis of games with emphasis on critical studies, development, technological literacy, markets and impact on society.

Prerequisite(s): Upper division standing or instructor consent.
Grading: Graded

CS 116A - Introduction to Computer Graphics

3 unit(s)
Vector geometry, geometric transformations and the graphics pipeline. Basic raster graphics algorithms for drawing discrete lines, clipping, visible surface determination and shading. Display of curves and surfaces. Graphics data structures.
Prerequisite(s): Prerequisite(s): MATH 31 or MATH 31X, MATH 39, CS 146 (with a grade of "C-" or better in each) and previous programming experience in C/C++. Or instructor consent.

Grading: Graded

CS 116B - Computer Graphics Algorithms

3 unit(s)
In-depth discussion of algorithms and techniques used in computer graphics and their implementation. Topics include: animation, fractals, anti-aliasing, fill algorithms, visible surface algorithms, color and shading, ray tracing, radiosity and texture maps. Substantial programming required.

Prerequisite(s): CS 116A (with a grade of "C-" or better) or instructor consent.

Grading: Graded

Note(s): Offered only occasionally.

CS 122 - Advanced Programming with Python

3 unit(s)
Advanced features of the Python programming language with emphasis on programming practice. Course involves substantial programming projects in Python.

Prerequisite(s): CS 146 (with a grade of "C-" or better) or instructor consent.

Grading: Graded

CS 123A - Bioinformatics I

3 unit(s)
Introduction to the main public domain tools, databases and methods in bioinformatics. Analysis of algorithms behind the most successful tools, such as the local and global sequence alignment packages, and the underlying methods used in fragment assembly packages. Solution of complex biological questions requiring modification of standard code.

Prerequisite(s): BIOL 30 and BIOL 31, or CS 46A and CS 46B Allowed Declared Majors: Biology, Chemistry, Computer Science

Grading: Graded

CS 123B - Bioinformatics II

3 unit(s)
Computational methods used for searching, classifying, analyzing, and modeling protein sequences. Tools for analyzing DNA and RNA sequences. More advanced topics, such as genetic algorithms and simulated annealing, which can be used to address folding problems.

Prerequisite(s): CS 123A.

Grading: Graded

CS 134 - Computer Game Design and Programming

3 unit(s)
Architectures and object-oriented patterns for computer game design. Animation, simulation, user interfaces, graphics, and intelligent behaviors. Team projects using an existing game engine framework.
**Prerequisite(s):** CS 146 and either CS 151 or CMPE 135 (with a grade of "C-" or better in each); or instructor consent.

**Grading:** Graded

**CS 143C - Numerical Analysis and Scientific Computing**

3 unit(s)
Development and comparison of important algorithms for scientific computing in terms of efficiency, accuracy and reliability. Topics include nonlinear equations, interpolation, approximation theory, differentiation, integration, differential equations, numerical stability and error analysis. Substantial assignments using contemporary software packages and professional subprogram libraries.

**Prerequisite(s):** MATH 32 or MATH 32X, one of CS 22A, MATH 50, CS 46A, CS 49C or CS 49J, one of MATH 33A, MATH 33LA, or MATH 34 (with a grade of "C-" or better in each); or instructor consent.

**Grading:** Graded

**CS 143M - Numerical Analysis and Scientific Computing**

3 unit(s)
Development and comparison of important algorithms for scientific computing in terms of efficiency, accuracy and reliability. Topics include systems of linear equations-direct and iterative methods, least squares problems, eigenvalues and eigenvectors, numerical stability and error analysis. Substantial assignments using contemporary software packages and professional subprogram libraries.

**Prerequisite(s):** MATH 39, one of CS 22A, MATH 50, CS 46A or CS 49C (each with a grade of "C-" or better). Or instructor consent.

**Grading:** Graded

**CS 144 - Advanced C++ Programming**

3 unit(s)
Advanced features of C++, including operator overloading, memory management, templates, exceptions, multiple inheritance, RTTI, namespaces, tools.

**Prerequisite(s):** CS 46B and CS 49C (with a grade of C- or better in each), or equivalent knowledge of object-oriented programming and C, or instructor consent.

**Grading:** Graded

**CS 146 - Data Structures and Algorithms**

3 unit(s)
Implementations of advanced tree structures, priority queues, heaps, directed and undirected graphs. Advanced searching and sorting (radix sort, heapsort, mergesort, and quicksort). Design and analysis of data structures and algorithms. Divide-and-conquer, greedy, and dynamic programming algorithm design techniques.

**Prerequisite(s):** MATH 30, MATH 42, CS 49J (or equivalent knowledge of Java), and CS 46B (with a grade of "C-" or better in each); Computer Science, Applied and Computational Math or Software Engineering Majors only; or instructor consent.

**Grading:** Graded

**CS 147 - Computer Architecture**
3 unit(s)
Introduction to the basic concepts of computer hardware structure and design, including processors and arithmetic logic units, pipelining, and memory hierarchy.

**Prerequisite(s):** CS 47 or CMPE 102 (with a grade of "C-" or better), Computer Science, Applied and Computational Math, or Software Engineering majors only; or instructor consent.

**Grading:** Graded

---

**CS 149 - Operating Systems**

3 unit(s)
Fundamentals: Contiguous and non-contiguous memory management; processor scheduling and interrupts; concurrent, mutually exclusive, synchronized and deadlocked processes; files. Substantial programming project required.

**Prerequisite(s):** CS 146 (with a grade of "C-" or better). Computer Science, Applied and Computational Math or Software Engineering Majors only; or Instructor Consent.

**Grading:** Graded

---

**CS 151 - Object-Oriented Design**

3 unit(s)

**Prerequisite(s):** MATH 42, CS 46B, and CS 49J (or equivalent knowledge of Java) (with a grade of "C-" or better in each); Allowed Declared Majors: Computer Science, Applied and Computational Math or Software Engineering. Or instructor consent.

**Grading:** Graded

---

**CS 152 - Programming Paradigms**

3 unit(s)

**Prerequisite(s):** CS 151 or CMPE 135 (with a grade of "C-" or better); Computer Science, Applied and Computational Math or Software Engineering Majors only; or instructor consent.

**Grading:** Graded

---

**CS 153 - Concepts of Compiler Design**

3 unit(s)
Theoretical aspects of compiler design, including parsing context free languages, lexical analysis, translation specification and machine-independent code generation. Programming projects to demonstrate design topics.

**Prerequisite(s):** CS 47 or CMPE 102, CS 146, and CS 154 (with a grade of "C-" or better in each); Computer Science, Applied and Computational Math or Software Engineering majors only; or instructor consent.

**Grading:** Graded
CS 154 - Formal Languages and Computability

3 unit(s)
Finite automata, context-free languages, Turing machines, computability.

Prerequisite(s): MATH 42 or MATH 42X and CS 46B (with a grade of "C-" or better in each); Allowed Declared Majors: Computer Science, Applied and Computational Mathematics, or Software Engineering, or instructor consent.

Grading: Graded

CS 155 - Introduction to the Design and Analysis of Algorithms

3 unit(s)
Algorithm design techniques: dynamic programming, greedy algorithms, Euclidean and extended Euclidean algorithms, Discrete and Fast Fourier transforms. Analysis of algorithms, intractable problems and NP-completeness. Additional topics selected from: selection algorithms and adversary arguments, approximation algorithms, parallel algorithms, and randomized algorithms.

Prerequisite(s): CS 146 (with a grade of "C-" or better) or instructor consent.

Grading: Graded

CS 156 - Introduction to Artificial Intelligence

3 unit(s)
Basic concepts and techniques of artificial intelligence: problem solving, search, deduction, intelligent agents, knowledge representation. Topics chosen from logic programming, game playing, planning, machine learning, natural language, neural nets, robotics.

Prerequisite(s): CS 146 and either CS 151 or CMPE 135 (with a grade of "C-" or better in each); or instructor consent.

Grading: Graded

CS 157A - Introduction to Database Management Systems

3 unit(s)

Prerequisite(s): CS 146 (with a grade of "C-" or better); Computer Science, Applied and Computational Math, or Software Engineering majors only; or instructor consent.

Grading: Graded

CS 157B - Database Management Systems II

3 unit(s)

Prerequisite(s): CS 157A (with a grade of "C-" or better); Computer Science, Applied and Computational Math, or
Software Engineering Majors only; or instructor consent.

**Grading:** Graded

**CS 157C - NoSQL Database Systems**

3 unit(s)

**Prerequisite(s):** CS 157A with a "C- or better"

**Grading:** Graded

**CS 158A - Computer Networks**

3 unit(s)
Introduction to computer networks, including network layered architectures, local and wide area networks, mobile wireless networks, Internet TCP/IP protocol suite, network resource management, network programming, network performance, network security, network applications.

**Prerequisite(s):** CS 146, and CS 147 or CMPE 120, (with grades of "C-" or better in each); or instructor consent.

**Grading:** Graded

**CS 158B - Computer Network Management**

3 unit(s)
Principles and technologies of network management: reference models, functions (fault, configuration, performance, security and accounting management), management information, communication protocols, integration, and assessment. Network security and cyber defense: cryptography, key distribution, authentication protocols, network attacks, access control, and example systems.

**Prerequisite(s):** CS 158A or CMPE 148 (with a grade of "C-" or better), or instructor consent

**Grading:** Graded

**CS 159 - Introduction to Parallel Processing**

3 unit(s)
Major parallel architectures: shared memory, distributed memory, SIMD, MIMD. Parallel algorithms: techniques for scientific applications, measures of performance. Parallel programming: principles and implementations in various languages. Assignments on available parallel and vector computers.

**Prerequisite(s):** CS 146 (with a grade of "C-" or better); Computer Science, Applied and Computational Math, or Software Engineering Majors only; or instructor consent.

**Grading:** Graded

**CS 160 - Software Engineering**

3 unit(s)
Software engineering principles, software process and process models, requirements elicitation and analysis, design, configuration management, quality control, project planning, social and ethical issues. Required team-based software development, including written requirements specification and design documentation, oral presentation, and tool use.
Prerequisite(s): CS 146, CS 151 (with a grade of "C-" or better in each); CS 100W (with a grade of "C" or better) or instructor consent. Computer Science and Software Engineering Majors only.

Grading: Graded

CS 161 - Software Project

3 unit(s)
A substantial project based on material from an advanced area of computer science. Includes lectures on the project topic and the design and testing of software systems. At least 50% of the course grade to be based on the project.

Prerequisite(s): CS 160 (with a grade of "C-" or better) or instructor consent. Computer Science and Software Engineering Majors only.

Grading: Graded

CS 166 - Information Security

3 unit(s)
Fundamental security topics including cryptography, protocols, passwords, access control, software security, and network security. Additional topics selected from multilevel security, biometrics, tamper-resistant hardware, information warfare, e-commerce, system evaluation and assurance, and intrusion detection.

Prerequisite(s): CS 146 (with a grade of "C-" or better) and either CS 47 or CMPE 102 or CMPE 120 (with a grade of "C-" or better); Computer Science, Applied and Computational Math, or Software Engineering Majors only; or instructor consent.

Grading: Graded

CS 168 - Blockchain and Cryptocurrencies

3 unit(s)

Prerequisite(s): CS 166 (with a grade of C- or better) or instructor consent.

Grading: Graded

CS 174 - Server-side Web Programming

3 unit(s)
Development and deployment of multi-tier web-based applications. Introduction to HTML, XML, enterprise design patterns, web services and database access.

Prerequisite(s): CS 46B (with a grade of "C-" or better); Computer Science, Applied and Computational Math, or Software Engineering Majors only.

Grading: Graded

CS 175 - Mobile Device Development

3 unit(s)
Mobile Platform APIs including those for networking, touch, graphics, data, location, and camera. Testing and profiling on devices and emulators/simulators.
Prerequisite(s): CS 47, and knowledge of Java equivalent to that of CS 46A or CS 49J
Grading: Graded

CS 180 - Individual Studies

1-3 unit(s)
Individual study in a specific field.

Prerequisite(s): Department chair consent. Not available to Open University Students
Grading: Credit/No Credit

CS 180H - Individual Studies for Honors

3 unit(s)
Senior project on advanced topics in computer science as determined by the instructor. Written paper or oral presentation of the project required. Intended for students graduating with departmental honors.

Prerequisite(s): At least junior standing as computer science major. GPA of 3.5 or higher in the major and department chair consent.
Grading: Credit/No Credit

CS 185C - Advanced Practical Computing Topics

3 unit(s)
Computing topics of current interest in industrial practice. Emphasis on effective use and integration of software/hardware. Different topics may be offered at different times in a short-course lecture/lab format and may be repeated for credit.

Prerequisite(s): Varies with topic.
Grading: Graded

CS 190 - Internship Project

1 unit(s)
Work on an approved semester-long paid project at an industrial site. Meet once per week on campus. Progress reports, oral presentations, final report, and evaluation by project supervisor will be used to demonstrate the acquisition of skills identified as goals prior to the start of the assignment.

Course may be repeated for credit for up to 3 units.

Prerequisite(s): CS 146 (with a grade of "C-" or better) or graduate standing, selection by a company, and instructor consent
Grading: Graded

CS 190I - Internship Project

3 unit(s)
Work on an approved semester-long paid project at an industrial site. Meet once per week on campus. Progress reports, oral presentations, final report, and evaluation by project supervisor will be used to demonstrate the acquisition of skills identified as goals prior to the start of the assignment.

Prerequisite(s): CS 146 (with a grade of "C-" or better) or graduate standing, selection by a company, and instructor consent
consent.

**Grading:** Graded

CS 192 - Int'l Program Studies

1-6 unit(s)

**Grading:** Mixed Grading

CS 200W - Graduate Technical Writing

3 unit(s)

Graduate technical writing workshop to develop advanced communication skills that will meet the professional needs of computer scientists, along with research methodologies and proper documentation for the master's thesis project. (This course does NOT satisfy the undergraduate GE Area Z requirement.)

*Satisfies GWAR: Graduation Writing Assessment Requirement.*

**Prerequisite(s):** Graduate standing.

**Grading:** AB-/NC Grading

**Note(s):** This course satisfies graduate-level GWAR in this master's program.

CS 216 - Geometric Modeling

3 unit(s)

Representation of curves and surfaces, basic differential geometry, solid modeling fundamentals, implementation considerations.

**Prerequisite(s):** CS 116A or instructor consent.

**Grading:** Graded

CS 218 - Topics in Cloud Computing

3 unit(s)

Topics in cloud computing, including distributed system models, virtual machines, virtualization, cloud platform architectures (IaaS, PaaS, SaaS), service-oriented architectures, cloud programing and software environments, peer-to-peer computing, ubiquitous cloud, cloud security and trust management.

**Prerequisite(s):** CS 149

**Grading:** Graded

CS 223 - Bioinformatics

3 unit(s)

The course investigates the main algorithms for solving computational problems in bioinformatics. Methods will include Hidden Markov Models for gene prediction and protein profiling, and Genetic Algorithms for biological sequence analysis and structure prediction. Students will be given programming projects.

**Prerequisite(s):** CS 123A or CS 155.

**Grading:** Graded

CS 235 - User Interface Design
3 unit(s)
Human-computer interaction principles. Direct manipulation, focus plus context, interaction history; interfaces for websites and website collections; usability testing; role of metaphors; case studies; advanced topics include information visualization, interfaces for collaboration, intelligent interfaces, and software agents.

Prerequisite(s): CS 130 or CS 116A, or instructor consent.
Grading: Graded

CS 243B - Advanced Topics in Numerical Analysis

3 unit(s)
Advanced topics in numerical methods.

Prerequisite(s): MATH 143C or MATH 143M; and instructor consent.
Grading: Graded

Note(s): Alternate years.

CS 247 - Advanced Computer Architecture

3 unit(s)
Advanced topics in vector architectures, including: pipelined architectures, dataflow computers, VLSI architectures, butterfly connections; bus and memory architectures; cache structures; hardware implementations of algorithms.

Prerequisite(s): CS 147 and CS 149 or instructor consent.
Grading: Graded

CS 249 - Distributed Computing

3 unit(s)
Current issues in operating systems, including multiprocessor systems and distributed computing, networks, security and performance. Case studies of current operating systems.

Prerequisite(s): CS 149 or instructor consent.
Grading: Graded

CS 251 - Obj Oriented Anlys

3 unit(s)
Introduction to important concepts, activities, and artifacts of the analysis and design phases of object-oriented software development. Use of CASE tools, UML, and pattern catalogs to build requirements models, domain models, design models, and reusable frameworks for a variety of software systems.

Prerequisite(s): CS 160 or instructor consent
Grading: Graded

CS 251A - Object-Oriented Analysis

3 unit(s)
Emphasizes the important concepts, activities, and artifacts of the analysis phase of object-oriented software development. CASE tools and UML are used to model application domain data, workflows, system requirements, deployment, and life cycles.
Prerequisite(s): CS 160 or instructor consent.
Grading: Graded

CS 251B - Object-Oriented Design

3 unit(s)
Course covers important concepts, activities, and artifacts of the design phase of object-oriented software development. Topics include design metrics, design patterns, refactoring, frameworks, and testing.

Prerequisite(s): CS 160 or instructor consent.
Grading: Graded

CS 252 - Advanced Programming Language Principles

3 unit(s)
Language design and paradigms, including concepts underlying functional, logic, object-oriented and parallel paradigms. Theoretical foundations, including lambda calculus, denotational and axiomatic semantics. Proofs of program correctness. Programming projects emphasizing different aspects of language design.

Prerequisite(s): CS 152 or instructor consent.
Grading: Graded

CS 253 - Advanced Compiler Design

3 unit(s)

Prerequisite(s): CS 153 or instructor consent.
Grading: Graded

CS 254 - Theory of Computation

3 unit(s)
Models of computation; decidability; complexity measures; hierarchies; P, NP and other complexity classes; intractable problems.

Prerequisite(s): CS 154 or instructor consent.
Grading: Graded

CS 255 - Design and Analysis of Algorithms

3 unit(s)
Randomized algorithms. Parallel algorithms. Distributed algorithms. NP-completeness of particular problems. Approximation algorithms.

Prerequisite(s): CS 155 or instructor consent.
Grading: Graded

CS 256 - Topics in Artificial Intelligence
3 unit(s)
Introduction to topics in artificial intelligence such as problem solving methods, game playing, understanding natural languages, pattern recognition, computer vision and the general problem of representing knowledge. Students will be expected to use LISP.

Prerequisite(s): CS 156 or instructor consent.
Grading: Graded

CS 257 - Database System Principles

3 unit(s)
Design management and performance issues on: file organization and access methods, buffer management and storage management. Query processing and query optimization, transaction management, recovery, and concurrency control techniques. Reliability, protection and integrity techniques. Extensive programming project.

Prerequisite(s): CS 157B or instructor consent.
Grading: Graded

CS 258 - Computer Communication Systems

3 unit(s)
Design, analysis and survey of the latest advancements in network and Internet technologies, such as supporting TCP/IP over various network media, software-defined networks, networks supporting cloud computing, network security, peer-to-peer and overlay networks, and quality of services.

Prerequisite(s): CS 158A or instructor consent.
Grading: Graded

CS 259 - Advanced Parallel Processing

3 unit(s)
An advanced hardware architecture and software development class focused on multi-threaded, parallel processing algorithms and techniques. A study of high-performance parallel hardware architectures and parallel programming languages. Applications of parallel and GPU processing, including computer gaming.

Grading: Graded

CS 262 - Randomized Algorithms and Applications

3 unit(s)
Design and analysis of algorithms which incorporate randomness in their design. Applications will be given in several of the following areas: data structures, pattern matching, cryptography, parallel computing, distributed computing, and interactive proof systems.

Prerequisite(s): CS 154 or CS 155.
Grading: Graded

CS 265 - Cryptography and Computer Security

3 unit(s)
Security mechanisms for protecting information in computer systems and networks. Includes cryptography and its applications to security services in distributed systems, mathematics of cryptography, access control, protection
models, security policies, design of secure systems, firewalls, and intrusion detection.

**Prerequisite(s):** CS 149 or instructor consent.

**Grading:** Graded

**CS 266 - Topics in Information Security**

*3 unit(s)*

Advanced topics in the area of information security. Content differs with each offering. Possible topics include, but are not restricted to: Network Security, Software Reverse Engineering and Cryptanalysis.

**Prerequisite(s):** CS 166 or instructor consent.

**Grading:** Graded

**CS 267 - Topics in Database Systems**

*3 unit(s)*

Advanced topics in the area of database and information systems. Content differs in each offering. Possible topics include though not restricted to: Data Mining, Distributed Databases and Transaction Processing.

**Prerequisite(s):** CS 157B.

**Grading:** Graded

**CS 268 - Topics in Wireless Mobile Networking**

*3 unit(s)*

Advanced topics in the area of wireless mobile networking. Content may differ in each offering. Possible topics include though not restricted to: wireless local and metropolitan area networks, mobile Internet, sensor networks, mobile computing, wireless network security. Repeatable when topic changes.

**Prerequisite(s):** CS 158A.

**Grading:** Graded

**CS 271 - Topics in Machine Learning**

*3 unit(s)*

Variable topics in machine learning. Content may include hidden Markov models, principal component analysis, support vector machines, clustering, boosting, random forests, neural networks, and deep learning. Relevant applications will be covered.

**Grading:** Graded

**CS 274 - Topics in Web Intelligence**

*3 unit(s)*

Topics in web intelligence including finding similar items, mining data streams, link analysis, frequent itemsets, advertising on the web, recommender systems, and mining social-network graphs. Relevant applications will be covered. Significant programming project is required.

**Prerequisite(s):** CS 157A or instructor consent.

**Grading:** Graded
CS 280 - Graduate Individual Studies

1-3 unit(s)
Individual study in specific field.

Prerequisite(s): Department chair consent. Not available to Open University Students

Grading: Credit/No Credit

CS 286 - Advanced Topics in Computer Science

3 unit(s)
Selected topics in computer science. Topics vary each semester and may be repeated for a maximum of 6 units.

Course may be repeated for credit for up to 6 units.

Prerequisite(s): Suitable upper division background in mathematics and computer science as set by instructor.

Grading: Graded

CS 297 - Preparation for Writing Project or Thesis

3 unit(s)
Supervised individual research and project work to prepare for a master's writing project or thesis.

Prerequisite(s): Fully classified standing in the MSCS program, department chair consent. Not available to Open University Students.

Pre/Corequisite(s): CS 200W

Grading: Credit/No Credit

CS 298 - Master's Writing Project

3 unit(s)
Prerequisite(s): CS 297 or CS 240, and department chair consent and admission to candidacy for the MS degree. Not available to Open University Students.

Grading: Mandatory CR/NC/RP

CS 298B - Bioinformatics Master's Project

3 unit(s)
Supervised individual research of an advanced character for the completion of the masters project.

Course may be repeated for credit for up to 3 units.

Prerequisite(s): Fully classified standing in the MS in Bioinformatics program and department chair consent. Not available to Open University Students.

Grading: Mandatory CR/NC/RP

CS 299 - Master's Thesis

3 unit(s)
Prerequisite(s): CS 297 and department chair consent and admission to candidacy for the MS degree. Not available to Open University Students.

Grading: Mandatory CR/NC/RP
CS 1290R - Culminating Experience Supervision

1 unit(s)
Continued work on thesis or project beyond minimum required units, for cases in which final deliverables are still in progress.

Course may be repeated for credit for up to 16 units.

Prerequisite(s): RP grade in a preceding thesis or project semester.
Grading: CR/NC, No Degree Credit

Note(s): No Degree Credit.

MATH 243A - Numerical Solution of PDEs

3 unit(s)
Finite difference methods applied to parabolic, elliptic and hyperbolic equations including numerical methods for solving the discretized problem, convergence, stability, error control, and applications.

Prerequisite(s): MATH 143C or MATH 143M or instructor consent.
Grading: Graded

Note(s): Alternate years.

Overview
Rocks, soil, minerals, fossils, oceans, earthquakes, volcanoes, climate change—the Department of Geology specializes in increasing students' understanding of the Earth and its geological features. We offer general education courses, K-12 teacher training and professional development, a rigorous, integrated undergraduate curriculum and graduate courses and research. Our bachelor's degree program in geology prepares students for graduate study in the geosciences as well as for entry-level positions in geological and environmental consulting firms, regulatory agencies and other employment settings. Our bachelor's program in earth science is designed to help students master the content needed for successful completion of the California Commission on Teaching Credentialing's California Subject Examinations for Teachers, and provides a career path for students interested in becoming secondary school teachers. Our master's degree program particularly emphasizes the study of applied geology, surface processes, and tectonics, enabling graduates to advance to Ph.D programs and to secure jobs as geologists, engineering geologists, hydrogeologists, geophysicists and environmental managers.

Geology and Earth Science Honors Program

Departmental honors in the BS Geology and Earth Science degree programs are awarded to those majors who have achieved a 3.5 grade point average in their required departmental courses and have completed an undergraduate research project. A proposal for undergraduate research, including an identified Geology faculty supervisor, must be approved by the Geology honors committee for acceptance into the honors program. Completion of two units of Geology 180 and both written and oral presentation of research results are required for completion of the program.

Undergraduate

Earth Science, BA

This major, offered by the Department of Geology, provides broad background in the earth sciences. Students interested in teaching science in high school or middle school should take the specified elective courses (consult with the advisor as needed).

Completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See “Teaching: How to Become a Teacher in California” (see Teaching) for information on application and admission to credential programs.

Summary of Degree Units

University Graduation Requirements 38

Major Preparation 29

Major Requirements 25-27

University Electives 26-28

Total 120

University Requirements for Graduation

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Undergraduate Graduation Requirements section of the Policies and Procedures.
Program Roadmaps

The 4-Year Roadmap is available online. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Degrees (ADT) Pathways are also available online.

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the General Education (GE) section to identify the specific adjustments for this degree program or contact your major advisor for more details.

General Education/American Institution Requirements

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

University Requirements (38 units)

Core Lower Division General Education (24 units)

Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

Note: Students who have completed the ADT Transfer degree (under SB 1440) for this major will have completed all lower division GE requirements and should follow the 60 unit guarantee roadmap. Meet with an advisor prior to registering for your first semester for the 60 unit roadmap or specific questions.

Upper Division General Education (6 units)

Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions (6 units)

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B, HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Complete One Sequence From:

African American Studies (6 units)

- AFAM 2A - African Americans and the Development of America's History and Government 3 unit(s) (D2)
- AFAM 2B - African Americans and the Development of America's History and Government 3 unit(s) (M7)

Asian American Studies (6 units)
• AAS 33A - Asian Americans in U.S. History I 3 unit(s) (D2)
• AAS 33B - Asian Americans in U.S. History II 3 unit(s) (M7)

U.S History and Government (6 units)

• HIST 15 - Essentials of U.S. History 3 unit(s) (M12)
• POLS 15 - Essentials of U.S. & California Government 3 unit(s) (M11)

Chicana and Chicano Studies (6 units)

• CCS 10A - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D2)
• CCS 10B - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (M7)

Physical Education (2 units)

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Major Preparation (29 units)

• ASTR 101 - Modern Astronomy 3 unit(s) (R)
• CHEM 1A - General Chemistry 5 unit(s) (B1+B3)
• CHEM 1B - General Chemistry 5 unit(s) (B1+B3)
• MATH 19 - Precalculus 5 unit(s) (B4)

Complete One Course From:

• METR 113 - Atmospheric Pollution 3 unit(s) (R)
• METR 112 - Global Climate Changes 3 unit(s) (R)

Complete One Course Sequence From:

Fundamental

A and B must be taken to meet requirement

• PHYS 2A - Fundamentals of Physics 4 unit(s) (B1+B3)
• PHYS 2B - Fundamentals of Physics 4 unit(s) (B1+B3)

General Physic

PHYS 50 and PHYS 51 must be taken to meet requirement
• PHYS 50 - General Physics/Mechanics 4 unit(s) (B1+B3)
• PHYS 51 - General Physics/Electricity and Magnetism 4 unit(s) (B1+B3)

Major Requirements (25-27 units)

Core Courses

• GEOL 1 - General Geology 4 unit(s) (B1B3)
• GEOL 7 - Earth, Time and Life 4 unit(s) (B1+B3)
• GEOL 28 - Geology Outdoors 1 unit(s)
• GEOL 100W - Writing Workshop 3 unit(s) (Z)
• GEOL 105 - General Oceanography 3 unit(s) (R)
• GEOL 145 - Earth System Science 4 unit(s)

Complete Two Courses From:

• GEOL 120 - Fundamentals of Mineralogy 3 unit(s)
• GEOL 122 - Petrology 4 unit(s)
• GEOL 124 - Sedimentology and Stratigraphy 3 unit(s) (R)
• GEOL 125 - Structural Geology 4 unit(s)
• GEOL 134 - Geomorphology 4 unit(s)
• GEOL 137 - Introduction to GPS/GIS for Geologic Applications 4 unit(s)

University Electives (26-28 units)

At least 11 units of University Electives must be in Upper Division.

Teacher Candidates should take:

• CHEM 120S - Chemical Safety Seminar 1 unit(s)
• BIOL 20 - Ecological Biology 3 unit(s) (B2+B3)
• BIOL 21 - Human Biology 3 unit(s) (B2+B3)

Total Units Required (120 units)

Geology, BS

• Department of Geology

General Education/American Institution Requirements

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

University Requirements (35 units)

Core Lower Division General Education (21 units)

Of the 39 units required by the university, 18 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

Upper Division General Education (6 units)

Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions (6 units)

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B, HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Complete One Sequence From:

African American Studies (6 units)
• AFAM 2A - African Americans and the Development of America's History and Government 3 unit(s) (D2)
• AFAM 2B - African Americans and the Development of America's History and Government 3 unit(s) (M7)

Asian American Studies (6 units)
• AAS 33A - Asian Americans in U.S. History I 3 unit(s) (D2)
• AAS 33B - Asian Americans in U.S. History II 3 unit(s) (M7)

U.S History and Government (6 units)
• HIST 15 - Essentials of U.S. History 3 unit(s) (M12)
• POLS 15 - Essentials of U.S. & California Government 3 unit(s) (M11)

Chicana and Chicano Studies (6 units)
• CCS 10A - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D2)
• CCS 10B - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (M7)

Physical Education (2 units)

Graduation Writing Assessment Requirement
At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Major Preparation (21 units)
• CHEM 1A - General Chemistry 5 unit(s) (B1+B3)
• CHEM 1B - General Chemistry 5 unit(s) (B1+B3)
• MATH 30 - Calculus I 3 unit(s) (B4)

Complete One Sequence From:

Fundamentals
• PHYS 2A - Fundamentals of Physics 4 unit(s) (B1+B3)
• PHYS 2B - Fundamentals of Physics 4 unit(s) (B1+B3)

General Physics
• PHYS 50 - General Physics/Mechanics 4 unit(s) (B1+B3)
• PHYS 51 - General Physics/Electricity and Magnetism 4 unit(s) (B1+B3)
Major Requirements (50-54 units)

Core Courses (30-32 units)

- GEOL 1 - General Geology 4 unit(s) (B1+B3)
- GEOL 7 - Earth, Time and Life 4 unit(s) (B1+B3)
- GEOL 28 - Geology Outdoors 1 unit(s)
- GEOL 100W - Writing Workshop 3 unit(s) (Z)
- GEOL 120 - Fundamentals of Mineralogy 3 unit(s)
- GEOL 122 - Petrology 4 unit(s)
- GEOL 124 - Sedimentology and Stratigraphy 3 unit(s) (R)
- GEOL 125 - Structural Geology 4 unit(s)
- GEOL 129A - Introductory Field Geology 2 unit(s)

Complete One Course From:

- GEOL 129B - Advanced Field Geology 4 unit(s)
- GEOL 129C - Intermediate Field Geology 2 unit(s)

Geology Electives (20-24 units)

Complete 20-24 units from:

- GEOL 127 - Tectonics 3 unit(s)
- GEOL 130 - Marine Geology 4 unit(s)
- GEOL 134 - Geomorphology 4 unit(s)
- GEOL 135 - Geochemistry 4 unit(s)
- GEOL 137 - Introduction to GPS/GIS for Geologic Applications 4 unit(s)
- GEOL 138 - Hydrogeology 4 unit(s)
- GEOL 140 - Principles of Engineering Geology 4 unit(s)
- GEOL 142 - Paleontology 4 unit(s)
- GEOL 143 - Active Tectonics 4 unit(s)
- GEOL 147 - Introduction to Applied Geophysics 4 unit(s)
- GEOL 174 - Hazardous Materials 3 unit(s)
- GEOL 180 - Individual Studies 1-3 unit(s)
- MS 141 - Geological Oceanography 4 unit(s)

University Electives (12-14 units)

MATH 31 recommended for graduate school or technical careers

Total Units Required (120 units)
Geology, MS

The MS program provides graduates with advanced training in Geology, culminating in the completion of an independent research thesis project. The academic curriculum and extensive faculty expertise provide the opportunity for study in many areas of Geology, with a particular emphasis on applied geology and tectonics. Graduates are employed as geologists, engineering geologists, hydrogeologists, hydrologists, geophysicists, environmental managers in engineering, geological, geophysical, and environmental consulting firms, and as geologists in the mining and petroleum industries.

The Department of Geology welcomes students with undergraduate degrees in other disciplines.

For more information visit www.sjsu.edu/geology.

Admission Requirements

Candidates must meet all university admission requirements. Students can be admitted in either classified or conditionally classified standing. If an applicant's preparation for advanced graduate work is considered inadequate to meet the course prerequisites or other departmental requirements (typically because the student does not have a BS in Geology or related field), the conditions will include taking the core Geology BS courses to meet their requirements.

The GRE is not required.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE.

Requirements for Admission to Graduate Candidacy

University Candidacy Requirements

A student is eligible for admission to candidacy for the MS degree in Geology after the student has fulfilled the general all-university requirements for advancement to candidacy as outlined in the Academic Regulations section of this catalog and the department requirements. Candidacy includes the successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website. In addition, the student's admission must be approved by the departmental graduate advisor.

Department Candidacy Requirements

The student will prepare a written thesis proposal in consultation with her/his thesis adviser. The student will defend her/his proposal in an oral examination with her/his thesis advisor and a minimum of two other thesis committee members.

Requirements for Graduation
University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Geology Department Requirements

An approved program for each candidate may be designed in consultation with the advisor on the basis of each individual's objectives. The program shall include at least 30 semester units earned beyond the bachelor's degree in 200-level and 100-level courses approved for graduate credit. This total includes 4 semester units of thesis research. At least 12 units must consist of 200-level courses. All students are required to take a 2-unit seminar (GEOL 285). All candidates are required to submit a master's thesis.

An oral presentation of thesis research is to be made before an open meeting of the Geology Department. The thesis must be approved by the student's thesis committee and submitted in final form, as defined in the SJSU Master's Thesis and Doctoral Dissertation Guidelines, to the Graduate Division of the university in accordance with published deadlines.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

Master's Requirements (30 units)

Core (14 units)

- GEOL 285 - Seminar 2 unit(s)

Complete Twelve Units From:

- GEOL 213 - Advanced Igneous and Metamorphic Petrology 4 unit(s) (GWAR)
- GEOL 214 - Sedimentary Petrology and Petrography 4 unit(s)
- GEOL 222 - Advanced Sedimentary Geology 4 unit(s)
- GEOL 231 - Advanced Structural Geology 4 unit(s) (GWAR)
- GEOL 234 - Advanced Geomorphology 4 unit(s) (GWAR)
- GEOL 237 - Advanced GIS/GPS Mapping 4 unit(s)
- GEOL 238 - Advanced Hydrogeology 4 unit(s) (GWAR)
- GEOL 242 - Advanced Paleontology 4 unit(s)
- GEOL 255 - Advanced Geology 4 unit(s)

Electives (12 units)

Other 100-level or 200-level courses, selected with advisor approval. GEOL 285 may be taken a second time.

Culminating Experience (4 units)
Plan A (Thesis)

- GEOL 299 - Master's Thesis 1-4 unit(s) (1 unit of GEOL 299 in each of four semesters is recommended)
- Thesis Defense (oral presentation)

Total Units Required (30 units)

Elective courses must be planned in consultation with the Geology Department Graduate Advisor.

The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 15.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

Minor

Geology Minor

The Department of Geology offers a baccalaureate minor to supplement a major in some fields. The geology minor consists of at least 15 units, at least six of which must be upper division courses, selected in consultation with the geology advisor.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Requirements (15 units)

Core Courses (9 units)

- GEOL 1 - General Geology 4 unit(s) (B1+B3)
- GEOL 7 - Earth, Time and Life 4 unit(s) (B1+B3)
- GEOL 28 - Geology Outdoors 1 unit(s)

Electives (6 units)

Complete six units from:
- GEOL 105 - General Oceanography 3 unit(s) (R)
- GEOL 107 - Prehistoric Life 3 unit(s) (R)
- GEOL 111 - Geology and the Environment 3 unit(s) (R)
- GEOL 112 - Hazards, Risks of Earthquakes and Volcanoes 3 unit(s) (R)
- GEOL 120 - Fundamentals of Mineralogy 3 unit(s)
- GEOL 122 - Petrology 4 unit(s)
- GEOL 124 - Sedimentology and Stratigraphy 3 unit(s) (R)
- GEOL 125 - Structural Geology 4 unit(s)
- GEOL 134 - Geomorphology 4 unit(s)
- GEOL 135 - Geochemistry 4 unit(s)
• GEOL 137 - Introduction to GPS/GIS for Geologic Applications 4 unit(s)
• GEOL 138 - Hydrogeology 4 unit(s)
• GEOL 142 - Paleontology 4 unit(s) (or other geology courses selected with advisor approval (at least one upper division course must include a lab))

Total Units Required (15 units)

GEOL 1 - General Geology

4 unit(s)
Examination of geologic processes and materials, including volcanoes, earthquakes, rock formation, oceans, streams, and plate tectonics and their importance to society.

Misc/Lab: Lecture 3 hours/Lab 3 hours and field trips.

Satisfies B1 + B3: Physical + Lab Science

Grading: Graded

GEOL 1L - General Geology Laboratory

1 unit(s)
Supplement to general lecture courses in Earth science or geology.

Misc/Lab: Lab 3 hours.

Pre/Corequisite(s): GEOL 2, GEOL 1, GEOL 6 or GEOL 111.
Grading: Graded

GEOL 2 - Geology for Engineers

3 unit(s)
This course provides a foundational introduction to geology as applied to civil engineering. The course focuses on learning and applying knowledge of geologic processes to civil engineering works, decision making, and evaluating the suitability of areas for urban infrastructure based upon geologic evidence and reasoning. Fieldtrips are required and may include weekends.

Prerequisite(s): Enrolled as Civil Engineering Major
Grading: Graded

GEOL 3 - Planet Earth

3 unit(s)
Origins and processes of Earth's interconnected physical and chemical systems, including aspects of astronomy, geology, meteorology, and oceanography. Impacts of these systems on humans, and of humans on the systems.

Satisfies B1: Physical Science

Grading: Graded

GEOL 4L - Earth Systems Lab
1 unit(s)
Hands-on investigations, measurements, and analysis of Earth's materials, processes, and hazards. Supplements general lecture courses in Geology.

Misc/Lab: Lab 3 hours.

Satisfies B3: Laboratory Science

Grading: Graded

GEOL 5 - Human Development and the Natural World

3 unit(s)
Introductory course examining the role of the natural world on the physiological, social, and psychological development of human beings within the context of the environmental, social, and academic community system.

Satisfies E: Human Understanding & Development

Grading: Graded

GEOL 6 - Geology of California

3 unit(s)
California's geology, illustrating physical processes, landscapes, geologic history and resources. California's seismic, volcanic, landslide and flooding hazards, and their impact on society.

Misc/Lab: Lecture 3 hours/field trips.

Satisfies B1: Physical Science

Grading: Graded

GEOL 7 - Earth, Time and Life

4 unit(s)
Earth's geosphere: processes that act on it and materials that comprise it; how rocks and fossils are used to interpret the history of Earth's geosphere, atmosphere, oceans, and life forms.

Misc/Lab: Lecture 3 hours/lab 3 hours.

Satisfies B1 + B3: Physical + Lab Science

Grading: Graded

GEOL 8 - The Age of the Dinosaurs

3 unit(s)
Scientific overview of the Mesozoic Era, or "age of dinosaurs." The course will focus on the evolution of dinosaurs and other contemporaneous life forms, as well as the mass extinction events that mark the beginning and end of the Mesozoic.

Satisfies B2: Life Science
**Grading:** Graded

**GEOL 9 - Earth Disasters**

4 unit(s)
Exploration of natural disasters related to earth processes, including earthquakes, volcanoes, landslides, tsunamis, flooding, and climate change, and their impacts on society.

**Misc/Lab:** Lecture 2 hours/lab 3 hours.

**Satisfies B1 + B3: Physical + Lab Science**

**Grading:** Graded

**GEOL 28 - Geology Outdoors**

1 unit(s)
Hands-on introduction to geology in a variety of field settings. Develop your observational skills at several of California's spectacular geologic attractions. Includes one-day field trips, a multi-day field trip, and short written reports.

**Prerequisite(s):** Completion of or co-enrollment in GEOL 3, GEOL 4L, and GEOL 7.

**Grading:** Credit/No Credit

**GEOL 92 - Int'l Program Studies**

1-12 unit(s)
**Grading:** Mixed Grading

**GEOL 100W - Writing Workshop**

3 unit(s)
Advanced writing, including planning and preparation of scientific reports. Improvement of skills needed for writing scientific reports, project proposals and resumes through practice and evaluation. GE Area: Z.

**Satisfies SJSU Studies Z: Written Communication II.**

**Prerequisite(s):** A3 or equivalent second semester composition course (with a grade of C- or better); completion of core GE; satisfaction of Writing Skills Test or completion of ENGL 100A / LLD 100A with C or better; and upper division standing. Or Graduate or Postbaccalaureate level.

**Pre/Corequisite(s):** Completion of or co-enrollment in GEOL 125, or instructor consent.

**Grading:** Graded

**Note(s):** Must be passed with C or better to satisfy the CSU Graduation Writing Assessment Requirement (GWAR).

**GEOL 103 - Earth Systems and the Environment**

3 unit(s)
Fundamental earth-space science concepts. Emphasis on active learning and guided inquiry. Recommended for students preparing for multiple subject credential. GE Area: R.
Satisfies SJSU Studies R: Earth & Environment.

**Prerequisite(s):** PHYS 1 or CHEM 30A, Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

**Grading:** Graded

**Note(s):** All of SJSU Studies courses require completion of the WST and upper division standing.

**GEOL 104 - Earth Science Teacher Enhancement**

0.5-3 unit(s)
A thematic approach to the study of regionally significant topics, including earthquakes, landslides and volcanoes. Development of hands-on classroom activities. Normally offered through University Continuing Education. Field trips.

**Prerequisite(s):** Teaching credential and instructor consent.

**Grading:** Credit/No Credit

**GEOL 105 - General Oceanography**

3 unit(s)
Scientific examination of the impact of oceans on global society, and human impacts on the oceans, through classroom discussions, computer exercises and field trips. GE Area: R.

*Lecture 3 hours/field trips.*

Satisfies SJSU Studies R: Earth & Environment.

**Prerequisite(s):** Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

**Grading:** Graded

**Note(s):** All of SJSU Studies courses require completion of the WST and upper division standing.

**GEOL 107 - Prehistoric Life**

3 unit(s)
Integrated interdisciplinary examination of the fossil record, including information from the fields of paleontology, genetics and cosmology that aids in the understanding of organic evolution and periodic massive extinctions. GE Area: R.

Satisfies SJSU Studies R: Earth & Environment.

**Prerequisite(s):** Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

**Grading:** Graded

**Note(s):** All of SJSU Studies courses require completion of the WST and upper division standing.

**GEOL 108 - Water, Ecosystems and Society**
3 unit(s)
Interdisciplinary investigation of hydrologic systems and their interactions with biologic communities and with society. Streams, lakes, estuaries, groundwater and the safety and protection of water resources.

Misc/Lab: Lecture 3 hours/field trips.

Prerequisite(s): Upper division standing.

Grading: Graded

GEOL 111 - Geology and the Environment

3 unit(s)
The effect of Earth processes on humans and their structures. Environmental problems related to earthquakes, landslides, minerals, energy, water and urban growth.

Lecture 3 hours/field trips.

Satisfies SJSU Studies R: Earth & Environment

Prerequisite(s): GE Area: R Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

GEOL 112 - Hazards, Risks of Earthquakes and Volcanoes

3 unit(s)
How, where and why earthquakes and volcanic eruptions occur. Analysis of hazards posed by earthquakes and volcanoes. Risks incurred by humankind due to these hazards. Minimizing risk; economic, social and political problems associated with earthquakes. GE Area: R.

Satisfies SJSU Studies R: Earth & Environment.

Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

GEOL 120 - Fundamentals of Mineralogy

3 unit(s)
Laboratory course designed to give students basic skills for identifying minerals and basic understanding of geologic processes that form minerals. Emphasis is on hand specimen and microscope identification.

Misc/Lab: Lecture 2 hours / Lab 3 hours

Prerequisite(s): GEOL 1 and GEOL 7.

Grading: Graded
GEOL 122 - Petrology

4 unit(s)
Identification of minerals and rocks in hand sample and under the microscope. Processes of formation, description, and classification of igneous, sedimentary and metamorphic rocks.

Misc/Lab: Lecture 3 hours/lab 3 hours.

Prerequisite(s): GEOL 120; completion of or co-enrollment in CHEM 1A.
Grading: Graded

GEOL 124 - Sedimentology and Stratigraphy

3 unit(s)
Study of the origin and description of sediment and sedimentary rocks; study of the formation, sequence, and correlation of stratified rocks.

Misc/Lab: Lecture 2 hours/lab 3 hours.

Satisfies SJSU Studies R: Earth & Environment

Prerequisite(s): GEOL 1 and GEOL 7.
Grading: Graded

GEOL 125 - Structural Geology

4 unit(s)
Recognition, interpretation and representation of structures of the Earth's crust. Analysis of basic principles of rock deformation.

Misc/Lab: Lecture 3 hours/lab and field 3 hours.

Prerequisite(s): MATH 19, GEOL 1, GEOL 7, GEOL 28
Grading: Graded

GEOL 127 - Tectonics

3 unit(s)
Description of large-scale features of the Earth's crust and upper mantle and the processes which formed them. Emphasis on plate tectonics and its implications for the evolution of North America.

Prerequisite(s): GEOL 100W, GEOL 122, GEOL 124, GEOL 125.
Grading: Graded

GEOL 129A - Introductory Field Geology

2 unit(s)
Introductory level field methods, field mapping and interpretation of geologic and tectonic history. Students stay at camp sites that vary from year to year. Field Trip Fees Required.

Prerequisite(s): GEOL 120, GEOL 122, GEOL 124 and GEOL 125 or permission of instructor
Grading: Graded
GEOL 129B - Advanced Field Geology

4 unit(s)
Geologic field mapping and interpretation of geologic and tectonic history. Students stay at camp sites that vary from year to year.

Misc/Lab: Lab 6-12 hours.

Course may be repeated for credit for up to 6 units.

Prerequisite(s): GEOL 122, GEOL 124, GEOL 125, or Permission of Instructor
Grading: Graded

GEOL 129C - Intermediate Field Geology

2 unit(s)
Intermediate level field methods, field mapping and interpretation of geologic and tectonic history. Students stay at camp sites that vary from year to year.

Prerequisite(s): GEOL 120, GEOL 122, GEOL 124 and GEOL 125 or permission of instructor
Grading: Graded

GEOL 130 - Marine Geology

4 unit(s)
Introduction to the geology of continental margins and ocean basins. Discussions focus on crustal structures and the effect of plate tectonics and oceanographic processes on modern marine sedimentation.

Misc/Lab: Lecture 3 hours/lab 3 hours.

Prerequisite(s): GEOL 1 or GEOL 7; GEOL 3 with instructor approval.
Grading: Graded

GEOL 134 - Geomorphology

4 unit(s)
Earth's surficial processes and landforms; effects of tectonics, climate and geology; landscape evolution. Landform interpretation using maps; surface water hydrology; applications.

Misc/Lab: Lecture 3 hours/lab 3 hours.

Prerequisite(s): GEOL 1 and GEOL 7, or instructor consent; 1 year of college calculus and physics recommended.
Grading: Graded

GEOL 135 - Geochemistry

4 unit(s)
Application of geochemical and thermodynamic principles to solution of geologic problems. Topics include: equilibrium-disequilibrium reactions, major and trace element behavior, isotope systematics and modern analytical methods.

Misc/Lab: Lecture 3 hours/lab 3 hours.
**Prerequisite(s):** GEOL 122 and CHEM 1B (or equivalent).
**Grading:** Graded

**GEOL 137 - Introduction to GPS/GIS for Geologic Applications**

4 unit(s)
Introduction to digital geologic mapping and analysis using Trimble GPS and ArcView GIS.

*Misc/Lab: Lecture 2 hours/lab 3 hours.*

**Prerequisite(s):** GEOL 1 and GEOL 7, or instructor consent. Computer literacy assumed.
**Grading:** Graded

**GEOL 138 - Hydrogeology**

4 unit(s)
Geological principles of the occurrence, accumulation and migration of water; groundwater as a manageable resource; groundwater geochemistry and contaminant transport.

*Lecture 3 hours/lab 3 hours.*

**Prerequisite(s):** GEOL 125 or instructor consent. Recommend: MATH 32 or MATH 32X, and GEOL 135.
**Grading:** Graded

**GEOL 140 - Principles of Engineering Geology**

4 unit(s)
Qualitative and quantitative analysis of geologic factors influencing site selection, development and use; methods of data collection, interpretation and presentations.

*Misc/Lab: Lecture 3 hours/lab 3 hours.*

**Prerequisite(s):** GEOL 125.
**Grading:** Graded

**GEOL 142 - Paleontology**

4 unit(s)
Study of the major groups of invertebrate fossils and their use in geological studies; principles of stratigraphy, including seismic stratigraphy.

*Misc/Lab: Lecture 2 hours/lab and field trips 3 hours.*

**Prerequisite(s):** GEOL 1 and GEOL 7.
**Grading:** Graded

**GEOL 143 - Active Tectonics**

4 unit(s)
This course will introduce students to the interdisciplinary field of Active Tectonics. The aim of the course is to provide students with a comprehensive and quantitative understanding of the tectonic and surficial processes that shape the
Earth’s surface.

Misc/Lab: Lecture 4 hours/Lab 3 hours

**Prerequisite(s):** GEOL 1, GEOL 7, and GEOL 28. GEOL 137 recommended.
**Grading:** Graded

**GEOL 145 - Earth System Science**

*4 unit(s)*
Exploration of the interconnected systems and processes that have driven Earth’s evolution over time and continue to function today. Capstone course that includes course projects and labs.

**Prerequisite(s):** GEOL 1, GEOL 7 or instructor consent
**Corequisite(s):** One semester of Chemistry
**Grading:** Graded

**GEOL 147 - Introduction to Applied Geophysics**

*4 unit(s)*
Introduction to modern geophysical techniques with emphasis and environmental applications. Field techniques and case histories.

Misc/Lab: Lecture 2 hours/lab 3 hours.

**Prerequisite(s):** PHYS 2A and PHYS 2B (or equivalent). GEOL 100W. GEOL 1, GEOL 7
**Grading:** Graded

**GEOL 150 - Field Studies in Natural History**

*1-2 unit(s)*
Field courses given on site, typically covering general ecology, botany, geology, zoology and specialized natural areas such as Baja California, Death Valley, seacoasts and mountains. Repeatable for up to a total of 3 units of credit when location or content changes.

*Satisfies B3: Laboratory Science*

**Grading:** Graded

**Note(s):** Not an elective in the department majors.

**GEOL 168A - Global Climate Change I**

*6 unit(s)*
Scientific and social scientific approaches to the process and effects of global climate change: Climate changes in the Earth’s past, interactions between climate and life, anthropogenic climate change, socioeconomic contexts of environmental effects, cultural influences on climate change mitigation strategies.

**Prerequisite(s):** Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
**Grading:** Graded
Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

GEOL 168B - Global Climate Change II

3 unit(s)
Scientific and social scientific approaches to the process and effects of global climate change: Climate changes in the Earth's past, interactions between climate and life, anthropogenic climate change, socioeconomic contexts of environmental effects, cultural influences on climate change mitigation strategies.

Satisfies SJSU Studies R+S+V: Earth & Environment + Self, Society & Equality in the U.S. + Culture, Civilization & Global Understanding

Prerequisite(s): COMM 168A / ENVS 168A / GEOL 168A / HUM 168A / METR 168A; Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

GEOL 174 - Hazardous Materials

3 unit(s)
Review of current methods and procedures for management of hazardous materials and hazardous wastes; analysis of contaminated systems and remedial actions.

Prerequisite(s): PHYS 51, PHYS 52, or PHYS 71 and CHEM 1A or instructor consent.
Grading: Graded

GEOL 180 - Individual Studies

1-3 unit(s)
Advanced lab or field work.

Prerequisite(s): Instructor consent. Not available to Open University Students
Grading: Credit/No Credit

GEOL 184 - Directed Reading

1-3 unit(s)
Reading of books, journals and papers chosen to fill gaps in training. Evaluation through weekly reports and conference.

Prerequisite(s): Not available to Open University Students
Grading: Credit/No Credit

GEOL 192 - Int'l Program Studies

1-12 unit(s)
Grading: Mixed Grading
GEOL 204 - Earth Systems Science for Teachers

3 unit(s)
Peer teaching and leadership instruction in earth science. Demonstrations, classroom activities, field projects and teaching strategies for K-12 teacher groups.

Prerequisite(s): Teaching credential and instructor consent.
Grading: Graded

GEOL 213 - Advanced Igneous and Metamorphic Petrology

4 unit(s)
Igneous and metamorphic processes and the evolution of the lithosphere. Application of field, petrographic and chemical data to models of petrogenesis. Laboratory emphasizes microscope studies and computer modeling.

Misc/Lab: Lecture 3 hours/lab 3 hours; field trips.

Satisfies GWAR: Graduation Writing Assessment Requirement

Prerequisite(s): GEOL 121 (or equivalent).
Grading: Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

GEOL 214 - Sedimentary Petrology and Petrography

4 unit(s)
Petrographic study of sedimentary rocks with application of petrographic information to reconstructions of source terranes, depositional conditions and diagenesis. Discussion of nature and origin of carbonate and terrigenous components is emphasized.

Misc/Lab: Lecture 3 hours/lab 3 hours.

Prerequisite(s): GEOL 124 and GEOL 213 or instructor consent.
Grading: Graded

GEOL 222 - Advanced Sedimentary Geology

4 unit(s)
Analysis of sedimentary facies, patterns of facies architecture and major controls on evolution of sedimentary basins.

Misc/Lab: Lecture 3 hours/lab 3 hours; field trips.

Prerequisite(s): GEOL 123 and GEOL 127.
Grading: Graded

GEOL 231 - Advanced Structural Geology

4 unit(s)
Analysis of deformed rocks with emphasis on deformation mechanisms, small-scale structures, shear zones, faults and folds. Techniques of strain analysis and analyzing structure on maps are emphasized in the laboratory.
Misc/Lab: Lecture 3 hours/lab 3 hours.

Satisfies GWAR: Graduation Writing Assessment Requirement

Prerequisite(s): GEOL 125.
Grading: Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

GEOL 234 - Advanced Geomorphology

4 unit(s)
We will investigate the role of geomorphology in affecting large-scale processes such as mountain uplift and the global climate. Coursework will include the manipulation of data sets from the Himalayas, topographic analysis of the Sierra Nevada, and modelling with Matlab.

Misc/Lab: Lecture 3 hours/lab 3 hours; 3-day field trip required.

Satisfies GWAR: Graduation Writing Assessment Requirement

Prerequisite(s): GEOL 134 or equivalent
Grading: Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

GEOL 237 - Advanced GIS/GPS Mapping

4 unit(s)
Advanced methods of ArcGIS mapping and analysis using published digital datasets and/or student-generated Differential GPS files. Topics vary, depending on student interest, but are generally limited to natural sciences.

Misc/Lab: Lecture 4 hour/Lab 3 hours

Prerequisite(s): GEOL 137 or instructor consent.
Grading: Graded

GEOL 238 - Advanced Hydrogeology

4 unit(s)
Numerical methods in groundwater modeling, vadose zone monitoring and transport and geochemistry of natural and contaminated waters.

Misc/Lab: Lecture 3 hours/lab 3 hours; field trips.

Satisfies GWAR: Graduation Writing Assessment Requirement

Prerequisite(s): GEOL 138 or instructor consent.
Grading: Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

GEOL 242 - Advanced Paleontology
The lecture portion of this course will be conducted as a seminar; students will read and discuss classic and important newer papers on macroevolutionary theory and paleobiology. In the lab portion of this course, students will use fossil samples to develop and test scientific hypotheses that will be part of a semester-long project.

Misc/Lab: Lecture 4 hours/Lab 3 hours.

**Prerequisite(s):** Suitable background in geology or evolutionary biology.

**Grading:** Graded

---

GEOL 255 - Advanced Geology

4 unit(s)
Selected topics in geology. Topics change with each offering.

Misc/Lab: Lecture 3 hours/lab 3 hours.

Course may be repeated for credit for up to 8 units.

**Prerequisite(s):** Suitable background in geology.

**Grading:** Graded

---

GEOL 285 - Seminar

2 unit(s)
Fundamental problems in geology. Topics change with each offering. May be repeated when content changes.

Misc/Lab: Discussion 2 hours.

Course may be repeated for credit for up to 8 units.

**Prerequisite(s):** Instructor consent.

**Grading:** Graded

---

GEOL 298 - Research

1-4 unit(s)
Advanced individual study in geology.

**Prerequisite(s):** Not available to Open University Students.

**Grading:** Mandatory CR/NC/RP

---

GEOL 299 - Master's Thesis

1-4 unit(s)

**Prerequisite(s):** Admission to candidacy for the master's degree. Not available to Open University Students.

**Grading:** Mandatory CR/NC/RP

---

GEOL 1290R - Culminating Experience Supervision

1 unit(s)
Continued work on thesis.
Prerequisite(s): Outstanding RP grade in a preceding semester in a thesis class
Grading: CR/NC, No Degree Credit

Overview

One of the oldest intellectual disciplines, mathematics plays a key role in many fields: cryptography, computer graphics, operations research, engineering and science. Students majoring in mathematics learn to communicate mathematical ideas effectively and to use basic computational skills, mathematical models and technology to solve practical problems. The Department of Mathematics and Statistics offers both undergraduate and graduate programs that prepare our alumni to work in industry and to teach in secondary schools or community colleges. In addition to a BA in mathematics, we offer a BS in applied mathematics that trains students for more technical careers and incorporates student research projects at the Center for Applied Mathematics, Computation and Statistics (CAMCOS). We also offer four master's degrees: an MS and an MA in mathematics.

Honors Program

The requirements for mathematics majors to graduate with departmental honors are: (1) at least a 3.0 G.P.A. overall, (2) at least a 3.5 G.P.A. in the major, (3) Completion of MATH 180H (Individual Studies for Honors).

Restriction on Enrollment for Credit

Enrollment for credit in MATH 10, MATH 12, MATH 18A, MATH 70, MATH 71, MATH 101, MATH 105, MATH 106, MATH 107A, and MATH 107B will not be allowed for students who have received credit in MATH 19, MATH 30, MATH 31, MATH 32, unless the particular course in question is required for the student's major, minor or credential requirements.

Precalculus Proficiency Assessment (PPA)

Many students who wish to enroll in MATH 30, MATH 30X, MATH 71 or MATH 71X are required to take the Precalculus Proficiency Assessment (PPA). Information regarding the PPA can also be found in the Mathematics and Statistics Department website.

Undergraduate

Applied Mathematics, Applied and Computational Mathematics Concentration, BS

This degree is recommended for students who wish to work in the research and development area of industry. This program also prepares a student for graduate study in applied mathematics, numerical analysis, or operations research.

The concentration in Applied and Computational Mathematics, offered by the Department of Mathematics and Statistics, provides a solid foundation in classical applied mathematics as well as computational mathematics, which could be informally described as "how to employ mathematics on computers wisely." A graduate could seek direct employment assisting a group of scientists with the formulation and solution of problems. There is a great need in local and national technical industries for people with sufficiently strong mathematical knowledge to participate on such teams. For example, modern techniques for solving partial differential equations are very sophisticated; the best method in a given situation depends on the properties of the model. Once a numerical approximation has been
formulated, the techniques to solve that, and the commercial software available to do it, again require informed decisions.

24 upper division units of mathematics are required for this degree. If upper division requirements are fulfilled using transferred lower division courses, then additional upper division math courses will need to be taken to obtain the required number of upper division units.

Summary of Degree Units

University Graduation Requirements 47

Major Preparation 25

Major Core Requirements 28

Specialized Tracks 15

University Electives 5

Total 120

University Requirements for Graduation

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Undergraduate Graduation Requirements section of the Policies and Procedures.

Program Roadmaps

The 4-Year Roadmap is available online. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Degrees (ADT) Pathways are also available online.

Major-Specific Graduation Requirements

All courses in the Preparation and Required in the Major must be completed with a grade of "C- or better", and the following Preparation for the Major course with a grade of "C or better": MATH 100W

General Education/American Institution Requirements

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

University Requirements (47 units)

Core Lower Division General Education (30 units)

Of the 39 units required by the university, 9 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

Upper Division General Education (9 units)
Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions (6 units)

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B, HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Complete One Sequence From:

African American Studies (6 units)

- AFAM 2A - African Americans and the Development of America's History and Government 3 unit(s) (D2)
- AFAM 2B - African Americans and the Development of America's History and Government 3 unit(s) (D3+US123)

Asian American Studies (6 units)

- AAS 33A - Asian Americans in U.S. History I 3 unit(s) (D2)
- AAS 33B - Asian Americans in U.S. History II 3 unit(s) (D3+US123)

Chicana and Chicano Studies (6 units)

- CCS 10A - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D2)
- CCS 10B - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D3+US123)

U.S. History and Government (6 units)

- HIST 15 - Essentials of U.S. History 3 unit(s) (D2+US1)
- POLS 15 - Essentials of U.S. & California Government 3 unit(s) (D3+US23)

Physical Education (2 units)

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Major Preparation (25 units)

- CS 46A - Introduction to Programming 4 unit(s)
- CS 46B - Introduction to Data Structures 4 unit(s)
- MATH 100W - Technical Writing Workshop 3 unit(s) (Z)
• 8 units from Economics, Science or Engineering. The choices must be approved by the Mathematics and Statistics Department 8 unit(s)

• 6 additional upper division units from Math, CS, Science, Engineering, Economics. All of these units can be in MATH 203 or similar applied mathematics projects. The choices must be approved by the Mathematics and Statistics Department 6 unit(s)

Major Requirements (43 units)

Lower Division Requirements (19 units)

• MATH 30 - Calculus I 3 unit(s) (B4)
  MATH 30X may be used instead of MATH 30.

• MATH 31 - Calculus II 4 unit(s) (B4)
  MATH 31X may be used instead of MATH 31.

• MATH 32 - Calculus III 3 unit(s) (B4)
  MATH 32X may be used instead of MATH 32.

• MATH 34 - Ordinary Differential Equations 3 unit(s)

• MATH 39 - Linear Algebra I 3 unit(s)

• MATH 42 - Discrete Mathematics 3 unit(s)
  MATH 42X may be used instead of MATH 42.

Upper Division Requirements (24 units)

• MATH 143M - Numerical Analysis and Scientific Computing 3 unit(s)

• MATH 161A - Applied Probability and Statistics I 3 unit(s)

Complete One Course From:

• MATH 134 - Ord. Diff. Eqns and Dynamical Systems 3 unit(s)

• MATH 170 - Mathematical Modeling for the Life Sciences 3 unit(s)

• MATH 177 - Linear and Non-Linear Optimization 3 unit(s)

Specialized Track (15 units)

Complete one of the following two tracks. Tracks are a cluster of courses used for advising purposes. Tracks will not appear on transcripts or diplomas. Please see an advisor in the Mathematics and Statistics department for more details.

Applied Math Track

• MATH 132 - Advanced Calculus 3 unit(s)

• MATH 133B - Partial Differential Equations 3 unit(s)

• MATH 138 - Complex Variables 3 unit(s)

• MATH 143C - Numerical Analysis and Scientific Computing 3 unit(s)

Complete One Course From:
- MATH 126 - Theory of Numbers 3 unit(s)
- MATH 142 - Introduction to Combinatorics 3 unit(s)
- MATH 146 - An Introduction to Mathematical Cryptography 3 unit(s)
- MATH 179 - Introduction to Graph Theory 3 unit(s)

Applied Discrete Math Track

- MATH 142 - Introduction to Combinatorics 3 unit(s)
- MATH 179 - Introduction to Graph Theory 3 unit(s)

Complete One Course From:

- MATH 127 - Applied and Industrial Algebra 3 unit(s)
- MATH 163 - Probability Theory 3 unit(s)

Complete Two Courses (Not Counted Above):

- MATH 127 - Applied and Industrial Algebra 3 unit(s)
- MATH 129B - Linear Algebra II 3 unit(s)
- MATH 143C - Numerical Analysis and Scientific Computing 3 unit(s)
- MATH 143M - Numerical Analysis and Scientific Computing 3 unit(s)
- MATH 146 - An Introduction to Mathematical Cryptography 3 unit(s)
- MATH 161B - Applied Probability and Statistics II 3 unit(s)
- MATH 162 - Statistics for Bioinformatics 3 unit(s)
- MATH 163 - Probability Theory 3 unit(s)
- MATH 177 - Linear and Non-Linear Optimization 3 unit(s)
- CS 116A - Introduction to Computer Graphics 3 unit(s)
- CS 146 - Data Structures and Algorithms 3 unit(s)
- CS 151 - Object-Oriented Design 3 unit(s)
- CS 155 - Introduction to the Design and Analysis of Algorithms 3 unit(s)
- CS 157A - Introduction to Database Management Systems 3 unit(s)
- CS 159 - Introduction to Parallel Processing 3 unit(s)

University Electives (5 units)

Total Units Required (120 units)

Applied Mathematics, Statistics Concentration, BS

This degree program is recommended for students who wish to pursue a career in statistics. This program also prepares a student for graduate study in probability and statistics.

The concentration in Statistics, offered by the Department of Mathematics and Statistics, is appropriate for students pursuing a career involving the collection and analysis of numerical data, the use of statistical techniques to predict population growth or economic conditions, the use of statistics to analyze medical, environmental, legal and social problems, or to help business managers make decisions and carry out quality control. The statistics concentration also provides a solid foundation for students who plan to become actuaries.
33 upper division units of mathematics are required for this degree. If upper division requirements are fulfilled using transferred lower division courses, then additional upper division math courses will need to be taken to obtain the required number of upper division units.

Complete One Sequence From:

African American Studies (6 units)

- AFAM 2A - African Americans and the Development of America's History and Government 3 unit(s) (D2)
- AFAM 2B - African Americans and the Development of America's History and Government 3 unit(s) (D3+US123)

Asian American Studies (6 units)

- AAS 33A - Asian Americans in U.S. History I 3 unit(s) (D2)
- AAS 33B - Asian Americans in U.S. History II 3 unit(s) (D3+US123)

Chicana and Chicano Studies (6 units)

- CCS 10A - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D2)
- CCS 10B - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D3+US123)

U.S. History and Government (6 units)

- HIST 15 - Essentials of U.S. History 3 unit(s) (D2+US1)
- POLS 15 - Essentials of U.S. & California Government 3 unit(s) (D3+US23)

Physical Education (2 units)

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Major Preparation (17 units)

- MATH 100W - Technical Writing Workshop 3 unit(s) (Z)
- 8 units from Economics, Business, Science, or Engineering. The choices must be approved by the Mathematics and Statistics Department 8 unit(s)
- 6 additional upper division units from Math, CS, Science, Engineering, Economics, or Business. All of these units can be in MATH 203 or similar applied mathematics projects. The choices must be approved by the Mathematics and Statistics Department 6 unit(s)

Major Requirements (49 units)
Lower Division Requirements (16 units)

- MATH 30 - Calculus I 3 unit(s) (B4)
  *MATH 30X may be used instead of MATH 30.
- MATH 31 - Calculus II 4 unit(s) (B4)
  *MATH 31X may be used instead of MATH 31.
- MATH 32 - Calculus III 3 unit(s) (B4)
  *MATH 32X may be used instead of MATH 32.
- MATH 39 - Linear Algebra I 3 unit(s)
- MATH 42 - Discrete Mathematics 3 unit(s)
  *MATH 42X may be used instead of MATH 42.

Upper Division Requirements (33 units)

- MATH 161A - Applied Probability and Statistics I 3 unit(s)
- MATH 161B - Applied Probability and Statistics II 3 unit(s)
- MATH 163 - Probability Theory 3 unit(s)
- MATH 164 - Mathematical Statistics 3 unit(s)
- MATH 167R - Statistical Programming with R 3 unit(s)

Complete Eighteen Units From:

*Only one of MATH 131A or MATH 132 may be taken*

- MATH 112 - Vector Calculus 3 unit(s)
- MATH 131A - Introduction to Analysis 3 unit(s)
- MATH 132 - Advanced Calculus 3 unit(s)
- MATH 142 - Introduction to Combinatorics 3 unit(s)
- MATH 143C - Numerical Analysis and Scientific Computing 3 unit(s)
- MATH 143M - Numerical Analysis and Scientific Computing 3 unit(s)
- MATH 150 - Theory of Interest 3 unit(s)
- MATH 162 - Statistics for Bioinformatics 3 unit(s)
- MATH 170 - Mathematical Modeling for the Life Sciences 3 unit(s)
- MATH 178 - Mathematical Modeling 3 unit(s)

University Electives (7 units)

Total Units Required (120 units)

Mathematics, BA

The BA - Mathematics, offered by the Department of Mathematics and Statistics, is recommended for students who enjoy problem solving and would like to apply problem solving skills along with communication and analyzing skills in a future career. This degree also provides an excellent background for graduate work in mathematics and other disciplines including law and medicine as well as engineering and science.
The degree requires 30 upper division units of mathematics and computer science. If upper division mathematics and computer science requirements are satisfied using lower division transferred courses, then additional upper division math courses will need to be taken to obtain the required number of upper division units.

Summary of Degree Units

University Graduation Requirements 44

Major Preparation 12-15

Major Requirements 46

University Electives 15-18

Total 120

University Requirements for Graduation

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Undergraduate Graduation Requirements section of the Policies and Procedures.

Program Roadmaps

The 4-Year Roadmap is available online. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Degrees (ADT) Pathways are also available online.

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the General Education (GE) section to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

All courses in the Preparation and Required in the Major must be completed with a grade of "C- or better", and the following Preparation for the Major course with a grade of "C or better": MATH 100W

General Education/American Institution Requirements

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

University Requirements (44 units)

Core Lower Division General Education (27 units)

Of the 39 units required by the university, 12 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.
Note: Students who have completed the ADT Transfer degree (under SB 1440) for this major will have completed all lower division GE requirements and should follow the 60 unit guarantee roadmap. Meet with an advisor prior to registering for your first semester for the 60 unit roadmap or specific questions.

Upper Division General Education (9 units)

Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions (6 units)

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B, HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

A grade of C or better (C- not accepted) is required to meet graduation requirement.
Major Preparation (12-15 units)

- MATH 100W - Technical Writing Workshop 3 unit(s) (Z)
- PHYS 50 - General Physics/Mechanics and one of PHYS 51, PHYS 52, or MATH 161A (or with prior approval, 6 units of upper division mathematics-related courses from other departments may be substituted). 7-8 units (B1+B3)

Complete One Course From:

- MATH 50 - Scientific Computing I 2 unit(s)
- MATH 167R - Statistical Programming with R 3 unit(s)
- CS 46A - Introduction to Programming 4 unit(s)
- CS 49C - Programming in C 3 unit(s)
- CS 49J - Programming in Java 3 unit(s)

Major Requirements (46 units)

Core Courses (16 units)

- MATH 30 - Calculus I 3 unit(s) (B4) MATH 30X may be used instead of MATH 30.
- MATH 31 - Calculus II 4 unit(s) (B4) MATH 31X may be used instead of MATH 31.
- MATH 32 - Calculus III 3 unit(s) (B4) MATH 32X may be used instead of MATH 32.
- MATH 39 - Linear Algebra I 3 unit(s)
- MATH 42 - Discrete Mathematics 3 unit(s) MATH 42X may be used instead of MATH 42.

Upper Division Core (15 units)

- MATH 108 - Introduction to Abstract Mathematics and Proofs 3 unit(s)
- MATH 128A - Abstract Algebra I 3 unit(s)
- MATH 131A - Introduction to Analysis 3 unit(s)

Complete One Course From:

- MATH 112 - Vector Calculus 3 unit(s)
- MATH 113 - Differential Geometry 3 unit(s)
- MATH 115 - Modern Geometry and Transformations 3 unit(s)
- MATH 138 - Complex Variables 3 unit(s)

Complete One Course From:

- MATH 128B - Abstract Algebra II 3 unit(s)
- MATH 129B - Linear Algebra II 3 unit(s)
- MATH 131B - Introduction to Real Variables 3 unit(s)
Upper Division Mathematics Elective (15 units)

Complete five courses (not counted above) from:
- MATH 104 - History of Mathematics 3 unit(s)
- MATH 112 - Vector Calculus 3 unit(s)
- MATH 113 - Differential Geometry 3 unit(s)
- MATH 115 - Modern Geometry and Transformations 3 unit(s)
- MATH 126 - Theory of Numbers 3 unit(s)
- MATH 128B - Abstract Algebra II 3 unit(s)
- MATH 129B - Linear Algebra II 3 unit(s)
- MATH 131B - Introduction to Real Variables 3 unit(s)
- MATH 132 - Advanced Calculus 3 unit(s)
- MATH 133B - Partial Differential Equations 3 unit(s)
- MATH 134 - Ord. Diff. Eqns and Dynamical Systems 3 unit(s)
- MATH 138 - Complex Variables 3 unit(s)
- MATH 142 - Introduction to Combinatorics 3 unit(s)
- MATH 143C - Numerical Analysis and Scientific Computing 3 unit(s)
- MATH 143M - Numerical Analysis and Scientific Computing 3 unit(s)
- MATH 146 - An Introduction to Mathematical Cryptography 3 unit(s)
- MATH 150 - Theory of Interest 3 unit(s)
- MATH 161A - Applied Probability and Statistics I 3 unit(s)
- MATH 161B - Applied Probability and Statistics II 3 unit(s)
- MATH 162 - Statistics for Bioinformatics 3 unit(s)
- MATH 163 - Probability Theory 3 unit(s)
- MATH 164 - Mathematical Statistics 3 unit(s)
- MATH 177 - Linear and Non-Linear Optimization 3 unit(s)
- MATH 179 - Introduction to Graph Theory 3 unit(s)
- MATH 180 - Individual Studies 1-4 unit(s) (Requires prior approval)
- MATH 180H - Individual Studies for Honors 3 unit(s) (Requires prior approval)
- MATH 180R - Undergraduate Research in Mathematics 1-4 unit(s) (Requires prior approval)
- MATH 203 - Applied Mathematics, Computation, and Statistics Projects 3 unit(s)

Complete One Course From:
- MATH 170 - Mathematical Modeling for the Life Sciences 3 unit(s)
- MATH 178 - Mathematical Modeling 3 unit(s)

University Electives (15-18 units)

Total Units Required (120 units)

Mathematics, Integrated Teacher Education Program, BA

This integrated major is designed for students interested in teaching mathematics in high school or middle school. The course work, satisfies requirements for (1) a BA in Mathematics, (2) a single subject teaching credential in mathematics (SSC), and (3) an education specialist instruction credential in mild to moderate disabilities (ESC).

**Major Core Requirements** 40

**Additional Requirements** 32

**Total** 120

**University Requirements for Graduation**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Undergraduate Graduation Requirements section of the Policies and Procedures.

**Program Roadmaps**

The 4-Year Roadmap is available online. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Degrees (ADT) Pathways are also available online.

**Major-Specific Graduation Requirements**

All courses in the Preparation and Required in the Major must be completed with a grade of "C- or better", and the following Preparation for the Major course with a grade of "C or better": ENGR 100W.

All credential courses in the Preparation and Required in the Major must be completed with a grade of "B" or better.

**General Education/American Institution Requirements**
Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

University Requirements (29 units)

Core Lower Division General Education (21 units)
Of the 39 units required by the university, 18 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C-“ or better to meet the requirement. Consult with major advisor for details.

Upper Division General Education
Of the 9 units required by the university, 9 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions (6 units)
The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B, HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Complete One Sequence From:

African American Studies (6 units)
- AFAM 2A - African Americans and the Development of America’s History and Government 3 unit(s) (D2)
- AFAM 2B - African Americans and the Development of America’s History and Government 3 unit(s) (M7)

Asian American Studies (6 units)
- AAS 33A - Asian Americans in U.S. History I 3 unit(s) (D2)
- AAS 33B - Asian Americans in U.S. History II 3 unit(s) (M7)

U.S. History and Government (6 units)
- HIST 15 - Essentials of U.S. History 3 unit(s) (M12)
- POLS 15 - Essentials of U.S. & California Government 3 unit(s) (M11)

Chicana and Chicano Studies (6 units)
- CCS 10A - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D2)
- CCS 10B - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (M7)

Physical Education (2 units)
Graduation Writing Assessment Requirement
At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).
A grade of C or better (C- not accepted) is required to meet graduation requirement.

Major Preparation (19-21 units)
- CHAD 60 - Child Development 3 unit(s) (E)
- ENGR 100W - Engineering Reports 3 unit(s) (ZR)
- MTED 184X - Student Teaching Phase I 4 unit(s)
- PHYS 50 - General Physics/Mechanics 4 unit(s) (B1B3)

Complete One Course From:
- CS 22A - Python Programming for Non Majors I 3 unit(s)
- CS 46A - Introduction to Programming 4 unit(s)
- CS 49C - Programming in C 3 unit(s)
- CS 49J - Programming in Java 3 unit(s)
- MATH 50 - Scientific Computing I 2 unit(s)
- MATH 167R - Statistical Programming with R 3 unit(s)

Complete One Course From:
- CCS 30 - Race and Ethnicity in Public Space 3 unit(s) (D1)
- SOCI 1 - Introduction to Sociology 3 unit(s) (D1)

Major Requirements (72 units)

Lower Division Courses (16 units)
- MATH 30 - Calculus I 3 unit(s) (B4) (MATH 30P or MATH 30PL may be used instead of MATH 30.)
- MATH 31 - Calculus II 4 unit(s) (B4)
- MATH 32 - Calculus III 3 unit(s) (B4)
- MATH 39 - Linear Algebra I 3 unit(s)
- MATH 42 - Discrete Mathematics 3 unit(s)

Upper Division Core (24 units)
- EDSE 102 - Speech, Language & Typical, Atypical Dev 3 unit(s) (S)
- EDSE 124 - Methodologies for Eng Learners w/out Dis 3 unit(s) (V)
- MATH 102 - Secondary School Mathematics 3 unit(s)
- MATH 108 - Introduction to Abstract Mathematics and Proofs 3 unit(s)
- MATH 115 - Modern Geometry and Transformations 3 unit(s)
- MATH 128A - Abstract Algebra I 3 unit(s)
Additional Requirements (32 units)
- EDEL 294 - Research and Practices in Health and Special Education 3 unit(s)
- EDSE 215 - Assessment And Evaluation of Individuals with Mild/Moderate Disabilities 3 unit(s)
- EDSE 218B - ASD: Mild to Moderate Disabilities 3 unit(s)
- EDSE 279 - Managing Behavior and Emotional Problems of Students in Special Education 3 unit(s)
- MATH 161A - Applied Probability and Statistics I 3 unit(s)
- MATH 161B - Applied Probability and Statistics II 3 unit(s)
- MTED 184Y - Student Teaching II - Classroom Teaching 4-6 unit(s) (4 units required)
- MTED 184Z - Student Teaching III - Classroom Teaching 4-6 unit(s) (4 units required)

Complete One Course From:
- MATH 126 - Theory of Numbers 3 unit(s)
- MATH 201B - Mathematics for Secondary Teachers 3 unit(s)

Complete One Course From:
- MATH 128B - Abstract Algebra II 3 unit(s)
- MATH 129B - Linear Algebra II 3 unit(s)
- MATH 131B - Introduction to Real Variables 3 unit(s)

Total Units Required (120-122 units)

Master

Mathematics, MA

This degree, offered by SJSU's Department of Mathematics and Statistics is recommended for future community college teachers and for students who plan to continue toward the PhD in mathematics.

Requirements for Admission

Candidates must meet all the university Graduate Admissions. Students can be admitted in either classified or conditionally classified standing. If an applicant's preparation for advanced graduate work is considered inadequate to meet the course prerequisites or other departmental requirements, the conditions will include taking preparatory courses to meet these requirements. Such courses will not count as part of the master's degree program requirements.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE.
Classified Standing

To enter this program with classified standing, a student must meet the minimum requirements for admission to the Graduate Division, have completed 18 semester units of upper-division undergraduate mathematics with a GPA of at least 3.0, and have one to three letters of recommendation submitted on his or her behalf. The coursework must be acceptable toward a bachelor's degree in mathematics and may not be counted toward the MA degree.

Conditionally Classified Standing

A student who meets the minimum requirements for admission to the Graduate Division but does not satisfy the mathematics coursework requirements stated above may be admitted as a conditionally classified student. Eligibility is determined on a case-by-case basis. The individual admission letter will explain the required terms and conditions for attaining classified standing. After arrival at SJSU, a conditionally accepted student must complete additional coursework to make up the unit deficiency in order to achieve classified status. These make-up units will not be included in the MA degree unit requirement total.

Requirements for Advancement to Graduate Candidacy

To advance to candidacy in the MA in Mathematics degree, a student must meet the university candidacy requirements, as stated in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations (GAPE) website at www.sjsu.edu/gape.

The student must complete the Petition for Advancement to Graduate Candidacy form. This form lists, among other things, all the coursework to be counted toward the master's degree. After the form has been signed by the student's thesis or writing project director (if applicable) and the Graduate Coordinator, it is forwarded to GAPE for final approval. Any subsequent changes to the student's program require approval from GAPE.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Graduation Writing Assessment Requirement

Students must pass the Graduation Writing Assessment Requirement (GWAR).

Program Graduation Requirements
Culminating Experience

Students must choose one of three options: The Plan A (Thesis), Plan B (Project), or Plan B (Comprehensive Examination).

Plan A (Thesis)

A student who selects the Thesis option must find a willing tenured or tenure-track faculty member to serve as the thesis advisor, and complete a thesis under that advisor's supervision. The thesis must be reviewed and approved by a committee composed of the advisor and two other faculty members chosen by the student in consultation with the advisor. The student must give a public presentation on the thesis, which is followed by an oral examination (defense) conducted by the committee. Theses must be filed with the College of Graduate Studies, subject to the rules and deadlines established by that office.

Thesis students must enroll in MATH 299 - Master's Thesis (3 units). Students receive credit when the thesis is completed, successfully defended, and all committee members have signed off on it. Students who do not complete their theses during the semester in which they are enrolled in MATH 299 will receive a grade of "RP" for that course. If all other degree requirements have been completed, students must subsequently enroll in MATH 1290R in compliance with university regulations until the thesis is completed, defended, and approved by Graduate Studies.

Plan B (Project)

A student who selects the Project option must find a willing tenured or tenure-track faculty member to serve as the project advisor, and complete a written project under that advisor's supervision. The project must be reviewed and approved by a committee composed of the advisor and two other faculty members chosen by the student in consultation with the advisor. The student must give a public presentation on the project, which is followed by an oral examination (defense) conducted by the committee.

Students choosing the Plan B (Project) option must enroll in MATH 298 - Special Study (3 units). Students receive credit when the writing project is completed, successfully defended, and all committee members have signed off on it. Students who do not complete their projects during the semester in which they are enrolled in MATH 298 will receive a grade of "RP" for that course. If all other degree requirements have been completed, students must subsequently sign up for MATH 1290R in compliance with university regulations until the writing project is completed and defended.

Plan B (Comprehensive Examination)

Students who select this option must pass two written comprehensive examinations. One examination will be in Higher Algebra (MATH 221A and MATH 221B). The second exam will be in Analysis (MATH 231A and MATH 231B).

Students choosing the Plan B (Comprehensive Exam) option must enroll in an additional elective (3 units) selected in consultation with the program graduate advisor. Students complete the program Culminating Experience when they pass both exams. Students who successfully complete all other program requirements but not one or both exams must subsequently enroll in MATH 1290R for the following semester or semesters in compliance with the university requirement for continuous enrollment until both exams have been passed in one sitting.

Master's Requirements (33 units)

Core Courses (21 units)

- CS 200W - Graduate Technical Writing 3 unit(s) (GWAR)
- MATH 221A - Higher Algebra I 3 unit(s)
- MATH 221B - Higher Algebra II 3 unit(s)
• MATH 231A - Real Analysis 3 unit(s)
• MATH 231B - Functional Analysis 3 unit(s)

Complete Two Courses From:

• MATH 229 - Advanced Matrix Theory 3 unit(s)
• MATH 238 - Advanced Complex Variables 3 unit(s)
• MATH 275A - Topology 3 unit(s)
• MATH 279A - Graph Theory 3 unit(s)

Electives (6 units)

Complete two courses from:

• MATH 203 - Applied Mathematics, Computation, and Statistics Projects 3 unit(s)
• MATH 211A - Geometry of Projective Spaces 3 unit(s)
• MATH 213A - Introduction to Smooth Manifolds 3 unit(s)
• MATH 213B - Introduction to Riemannian Geometry 3 unit(s)
• MATH 226 - Theory of Numbers 3 unit(s)
• MATH 229 - Advanced Matrix Theory 3 unit(s)
• MATH 233A - Applied Mathematics I 3 unit(s)
• MATH 234 - Advanced Dynamical Systems 3 unit(s)
• MATH 235 - Wavelets and their Applications 3 unit(s)
• MATH 238 - Advanced Complex Variables 3 unit(s)
• MATH 243A - Advanced Numerical Analysis 3 unit(s)
• MATH 243B - Advanced Topics in Numerical Analysis 3 unit(s)
• MATH 243M - Numerical Linear Algebra 3 unit(s)
• MATH 261A - Regression Theory and Methods 3 unit(s)
• MATH 263 - Stochastic Processes 3 unit(s)
• MATH 275A - Topology 3 unit(s)
• MATH 275B - Advanced Topics in Topology 3 unit(s)
• MATH 279A - Graph Theory 3 unit(s)
• MATH 279B - Advanced Graph Theory 3 unit(s)
• MATH 285M - Advanced Topics in Pure Mathematics 3 unit(s)
• MATH 297A - Preparation for Writing Project, Research Project or Thesis 3 unit(s)

Additional Electives (3 units)

Complete an additional 100-level or 200-level courses selected in consultation with MA Mathematics advisor. Elective courses may include a maximum of 3 units of MATH 280 and/or MATH 297A.

Courses excluded: MATH 100W, MATH 101, MATH 102, MATH 105, MATH 106, MATH 107A, MATH 107B, MATH 201A, MATH 201B, MATH 287.

Culminating Experience (3 units)

Complete One Option (Plan A Thesis, Plan B Writing Project, or Plan B Comprehensive Exam):
Plan A (Thesis) (3 units)

- MATH 299 - Master's Thesis 1-4 unit(s) (3 units required)
- Oral Presentation
- Oral Defense

Plan B (Writing Project) (3 units)

- MATH 298 - Special Study 1-4 unit(s) (3 units required)
- Oral Presentation
- Oral Defense

Plan B (Comprehensive Exam) (3 units)

- MATH 295E - Mathematics Comprehensive Exam Preparation 3 unit(s)
- Comprehensive Exam

Total Units Required (33 units)

Elective courses must be planned in consultation with the MA Mathematics Advisor.

The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 6.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

Mathematics, MS

This degree, offered by SJSU's Department of Mathematics and Statistics is appropriate for students who seek to deepen their knowledge of mathematics and its applications for work in the research and development area of industry.

Requirements for Admission

Candidates must meet all the university admission requirements. Students can be admitted in either classified or conditionally classified standing. If an applicant's preparation for advanced graduate work is considered inadequate to meet the course prerequisites or other departmental requirements, the conditions will include taking preparatory courses to meet these requirements. Such courses will not count as units that fulfill the master's degree program requirements.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE.

Classified Standing
To enter this program with classified standing, a student must meet the minimum requirements for admission to the Graduate Division, have completed 18 semester units of upper-division mathematics with a GPA of at least 3.0, and have one to three letters of recommendation submitted on his or her behalf. The coursework must be acceptable toward a bachelor's degree in mathematics and may not be counted toward the MS degree.

**Conditionally Classified Standing**

A student who meets the minimum requirements for admission to the Graduate Division but does not satisfy the mathematics coursework requirements stated above may be admitted as a conditionally classified student. Eligibility is determined on a case-by-case basis. The individual admission letter will explain the required terms and conditions for attaining classified standing. After arrival at SJSU, a conditionally accepted student must complete additional coursework to make up the unit deficiency in order to achieve classified status. These make-up units will not be included in the MA degree unit requirement total.

**Requirements for Advancement to Graduate Candidacy**

To advance to candidacy for the MS degree, a student must meet the university candidacy requirements, as stated in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations (GAPE) website at www.sjsu.edu/gape.

The student must complete the Petition for Advancement to Graduate Candidacy form. This form lists, among other things, all the coursework to be counted toward the master's degree. After the form has been signed by the student's thesis or writing project director (if applicable) and the Graduate Coordinator, it is forwarded to GAPE for final approval. Any subsequent changes to the student's program require approval from GAPE.

**Requirements for Graduation**

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

**Program Graduation Requirements**

**Graduation Writing Assessment Requirement**

Students must pass the Graduation Writing Assessment Requirement (GWAR).

**Culminating Experience**
Students must choose one of three options: The Plan A (Thesis), Plan B (Project), or Plan B (Comprehensive Examination).

**Plan A (Thesis)**

A student who selects the Thesis option must find a willing tenured or tenure-track faculty member to serve as the thesis advisor, and complete a thesis under that advisor's supervision. The thesis must be reviewed and approved by a committee composed of the advisor and two other faculty members chosen by the student in consultation with the advisor. The student must give a public presentation on the thesis, which is followed by an oral examination (defense) conducted by the committee. Theses must be filed with the Associate Dean of Graduate Studies, subject to the rules and deadlines established by the College of Graduate Studies.

Thesis students must enroll in MATH 299 - Master's Thesis (3 units). Students receive credit when the thesis is completed, successfully defended, and all committee members have signed off on it. Students who do not complete their theses during the semester in which they are enrolled in MATH 299 will receive a grade of "RP" for that course. If all other degree requirements have been completed, students must subsequently enroll in MATH 1290R in compliance with university regulations until the thesis is completed, defended, and approved by College of Graduate Studies.

**Plan B (Project)**

A student who selects the Project option must find a willing tenured or tenure-track faculty member to serve as the project advisor, and complete a written project under that advisor's supervision. The project must be reviewed and approved by a committee composed of the advisor and two other faculty members chosen by the student in consultation with the advisor. The student must give a public presentation on the project, which is followed by an oral examination (defense) conducted by the committee.

Students choosing the Plan B (Project) option must enroll in MATH 298 - Special Study (3 units). Students receive credit when the writing project is completed, successfully defended, and all committee members have signed off on it. Students who do not complete their projects during the semester in which they are enrolled in MATH 298 will receive a grade of "RP" for that course. If all other degree requirements have been completed, students must subsequently sign up for MATH 1290R in compliance with university regulations until the writing project is completed and defended.

**Plan B (Comprehensive Examination)**

Students who select this option must pass two written comprehensive examinations. One examination will be in Numerical Analysis (MATH 243A and MATH 243M). The second exam will be in Differential Equations/Dynamical Systems (MATH 233A and MATH 234).

Students must enroll in MATH 295E (3 units) for the semester they are taking their comprehensive exams. Students receive credit when both exams are passed. Students who do not pass one or both exams during the semester they are enrolled in MATH 298E will receive a grade of "RP" for that course. If all other degree requirements have been completed, students must subsequently enroll in MATH 1290R for the following semester or semesters in compliance with the university requirement for continuous enrollment until both exams have been passed.

**Master's Requirements (33 units)**

**Core Courses (21 units)**

- CS 200W - Graduate Technical Writing 3 unit(s) (GWAR)
- MATH 233A - Applied Mathematics I 3 unit(s)
- MATH 234 - Advanced Dynamical Systems 3 unit(s)
- MATH 243A - Advanced Numerical Analysis 3 unit(s)
• MATH 243M - Numerical Linear Algebra 3 unit(s)

Applied Mathematics

Select one of the following courses in consultation with the graduate advisor:

• MATH 203 - Applied Mathematics, Computation, and Statistics Projects 3 unit(s)
• MATH 285 - Advanced Topics in Mathematics 3 unit(s)
• MATH 288J - Applied Mathematics Internship 3 unit(s)

Statistics

Select one of the following courses in consultation with the graduate advisor:

• MATH 163 - Probability Theory 3 unit(s)
• MATH 261A - Regression Theory and Methods 3 unit(s)
• MATH 263 - Stochastic Processes 3 unit(s) (or another 200-level statistics course with consent of MS Mathematics advisor)

Electives (6 units)

Complete two courses from:

• MATH 213A - Introduction to Smooth Manifolds 3 unit(s)
• MATH 213B - Introduction to Riemannian Geometry 3 unit(s)
• MATH 229 - Advanced Matrix Theory 3 unit(s)
• MATH 235 - Wavelets and their Applications 3 unit(s)
• MATH 238 - Advanced Complex Variables 3 unit(s)
• MATH 243B - Advanced Topics in Numerical Analysis 3 unit(s)
• MATH 261A - Regression Theory and Methods 3 unit(s)
• MATH 263 - Stochastic Processes 3 unit(s)
• MATH 279A - Graph Theory 3 unit(s)
• MATH 279B - Advanced Graph Theory 3 unit(s)
• MATH 285A - Advanced Topics in Applied Mathematics 3 unit(s)
• MATH 297A - Preparation for Writing Project, Research Project or Thesis 3 unit(s)

Additional Electives (3 units)

Complete one 100-level or 200-level course selected in consultation with MS Mathematics Advisor. Elective courses may include a maximum of 3 units of MATH 280 and/or MATH 297A. Courses excluded are: MATH 100W, MATH 101, MATH 102, MATH 105, MATH 106, MATH 107A, MATH 107B, MATH 188I, MATH 201A, MATH 201B, and MATH 287.

Culminating Experience (3 units)

Plan A (Thesis)

• MATH 299 - Master's Thesis 1-4 unit(s) (3 units required)
• Oral Presentation
• Oral Defense

Plan B (Project)

• MATH 298 - Special Study 1-4 unit(s) (3 units required)
• Oral Presentation
• Oral Defense

Plan B (Comprehensive Exam)

• Additional 3-unit elective selected in consultation with graduate advisor
• Comprehensive Exam

Total Units Required (33 units)

Elective courses must be planned in consultation with the MS Mathematics Advisor.

The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 6.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

Statistics, MS

• Admissions Requirements
• Requirements for Admission to Candidacy
• Requirements for Graduation
• Master's Requirements (36 units)
• Program Learning Outcomes

The Master of Science in Statistics prepares students to become practicing statisticians in business, government and industry fields. It features theoretical and applied coursework in statistics and advanced statistical techniques, and its skills-based coursework emphasizes writing and communication skills and provides students with practical project experience. The program was developed in concert with industry and is designed to dovetail into professional career opportunities.

Persons with bachelor's degrees in engineering, the sciences, economics, business, the social sciences or other fields that use statistics are encouraged to apply. Those with bachelor's degrees in mathematics or statistics are welcome to apply for the program in order to advance their technical and theoretical skills.

Information about the MS, Statistics is available on the Department of Mathematics and Statistics website at www.sjsu.edu/math.

Admissions Requirements

University Admissions
Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system and meet all the university admission requirements. See the GAPE Graduate Admissions website and this Catalog for general information about graduate admissions at SJSU.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE. For TOEFL Requirements, see the Policies and Procedures section, Graduate and Post-Baccalaureate Information.

**Requirements for Admission to Classified Standing**

To enter this program with classified standing, an applicant must meet the minimum requirements for admission to the Graduate Division. Applicants must also have completed the following SJSU courses or their equivalents each with a grade of "B" or better (this coursework is not counted toward the MS degree):

1. A calculus series through multiple integration and partial differentiation (equivalent to the SJSU courses MATH 30, MATH 31 and MATH 32);
2. Linear algebra equivalent to MATH 39; and
3. Introductory calculus-based probability and statistics equivalent to MATH 161A.

In addition, applicants must also submit scores from the general GRE test. Applicants must have two letters of recommendation submitted on their behalf.

**Requirements for Admission to Conditionally Classified Standing**

An applicant who meets the minimum requirements for admission to the Graduate Division but does not yet satisfy the mathematics and statistics coursework program requirements stated above may be admitted as Conditionally Classified. The student must complete additional coursework to make up the deficiency before beginning the program. The units earned from this additional coursework may not be counted towards the total number of units required for the MS degree. The individual admission letter will explain the required terms and conditions for attaining Classified standing.

**Requirements for Admission to Candidacy**

To be admitted to candidacy for the MS Statistics degree:

1. A student must meet the candidacy requirements as stated in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. The GWAR requirement is fulfilled by passing CS 200W.
2. Complete MATH 163 and MATH 164, each with a grade of at least B.
3. Complete at least 18 units towards the degree with at least a 3.0 average.
4. Complete the Request for Candidacy and Graduate Degree Program form for the Master of Science degree. This form lists, among other things, all the coursework to be counted toward the master's degree. After the form has been signed by the Graduate Coordinator, it is forwarded to the Associate Dean for College of Graduate Studies for final approval. Any subsequent changes to the student's program require approval from College of Graduate Studies.

**Requirements for Graduation**
University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

MS- Statistics Graduation Requirements

Students in the MS Statistics program complete all courses in the program core, project experience or written exam, and culminating experience. Those choosing the Specialization in Machine Learning complete the electives MATH 251, MATH 252, MATH 250 and MATH 267. All other students complete MATH 261B and 9 units of electives selected in consultation with, and approved by, the Statistics Coordinator. The electives should form a coherent set of courses associated with the student's career goals. They may include a maximum of 3 units of MATH 180 and a maximum of three units of MATH 203 or MATH 298. The maximum number of 100-level undergraduate units that can be applied toward the master's degree is 15.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

Culminating Experience

Plan B (Project)

Students in the MS, Statistics enroll in MATH 269 in their final semester. They complete the program culminating experience requirement by successfully completing the course and an oral examination related to their consulting project.

Master's Requirements (36 units)

Core Courses (18 units)

- CS 200W - Graduate Technical Writing 3 unit(s) (GWAR)
- MATH 163 - Probability Theory 3 unit(s)
- MATH 164 - Mathematical Statistics 3 unit(s)
- MATH 167R - Statistical Programming with R 3 unit(s)
- MATH 167PS - Introduction to Python Programming and SQL 3 unit(s)
- MATH 261A - Regression Theory and Methods 3 unit(s)

Project Experience (3 units)

Complete one course from:

- MATH 203 - Applied Mathematics, Computation, and Statistics Projects 3 unit(s)
- MATH 288I - Internships 3 unit(s)
- MATH 298 - Special Study 1-4 unit(s) (3 units required)
Comprehensive Written Exam

Comprehensive written exam on material from

- MATH 163 - Probability Theory 3 unit(s)
- MATH 164 - Mathematical Statistics 3 unit(s)
- MATH 261A - Regression Theory and Methods 3 unit(s)
- One additional elective approved by the graduate advisor

Electives or Specialization (12 units)

Complete 12 Units of Electives or the Specialization in Machine Learning

Electives

- Students not pursuing a specialization take MATH 261B and 9 units of electives selected in consultation with the graduate advisor 9 unit(s)
- MATH 261B - Design and Analysis of Experiments 3 unit(s)

Specialization in Machine Learning

- MATH 251 - Statistical and Machine Learning Classification 3 unit(s)
- MATH 252 - Cluster Analysis 3 unit(s)
- MATH 250 - Mathematical Methods for Data Visualization 3 unit(s)
- MATH 267 - Computational Statistics 3 unit(s)

Culminating Experience (3 units)

- MATH 269 - Statistical Consulting 3 unit(s)

Total Units Required (36 units)

Elective courses must be planned in consultation with the Graduate Advisor.

The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 15.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate.

Minor

Mathematics Education Minor

A grade of "C-" or better is required for courses being used to satisfy the requirements for this minor.

University Graduation Requirements
To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Requirements (12 units)

- MATH 102 - Secondary School Mathematics 3 unit(s)
- EDSC 173 - Psychological Foundations of Secondary Teacher Education 3 unit(s)
- EDTE 190 - Health Education for the Classroom Teacher 3 unit(s)
- EDSE 192A - Including and Supporting Students 3 unit(s)

Total Units Required (12 units)

Units for the above courses, while leading to the Minor in Mathematics Education, are not transferred to credential programs. These courses do, however, satisfy requirements that must be met in order for the credential programs at SJSU to recommend the credential to the State of California.

Mathematics Minor

A grade of "C-" or better is required for courses being used to satisfy the requirements for this minor.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Requirements (19 units)

Lower Division (10 units)

- MATH 30 - Calculus I 3 unit(s) (B4) *(MATH 30X may be used instead of MATH 30.)*
- MATH 31 - Calculus II 4 unit(s) (B4)

Complete One Course From:

- MATH 32 - Calculus III 3 unit(s) (B4)
- MATH 42 - Discrete Mathematics 3 unit(s)

Upper Division Mathematics Electives (9 units)

Total Units Required (19 units)

Mathematics, For K-8 Teachers Minor

A grade of "C-" or better is required for courses being used to satisfy the requirements for this minor.

University Graduation Requirements
To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Requirements (18 units)

*MATH 19* Precalculus or a *Calculus* course may be substituted for one of the required courses in this minor. A grade of "C-" or better is required for courses being used to satisfy the requirements for this minor.

- MATH 12 - Number Systems 3 unit(s) (B4)
- MATH 101 - Problem Solving for Teachers 3 unit(s)
- MATH 105 - Concepts in Mathematics, Probability, Statistics 3 unit(s)
- MATH 106 - Intuitive Geometry 3 unit(s)
- MATH 107A - Explorations in Algebra 3 unit(s)
- MATH 107B - Explorations in Geometry 3 unit(s)

Total Units Required (18 units)

*MATH 1 - Mathematical Reasoning*

3 unit(s)
Focus on foundational mathematical skills and knowledge in the context of contemporary society.

*Satisfies B4: Mathematical Concepts*

**Corequisite(s):** MATH 1001S required for Math Enrollment Categories M-III and M-IV.

**Grading:** Graded

*MATH 10 - Mathematics for General Education*

3 unit(s)
Topics include methods of proof, problem solving, trigonometry, probability, statistics, applications to scheduling and apportionment, population studies, consumer math, theory of games, polyhedra, networks, graph theory, linear programming.

*Satisfies B4: Mathematical Concepts*

**Prerequisite(s):** Math Enrollment Category M-I or M-II, or MATH 1 with a grade of C- or better.

**Grading:** Graded

*MATH 10A - Mathematics in Art and Music*

3 unit(s)
An accessible look into some beautiful ideas of mathematics in art and music. Topics include plane symmetries, tilings, perspective drawing, musical intervals, scales and temperament, timbre and periodic functions. GE Area: B4.

*Satisfies B4: Mathematical Concepts*

**Corequisite(s):** MATH 1010AS required for Math Enrollment Categories M-III and M-IV.

**Grading:** Graded

*MATH 10D - Probability, Data Science, Ethics, and You*
3 unit(s)
An accessible introduction to the basic principles of probability and data science with a focus on ethical considerations.

Satisfies B4: Mathematical Concepts

Corequisite(s): MATH 1010DS required for Math Enrollment Categories M-III and M-IV.
Grading: Graded

MATH 10P - Mathematics in Politics

3 unit(s)
An accessible look into some beautiful ideas of mathematics in politics. Topics include voting systems, apportionment and gerrymandering.

Satisfies B4: Mathematical Concepts

Corequisite(s): MATH 1010PS required for Math Enrollment Categories M-III and M-IV.
Grading: Graded

MATH 12 - Number Systems

3 unit(s)
Structure of the real number system, numeration systems, elementary number theory, and problem-solving techniques; technology integrated throughout the course. This course is intended for future elementary teachers. The sequence of Math 12, MATH 105, and MATH 106 satisfies subject matter competence in K-8 mathematics.

Satisfies B4: Mathematical Concepts

Prerequisite(s): Two years of high school algebra; one year of high school geometry; Math Enrollment Category M-I or M-II, or MATH 1 with a grade of C- or better.
Grading: Graded

MATH 15F - Statway Part A: Statistics-Concepts & Methods

3 unit(s)
Concepts and methods of statistics with an emphasis on data analysis. Topics include methods for collecting data graphical and numerical descriptive statistics, correlation, simple linear regression, basic concepts of probability, confidence intervals and hypothesis test for means and proportions, and chi-square tests. Must complete UNVS 15F/UNVS 15S sequence to satisfy GE Area B4.

Misc/Lab: Lecture 1 hour / Activity 4 hours
Grading: Graded

MATH 15S - Statway Part B: Statistics-Concepts & Methods

3 unit(s)
Concepts and methods of statistics with an emphasis on data analysis. Topics include methods for collecting data graphical and numerical descriptive statistics, correlation, simple linear regression, basic concepts of probability, confidence intervals and hypothesis test for means and proportions, and chi-square tests. Completion with a grade of C- or better satisfies the GE Area B4 Mathematical Concepts requirement.
Lecture 1 hour / Activity 4 hours

Satisfies B4: Mathematical Concepts

**Prerequisite(s):** UNVS 15F with a grade of C- or better or concurrent enrollment in UNVS 1015W.

**Grading:** Graded

**MATH 18A - College Algebra**

3 unit(s)
Review of basic algebra. Complex numbers, functions, graphs, polynomials, inverse functions, exponential and logarithmic functions.

Satisfies B4: Mathematical Concepts

**Prerequisite(s):** Math Enrollment Category M-I, M-II, or M-III; or MATH 1 with a grade of C- or better. MATH 1018AS required as a corequisite for Enrollment Categories M-III and M-IV, and recommended for Enrollment Category M-II.

**Corequisite(s):** MATH 18AW recommended.

**Grading:** Graded

**MATH 18AW - College Algebra Workshop**

1 unit(s)
Students work in groups on college algebra material to help them understand college algebra concepts more thoroughly since it is the groundwork for success in future math courses.

**Misc/Lab:** Activity 2 hours.

Course may be repeated for credit for up to 3 units.

**Corequisite(s):** MATH 18A

**Grading:** Credit/No Credit

**MATH 18B - Trigonometry**

3 unit(s)
Trigonometric functions: Unit circle, right triangle, analytic; trigonometric identities. Analytic geometry (conic sections). Other topics chosen from: polar coordinates and complex numbers; vectors in two and three dimensions.

**Prerequisite(s):** MATH 18A with a grade of "C-" or better.

**Grading:** Graded

**Note(s):** With MATH 18A, preparation for MATH 30/MATH 30X.

**MATH 18WB - Trigonometry Workshop**

1 unit(s)
Students work in groups on trigonometry material presented in MATH 18B, to help them understand trigonometry concepts more thoroughly.

**Activity 2 hours.**
Course may be repeated for credit for up to 3 units.

Corequisite(s): MATH 18B.
Grading: Credit / No Credit

MATH 19 - Precalculus

5 unit(s)
Preparation for calculus: polynomial, rational, exponential, logarithmic and trigonometric functions; analytic geometry.

Lecture 4 hour/lab 3 hours.

Satisfies B4: Mathematical Concepts.

Prerequisite(s): Math Enrollment Category M-I, M-II, or M-III; or MATH 1 with a grade of C- or better.
Corequisite(s): MATH 1019S required as a corequisite for Enrollment Category M-III, and recommended for Enrollment Category M-II.
Grading: ABC-/NC Grading

MATH 30 - Calculus I

3 unit(s)
Introduction to calculus including limits, continuity, differentiation, applications and introduction to integration. Graphical, algebraic and numerical methods of solving problems.

Satisfies B4: Mathematical Concepts

Prerequisite(s): Math Enrollment Category M-I or M-II and satisfactory score on the Precalculus Proficiency Assessment; MATH 19 with a grade of B or better to waive the exam; or MATH 18A and MATH 18B, with a grade of B or better in each to waive the exam.
Grading: Graded

Note(s): Students repeating MATH 30 are not eligible for this class and must take MATH 30X, but grade forgiveness can apply. MATH 30X is replacing MATH 30P and MATH 30PL.

MATH 30W - Calculus I Workshop

2 unit(s)
Designed to help all students excel in Calculus I. Students work in groups on challenging calculus problems to help them understand the concepts in Calculus I more deeply and lay the groundwork for success in future math courses.

Lab 6 hours.

Course is repeatable for up to 3 units.

Corequisite(s): MATH 30X.
Grading: Credit / No Credit

Note(s): The workshop is 2 units. Activities in this workshop include embedded Precalculus review as well Calculus I material.

MATH 30X - Calculus I
3 unit(s)
Introduction to calculus including limits, continuity, differentiation, applications, and introduction to integration. Graphical, algebraic and numerical methods of solving problems.

Satisfies B4: Mathematical Concepts

Prerequisite(s): Math Enrollment Category M-I, M-II, or M-III and satisfactory score on the Precalculus Proficiency Assessment; MATH 19 with a grade of C- or better to waive the exam; or MATH 18A and MATH 18B with a grade of C- or better in each to waive the exam.
Corequisite(s): MATH 30W.
Grading: Graded

Note(s): MATH 30X is treated as a repeat for students who have taken MATH 30. MATH 30X is replacing MATH 30P and MATH 30PL.

MATH 31 - Calculus II

4 unit(s)
Definite and indefinite integration with applications. Sequences and series. Graphical, algebraic and numerical methods of solving problems.

Satisfies B4: Mathematical Concepts

Prerequisite(s): AP Calculus AB score 4 to 5, AP Calculus BC/AB Subscore 4-5, or MATH 30 or MATH 30X (with a grade of B or better).
Grading: Graded

Note(s): Passing this course with a grade of "C-" or better course fulfills GE Area B4. Students who are repeating MATH 31 or MATH 31X are not eligible for this class and must take MATH 31X.

MATH 31W - Calculus II Workshop

1 unit(s)
Support for students to excel in Calculus II. Students work in groups on challenging calculus problems to help them understand the concepts in Calculus II more deeply and lay the groundwork for success in future math courses.

Lab 3 hours.

Course is repeatable for up to 3 units.

Corequisite(s): MATH 31X.
Grading: Credit / No Credit

MATH 31X - Calculus II

4 unit(s)
Definite and indefinite integration with applications. Sequences and series. Graphical, algebraic and numerical methods of solving problems.

Satisfies B4: Mathematical Concepts

Prerequisite(s): AP Calculus AB score 3 to 5, AP Calculus BC/AB Subscore 3-5, or MATH 30 or MATH 30X (with a grade of C- or better).
Corequisite(s): MATH 31W.
Grading: Graded

Note(s): Passing this course with a grade of "C-" or better course fulfills GE Area B4. Students who are repeating MATH 31 or Math 31X are not eligible for this class and must take Math 31X.

MATH 32 - Calculus III

3 unit(s)
Functions of more than one variable, partial derivatives, multiple integrals and vector calculus. Graphical, algebraic and numerical methods of solving problems. GE Area B4.

Satisfies B4: Mathematical Concepts.

Prerequisite(s): Score of 4 to 5 on the AP Calculus BC Exam; or MATH 31 or MATH 31X with a grade of B or better.
Grading: Graded

Note(s): Students who are repeating MATH 32 must take MATH 32X.

MATH 32H - Honors Multivariable Calculus

4 unit(s)
Functions of more than one variable, partial derivatives, and multiple integrals. Vector fields, line and surface integrals, Green's Theorem, Stokes' Theorem, Divergence Theorem. Applications to engineering and science.

Misc/Lab: Lecture 3 hours/Lab 3 hours

Prerequisite(s): A score of 4 or 5 on the AP Calculus BC exam or Instructor Consent.
Grading: Graded

MATH 32W - Calculus III Workshop

1 unit(s)
Designed to promote students to excel in Calculus III. Students work in groups on Calculus III material to help them understand Calculus III concepts more thoroughly.

Lab 3 hours.

Course is repeatable for up to 3 units.

Corequisite(s): MATH 32X.
Grading: Credit / No Credit

MATH 32X - Calculus III

3 unit(s)
Functions of more than one variable, partial derivatives, multiple integrals and vector calculus. Graphical, algebraic and numerical methods of solving problems.

Satisfies B4: Mathematical Concepts

Prerequisite(s): Score of 3 to 5 on the AP Calculus BC Exam; or MATH 31 or MATH 31X with a grade of C- or better.
Corequisite(s): MATH 32W.
Grading: Graded

MATH 33A - Ordinary Differential Equations for SCI & ENGR

3 unit(s)
(Formerly MATH 133A) First order differential equations, first order linear systems, second order linear equations, applications, Laplace transforms, series solutions.

Prerequisite(s): MATH 32 or MATH 32H or MATH 32X (with a grade of "C-" or better) or instructor consent.
Grading: Graded

MATH 33LA - Differential Equations and Linear Algebra

3 unit(s)
(Formerly MATH 123) Matrices, determinants, systems of linear equations, vector geometry, linear transformations, eigenvalues and eigenvectors, diagonalization, first order differential equations, linear systems of differential equations, higher order differential equations, Laplace transforms.

Prerequisite(s): MATH 31 or MATH 31X (with a grade of "C-" or better) or instructor consent.
Grading: Graded

MATH 34 - Ordinary Differential Equations

3 unit(s)
First order differential equations, first order linear systems, second order linear equations, applications, numerical and series solutions. Nonlinear stability of solutions will be introduced. Existence and uniqueness of solutions will be emphasized.

Prerequisite(s): MATH 32 or MATH 32X (with a grade of C- or better) or instructor consent.
Pre/Corequisite(s): MATH 39 or instructor consent.
Grading: Graded

MATH 39 - Linear Algebra I

3 unit(s)
(Formerly MATH 129A) Matrices, systems of linear equations, vector geometry, matrix transformations, determinants, eigenvectors and eigenvalues, orthogonality, diagonalization, applications, computer exercises. Theory in Rn emphasized; general real vector spaces and linear transformations introduced.

Prerequisite(s): MATH 31 or MATH 31X (with a grade of "C-" or better) or instructor consent.
Grading: Graded

MATH 42 - Discrete Mathematics

3 unit(s)
Sets, logic, methods of proof including mathematical induction, functions, relations, elementary combinatorics, probability, Boolean algebras.

Prerequisite(s): Math Enrollment Category M-I or M-II and satisfactory score on the Precalculus Proficiency Assessment; MATH 19 with a grade of "B" or better to waive the exam; or MATH 18A and MATH 18B, with a grade of "B" or better in each to waive the exam.
Grading: Graded

Note(s): Students who are repeating MATH 42 and MATH 42X are not eligible for this class and must take MATH 42X.

MATH 42W - Discrete Math Workshop

1 unit(s)
Designed to promote students to excel in Discrete Mathematics. Students work in groups on challenging discrete math problems to help them understand the concepts in discrete math more deeply and lay the groundwork for success in future courses.

Lab 3 hours.

Course is repeatable for up to 3 units.

Corequisite(s): MATH 42X.
Grading: Credit / No Credit

MATH 42X - Discrete Mathematics

3 unit(s)
Sets, logic, methods of proof including mathematical induction, functions, relations, elementary combinatorics, probability, Boolean algebras.

Prerequisite(s): Math Enrollment Category M-I, M-II, or M-III and satisfactory score on the Precalculus Proficiency Assessment; MATH 19 with a grade of C- or better to waive the exam; or MATH 18A and MATH 18B with a grade of C- or better in each to waive the exam.
Corequisite(s): MATH 42W.
Grading: Graded

MATH 50 - Scientific Computing I

2 unit(s)
Computer systems and structured programming, emphasizing solutions of problems in the atmospheric sciences using Python programming. Includes the UNIX operating system, mass data handling and data visualization.

Lecture 1 hour/Lab 3 hours.

Prerequisite(s): MATH 30 or MATH 30X.
Corequisite(s): For METR majors: MATH 31 or MATH 31X, METR 60, PHYS 50. For Climate Science majors: METR 60 and CHEM 1A.
Grading: Graded

MATH 70 - Finite Mathematics

3 unit(s)
Systems of linear equations and inequalities, matrices, linear programming, set theory and probability theory, applications to business and to social sciences.

Satisfies B4: Mathematical Concepts.

Prerequisite(s): Math Enrollment Category M-I or M-II or C- or better in any GE Area B4 course or satisfactory score
in the Precalculus Proficiency Assessment.

**Grading:** Graded

**MATH 71 - Calculus for Business and Aviation**

3 unit(s)
Functions and graphs, limits, continuity, differentiation, integration, partial differentiation. Emphasis on business and economics applications.

*Satisfies B4: Mathematical Concepts*

**Prerequisite(s):** MATH 18A or MATH 19 with a grade of B or better; satisfactory score on the Precalculus Proficiency Assessment; or SAT Math score of 550+ (old version) or 570+ (revised score); or ACT Math score of 23+ waives the prerequisite.

**Grading:** Graded

**Note(s):** Students repeating MATH 71 are not eligible for this class and must take MATH 71X.

**MATH 71W - Calculus Workshop for Business/Aviation**

1 unit(s)
Designed to help all students excel in Calculus for Business/Aviation. Students work in groups on challenging calculus problems to help them understand the concepts in calculus more deeply and lay the groundwork for success in future courses.

*Lab 3 hours.*

*Course is repeatable for up to 3 units.*

**Corequisite(s):** MATH 71X.

**Grading:** Credit / No Credit

**MATH 71X - Calculus for Business and Aviation**

3 unit(s)
Functions and graphs, limits, continuity, differentiation, integration, partial differentiation. Emphasis on business and economics applications.

*Satisfies B4: Mathematical Concepts*

**Prerequisite(s):** MATH 18A or MATH 19 with a grade of C- or better to waive the exam; or satisfactory score on the Precalculus Proficiency Assessment; or SAT Math score of 550+ (old version) or 570+ (revised score); or ACT Math score of 23+ to waive the exam.

**Corequisite(s):** MATH 71W.

**Grading:** Graded

**MATH 92 - Int'l Program Studies**

1-6 unit(s)

**Grading:** Mixed Grading

**MATH 100W - Technical Writing Workshop**
3 unit(s)
Advanced writing through preparation of technical reports and presentations. Improving skills for writing subject-related reports, project proposals and personal resumes through practice and evaluation. Course assignments will be related to issues concerning careers in mathematics and mathematics education. GE Area: Z.

Satisfies SJSU Studies Z: Written Communication II.

Prerequisite(s): A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test or completion of ENGL 100A / LLD 100A with C or better; and upper division standing. Graduate or Postbaccalaureate level.

Grading: Graded

Note(s): Must be passed with C or better to satisfy the CSU Graduation Writing Assessment Requirement (GWAR).

MATH 101 - Problem Solving for Teachers

3 unit(s)

Prerequisite(s): MATH 106 (with a grade of "C-" or better) or instructor consent.

Grading: Graded

MATH 102 - Secondary School Mathematics

3 unit(s)
Secondary school mathematics from an advanced viewpoint, plus topics from higher mathematics. Emphasizes inductive reasoning in problem solving. Applications useful to junior and senior high school teachers.

Prerequisite(s): Equivalent of mathematics minor (with 9 upper division units) or instructor consent.

Grading: Graded

MATH 104 - History of Mathematics

3 unit(s)
Mathematical development from earliest times to the twentieth century.

Prerequisite(s): MATH 42 or MATH 42X, and MATH 115 (each with a grade of "C-" or better). Or instructor consent.

Grading: Graded

MATH 105 - Concepts in Mathematics, Probability, Statistics

3 unit(s)
Introduction to functions and algebraic reasoning, introduction to probability, data, graphs, statistics, problem solving; technology integrated throughout the course. This course is intended for future elementary teachers. The sequence of MATH 12, MATH 105, and MATH 106 satisfies subject matter competence in K-8 mathematics.

Prerequisite(s): Two years of high school algebra, one year of high school geometry, MATH 12 with a "C-" or better.

Grading: Graded

MATH 106 - Intuitive Geometry
3 unit(s)
Introductory geometry, measurement, inductive and deductive reasoning, introduction to transformations, and problem-solving techniques; technology integrated throughout the course. This course is intended for future elementary teachers. The sequence of MATH 12, MATH 105, and MATH 106 satisfies subject matter competence in K-8 mathematics.

Prerequisite(s): MATH 12 and MATH 105 with grades of "C-" or better
Grading: Graded

MATH 107A - Explorations in Algebra

3 unit(s)
Comprehensive view of school algebra primarily for the mathematical preparation of teachers. The computer will be used to generate examples, investigate relationships, explore algorithms and solve problems. Functions and relations used as a unifying theme throughout.

Prerequisite(s): MATH 106 (with a grade of "C-" or better), or instructor consent.
Grading: Graded

MATH 107B - Explorations in Geometry

3 unit(s)
Comprehensive view of elementary geometry primarily for the mathematical preparation of teachers. The computer will be used to investigate two- and three-dimensional patterns, measurement and parallelism. Transformational approach to congruence and similarity. Nature of inductive reasoning and deductive proof.

Prerequisite(s): MATH 106 (with a grade of "C-" or better), or instructor consent.
Grading: Graded

MATH 108 - Introduction to Abstract Mathematics and Proofs

3 unit(s)
The course purpose is to develop students' mathematical maturity and skill with proofs. Material covered includes logic; set theory including functions, relations, and cardinality; the real number system, including the completeness axiom; and selected topics.

Prerequisite(s): MATH 31 or MATH 31X, and MATH 42 or MATH 42X (each with a grade of "C-" or better). Or instructor consent.
Grading: Graded

MATH 112 - Vector Calculus

3 unit(s)
Vector fields, line and surface integrals, Green's Theorem, Stokes' Theorem, Divergence Theorem and advanced topics such as differential forms or applications to mechanics, fluid mechanics, or electromagnetism.

Prerequisite(s): MATH 32 or MATH 32X (with a grade of "C-" or better) or instructor consent.
Grading: Graded

MATH 113 - Differential Geometry
Properties of curves and surfaces, Frenet-Serret formulas and the fundamental forms. Study of curves and surfaces in the small by means of differential calculus.

**Prerequisite(s):** MATH 32 or MATH 32X, and MATH 39 (each with a grade of "C-" or better). Or instructor consent.

**Grading:** Graded

**Note(s):** Offered only occasionally.

*MATH 115 - Modern Geometry and Transformations*

3 unit(s)
Synthetic and analytic theory of projective transformations, similarities, Euclidian motions, inversive geometry and an introduction to non-Euclidean geometry.

**Prerequisite(s):** MATH 31 or MATH 31X (with a grade of "C-" or better) or instructor consent.

**Grading:** Graded

*MATH 123W - Differential Equations and Linear Algebra Workshop*

1 unit(s)
A course designed to help all students excel in Linear Algebra and Ordinary Differential Equations (ODE's). Students work in groups on challenging problems to help them understand the concepts of Linear Algebra and ODE's more deeply and lay the groundwork for success in future courses.

*Course is repeatable for up to 3 units.*

**Prerequisite(s):** MATH 32 or MATH 32X (with a grade of C- or better).

**Corequisite(s):** MATH 33LA.

**Grading:** Credit / No Credit

*MATH 126 - Theory of Numbers*

3 unit(s)
Divisibility, prime numbers, congruences of first and higher degrees, theorems of Fermat, Euler and Wilson. Quadratic residues.

**Prerequisite(s):** MATH 31 or MATH 31X, and MATH 42 or MATH 42X (each with a grade of "C-" or better). Or instructor consent.

**Grading:** Graded

*MATH 127 - Applied and Industrial Algebra*

3 unit(s)
Fundamental topics of abstract algebra (groups, rings, fields) from the viewpoint of real-world application, such as coding theory, robotics, algorithm design, cryptography, integrated circuit design, and signal processing.

**Prerequisite(s):** MATH 42 or MATH 42X, and MATH 39 (each with a C- or better). Or instructor consent.

**Grading:** Graded

*MATH 128A - Abstract Algebra I*
3 unit(s)
Group theory: permutation groups, abelian groups, morphism theorems, finite groups. Introduction to rings and fields.

**Prerequisite(s):** MATH 108 and MATH 39 (each with a grade of "C-" or better) or instructor consent.
**Grading:** Graded

*MATH 128B - Abstract Algebra II*

3 unit(s)
Emphasis on rings, integral domains, fields, field extensions, Galois theory.

**Prerequisite(s):** MATH 128A (with a grade of "C-" or better) or instructor consent.
**Grading:** Graded

*MATH 129B - Linear Algebra II*

3 unit(s)
Continuation of MATH 39. Abstract vector spaces and linear transformations, diagonalization, Cayley-Hamilton theorem, minimal polynomials, Jordan canonical form. Selected topics from inner product and adjoint, duality, rational canonical form and applications.

**Prerequisite(s):** MATH 108 and MATH 39 (each with a grade of "C-" or better). Or instructor consent.
**Grading:** Graded

*MATH 131A - Introduction to Analysis*

3 unit(s)
Properties of real numbers including completeness and compactness. Continuous functions, uniform continuity, the derivative.

**Prerequisite(s):** MATH 32 or MATH 32X, and MATH 108 (each with a grade of "C-" or better). Or instructor consent.
**Grading:** Graded

*MATH 131B - Introduction to Real Variables*

3 unit(s)
The theory of the Riemann integral, sequences and series of functions, spaces of functions.

**Prerequisite(s):** MATH 131A (with a grade of "C-" or better) or instructor consent.
**Grading:** Graded

*MATH 132 - Advanced Calculus*

3 unit(s)
Calculus of several variables; Jacobian, inverse and implicit function theorems, contracting mapping theorem, change of variables in integration and applications.

**Prerequisite(s):** MATH 32 or MATH 32X, and MATH 39 (each with a grade of "C-" or better). Or instructor consent.
**Grading:** Graded

*MATH 133B - Partial Differential Equations*
3 unit(s)
Partial differential equations of physics and engineering, Fourier series, Legendre polynomials, Bessel functions, orthogonal functions, the Sturm-Liouville equation.

Prerequisite(s): One of MATH 33A, MATH 33LA, or MATH 34; and one of MATH 112 or MATH 132. All with a grade of C- or better.
Grading: Graded

MATH 133W - Ordinary Differential Equations Workshop

1 unit(s)
Designed to help all students excel in Ordinary Differential Equations (ODE's). Students work in groups on challenging problems to help them understand the concepts in ODE's more deeply and lay the groundwork for success in future courses.

Prerequisite(s): MATH 32 or MATH 32X (with a grade of C- or better).
Corequisite(s): MATH 33A.
Grading: Credit / No Credit

MATH 134 - Ord. Diff. Eqns and Dynamical Systems

3 unit(s)

Prerequisite(s): MATH 39 and one of MATH 33A or MATH 34, both with a grade of C- or better; or MATH 33LA (with a grade of C- or better).
Grading: Graded

MATH 138 - Complex Variables

3 unit(s)
Analytic functions, complex integration, residues and power series.

Prerequisite(s): MATH 32 or MATH 32X (with a grade of "C-" or better) or instructor consent.
Grading: Graded

MATH 142 - Introduction to Combinatorics

3 unit(s)
Sets, permutations, combinations, probability, mathematical induction, counting techniques, generating functions, partitions, recurrence relations, inclusion-exclusion. Polya's theorem and applications to computer science, mathematics, engineering and physical sciences.

Prerequisite(s): MATH 32 or MATH 32X, and MATH 42 or MATH 42X (each with a grade of "C-" or better). Or instructor consent.
Grading: Graded

MATH 143C - Numerical Analysis and Scientific Computing
3 unit(s)
Development and comparison of important algorithms for scientific computing in terms of efficiency, accuracy and reliability. Topics include nonlinear equations, interpolation, approximation theory, differentiation, integration, differential equations, numerical stability and error analysis. Substantial assignments using contemporary software packages and professional subprogram libraries.

Prerequisite(s): MATH 32 or MATH 32X, one of CS 22A, MATH 50, CS 46A, CS 49C or CS 49J, one of MATH 33A, MATH 33LA, or MATH 34 (with a grade of "C-" or better in each); or instructor consent.
Grading: Graded

MATH 143M - Numerical Analysis and Scientific Computing

3 unit(s)
Development and comparison of important algorithms for scientific computing in terms of efficiency, accuracy and reliability. Topics include systems of linear equations-direct and iterative methods, least squares problems, eigenvalues and eigenvectors, numerical stability and error analysis. Substantial assignments using contemporary software packages and professional subprogram libraries.

Prerequisite(s): MATH 39, one of CS 22A, MATH 50, CS 46A or CS 49C (each with a grade of "C-" or better). Or instructor consent.
Grading: Graded

MATH 146 - An Introduction to Mathematical Cryptography

3 unit(s)
Introduction to mathematics that has been useful in cryptography with a focus on the underlying mathematics (abstract algebra, number theory, probability, and combinatorics), and supporting applications (encryption, hash functions, blockchain). Additional topics may be covered.

Prerequisite(s): MATH 42 or MATH 42X, and MATH 39 (each with C- or better), or instructor consent.
Grading: Graded

Note(s): Recommended (but not required) one of MATH 108, MATH 126, MATH 127, MATH 142, MATH 163.

MATH 150 - Theory of Interest

3 unit(s)
Measurement of interest; time value of money; present and future values of cash flows; applications to annuities, loans, sinking funds, bonds, and portfolios; duration and immunization.

Prerequisite(s): MATH 161A or ISE 130, or instructor consent
Grading: Graded

MATH 161A - Applied Probability and Statistics I

3 unit(s)
Descriptive and inferential statistics. Collection and analysis of data, discrete and continuous probability models, random variables, Central Limit Theorem, confidence intervals, hypothesis testing.

Prerequisite(s): MATH 31 or MATH 31X (with a grade of "C-" or better) or instructor consent.
Grading: Graded
MATH 161B - Applied Probability and Statistics II

3 unit(s)
A continuation of MATH 161A. Two sample confidence intervals and hypothesis tests, analysis of variance, simple and multiple regression, chi-square tests of homogeneity and goodness-of-fit, other topics as time permits. Use of statistical software is integral to the course. Student project required.

Prerequisite(s): MATH 161A (with a grade of "C-" or better), or instructor consent
Grading: Graded

MATH 162 - Statistics for Bioinformatics

3 unit(s)
Introduction to the theory and applications of statistical methodology in the biological sciences. Topics include inference, stochastic processes, Markov chains, hidden Markov models, clustering, and gene expression analysis. Applications to current molecular biology and genetics problems. No biology background required.

Prerequisite(s): MATH 161A (with a grade of "C-" or better) or instructor consent.
Grading: Graded

MATH 163 - Probability Theory

3 unit(s)
Probability axioms; random variables; marginal and conditional density and distribution functions; binomial, geometric, Poisson, gamma and normal probability laws; mathematical expectations, moment generating functions; limit theorems; sampling distributions.

Prerequisite(s): MATH 32 or MATH 32X, and MATH 161A (each with a grade of "C-" or better) or instructor consent.
Grading: Graded

MATH 163W - Probability Workshop

1 unit(s)
Corequisite workshop designed to help all students succeed in MATH 163. Students work in groups on probability problems and review material from MATH161A and MATH 32 or MATH 32X as necessary.

Course is repeatable for up to 2 units.

Grading: Credit / No Credit

MATH 164 - Mathematical Statistics

3 unit(s)
Sampling distributions, confidence intervals, order statistics, sufficient statistics, the Rao-Blackwell Theorem, completeness, uniqueness, point estimation, maximum likelihood, Bayes’ methods, testing hypotheses, likelihood ratio tests, categorical data analysis, nonparametric tests.

Prerequisite(s): MATH 163 (with a grade of "C-" or better) or instructor consent.
Grading: Graded

MATH 167PS - Introduction to Python Programming and SQL
3 unit(s)
Introduction to Python. Data types, control flow, object-oriented programming, and graphical user interface-driven applications. The class will include designing relational schemas, writing SQL queries, accessing and designing a database, performing database administration. The students will also learn how to perform intermediate data base operations.

Prerequisite(s): MATH 39, MATH 161A, and MATH 167R or instructor consent.
Grading: Graded

MATH 167R - Statistical Programming with R

3 unit(s)
Introduction to the R programming language. Topics include data structures, reading and writing data, databases, data visualization, accessing and creating packages, programming structures and functions.

Prerequisite(s): MATH 161A with a grade of "C-" or better
Grading: Graded

MATH 170 - Mathematical Modeling for the Life Sciences

3 unit(s)
Mathematical models used in biology and other life sciences, discrete and continuous processes, mathematical methods for analyzing solutions to the above models, interpretation of mathematical results.

Prerequisite(s): MATH 39 and one of MATH 33A or MATH 34 (both with a grade of C- or better); or MATH 33LA (with a grade of C- or better).
Grading: Graded

MATH 177 - Linear and Non-Linear Optimization

3 unit(s)
Linear inequalities, the simplex method and other algorithms, duality, integer optimization, convex optimization, quadratic optimization, game theory.

Prerequisite(s): MATH 32 and MATH 39, both with a grade of C- or better.
Grading: Graded

MATH 178 - Mathematical Modeling

3 unit(s)
Basic modeling techniques including graphing, proportion, curve fitting and interpolation, optimization, probability and computer simulation, derivatives and differences. Technology will be incorporated to model applied problems from business/economics, physical/life/social sciences and engineering.

Prerequisite(s): MATH 39 (with a grade of "C-" or better) or instructor consent.
Grading: Graded

MATH 179 - Introduction to Graph Theory

3 unit(s)
Hamiltonian and Eulerian properties, matching, trees, connectivity, coloring problems and planarity. Emphasis on algorithms and applications, including optimal network flows.
**Prerequisite(s):** MATH 42 or MATH 42X, and MATH 39 (each with a grade of "C-" or better). Or instructor consent.

**Grading:** Graded

**MATH 180 - Individual Studies**

1-4 unit(s)
Individual study in a specific field. Not available to Open University Students.

**Prerequisite(s):** Department chair consent.

**Grading:** Credit/No Credit

**MATH 180H - Individual Studies for Honors**

3 unit(s)
Senior project on advanced topics in mathematics as determined by the instructor. Written paper and oral presentation of the project required. Intended for students graduating with departmental honors.

**Prerequisite(s):** At least junior standing as mathematics major. GPA of 3.5 or higher in the major and department chair consent.

**Grading:** Credit/No Credit

**MATH 180R - Undergraduate Research in Mathematics**

1-4 unit(s)
Advanced work in specific fields with variable units 1 to 4. Students will work on research topics in mathematics which will vary depending the instructor(s).

**Prerequisite(s):** Mathematics major/minor or consent of instructor

**Grading:** Credit/No Credit

**MATH 185 - Special Topics in Mathematics**

3 unit(s)
Selected topics in Mathematics. Topics vary each semester. Course is repeatable for a maximum total of 12 units of credit.

*Course may be repeated for credit for up to 12 units.*

**Prerequisite(s):** Suitable upper division background in mathematics set by instructor.

**Grading:** Graded

**MATH 188I - Student Internships**

3 unit(s)
Professional work experience in an area relevant to the students degree objectives. A written report, oral report and evaluation by a supervisor will be used to demonstrate that the goals of the internship experience have been met.

**Prerequisite(s):** Math department project coordinator consent.

**Grading:** Credit/No Credit

**MATH 190 - Introduction to MS Level Statistics**
1 unit(s)
Intensive review of mathematical methods. Selected topics from multivariate calculus, linear algebra, probability theory and elementary statistics. Introduction to statistical software including graphics and programming using R. Course will cover indispensable tools necessary for success in the MS statistics program.

**Prerequisite(s):** Admission to the MS Statistics Program  
**Grading:** Credit/No Credit

*MATH 192 - Int'l Program Studies*

1-12 unit(s)  
**Grading:** Mixed Grading

*MATH 201A - Mathematics for Secondary Teachers*

3 unit(s)  
Secondary school mathematics from an advanced viewpoint, plus topics from higher mathematics. Emphasizes inductive reasoning in problem solving. Applications useful to junior and senior high school teachers.

**Prerequisite(s):** Equivalent of mathematics minor or instructor consent.  
**Grading:** Graded

*MATH 201B - Mathematics for Secondary Teachers*

3 unit(s)  
Secondary school mathematics from an advanced viewpoint, plus topics from higher mathematics. Emphasizes deductive reasoning in problem solving. Applications useful to junior and senior high school teachers.

**Prerequisite(s):** Equivalent of mathematics minor or instructor consent.  
**Grading:** Graded

**Note(s):** MATH 201A is not a prerequisite.

*MATH 203 - Applied Mathematics, Computation, and Statistics Projects*

3 unit(s)  
Supervised teamwork to solve a substantial problem in mathematics or computer science usually supplied by an outside agency such as a local company. The number of different projects offered and the topics will vary widely. A project usually continues for two consecutive semesters.

**Prerequisite(s):** Instructor consent.  
**Grading:** Credit/No Credit

*MATH 211A - Geometry of Projective Spaces*

3 unit(s)  
Structure of projective planes; finite planes and combinatorics; automorphism groups; configuration theorems and coordinatizations; conics; introduction to projective n-space over a field; topological properties; subgeometries.

**Prerequisite(s):** MATH 112 or MATH 115 or instructor consent.  
**Grading:** Graded
Note(s): Alternate years.

MATH 213A - Introduction to Smooth Manifolds

3 unit(s)

Prerequisite(s): MATH 113 or MATH 175 or MATH 132; or instructor consent.
Grading: Graded

Note(s): Alternate years.

MATH 213B - Introduction to Riemannian Geometry

3 unit(s)
Riemannian metric and Levi-Civita connection. Geodesics, completeness and Hopf-Rinow theorem. Curvature. First and second variations of arc-length. Spaces of constant curvature. Additional topics selected by the instructor such as theorems of Myers, Hadamard, Synge, and Gauss-Bonnet.

Prerequisite(s): MATH 213A or instructor consent.
Grading: Graded

Note(s): Alternate years.

MATH 221A - Higher Algebra I

3 unit(s)
Topics from groups, rings, integral domains, modules, fields, vector spaces.

Prerequisite(s): MATH 128B or instructor consent.
Grading: Graded

MATH 221B - Higher Algebra II

3 unit(s)
Continuation of MATH 221A with additional advanced topics in algebra selected by instructor.

Prerequisite(s): MATH 221A or instructor consent.
Grading: Graded

MATH 226 - Theory of Numbers

3 unit(s)
Advanced topics in number theory selected by the instructor. Emphasis may be in algebraic number theory (e.g. Diophantine equations), analytic number theory (e.g. the prime number theorem), and/or computational number theory (e.g. cryptography).

Prerequisite(s): MATH 126 and MATH 128A or instructor consent.
Grading: Graded
Note(s): Alternate years.

MATH 229 - Advanced Matrix Theory

3 unit(s)
Eigenvalues, unitary equivalence and Schur's theorem. Normal, Hermitian and symmetric real matrices. Positive definite matrices, polar and singular value factorizations, and selected topics at the discretion of the instructor.

Prerequisite(s): MATH 129B or instructor consent.
Grading: Graded

MATH 231A - Real Analysis

3 unit(s)
Sigma algebras, construction of measures, differentiation, product measures, integration theory, the spaces L1 and C.

Prerequisite(s): MATH 131B or instructor consent.
Grading: Graded

MATH 231B - Functional Analysis

3 unit(s)
Function spaces and their duals, operators on function spaces, applications to analysis (classical and functional) and topics selected at the discretion of the instructor.

Prerequisite(s): MATH 231A or instructor consent.
Grading: Graded

MATH 233A - Applied Mathematics I

3 unit(s)

Prerequisite(s): MATH 133B or instructor consent.
Grading: Graded

MATH 234 - Advanced Dynamical Systems

3 unit(s)
Continuous and discrete dynamical systems with applications. Topics include stability of equilibria and closed orbits, structural stability, applications in classical mechanics, biology and engineering, including control systems.

Prerequisite(s): MATH 134 or instructor consent.
Grading: Graded

Note(s): Alternate years.
MATH 235 - Wavelets and their Applications

3 unit(s)
Wavelets with particular emphasis on their use in the representation of digital signals and image analysis. Theory of filters, filter banks and wavelets with applications selected from image and video compression, speech, audio and ECG compression, and communication applications.

Prerequisite(s): MATH 39 and MATH 134, or instructor consent.
Grading: Graded

MATH 238 - Advanced Complex Variables

3 unit(s)
A course specializing in one or more of the advanced branches of the theory of complex functions.

Prerequisite(s): MATH 138 or instructor consent.
Grading: Graded

Note(s): Alternate years.

MATH 243A - Advanced Numerical Analysis

3 unit(s)
Finite difference methods applied to parabolic, elliptic and hyperbolic equations including numerical methods for solving the discretized problem, convergence, stability, error control, and applications.

Prerequisite(s): MATH 143C or MATH 143M or instructor consent.
Grading: Graded

Note(s): Alternate years.

MATH 243B - Advanced Topics in Numerical Analysis

3 unit(s)
Advanced topics in numerical methods.

Prerequisite(s): MATH 143C or MATH 143M; and instructor consent.
Grading: Graded

Note(s): Alternate years.

MATH 243M - Numerical Linear Algebra

3 unit(s)
Advanced topics in numerical linear algebra.

Prerequisite(s): MATH 143C or MATH 143M; and instructor consent
Grading: Graded

MATH 250 - Mathematical Methods for Data Visualization
3 unit(s)
(Formerly MATH 253) Programming basics. 2D and 3D data plotting and graphing, advanced linear algebra, 
dimensionality reduction, visualization of high dimensional data, and applications to clustering and classification.

Prerequisite(s): MATH 32, MATH 39 and MATH 163 (each with a grade of B or better), or instructor consent.
Grading: Graded

MATH 251 - Statistical and Machine Learning Classification

3 unit(s)
Dimensionality reduction, instance-based classification, discriminant analysis, logistic regression, support vector 
machine, kernel methods, ensemble learning, neural networks and deep learning, classification of nonnumeric data.

Prerequisite(s): MATH 164 and MATH 250.
Grading: Graded

MATH 252 - Cluster Analysis

3 unit(s)
Cluster analysis techniques. Dissimilarities and distances. Hierarchical clustering, distance-based clustering, fuzzy 
clustering, spectral clustering, subspace clustering, categorical data clustering. Clustering method for high 
dimensional datasets.

Prerequisite(s): MATH 32 or MATH 32X, MATH 39 (each with a grade of "B" or better), MATH 163 and MATH 
267A or CS 122. Or instructor consent.
Grading: Graded

MATH 257 - Multivariate Data Analysis

3 unit(s)
Multivariate normal distribution, Hotelling's T-squared distribution, data reduction techniques including principal 
component and factor analysis, canonical correlation analysis, discrimination and classification techniques. Intensive 
use of computer analysis and real data sets. As time permits, advanced topics chosen by instructor. Possible topics 
include basis functions, derivative estimation, functional principal components, functional linear model.

Prerequisite(s): MATH 163 and MATH 261A (each with a grade of "B" or better), or instructor consent.
Grading: Graded

MATH 258 - Categorical Data Analysis

3 unit(s)
Distributions for categorical data, descriptive and inferential methods for contingency tables, introduction to 
generalized linear models, logit models for binary data, and loglinear models for count data.

Prerequisite(s): MATH 261A with a grade of "B" or better
Grading: Graded

MATH 261A - Regression Theory and Methods

3 unit(s)
Simple linear regression, multiple regression, indicator variables, influence diagnostics, transformations, assumption 
analysis, generalized linear models, nonlinear regression, CART, hypothesis testing, confidence and prediction
intervals, variable selection and model building.

**Prerequisite(s):** MATH 39, and either MATH 161A or MATH 164 (each with grade "B" or better), MATH 163, MATH 267A.

**Corequisite(s):** MATH 163 and/or MATH 267A may be taken concurrently.

**Grading:** Graded

---

**MATH 261B - Design and Analysis of Experiments**

3 unit(s)
Principles, construction and analysis of experimental designs. ANOVA; randomized blocks, Latin squares, factorial, nested and other designs; fixed and random effects, multiple comparisons, repeated measures. Expected mean squares. Diagnostics and model comparison.

**Prerequisite(s):** MATH 261A with grade of "B" or better.

**Pre/Corequisite(s):** MATH 164

**Grading:** Graded

---

**MATH 263 - Stochastic Processes**

3 unit(s)
Introductory course in stochastic processes and their applications. The course will cover random walks, discrete time Markov chains, the Poisson process, continuous time Markov processes, renewal theory and queuing theory.

**Prerequisite(s):** MATH 39 and MATH 163 (each with a grade of "B" or better).

**Grading:** Graded

---

**MATH 264 - Bayesian Data Analysis**

3 unit(s)

**Prerequisite(s):** MATH 164 with a "B" or better

**Grading:** Graded

---

**MATH 265 - Time Series Theory and Methods**

3 unit(s)
Analysis of correlated data in time, trends, seasonal patterns, periodicity, autocorrelation, spectral/frequency analysis, filtering, ARIMA models, state-space models, forecasting. Applications from various fields including economics, signal processing, finance, atmospheric science.

**Prerequisite(s):** MATH 261A with a grade of "B" or better

**Grading:** Graded

---

**MATH 266 - Survival Analysis**

3 unit(s)
Statistical methods for analysis of time-to-event censored data. Survival distributions and hazard rates; Kaplan-Meier estimator; proportional hazards; partial likelihood; diagnostics. Applications from clinical trials, toxicology and tumorigenicity studies, epidemiological studies, and engineering reliability.
Prerequisite(s): MATH 261A
Grading: Graded

Note(s): Alternate years.

MATH 267 - Computational Statistics

3 unit(s)
Simulation and Monte Carlo methods, Markov chain Monte Carlo, bootstrap and resampling, optimization, and special topics.

Prerequisite(s): MATH 163, MATH 167R, and MATH 261A each with a grade of "B" or better
Grading: Graded

MATH 267A - Statistical Programming with R

3 unit(s)
Introduction to the R programming language. Topics include data structures, reading and writing data, databases, data visualization, accessing packages, programming structures and functions.

Prerequisite(s): MATH 161A with a grade of C- or better.
Grading: Graded

MATH 269 - Statistical Consulting

3 unit(s)
Theoretical and practical aspects of statistical consulting. Development through classwork, group discussion, role-playing and real consulting activities, of tools necessary to conduct effective consulting sessions, present oral arguments and written reports, and work collaboratively to solve problems.

Prerequisite(s): MATH 163, MATH 164, MATH 261A, MATH 261B (each with a grade of "B" or better); and instructor consent.
Grading: Credit/No Credit

Note(s): this course is normally taken in the last semester of the MS Statistics program.

MATH 275A - Topology

3 unit(s)
Topological spaces and associated concepts (e.g., subspaces, product spaces, quotient spaces); continuous functions; compactness, connectedness (including path connectedness) and their local versions; countability and separation axioms; compactifications and Tychonoff's Theorem; paracompactness and metrization theorems.

Prerequisite(s): MATH 131A with a grade of "B" or better; or instructor consent
Grading: Graded

MATH 275B - Advanced Topics in Topology

3 unit(s)
A course specializing in one or more topics from advanced topology such as homotopy and the fundamental group, homology groups of spaces, continuum theory, function spaces, metrization, dimension theory, manifolds, topological...
groups.

**Prerequisite(s):** MATH 275A or instructor consent  
**Grading:** Graded

**Note(s):** Alternate years.

**MATH 279A - Graph Theory**

3 unit(s)  
Advanced course in graph theory covering graphs, digraphs, trees, networks, connectedness, eulerian circuits, hamiltonian cycles, graph embeddings, matchings, factorizations, graph colorings and Ramsey theory.

**Prerequisite(s):** MATH 179, or both MATH 142 and an upper division algebra class, or instructor consent.  
**Grading:** Graded

**Note(s):** Alternate years.

**MATH 279B - Advanced Graph Theory**

3 unit(s)  
Advanced topics in modern graph theory selected by instructor. Possible topics are algebraic graph theory, random graph theory, matroid theory, ramsey theory, expander graphs, and others.

**Prerequisite(s):** MATH 279A or instructor consent.  
**Grading:** Graded

**MATH 280 - Graduate Individual Studies**

1-3 unit(s)  
Individual study in a specific field.

**Prerequisite(s):** Department chair consent. Not available to Open University Students  
**Grading:** Credit/No Credit

**MATH 281 - Research Seminar**

1-3 unit(s)  
Weekly participation in the department research seminar. Topics will focus on recent developments in mathematics and emphasis will be placed on written and oral presentations.

**Prerequisite(s):** Instructor Consent  
**Grading:** Graded

**MATH 285 - Advanced Topics in Mathematics**

3 unit(s)  
Selected topics in Mathematics. Topics vary each semester. A maximum of 12 units may be repeated.

*Course may be repeated for credit for up to 12 units.*
**Prerequisite(s):** Suitable upper division background in mathematics set by instructor.

**Grading:** Graded

*MATH 285A - Advanced Topics in Applied Mathematics*

3 unit(s)
Selected topics in Applied Mathematics. Topics vary each semester.

*Course may be repeated for credit for up to 12 units.*

**Prerequisite(s):** Upper-division coursework in applied mathematics or instructor consent.

**Grading:** Graded

*MATH 285M - Advanced Topics in Pure Mathematics*

3 unit(s)
Selected topics in Pure Mathematics. Topics vary each semester.

*Course may be repeated for credit for up to 12 units.*

**Prerequisite(s):** Upper-division coursework in mathematics or instructor consent.

**Grading:** Graded

*MATH 285S - Advanced Topics in Statistics*

3 unit(s)
Selected topics in Statistics. Topics vary each semester.

*Course may be repeated for credit for up to 12 units.*

**Prerequisite(s):** Upper-division coursework in statistics or instructor consent.

**Grading:** Graded

*MATH 287 - Professional Development in College Teaching*

1 unit(s)
Required for all teaching assistants in the master's program. Practical and technical aspects of college teaching; current pedagogical techniques and educational issues.

*Course may be repeated for credit for up to 2 units.*

**Corequisite(s):** TA position in the Mathematics and Statistics Department

**Grading:** Credit/No Credit

*MATH 288I - Internships*

3 unit(s)
Professional work experience under the supervision of a statistician.

**Prerequisite(s):** Graduate standing and MS Statistics Project Coordinator consent.

**Grading:** Mandatory CR/NC/RP
MATH 288J - Applied Mathematics Internship

3 unit(s)
Professional work experience under the supervision of an applied mathematician.

Prerequisite(s): Graduate standing in the MS Math program and instructor consent.
Grading: Mandatory CR/NC/RP

MATH 295E - Mathematics Comprehensive Exam Preparation

3 unit(s)
Preparation for Mathematics Master's Comprehensive Examination. Review of topics and representative problems covered by the various parts of the Exam. CR grade assigned when student has passed both parts of the Comprehensive Exam. Successful completion satisfies graduate Culminating Experience requirement.

Prerequisite(s): Approval of Mathematics Graduate Advisor is required. Students must file for Advancement to Candidacy before enrolling. Not open to students electing Thesis/Writing Project option.
Grading: Mandatory CR/NC/RP

MATH 297A - Preparation for Writing Project, Research Project or Thesis

3 unit(s)
Supervised individual research and project work to prepare for a master's writing project, research project or thesis.

Course may be repeated for credit for up to 6 units.

Prerequisite(s): Fully classified standing in the MS/MA Math or MS Statistics program, department chair consent.
Corequisite(s): GWAR
Grading: Credit/No Credit

MATH 298 - Special Study

1-4 unit(s)
Advanced individual research and writing projects.

Prerequisite(s): Admission to candidacy for the MA or MS degree, Math 297 and Department Chair consent. Not available to Open University Students.
Grading: Mandatory CR/NC/RP

MATH 299 - Master's Thesis

1-4 unit(s)
Prerequisite(s): Admission to candidacy for the MA or MS degree, Math 297 and Department Chair consent. Not available to Open University Students.
Grading: Mandatory CR/NC/RP

MATH 1001S - Supported Instruction for MATH 001

1 unit(s)
Reviews relevant background material prior to the corresponding content for MATH 1.

Misc/Lab: Activity 2 hours.
Course may be repeated for credit for up to 3 units.

Corequisite(s): Required corequisite for enrollment category M-III and M-IV students in MATH 1.
Grading: CR/NC, No Degree Credit

Note(s): No Degree Credit.

MATH 1010AS - Support Course for Math 10A

1 unit(s)
Support course that reviews relevant background material prior to the corresponding content for MATH 10A.

Activity 2 hours

Course may be repeated for credit for up to 3 units.

Prerequisite(s): Required for MATH 10A students in Math Enrollment Categories III/IV.
Grading: Credit/No Credit, No Degree Credit

MATH 1010DS - Support Course for MATH 10D

1 unit(s)
Support course that reviews relevant background material prior to the corresponding content for MATH 10D.

Activity 2 hours.

Course may be repeated for credit for up to 3 units.

Prerequisite(s): Required for MATH 10D students in Math Enrollment Categories III/IV.
Grading: Credit/No Credit, No Degree Credit

MATH 1010PS - Support Course for Math 10P

1 unit(s)
Corequisite support course to review relevant background material prior to the corresponding content for MATH 10P.

Activity 2 hours

Course may be repeated for credit for up to 3 units.

Corequisite(s): Required for MATH 10P students in Math Enrollment Categories III/IV.
Grading: Credit/No Credit, No Degree Credit

MATH 1015D - Statway Algebra Review Activity

1 unit(s)
Supplemental course for Statway students planning to enter a field requiring algebra or calculus, e.g., Business.

Prerequisite(s): UNVS 15F or instructor consent.
Corequisite(s): UNVS 15S.
Grading: CR/NC, No Degree Credit
**Note(s):** No degree credit.

**MATH 1015W - Statway Supplemental Activity**

1 unit(s)
Supplemental activity course for Statway students who complete UNVS 15F (Statway A) with a grade below C-.
Includes review of UNVS 15F and supporting activities for UNVS 15S.

*Misc/Lab: Activity 2 hours.*

*Course may be repeated for credit for up to 3 units.*

**Corequisite(s):** UNVS 15S

**Grading:** CR/NC, No Degree Credit

**Note(s):** No Degree Credit.

**MATH 1018AS - Support Course for MATH 18A**

1 unit(s)
Support course that reviews relevant background material prior to the corresponding content for MATH 18A.
Required for Category M-III and Category M-IV students in MATH 18A.

*Misc/Lab: Activity 2 hours.*

*Course may be repeated for credit for up to 3 units.*

**Grading:** CR/NC, No Degree Credit

**Note(s):** Credit/No credit, No Degree Credit.

**MATH 1019S - Supported Instruction for MATH 19**

1 unit(s)
Reviews relevant background material prior to the corresponding content for MATH 19.

*Misc/Lab: Activity 2 hours.*

*Course may be repeated for credit for up to 3 units.*

**Corequisite(s):** Required corequisite for Math Enrollment Category III/IV students in MATH 19.

**Grading:** Credit/No Credit, No Degree Credit

**MATH 1290R - Culminating Experience Supervision**

1 unit(s)
Continued work on thesis or project.

*Course may be repeated for credit for up to 16 units.*

**Prerequisite(s):** Outstanding RP grade in a preceding semester in a project or thesis class
**Grading:** CR/NC, No Degree Credit

**Note(s):** No Degree Credit.

**MTED 184S - Math Education Phase II Seminar**

1 unit(s)
This seminar will support the student teaching field experience. Students will be asked to extend their pedagogical content knowledge in light of their phase II experiences and will be supported in the preparation of their Performance Assessment for California Teachers.

**Prerequisite(s):** EDSC 184X and good standing in the Secondary Education Credential program

**Corequisite(s):** MTED 184Y and/or MTED 184Z

**Grading:** Credit/No Credit

**MTED 184X - Student Teaching Phase I**

4 unit(s)
Student teaching in Mathematics Education (Phase I) is designed to provide students with the experiences they need to be successful in Phase II. During the Phase I semester, student teachers work with their mentor teacher in a mathematics classroom one period each day, with additional times set aside each week to confer, debrief, and plan.

**Prerequisite(s):** MTED 394

**Grading:** Credit/No Credit

**MTED 184Y - Student Teaching II - Classroom Teaching**

4-6 unit(s)
Minimum 80-120 class periods of classroom teaching, laboratory or field teaching in appropriate single subjects, grades K-12 and related teaching activities. Attendance at a weekly seminar is required.

**Prerequisite(s):** MTED 394 and joint approval of Mathematics and Education departments.

**Grading:** Credit/No Credit

**MTED 184Z - Student Teaching III - Classroom Teaching**

4-6 unit(s)
Same as MTED 184Y, including the seminar, but in a different course. May be in a different school.

**Prerequisite(s):** MTED 394 and joint approval of the Mathematics and Teacher Education Departments.

**Grading:** Credit/No Credit

**MTED 280 - Research in Math Education**

3 unit(s)
Theories of learning mathematics; recent trends in mathematics curriculum and pedagogy; types of research in mathematics education; methods of conducting research in mathematics education; developing research questions; conducting library research; and synthesis of research in various areas of mathematics education.

**Prerequisite(s):** Graduate-level core class for the MA Math, MS Math, or MS Statistics, or instructor consent.

**Grading:** Graded
MTED 281A - Seminar in Postsecondary Mathematics Teaching I

2 unit(s)
First semester seminar in teaching mathematics at the post-secondary level. Students will engage in initial instructor training, plan and present to their peers a sample lecture, attend two peers' classes and provide a detailed evaluation to each, have their own teaching (at the workshop or course-supplement level) evaluated by peers, and engage in our weekly meetings.

**Prerequisite(s):** Current standing as a graduate teaching assistant in the Department of Mathematics and Statistics.

**Grading:** Credit / No Credit

**Note(s):** This course can not be used to satisfy degree requirements for the MA Math, MS Math and MS Stat programs.

MTED 281B - Seminar in Postsecondary Mathematics Teaching II

2 unit(s)
Second semester seminar in teaching mathematics at the post-secondary level. Students will conduct a literature review on a topic that has arisen from their own teaching, attend two peers' classes and provide a detailed evaluation to each, have their own teaching (at the Math 8/19 level) evaluated by peers, and engage in our weekly meetings.

**Prerequisite(s):** MTED 281A.

**Grading:** Graded

**Note(s):** This course can not be used to satisfy degree requirements for the MA Mathematics, MS Mathematics and MS Statistics programs.

MTED 281C - Seminar in Postsecondary Mathematics Teaching III

2 unit(s)
Third semester seminar in teaching mathematics at the post-secondary level. Students will produce a training experience for future MTED 281A / MTED 281B students, including producing written materials, and conduct the training experience, attend two peers' classes and provide a detailed evaluation to each, have their own teaching (at the MATH 8/19 or other level) evaluated by peers, and engage in our weekly meetings.

**Prerequisite(s):** MTED 281B.

**Grading:** Credit / No Credit

**Note(s):** This course can not be used to satisfy degree requirements for the MA Mathematics, MS Mathematics and MS Statistics programs.

MTED 394 - Secondary School Mathematics

3 unit(s)
The place and function of mathematics in secondary education, improvement and evaluation of instruction. Teaching the subject matter of secondary mathematics.

**Prerequisite(s):** MATH 201A or MATH 201B and, either passing score on the CSET exams or be within 3 courses of completing the subject matter preparation program, or instructor consent.

**Grading:** Graded

MTED 394F - Middle School Mathematics Methods
3 unit(s)
The place and function of mathematics in middle grades education, improvement and evaluation of instruction. Teaching the subject matter of middle grades mathematics.

Prerequisite(s): EDEL 108D, Passing scores on CSET I and II or Instructor consent.
Grading: Graded

Overview
The only one of its kind in the CSU system, the Department of Meteorology and Climate Science provides students with an in-depth knowledge of the atmosphere, preparing them for careers in the atmospheric sciences. Meteorology focuses on day-to-day weather; in climate science the focus is on the evolution of Earth's climate. We train students to measure, analyze, model and predict the state of the atmosphere into the next week and on into the next century, offering undergraduate and graduate programs that are strong in both theoretical and applied courses. Among our alumni are weather forecasters with both the National Weather Service and in the private sector, air pollution specialists, environmental consultants, science teachers, university professors, science writers and top scientists in the National Atmospheric and Oceanographic Administration (NOAA), the U.S. Armed Forces, and NASA. We are one of the most research-active departments on campus, enabling students at all levels to participate and benefit from supervised research activities.

Undergraduate

Meteorology, BS
The BS Meteorology degree program, offered by the Department of Meteorology and Climate Science, is designed to develop meteorologists who, upon graduation, are ready to begin professional practice in the private sector or in government, or are ready to enter graduate programs in atmospheric science.

**University Requirements for Graduation**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Undergraduate Graduation Requirements section of the Policies and Procedures.

**Program Roadmaps**

The 4-Year Roadmap is available online. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Degrees (ADT) Pathways are also available online.

**Major Exceptions**

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the General Education (GE) section to identify the specific adjustments for this degree program or contact your major advisor for more details.

**Major-Specific Graduation Requirements**

All Preparation and Required in the Major courses must be completed with a "C-" or better.

**General Education/American Institution Requirements**

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

**University Requirements (38 units)**

**Core Lower Division General Education (15 units)**

Of the 39 units required by the university, 24 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

**Upper Division General Education (9 units)**
Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions (12 units)

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B, HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

- AMS 1A - American Cultures to 1877 6 unit(s) (M4)
- AMS 1B - American Cultures 1877 to present 6 unit(s) (M5)

Physical Education (2 units)

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Major Preparation (27 units)

A minimum grade of "C-" must be attained in all major and preparation courses.

- CHEM 1A - General Chemistry 5 unit(s) (B1+B3)
- MATH 30 - Calculus I 3 unit(s) (B4)
- MATH 31 - Calculus II 4 unit(s) (B4)
- MATH 32 - Calculus III 3 unit(s) (B4)
- PHYS 50 - General Physics/Mechanics 4 unit(s) (B1+B3)
- PHYS 51 - General Physics/Electricity and Magnetism 4 unit(s) (B1+B3)
- PHYS 52 - General Physics/Waves, Light, Heat 4 unit(s) (B1+B3)

Major Requirements (54 units)

Core Courses (48 units)

- METR 10 - Weather and Climate 3 unit(s) (B1)
- METR 40 - Weather Seminar 1 unit(s)
- METR 50 - Scientific Computing I 2 unit(s)
- METR 51 - Scientific Computing II 2 unit(s)
- METR 60 - Meteorology I 3 unit(s)
- METR 61 - Meteorology II 2 unit(s)
- METR 100W - Writing Workshop: Meteorological Reports 3 unit(s) (Z)
- METR 121A - Dynamic Meteorology 4 unit(s)
- METR 121B - Dynamic Meteorology 3 unit(s)
• METR 123 - Advanced Climatology 3 unit(s)
• METR 125 - Physical Meteorology 3 unit(s)
• METR 136 - Empirical Techniques in Meteorology 3 unit(s)
• METR 150 - Computers in Meteorology III 3 unit(s)
• METR 163 - Meteorological Instrumentation 3 unit(s)
• METR 170A - Weather Briefing 1 unit(s)
• METR 170B - Weather Briefing 1 unit(s)
• METR 171A - Synoptic Weather Analysis and Forecasting 3 unit(s)
• METR 172 - Mesoscale Meteorology 3 unit(s)
• METR 179 - Topics in Senior Thesis 1-2 unit(s) (2 units required)

Major Electives (6 units)

Complete two courses from:
• METR 130 - Boundary Layer Meteorology 3 unit(s)
• METR 131 - Air Pollution Meteorology 3 unit(s)
• METR 155 - Remote Sensing 3 unit(s)
• METR 160 - Tropical Meteorology 3 unit(s)
• METR 161 - Introduction to Hydrometeorology 3 unit(s)
• METR 164 - Introduction to Fire Weather 3 unit(s)
• METR 165 - Mountain Meteorology 3 unit(s)
• METR 166 - Field Studies in Meteorology 3 unit(s)
• METR 170C - Weather Briefing III 1 unit(s)
• METR 171B - Synoptic Weather Analysis and Forecasting 3 unit(s)
• METR 173 - Global Climate Modeling 3 unit(s)
• METR 174 - Climate Change Solutions 3 unit(s)
• METR 185 - Special Topics 1-3 unit(s)

University Electives (0-1 units)

Total Units Required (120 units)

Meteorology, Climate Science Concentration, BS

The BS Meteorology, concentration in Climate Science program, offered by the Department of Meteorology and Climate Science, is designed to prepare students for careers in emerging fields of climate change studies and mitigation, and related fields including energy and carbon management. Graduating students will be ready to begin careers in the private sector or in government, or will be ready to enter graduate programs in the atmospheric/climate sciences.

University Electives 3
Total 120

University Requirements for Graduation

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Undergraduate Graduation Requirements section of the Policies and Procedures.

Program Roadmaps

The 4-Year Roadmap is available online. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Degrees (ADT) Pathways are also available online.

General Education/American Institution Requirements

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

University Requirements (35 units)

Core Lower Division General Education (21 units)

Of the 39 units required by the university, 18 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

Upper Division General Education (6 units)

Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions (6 units)

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B, HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Complete One Sequence From:

African American Studies (6 units)

- AFAM 2A - African Americans and the Development of America's History and Government 3 unit(s) (D2)
- AFAM 2B - African Americans and the Development of America's History and Government 3 unit(s) (M7)
Asian American Studies (6 units)

- AAS 33A - Asian Americans in U.S. History I 3 unit(s) (D2)
- AAS 33B - Asian Americans in U.S. History II 3 unit(s) (M7)

U.S. History and Government (6 units)

- HIST 15 - Essentials of U.S. History 3 unit(s) (M12)
- POLS 15 - Essentials of U.S. & California Government 3 unit(s) (M11)

Chicana and Chicano Studies (6 units)

- CCS 10A - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D2)
- CCS 10B - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (M7)

Physical Education (2 units)

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Major Preparation (20 units)

- BIOL 31 - Principles of Biology II 4 unit(s) (B2+B3)
- CHEM 1A - General Chemistry 5 unit(s) (B1+B3)
- MATH 30 - Calculus I 3 unit(s) (B4)
- PHYS 2A - Fundamentals of Physics 4 unit(s) (B1+B3)
- PHYS 2B - Fundamentals of Physics 4 unit(s) (B1+B3)

Major Requirements (62 units)

Core Courses (53 units)

- COMM 146F - Communication and the Environment 4 unit(s)
- ENVS 1 - Introduction to Environmental Issues 3 unit(s) (D1)
- ENVS 119 - Energy and the Environment 3 unit(s) (D1)
- ENVS 133 - Sustainable Energy Strategies 3 unit(s)
- GEOL 3 - Planet Earth 3 unit(s) (B1)
- ISE 103 - Life Cycle Engineering 3 unit(s)
- METR 12 - Global Warming: Science and Solutions 3 unit(s) (B1)
- METR 40 - Weather Seminar 1 unit(s)
- METR 50 - Scientific Computing I 2 unit(s)
- METR 51 - Scientific Computing II 2 unit(s)
• METR 60 - Meteorology I 3 unit(s)
• METR 71 - Introduction to Climate Science 2 unit(s)
• METR 100W - Writing Workshop: Meteorological Reports 3 unit(s) (Z)
• METR 123 - Advanced Climatology 3 unit(s)
• METR 135 - The Global Carbon Cycle 3 unit(s)
• METR 136 - Empirical Techniques in Meteorology 3 unit(s)
• METR 163 - Meteorological Instrumentation 3 unit(s)
• METR 173 - Global Climate Modeling 3 unit(s)
• METR 174 - Climate Change Solutions 3 unit(s)

Electives (9 units)

Complete nine units from:
• ENVS 107 - Introduction to Environmental Economics and Policy 3 unit(s)
• ENVS 116 - Solar Energy Analysis 3 unit(s)
• ENVS 124 - Introduction to Environmental Law 3 unit(s)
• ENVS 128 - Water Resource Management 3 unit(s)
• ENVS 130 - Energy Policy Analysis 3 unit(s)
• ENVS 132 - Solar Home Design 3 unit(s)
• GEOG 120 - Food Supply and Agricultural Systems 3 unit(s)
• GEOG 124 - Topics in Physical Geography 3 unit(s)
• GEOG 130 - Natural Resources 3 unit(s)
• GEOG 170 - Introduction to Mapping and Geographic Information Systems 3 unit(s)
• GEOG 171 - Advanced Geographic Information Systems 3 unit(s)
• GEOG 181 - Remote Sensing: Basic Theory and Image Interpretation 3 unit(s)
• GEOG 182 - Remote Sensing: Digital Analysis 3 unit(s)
• METR 131 - Air Pollution Meteorology 3 unit(s)

University Electives (3 units)

Total Units Required (120 units)

Master

Meteorology, MS

The Master of Science in Meteorology prepares students for high-level professional responsibility, independent research, and continued graduate work in atmospheric science. Graduate-level theoretical and applied meteorology courses and a substantial research project lead to the preparation of the master's thesis, the culmination of the degree plan of study. Departmental opportunities for financial support include research and teaching assistantships.

The Department of Meteorology and Climate Science has one of the most active research programs at SJSU. The meteorology faculty has a wide range of expertise and supports a broad range of research activity. Their areas of specialization include Weather Analysis and Forecasting, Fire Weather, Urban Meteorology and Air Pollution, Atmospheres of Other Planets, Tropical Meteorology, Radar and Satellite Remote Sensing, Cloud and Aerosol Physics, Atmospheric Dynamics, Meteorological Data Processing, Data Communications, and Data Acquisition and Display.
Our graduates find employment in forecasting, research, consulting and media, and continue for the Ph.D. degree at top universities throughout the country. Department alumni include top scientists and forecasters in The National Oceanic and Atmospheric Administration (NOAA), the National Weather Service (NWS), the United States Air Force and Navy, NASA, various state and federal air pollution agencies, the aerospace industry, and aviation operations. Others of our alumni are university professors, high school and community college teachers, TV forecasters, meteorologists in the wind power, electric, gas and oil industries, science writers, and consultants for legal cases, air pollution problems and building design.

Admission Requirements

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system and meet all the university admission requirements. Applicants apply separately to the department to obtain admission into the MS, Meteorology program. See the GAPE Graduate Admissions website and this Catalog for general information about graduate admissions at SJSU.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE. For TOEFL Requirements, see the Policies and Procedures section, Graduate and Post-Baccalaureate Information.

Requirements for Admission to Classified Standing

Students are admitted to the MS, Meteorology program in Classified or Conditional Standing. Admission to classified standing requires the following. Applicants must:

- Possess the equivalent of an SJSU BS in Meteorology or, with the approval of the department graduate committee, a degree in physical science or mathematics. Students entering with degrees in other areas may be admitted to conditionally classified standing, and will be required to make up deficiencies (e.g., in meteorology and math) before enrolling in the core graduate classes.
- Have earned minimum GPA of 2.75 (on a scale of 0-4) in their BS degrees.
- Submit Graduate Record Examination (GRE) scores. More information about the GRE can be found on the Graduate Program Test Requirements webpage.

Requirements for Admission to Conditionally Classified Standing

Those applicants who meet minimum requirements for graduate admission, but do not meet departmental requirements, may be admitted to conditionally classified standing on the approval of the department graduate committee. The individual admission notification will explain the required terms and conditions for attaining Classified standing. Resolving deficiencies usually involve the successful completion of undergraduate courses in meteorology courses and math. Upon completion of these courses, the student advances from conditional to classified standing via petition to Graduate Studies.

Requirements for Advancement to Candidacy

University requirements for advancement to candidacy for the master's degree are outlined in the Graduate Policies and Procedures section. Competence in the general areas covered by METR 121A - Dynamic Meteorology, METR 125 - Physical Meteorology, either METR 60 - Meteorology I or METR 171A - Synoptic Weather Analysis and
Forecasting (Synoptic Meteorology, to be decided in consultation with the department graduate committee), and METR 100W - Writing Workshop: Meteorological Reports or METR 202 - Research Methods in Meteorology, must be demonstrated to the Department Graduate Committee prior to admission to candidacy. This can be done by satisfactory completion of these courses (or their equivalent) with a minimum grade of "B" in each, or successful completion of a comprehensive written examination. Students should consult with the graduate advisor concerning these alternatives. A student admitted in classified standing may be admitted to candidacy after completion of the terms and conditions specified in the admission notification letter.

The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website. MS, Meteorology students are currently required to take METR 202 to satisfy this University requirement.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures. Courses taken to meet the requirements for admission to candidacy will not be counted as part of the MS program. All students must complete the Graduation Writing Assessment Requirement.

Graduation Writing Assessment Requirement

Students must pass the Graduation Writing Assessment Requirement (GWAR).

Culminating Experience

Students complete the Plan A (Thesis) as their MS, Meteorology degree program culminating experience. The Plan B (Project) option is only offered under exceptional circumstances and students may not choose it themselves.

Plan A (Thesis)

This option requires an acceptable written research thesis and a successful oral presentation of the thesis. The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master's Thesis and Doctoral Dissertation Guidelines. Students in the thesis option enroll in one unit of METR 285 - Colloquium and two units of METR 299 - Master's Thesis or Project in their final semester. Students who complete the METR 299 but not its associated thesis enroll in the 1290R until both are completed.

Plan B (Project)

The Project option is open to students who can demonstrate to the Departmental Graduate Committee that they possess adequate professional meteorological experience to substitute for the research thesis. It is only offered under exceptional circumstances and students may not choose it themselves. Students approved for the Plan B option will select a suitable topic in meteorology on which to prepare a carefully documented written report in consultation with the project advisor. They will enroll in one unit of METR 285 - Colloquium and an additional two units of METR 298, Research in their final semester. Students who complete their final METR 298 but not its associated thesis enroll in the 1290R until both are completed.
Master's Requirements (30 units)

Core Courses (12 units)

- METR 202 - Research Methods in Meteorology 3 unit(s) (GWAR)
- METR 205 - Advanced Atmospheric and Climate Dynamics 3 unit(s)
- METR 215 - Advanced Physical Meteorology 3 unit(s)
- METR 240 - Numerical Modeling 3 unit(s)
or METR 241 - Parameterization in NWP

Research (6 units)

- METR 298 - Research 1-4 unit(s) (At least 3 units of METR 298 in each of two semesters.)

Advanced Courses (3 units)

Complete 3 units of the following selected in consultation with the graduate advisor:
- METR 225 - Topics in Advanced Atmosphere Dynamics 3 unit(s)
- METR 206 - Advanced Synoptic Meteorology 3 unit(s)
- METR 209 - Adv Fire Behavior 3 unit(s)
- METR 241 - Parameterization in NWP 3 unit(s)
- METR 245 - Mesoscale Modeling 3 unit(s)
- METR 280 - Recent Developments in Meteorology 1-3 unit(s)

Electives (6 units)

6 units of the following selected in consultation with the graduate advisor:

Students may take 3 additional units of Advanced Courses as an elective. Students may also take approved elective(s) in physics, computer science, and/or mathematics. Elective units cannot include METR 285, METR 298 or METR 299.

- METR 121B - Dynamic Meteorology 3 unit(s)
- METR 123 - Advanced Climatology 3 unit(s)
- METR 125 - Physical Meteorology 3 unit(s)
- METR 130 - Boundary Layer Meteorology 3 unit(s)
- METR 131 - Air Pollution Meteorology 3 unit(s)
- METR 135 - The Global Carbon Cycle 3 unit(s)
- METR 150 - Computers in Meteorology III 3 unit(s)
- METR 155 - Remote Sensing 3 unit(s)
- METR 160 - Tropical Meteorology 3 unit(s)
- METR 163 - Meteorological Instrumentation 3 unit(s)
- METR 164 - Introduction to Fire Weather 3 unit(s)
- METR 165 - Mountain Meteorology 3 unit(s)
- METR 166 - Field Studies in Meteorology 3 unit(s)
- METR 171B - Synoptic Weather Analysis and Forecasting 3 unit(s)
- METR 172 - Mesoscale Meteorology 3 unit(s)
• METR 173 - Global Climate Modeling 3 unit(s)
• METR 185 - Special Topics 1-3 unit(s)

Culminating Experience (3 units)

*Students in this program complete a Plan A (Thesis)*

Plan A (Thesis)

• METR 285 - Colloquium 1 unit(s) *(Minimum one unit)*
• METR 299 - Master’s Thesis or Project 1-6 unit(s) *(2 units METR 299 in the final semester)*

Plan B (Project)

• METR 285 - Colloquium 1 unit(s) *(Minimum one unit)*
• METR 298 - Research 1-4 unit(s) *(2 units METR 298 in the final semester)*

Total Units Required (30 units)

Elective courses must be planned in consultation with the Graduate Advisor.

The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 15.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate.

**Minor**

**Atmospheric and Seismic Hazards Minor**

This non-mathematical minor is designed to increase student understanding of natural and man-made meteorological, geological and environmental hazards.

**University Graduation Requirements**

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

**Minor Requirements (13 units)**

**Required Courses (10 units)**

• METR 112 - Global Climate Changes 3 unit(s) *(R)*
• METR 170A - Weather Briefing 1 unit(s) *(Taken in the Fall Semester)*
• GEOL 3 - Planet Earth 3 unit(s) *(B1)*
Complete One Course From:

- METR 10 - Weather and Climate 3 unit(s) (B1)
- METR 12 - Global Warming: Science and Solutions 3 unit(s) (B1)

Electives (3 units)

*Please note: If a student is taking this minor as a requirement for their major, both courses may be required. Please see advisor for more details.*

- METR 113 - Atmospheric Pollution 3 unit(s) (R)
- GEOL 112 - Hazards, Risks of Earthquakes and Volcanoes 3 unit(s) (R)

Total Units Required (13 units)

**Climate Change Strategies Minor**

This minor is designed to increase students understanding of climate change, potential impacts, and strategies to deal with what's coming.

**University Graduation Requirements**

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

**Minor Requirements (18 units)**

**Meteorology Courses (9 units)**

- METR 12 - Global Warming: Science and Solutions 3 unit(s) (B1)
- METR 112 - Global Climate Changes 3 unit(s) (R)

**Complete One Course From:**

- METR 113 - Atmospheric Pollution 3 unit(s) (R)
- METR 115 - Wildfire in the Earth System 3 unit(s) (R)

**Environmental Studies Courses (9 units)**

- ENVS 119 - Energy and the Environment 3 unit(s) (R)
- ENVS 130 - Energy Policy Analysis 3 unit(s)

**Complete One Course From:**

- ENVS 116 - Solar Energy Analysis 3 unit(s)
- ENVS 133 - Sustainable Energy Strategies 3 unit(s)
Total Units Required (18 units)

**Meteorology Minor**

This minor is designed to prepare science and engineering students to solve interdisciplinary problems involving the atmospheric sciences.

**University Graduation Requirements**

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

**Minor Requirements (13 units)**

**Required Courses (10 units)**

*Taken in the Fall semester*

- METR 60 - Meteorology I 3 unit(s)
- METR 170A - Weather Briefing 1 unit(s)

Complete One Course From:

- METR 10 - Weather and Climate 3 unit(s) (B1)
- METR 12 - Global Warming: Science and Solutions 3 unit(s) (B1)

Complete One Course From:

- METR 123 - Advanced Climatology 3 unit(s)
- METR 136 - Empirical Techniques in Meteorology 3 unit(s)
- METR 163 - Meteorological Instrumentation 3 unit(s)

**Electives (3 units)**

*Please note: If a student is taking this minor as a requirement for their major, both courses may be required. Please see advisor for more details.*

- METR 112 - Global Climate Changes 3 unit(s) (R)
- METR 113 - Atmospheric Pollution 3 unit(s) (R)

**Total Units Required (13 units)**

*METR 10 - Weather and Climate*

3 unit(s)

A descriptive introduction to the atmosphere, with emphasis on weather phenomena, climate, climate change, forecasting and air pollution.
Satisfies B1: Physical Science

Grading: Graded

METR 12 - Global Warming: Science and Solutions

3 unit(s)
Examination of past, present and future climates. Examination of global warming and mitigation strategies.

Satisfies B1: Physical Science

Grading: Graded

METR 40 - Weather Seminar

1 unit(s)
Meteorology program planning; careers in Meteorology; a survey of major problems in the atmosphere; faculty research programs; department, college and university resources, survival in the university; strategies for success.

Grading: Credit/No Credit

METR 50 - Scientific Computing I

2 unit(s)
Computer systems and structured programming, emphasizing solutions of problems in the atmospheric sciences using Python programming. Includes the UNIX operating system, mass data handling and data visualization.

Lecture 1 hour/Lab 3 hours.

Prerequisite(s): MATH 30 or MATH 30XMETR 60.
Corequisite(s): For METR majors: MATH 31 or MATH 31X, METR 60, PHYS 50. For Climate Science majors: METR 60 and CHEM 1A.
Grading: Graded

METR 51 - Scientific Computing II

2 unit(s)
Computer systems and advanced programming in Python emphasizing solutions of problems in the atmospheric sciences. Other related topics include UNIX scripting, advanced data visualization and basic HTML techniques. Introduction to Fortran.

Misc/Lab: Lecture 1 hours/lab 3 hours.

Prerequisite(s): METR 50 (or equivalent).
Corequisite(s): For METR majors: METR 61. For Climate Science majors: METR 61 or METR 71.
Grading: Graded

METR 60 - Meteorology I

3 unit(s)
A quantitative introduction to Atmospheric Science for Meteorology majors.
Misc/Lab: Lecture 2 hours/Lab 3 hours.

Prerequisite(s): MATH 30 or MATH 30P or MATH 30PL or MATH 30X (and PHYS 2B for Climate Science Concentration).
Corequisite(s): MATH 31 or MATH 31X, PHYS 50, METR 50 (or CHEM 1A and METR 50 for Climate Science Concentration).
Grading: Graded

METR 61 - Meteorology II

2 unit(s)
A continuation of METR 60, introducing Meteorology majors to quantitative aspects of the science.

Prerequisite(s): METR 60, CHEM 1A.
Corequisite(s): METR 51, MATH 32, PHYS 52, METR 163.
Grading: Graded

METR 71 - Introduction to Climate Science

2 unit(s)
Continuation of METR 60, but with an emphasis on Climate Science.

Misc/Lab: Lecture 2 hour/Lab 3 hours

Prerequisite(s): METR 60.
Corequisite(s): METR 51, BIOL 31.
Grading: Graded

METR 100W - Writing Workshop: Meteorological Reports

3 unit(s)
Introduction to scientific writing, research methods and preparation of technical reports in the meteorology field. GE Area: Z.

Satisfies SJSU Studies Z: Written Communication II.

Prerequisite(s): A3 or equivalent second semester composition course (with a grade of C- or better); completion of core GE; satisfaction of Writing Skills Test or completion of ENGL 100A / LLD 100A with C or better; and upper division standing. Or Graduate or Postbaccalaureate level.
Corequisite(s): METR 121A or METR 135, or instructor consent.
Grading: Graded

Note(s): Must be passed with C or better to satisfy the CSU Graduation Writing Assessment Requirement (GWAR).

METR 112 - Global Climate Changes

3 unit(s)
Formation and evolution of the atmosphere. Climate changes in the Earth's past. Interactions between climate and life. Anthropogenic climate change. GE Area: R.

Satisfies SJSU Studies R: Earth & Environment.
Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

METR 113 - Atmospheric Pollution

3 unit(s)
Descriptive discussion of the sources, effects and fates of pollutants in the atmosphere. Interaction of pollutants and weather systems, including acid precipitation, ozone destruction; air pollution policy and regulations.

Satisfies SJSU Studies R: Earth & Environment

Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

METR 115 - Wildfire in the Earth System

3 unit(s)
Introduces students to the science of wildland fire on earth and in various ecosystems. Topics include extreme fire behavior in a changing climate, fire weather, fire danger, and national policies on fire suppression strategies and prescribed fire use in land management. GE Area: R.

Satisfies SJSU Studies R: Earth & Environment.

Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

METR 121A - Dynamic Meteorology

4 unit(s)
Theoretical examination of the motion and behavior of the atmosphere. Governing equations and applications; vorticity; waves; numerical prediction; baroclinic instability.

Prerequisite(s): METR 51, METR 61.
Corequisite(s): MATH 33A.
Grading: Graded

Note(s): Year course.

METR 121B - Dynamic Meteorology
3 unit(s)
Theoretical examination of the motion and behavior of the atmosphere. Governing equations and applications; vorticity; waves; numerical prediction; baroclinic instability.

**Prerequisite(s):** METR 121A.
**Grading:** Graded

**Note(s):** Year course.

**METR 123 - Advanced Climatology**

3 unit(s)
The physical basis of climate with emphasis on the theory of global warming.

**Prerequisite(s):** METR 61 or METR 71.
**Grading:** Graded

**METR 125 - Physical Meteorology**

3 unit(s)
Cloud and precipitation physics, atmospheric electricity, optics and acoustics.

**Prerequisite(s):** METR 124 or instructor consent.
**Grading:** Graded

**METR 130 - Boundary Layer Meteorology**

3 unit(s)
Structure of the atmospheric planetary boundary layer with applications to air pollution, agriculture and cities; meso-circulations such as sea breeze.

**Prerequisite(s):** METR 121B or instructor consent.
**Grading:** Graded

**METR 131 - Air Pollution Meteorology**

3 unit(s)
Quantitative description of contaminants in the atmosphere: sources, dispersion and sinks; their effects on atmospheric energy balance and condensation.

**Prerequisite(s):** METR 121B or instructor consent.
**Grading:** Graded

**METR 135 - The Global Carbon Cycle**

3 unit(s)
A quantitative examination of the global carbon cycle through the solid earth, atmosphere, oceans, and biosphere.

**Prerequisite(s):** METR 71.
**Grading:** Graded

**METR 136 - Empirical Techniques in Meteorology**
3 unit(s)
Applications of statistical methods to analysis of meteorological and climatological data; use of the internet to obtain climate data; objective forecasting methods; elementary decision theory; data analysis using contemporary computer software.

Misc/Lab: Lecture 2 hours/lab 3 hours.

Prerequisite(s): METR 61 or METR 71 (for Climate Science Concentration), or STAT 95 and METR 12 (or METR 112), and upper division standing (for ENVS majors).
Grading: Graded

METR 143C - Numerical Analysis and Scientific Computing

3 unit(s)
Development and comparison of important algorithms for scientific computing in terms of efficiency, accuracy and reliability. Topics include nonlinear equations, interpolation, approximation theory, differentiation, integration, differential equations, numerical stability and error analysis. Substantial assignments using contemporary software packages and professional subprogram libraries.

Prerequisite(s): MATH 32 or MATH 32X, one of CS 22A, MATH 50, CS 46A, CS 49C or CS 49J, one of MATH 33A, MATH 33LA, or MATH 34 (with a grade of "C-" or better in each); or instructor consent.
Grading: Graded

METR 150 - Computers in Meteorology III

3 unit(s)
Computer applications to advanced problems in atmospheric science, including specialized computer systems, mass data handling, weather data communications.

Misc/Lab: Lecture 2 hours/lab 3 hours.

Prerequisite(s): MATH 043, METR 51 or instructor consent.
Grading: Graded

Note(s): Offered only occasionally.

METR 155 - Remote Sensing

3 unit(s)
This course will cover the background of remote sensing, current status of sensors and platforms, and recent satellite-based results on climate change.

Prerequisite(s): METR 124.
Grading: Graded

METR 160 - Tropical Meteorology

3 unit(s)
Local and diurnal variations in tropical weather; mean and synoptic fields of meteorological parameters in the tropics; general circulation; hurricanes; monsoons.

Prerequisite(s): METR 121B.
Grading: Graded
**Note(s):** Offered on an irregular basis only.

**METR 161 - Introduction to Hydrometeorology**

3 unit(s)
Survey of the transfer of water and energy between the land surface and the lower atmosphere, including the processes of precipitation, evaporation, and stream flow. Water resources and policy initiatives incorporated where applicable.

**Grading:** Graded

**METR 163 - Meteorological Instrumentation**

3 unit(s)
Measurement techniques and instruments used in atmospheric and climate sciences, using lecture, laboratory and field work. Students will learn techniques of instrument calibration, deployment, and data acquisition.

**Misc/Lab:** Lecture 2 hours/lab 3 hours.

**Prerequisite(s):** METR 60 (or PHYS 2B; CHEM 1A; STAT 95; AND METR 12 or METR 112 for ENVS majors).

**Corequisite(s):** METR 61 (METR majors)

**Grading:** Graded

**METR 164 - Introduction to Fire Weather**

3 unit(s)
Quantitative description of weather conditions that lead to fire danger around the world and atmospheric conditions leading to extreme fire behavior.

**Prerequisite(s):** METR 61.

**Grading:** Graded

**METR 165 - Mountain Meteorology**

3 unit(s)
Examination of atmospheric processes in mountain environments including micro and mesoscale wind systems, precipitation processes and convection, snow and avalanche mechanics.

**Prerequisite(s):** METR 61.

**Corequisite(s):** METR 121A.

**Grading:** Graded

**METR 166 - Field Studies in Meteorology**

3 unit(s)
Intensive summer observing campaign in the field.

**Misc/Lab:** Lecture 3 hour/Activity 4 hours

**Prerequisite(s):** METR 100W, METR 121B, METR 124, METR 170B.

**Grading:** Graded
**METR 168A - Global Climate Change I**

6 unit(s)
Scientific and social scientific approaches to the process and effects of global climate change: Climate changes in the Earth’s past, interactions between climate and life, anthropogenic climate change, socioeconomic contexts of environmental effects, cultural influences on climate change mitigation strategies.

**Prerequisite(s):** Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

**Grading:** Graded

**Note(s):** All of SJSU Studies courses require completion of the WST and upper division standing.

**METR 168B - Global Climate Change II**

3 unit(s)
Scientific and social scientific approaches to the process and effects of global climate change: Climate changes in the Earth’s past, interactions between climate and life, anthropogenic climate change, socioeconomic contexts of environmental effects, cultural influences on climate change mitigation strategies.

*Satisfies SJSU Studies R+S+V: Earth & Environment + Self, Society & Equality in the U.S. + Culture, Civilization & Global Understanding*

**Prerequisite(s):** COMM 168A / ENVS 168A / GEOL 168A / HUM 168A / METR 168A; Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

**Grading:** Graded

**Note(s):** All of SJSU Studies courses require completion of the WST and upper division standing.

**METR 170A - Weather Briefing**

1 unit(s)
Weather briefing associated with METR 121A, METR 121B.

*Misc/Lab: Lab 3 hours.*

**Corequisite(s):** METR 121A.

**Grading:** Credit/No Credit

**Note(s):** Year course 1 unit each semester.

**METR 170B - Weather Briefing**

1 unit(s)
Weather briefing associated with METR 121A, METR 121B.

*Misc/Lab: Lab 3 hours.*

**Corequisite(s):** METR 121B.

**Grading:** Credit/No Credit
METR 170C - Weather Briefing III

1 unit(s)
Weather analysis and forecasting lab. Simulated professional forecasts and briefings of the current state of the atmosphere at the large and local scales using real time forecast data.

4 hours Lab.

Prerequisite(s): METR 170A, METR 170B, and METR 171A.
Corequisite(s): METR 172.
Grading: Credit/No Credit

Note(s): Preparation for WxChallenge.

METR 171A - Synoptic Weather Analysis and Forecasting

3 unit(s)
Structure and behavior of atmospheric circulation systems, practical weather analysis and forecasting techniques. Acquisition, manipulation and display of real-time data sets, verbal presentations of weather analyses and forecasts.

Misc/Lab: Lecture 1 hour/lab 6 hours each semester.

Prerequisite(s): METR 100W, METR 121B or instructor consent.
Pre/Corequisite(s): METR 125.
Grading: Graded

Note(s): Year course.

METR 171B - Synoptic Weather Analysis and Forecasting

3 unit(s)
Structure and behavior of atmospheric circulation systems, practical weather analysis and forecasting techniques. Acquisition, manipulation and display of real-time data sets, verbal presentations of weather analyses and forecasts.

Misc/Lab: Lecture 1 hour/lab 6 hours each semester.

Prerequisite(s): METR 171A.
Grading: Graded

METR 172 - Mesoscale Meteorology

3 unit(s)
Structure and behavior of mesoscale atmospheric circulations, practical weather forecasting techniques.

Prerequisite(s): METR 171A.
Grading: Graded

METR 173 - Global Climate Modeling

3 unit(s)
Senior level course focused on climate modeling using the CMIP 3 intercomparison (models used for the IPCC 2007) as the primary study area.
Misc/Lab: Lecture 3 hour/Lab 3 hours

**Prerequisite(s):** METR 51, METR 71, METR 100W, METR 136.
**Grading:** Graded

**METR 174 - Climate Change Solutions**

3 unit(s)
Senior level capstone course in which students will define and conduct a project which is both climate change related and of a practical nature.

**Prerequisite(s):** METR 173, METR 100W.
**Grading:** Graded

**METR 179 - Topics in Senior Thesis**

1-2 unit(s)
Supervised research and the preparation of a senior thesis.

*Course may be repeated for credit for up to 3 units.*

**Prerequisite(s):** METR 100W. Not available to Open University Students.
**Pre/Corequisite(s):** METR 171A (first semester) METR 171B (second semester).
**Grading:** Credit/No Credit

**METR 180 - Individual Studies**

1-4 unit(s)
Independent work on topics by special arrangement. A maximum of four units may be repeated.

*Course may be repeated for credit for up to 4 units.*

**Prerequisite(s):** Meteorology major or minor. Not available to Open University Students.
**Grading:** Credit/No Credit

**METR 182 - Tutor Assistant in Meteorology**

1 unit(s)
Supervised instructional experience as a tutor assistant. A maximum of four units may be repeated.

*Course may be repeated for credit for up to 4 units.*

**Prerequisite(s):** Upper division standing and instructor consent. Not available to Open University Students.
**Grading:** Credit/No Credit

**METR 185 - Special Topics**

1-3 unit(s)
Selected topics in meteorology. Topics vary and are announced each semester.
Prerequisite(s): METR 121B.
Grading: Graded

METR 192 - International Program Studies

1-6 unit(s)
Grading: Mixed Grading

METR 202 - Research Methods in Meteorology

3 unit(s)
The nature of research in meteorology with particular reference to formulation of the problem, methods of attack and presentation of results. Proposal writing and selection of MS thesis topic.

Satisfies GWAR: Graduation Writing Assessment Requirement

Prerequisite(s): Instructor consent.
Grading: Graded

Note(s): Offered on an irregular basis only. This course satisfies graduate-level GWAR in this master's program.

METR 205 - Advanced Atmospheric and Climate Dynamics

3 unit(s)
Dynamics of larger-scale atmospheric flows over short and climate timescales. Quasi-geostrophic theory and applications; atmospheric waves; baroclinic instability; energetics of atmospheric and climate systems; dynamics of the general circulation; dynamics of the climate system; dynamics of climate change.

Prerequisite(s): METR 121B or equivalent
Grading: Graded

METR 206 - Advanced Synoptic Meteorology

3 unit(s)
Structure and theory of the observed features of atmospheric circulation regimes. Dynamical and thermodynamical interpretation of various scales of disturbances; application of numerical weather analysis and prediction methods; use of satellite data.

Prerequisite(s): METR 171B (or equivalent).
Grading: Graded

Note(s): Offered on an irregular basis only.

METR 209 - Adv Fire Behavior

3 unit(s)
Advanced topics in meteorology of extreme fire behavior. Includes fire-atmosphere interactions, microscale turbulence, flame properties, combustion physics, fuel dynamics, and extreme fire behavior such as fire whirls. Offered every fourth year.

Prerequisite(s): METR 124 or instructor consent.
Grading: Graded
METR 215 - Advanced Physical Meteorology

3 unit(s)
Thermodynamics of moist air; nucleation processes; particulates in air, microphysics and cloud dynamics, sampling techniques.

**Prerequisite(s):** METR 125 (or equivalent).
**Grading:** Graded

METR 225 - Topics in Advanced Atmosphere Dynamics

3 unit(s)
Gravity wave theory and observation; atmospheric tides; chaos theory; climate change dynamics; teleconnections; the MJO.

**Prerequisite(s):** METR 205 or equivalent.
**Grading:** Graded

METR 240 - Numerical Modeling

3 unit(s)
Numerical analysis and prediction in meteorology. Numerical methods and their errors; finite-difference and spectral methods; atmospheric models.

**Prerequisite(s):** METR 50 (or equivalent); METR 205A or instructor consent.
**Grading:** Graded

METR 241 - Parameterization in NWP

3 unit(s)
Studies of parameterization schemes for sub-gridscale physics in numerical models. Included are schemes for surface fluxes, soil-vegetation models, convection, clouds, and radiative transfer. Why these are needed, and how they are developed and implemented.

**Prerequisite(s):** METR 240
**Grading:** Graded

METR 245 - Mesoscale Modeling

3 unit(s)
Formulation and solution techniques for numerical models of the polluted atmospheric boundary layer, including meso-circulations such as sea breezes.

**Prerequisite(s):** METR 130 and METR 240
**Grading:** Graded

METR 245L - Mesoscale Modeling Lab

1 unit(s)
Experience porting, compiling, initializing and running mesoscale models, data analysis and visualization.
Prerequisite(s): METR 245.
Grading: Graded

METR 280 - Recent Developments in Meteorology

1-3 unit(s)
Intensive study of a particular topic in the atmospheric sciences with special emphasis on recent research results, such as instrumentation or modeling techniques. Topics vary and are announced each semester.

Prerequisite(s): Instructor consent.
Grading: Graded

METR 285 - Colloquium

1 unit(s)
Advanced studies in special fields, including original work by faculty, guest speakers and graduate students. One presentation required of each enrolled student and attendance required for all graduate students.

Prerequisite(s): Instructor consent.
Grading: Mandatory CR/NC/RP

METR 298 - Research

1-4 unit(s)
Supervised individual laboratory or field work.

Prerequisite(s): Instructor consent. Not available to Open University Students.
Grading: Mandatory CR/NC/RP

METR 299 - Master's Thesis or Project

1-6 unit(s)
Prerequisite(s): Admission to candidacy for the MS degree and approval of topic by thesis advisor. Not available to Open University Students.
Grading: Mandatory CR/NC/RP

Overview

At the core of all science, physics helps us understand chemical reactions, protein folding, the Earth’s interior, and the life cycle of stars. Among much else, physicists invented the semiconductor, the laser, and the electron microscope. They play key roles in the design and operation of spacecraft and in the development of electronic and optical instrumentation. The Department of Physics and Astronomy offers an MS degree in physics and two undergraduate degrees: (1) a BS that prepares students for professional careers in applied physics or graduate study, and (2) a BA that combines a strong foundation in physics with electives that allow for a second area of concentration, such as computer science, chemistry, science education, or math. Our faculty are experts in lasers and optics, computational physics, condensed matter, astrophysics, and physics education research. The department receives on average approximately $1.8 million annually in external funding for sponsored research.

Undergraduate

Physics, BA

This 120-unit program, offered by the Department of Physics and Astronomy, provides a strong foundation in physics while allowing sufficient electives for the student to pursue a second program of study in another field (e.g., science education, business, math, or another science; transfer students must take at least 12 units of upper division physics major courses at SJSU with a GPA of 2.0 or better in these courses).

- Program Learning Outcomes

Summary of Degree Units

University Graduation Requirements 44

Major Preparation 18

Major Requirements 46

University Electives 12
University Requirements for Graduation

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Undergraduate Graduation Requirements section of the Policies and Procedures.

Program Roadmaps

The 4-Year Roadmap is available online. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Degrees (ADT) Pathways are also available online.

General Education/American Institution Requirements

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

University Requirements (44 units)

Core Lower Division General Education (24 units)

Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

Note: Students who have completed the ADT Transfer degree (under SB 1440) for this major will have completed all lower division GE requirements and should follow the 60 unit guarantee roadmap. Meet with an advisor prior to registering for your first semester for the 60 unit roadmap or Specific questions.

Upper Division General Education (9 units)

Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions (6 units)

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B, HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Complete One Sequence From:

African American Studies (6 units)

- AFAM 2A - African Americans and the Development of America's History and Government 3 unit(s) (D2)
- AFAM 2B - African Americans and the Development of America's History and Government 3 unit(s) (M7)

Asian American Studies (6 units)
- **AAS 33A** - Asian Americans in U.S. History I 3 unit(s) (D2)
- **AAS 33B** - Asian Americans in U.S. History II 3 unit(s) (M7)

**U.S. History and Government (6 units)**

- **HIST 15** - Essentials of U.S. History 3 unit(s) (M12)
- **POLS 15** - Essentials of U.S. & California Government 3 unit(s) (M11)

**Chicana and Chicano Studies (6 units)**

- **CCS 10A** - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D2)
- **CCS 10B** - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (M7)

**Physical Education (2 units)**

**Graduation Writing Assessment Requirement (3 units)**

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

* A grade of C or better (C- not accepted) is required to meet graduation requirement.

**Major Preparation (18 units)**

- **CHEM 1A** - General Chemistry 5 unit(s) (B1+B3)
- **MATH 30** - Calculus I 3 unit(s) (B4)
- **MATH 31** - Calculus II 4 unit(s) (B4)
- **MATH 32** - Calculus III 3 unit(s) (B4)
- **MATH 33A** - Ordinary Differential Equations for SCI & ENGR 3 unit(s)

**Major Requirements (46 units)**

**Core Courses (46 units)**

- **PHYS 20** - Invitation to Physics and Astronomy 1 unit(s)
- **PHYS 40** - Introduction to Computational Physics 3 unit(s)
- **PHYS 50** - General Physics/Mechanics 4 unit(s) (B1+B3)
- **PHYS 51** - General Physics/Electricity and Magnetism 4 unit(s) (B1+B3)
- **PHYS 52** - General Physics/Waves, Light, Heat 4 unit(s) (B1+B3)
- **PHYS 105A** - Advanced Mechanics I 4 unit(s)
- **PHYS 110A** - Electricity and Magnetism I 3 unit(s)
- **PHYS 120A** - Electronics, Data Acquisition & Analysis 3 unit(s)
- **PHYS 122** - Modern Physics 4 unit(s)
- **PHYS 130** - Mathematical Methods in Physics 4 unit(s)
- **PHYS 160** - Thermodynamics and Statistical Physics 3 unit(s)
- Additional units of upper division physics 9 unit(s)
University Electives (12 units)

Total Units Required (120 units)

**Physics, BS**

This 120-unit program, offered by the Department of Physics and Astronomy, prepares students for professional positions in applied and computational physics or for graduate study (transfer students must take at least 12 units of upper division physics major courses at SJSU with a GPA of 2.0 or better in these courses).

• PHYS 122 - Modern Physics 4 unit(s)
• PHYS 130 - Mathematical Methods in Physics 4 unit(s)
• PHYS 140 - Computational Methods in Physics 3 unit(s)
• PHYS 160 - Thermodynamics and Statistical Physics 3 unit(s)
• PHYS 163 - Quantum Mechanics 3 unit(s)

Complete One Course From:

• PHYS 120B - Modern and Solid State Physics Lab 3 unit(s)
• PHYS 120C - Advanced Physics Lab: Optics and Lasers 3 unit(s)

Astronomy and Physics Electives (6 units)

Additional six units in upper division Physics or Astrophysics from:

• ASTR 117A - Astrophysics I 3 unit(s)
• ASTR 117B - Astrophysics II 3 unit(s)
• ASTR 155 - Topics in Modern Astrophysics 3 unit(s)
• PHYS 105B - Advanced Mechanics II 3 unit(s)
• PHYS 158 - Modern Optics 3 unit(s)
• PHYS 175A - Solid State Physics 3 unit(s)
• PHYS 120B - Modern and Solid State Physics Lab 3 unit(s)
• PHYS 120C - Advanced Physics Lab: Optics and Lasers 3 unit(s)
• PHYS 168 - Lasers 3 unit(s)

University Electives (3 units)

Total Units Required (120 units)
Physics, Preparation for Teaching, BA

This major is designed for students interested in teaching science in high school or middle school. Students enrolled in this program will earn units towards their single subject credential as an undergraduate. The following course work satisfies San José State University’s requirements for a BA in Physics, offered by the Department of Physics and Astronomy. A minimum grade point average (GPA) criterion may be required for verification of subject matter competency. Completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See “Teaching: How to Become a Teacher in California” (see Teaching) for information on application and admission to credential programs.

- Program Learning Outcomes

Summary of Degree Units

University Graduation Requirements 44

Major Preparation 18

Major Requirements 53

University Electives 5

Total 120

University Requirements for Graduation

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Undergraduate Graduation Requirements section of the Policies and Procedures.

Program Roadmaps

The 4-Year Roadmap is available online. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Degrees (ADT) Pathways are also available online.

General Education/American Institution Requirements

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

University Requirements (44 units)

Core Lower Division General Education (24 units)

Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

Upper Division General Education (9 units)
Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions (6 units)

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B, HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Complete One Sequence From:

African American Studies (6 units)

- AFAM 2A - African Americans and the Development of America's History and Government 3 unit(s) (D2)
- AFAM 2B - African Americans and the Development of America's History and Government 3 unit(s) (M7)

Asian American Studies (6 units)

- AAS 33A - Asian Americans in U.S. History I 3 unit(s) (D2)
- AAS 33B - Asian Americans in U.S. History II 3 unit(s) (M7)

U.S. History and Government (6 units)

- HIST 15 - Essentials of U.S. History 3 unit(s) (M12)
- POLS 15 - Essentials of U.S. & California Government 3 unit(s) (M11)

Chicana and Chicano Studies (6 units)

- CCS 10A - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D2)
- CCS 10B - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (M7)

Physical Education (2 units)

Graduation Writing Assessment Requirement (3 units)

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Major Preparation (18 units)

- CHEM 1A - General Chemistry 5 unit(s) (B1+B3)
- MATH 30 - Calculus I 3 unit(s) (B4)
- MATH 31 - Calculus II 4 unit(s) (B4)
- MATH 32 - Calculus III 3 unit(s) (B4)
• MATH 33A - Ordinary Differential Equations for SCI & ENGR 3 unit(s)

Major Requirements (53 units)

Core Courses (53 units)

• EDEL 294 - Research and Practices in Health and Special Education 3 unit(s)
• EDSC 162 - Language/Literacy Development of L2 Learners 3 unit(s)
• EDSC 173 - Psychological Foundations of Secondary Teacher Education 3 unit(s)
• PHYS 20 - Invitation to Physics and Astronomy 1 unit(s)
• PHYS 40 - Introduction to Computational Physics 3 unit(s)
• PHYS 50 - General Physics/Mechanics 4 unit(s) (B1+B3)
• PHYS 51 - General Physics/Electricity and Magnetism 4 unit(s) (B1+B3)
• PHYS 52 - General Physics/Waves, Light, Heat 4 unit(s) (B1+B3)
• PHYS 105A - Advanced Mechanics I 4 unit(s)
• PHYS 110A - Electricity and Magnetism I 3 unit(s)
• PHYS 120A - Electronics, Data Acquisition & Analysis 3 unit(s)
• PHYS 122 - Modern Physics 4 unit(s)
• PHYS 130 - Mathematical Methods in Physics 4 unit(s)
• SCED 273 - Secondary School Science 3 unit(s)
• SCED 175 - Classroom Experiences in Science Teaching 1 unit(s)
• Additional units of upper division physics 6 unit(s)

University Electives (5 units)

Total Units Required (120 units)

Master

Physics, Computational Physics Concentration, MS

The goal of this concentration, offered by the Department of Physics and Astronomy, is to give the candidate a thorough grounding in physics, computer programming, and numerical methods. All candidates are required to complete a thesis including the defense (Plan A) or take an oral comprehensive examination as culminating experience (Plan B).

The admission requirements, advancement to candidacy, and graduation requirements are detailed on the Physics, MS degree program section of the catalog.

Master's Requirements (30 units)

Graduation Writing Assessment Requirement

Students must pass the Graduation Writing Assessment Requirement (GWAR).
Core Courses (18 units)

- PHYS 100W - Methods of research and communication in physics 3 unit(s) (GWAR)
  or PHYS 220E - Graduate Optics Lab 3 unit(s) (GWAR)
- PHYS 205 - Advanced Dynamics 3 unit(s)
- PHYS 210 - Electromagnetic Theory 3 unit(s)
- PHYS 230 - Methods in Mathematical Physics 3 unit(s)
- PHYS 240 - Computational Physics 3 unit(s)
- PHYS 263A - Quantum Theory 3 unit(s)

Mathematics Courses (6 units)

Complete one course:

- MATH 143C - Numerical Analysis and Scientific Computing 3 unit(s)
- MATH 143M - Numerical Analysis and Scientific Computing 3 unit(s)

Complete one course:

Select one course in consultation with Graduate Advisor.

- MATH 243B - Advanced Topics in Numerical Analysis 3 unit(s)
- MATH 243M - Numerical Linear Algebra 3 unit(s)
- 200-level mathematics or physics course 3 unit(s)

Culminating Experience (6 units)

Complete one option (Plan A or Plan B):

Plan A (Thesis)

- PHYS 297 - Directed Research 1-5 unit(s) (4 units required)
- PHYS 299 - Master's Thesis 1-4 unit(s) (2 units required)

Plan B (Project)

- PHYS 298 - Graduate Research Report 1-4 unit(s) (1 unit required)
- Additional 3 units of PHYS 297 or 200-level mathematics or physics elective course selected in consultation with graduate advisor
- PSYC 298 - Special Problems 1-6 unit(s) (2 units required)

Total Units Required (30 units)

Physics, Modern Optics Concentration, MS
MS Physics, concentration in Modern Optics is offered by the Department of Physics and Astronomy. The students in this concentration receive instruction in fundamental areas of physics and gain experience and knowledge in a wide range of subjects related to Modern Optics. All candidates are required to complete a thesis including the defense (Plan A) or take an oral comprehensive examination as culminating experience (Plan B).

The admission requirements, advancement to candidacy, and graduation requirements are detailed on the Physics, MS degree program section of the catalog.

Master's Requirements (30 units)

Graduation Writing Assessment Requirement

Students must pass the Graduation Writing Assessment Requirement (GWAR).

Core Courses (18 units)

- PHYS 220E - Graduate Optics Lab 3 unit(s) (GWAR)
- PHYS 205 - Advanced Dynamics 3 unit(s)
- PHYS 210 - Electromagnetic Theory 3 unit(s)
- PHYS 230 - Methods in Mathematical Physics 3 unit(s)
- PHYS 258 - Optics 3 unit(s)
- PHYS 263A - Quantum Theory 3 unit(s)

Electives (6 units)

Complete one course (3 units):

- PHYS 208 - Introduction to Electro-Optics 3 unit(s)
- PHYS 268 - Laser Spectroscopy 3 unit(s)

Complete one additional course (3 units):

- PHYS 120C - Advanced Physics Lab: Optics and Lasers 3 unit(s)
- PHYS 158 - Modern Optics 3 unit(s)
- PHYS 168 - Lasers 3 unit(s)
- PHYS 208 - Introduction to Electro-Optics 3 unit(s)
- PHYS 268 - Laser Spectroscopy 3 unit(s)

Culminating Experience (6 units)

Complete one option (Plan A or Plan B):

Plan A (Thesis)

- PHYS 297 - Directed Research 1-5 unit(s) (4 units required)
- PHYS 299 - Master’s Thesis 1-4 unit(s) (2 units required)
Plan B (Project)

- PHYS 297 - Directed Research 1-5 unit(s) (1 unit required)
- Additional 3 units of PHYS 297 or additional course from PHYS 120C, 158, 168, 208, or 268
- PHYS 298 - Graduate Research Report 1-4 unit(s)

Total Units Required (30 units)

Physics, MS

- Admissions Requirements
- Advancement to Candidacy
- Requirements for Graduation
- Master's Requirements (30 units)
- Program Learning Outcomes

At the core of all science, physics helps us understand chemical reactions, protein folding, the Earth's interior, and the life cycle of stars. Physicists invented the semiconductor, the laser, and the electron microscope. They play key roles in the design and operation of spacecraft and in the development of electronic and optical instrumentation. The Department of Physics and Astronomy offers a Master of Science in Physics and two concentrations: Computational Physics and Modern Optics. Our faculty are experts in lasers and optics, computational physics, condensed matter, astrophysics, and physics education research. The department receives on average approximately $1.8 million annually in external funding for sponsored research.

Department of Physics and Astronomy Website: physics.sjsu.edu.

Admissions Requirements

Candidates must meet all the university admissions requirements. Students can be admitted in either classified or conditionally classified standing:

- **Classified Standing:** Students admitted with classified standing will have an undergraduate degree in Physics or other STEM discipline with classes completed in upper division Mechanics, Electricity and Magnetism and Quantum Mechanics.
- **Conditional Classified Standing:** Conditional acceptance means that the candidate must fulfill specific requirements in order to be eligible to apply for advancement to candidacy. These conditions will be stipulated as part of the acceptance agreement between the faculty adviser and the applicant. Failure to fulfill these requirements will result in disqualification from the program.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage.

Advancement to Candidacy

Each semester, students should consult with their graduate advisor to develop a schedule of courses. Students admitted as conditionally classified must satisfy the requirements listed in their acceptance agreement before advancing to candidacy. Students who have achieved classified standing in the master's degree curriculum must next advance to candidacy for the degree. A student may advance to candidacy after:
1. Completing a minimum of 9 units of letter-graded work as a graduate student in 100- or 200-level courses acceptable to the department as well as fulfilling the other university requirements for advancement to candidacy.
2. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR), which is satisfied in this degree by the completion of PHYS 100W or PHYS 220E with a grade of "B" or better.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Program Graduation Requirements

Students must complete program requirements, which consists of 30 semester units of approved work. The student consults with their advisor to select a thesis or project topic.

Culminating Experience

Plan A (Thesis)

Thesis: The thesis must meet university requirements as stipulated in the Graduate Policies and Procedures section of this catalog and in the SJSU Master's Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate's research committee chair with the assistance of the research committee. The MS thesis document must be approved by the student's research committee before submission. Typically, the research committee will provide the candidate feedback during the Thesis Defense and may request changes to the thesis before final approval. Oral Thesis Defense: All MS candidates are required to present a public seminar based on their research project.

Plan B (Project)

Written Project: The written project must be a manuscript describing the student's research project, written following a professional journal's format for submission. It will be written under the guidance of the candidate's research committee chair with the assistance of their research committee. The manuscript must be approved by the student's research committee. Typically, the committee will provide the candidate feedback during the Project Defense and may request changes to the manuscript before final approval.

Masters Requirements (30 units)

Graduation Writing Assessment Requirement

Students must pass the Graduation Writing Assessment Requirement (GWAR).

Core Courses (18 units)
• PHYS 100W - Methods of research and communication in physics 3 unit(s) (GWAR)
or PHYS 220E - Graduate Optics Lab 3 unit(s) (GWAR)
• PHYS 205 - Advanced Dynamics 3 unit(s)
• PHYS 210 - Electromagnetic Theory 3 unit(s)
• PHYS 230 - Methods in Mathematical Physics 3 unit(s)
• PHYS 258 - Optics 3 unit(s)
• PHYS 263A - Quantum Theory 3 unit(s)

Electives (6 units)

• 3 units letter-graded 200-level physics
• 3 units 100- or 200-level physics, mathematics, science or engineering courses approved by the graduate advisor

Culminating Experience (6 units)

Complete one option (Plan A or Plan B):

Plan A (Thesis)

• PHYS 297 - Directed Research 1-5 unit(s) (4 units required)
• PHYS 299 - Master's Thesis 1-4 unit(s) (2 units required)

Plan B (Project)

• PHYS 297 - Directed Research 1-5 unit(s) (1 unit required)
• Additional 3 units of PHYS 297 or elective selected in consultation with graduate advisor
• PHYS 298 - Graduate Research Report 1-4 unit(s) (2 units required)

Total Units Required (30 units)

Minor

Astronomy Minor

The Astronomy minor offered by the Department of Physics and Astronomy requires completion of the physics and astronomy courses taken at San José State University with a grade of "C" (2.0 GPA) or better.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Requirements (21 units)

• PHYS 50 - General Physics/Mechanics 4 unit(s) (B1+B3)
Physics Minor

A physics minor to accompany a major in some other field is offered. A physics minor is 18 units of physics courses taken at San José State University with a "C" (2.0) average or better.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor Requirements (18 units)

- PHYS 50 - General Physics/Mechanics 4 unit(s) (B1+B3)
- PHYS 51 - General Physics/Electricity and Magnetism 4 unit(s) (B1+B3)
- PHYS 52 - General Physics/Waves, Light, Heat 4 unit(s) (B1+B3)
- Six units of upper division physics approved by Physics advisor 6 unit(s)

Total Units Required (18 units)

ASTR 10 - Descriptive Astronomy

3 unit(s)
A generally non-mathematical examination of principles, facts and logic of astronomy, emphasizing arrangement, origin and evolution of the solar system.

Satisfies B1: Physical Science

Grading: Graded

ASTR 92 - International Program Studies

1-12 unit(s)
Grading: Mixed Grading

ASTR 101 - Modern Astronomy

3 unit(s)
A principally non-mathematical discussion of current scientific observational and theoretical understanding of the origin and evolution of stars, galaxies and the cosmos.

Satisfies SJSU Studies R: Earth & Environment
Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

**ASTR 102 - Astronomy Lab**

1 unit(s)
Experimental examination of specific astronomical topics: coordinate systems, constellations, etc. Astronomical applications of general physical principles: gravitational motion, stellar spectra, etc.

Misc/Lab: Lab 3 hours.

Satisfies B3: Laboratory Science

Prerequisite(s): Completion of or concurrent enrollment in a college-level astronomy course.

Grading: Graded

**ASTR 117A - Astrophysics I**

3 unit(s)
Physical and observational foundations of astronomy and astrophysics. Celestial coordinates, telescopes, astronomical observations, orbital motion, physics and chemistry of planetary systems; introduction to stellar physics. Computer models and simulations may be used.

Prerequisite(s): PHYS 52 and MATH 32 or MATH 32X with a "C-" or better.
Grading: Graded

**ASTR 117B - Astrophysics II**

3 unit(s)
Physics of stellar structure and evolution; observed properties of stars; physics and chemistry of the interstellar medium; galaxies and cosmology.

Prerequisite(s): PHYS 52 and MATH 31 or MATH 31X with a "C-" or better. College of Science or Engineering Majors only.
Grading: Graded

**ASTR 155 - Topics in Modern Astrophysics**

3 unit(s)
Topics vary each semester and may include observational and/or computational techniques. Course is repeatable for a total of 9 units.

Course may be repeated for credit for up to 9 units.

Prerequisite(s): ASTR 117A with a C- or better
Grading: Graded
ASTR 192 - Int'l Program Studies

1-12 unit(s)

Grading: Mixed Grading

PHYS 1 - Elementary Physics

3 unit(s)

Mechanics, energy, electricity, magnetism, optics, atomic and nuclear physics, properties of matter; emphasizes practical applications of physics principles to contemporary problems.

Satisfies B1: Physical Science

Prerequisite(s): The following Declared Majors are not allowed to enroll in this course: Engineering, Chemistry, Geology, Meteorology, Physics, Earth Science.

Grading: Graded

PHYS 1L - Elementary Physics Lab

1 unit(s)

Selected experiments on topics covered in Phys 1.

Misc/Lab: Lab 3 hours.

Satisfies B3: Laboratory Science

Corequisite(s): PHYS 1. The following Declared Majors are not allowed to enroll in this course: Engineering, Chemistry, Geology, Meteorology, Physics, Earth Science.

Grading: Graded

PHYS 2A - Fundamentals of Physics

4 unit(s)

First semester of a two-semester sequence that is non-calculus based and covers the topics of mechanics, heat, and sound.

Misc/Lab: Lecture 3 hours/lab 3 hours.

Satisfies B1 + B3: Physical + Lab Science

Prerequisite(s): Algebra.

Grading: Graded

Note(s): Year course.

PHYS 2AW - Fundamentals of Physics

1 unit(s)

A discussion course for students concurrently registered in Physics 002A covering problem solving methods as related to topics normally covered in Physics 002A.

Course may be repeated for credit for up to 3 units.
**Corequisite(s):** PHYS 2A  
**Grading:** Credit/No Credit

**PHYS 2B - Fundamentals of Physics**

4 unit(s)  
Electricity and magnetism, optics and atomic structure.

**Misc/Lab:** Lecture 3 hours/lab 3 hours.

**Satisfies B1 + B3: Physical + Lab Science**

**Prerequisite(s):** PHYS 2A (with grade of "C-" or better).  
**Grading:** Graded

**PHYS 20 - Invitation to Physics and Astronomy**

1 unit(s)  
Introduction to the physics department, its faculty, and basic skills necessary for success as a physics major. Topics include relativity and quantum theory for beginners, careers in physics and astronomy, career pathways of BA/BS physics recipients, the role of research in undergraduate STEM education, a historical perspective on the field of physics, and physics/astronomy in the news.

**Grading:** Graded

**PHYS 23 - Animation Physics**

3 unit(s)  
This course presents principles and concepts of physics relevant to animation and special effects. Students will demonstrate mastery of this scientific knowledge in the critical analysis of films, shows, video games, etc., and in creating their own animated shorts.

**Satisfies B1: Physical Science**

**Grading:** Graded

**PHYS 40 - Introduction to Computational Physics**

3 unit(s)  
An introduction to programming for physics majors who have no previous programming experience. Problem solving, data visualization and analysis using computational methods.

**Misc/Lab:** Lecture 2 hours/Lab 3 hours.

**Prerequisite(s):** PHYS 50  
**Grading:** Graded

**PHYS 49 - Introduction to Physics**

3 unit(s)  
A preparatory course in physics for science and engineering majors, emphasizing significant figures, unit

**Prerequisite(s):** MATH 19 or pre-calc placement test  
**Grading:** Graded

**PHYS 50 - General Physics/Mechanics**

4 unit(s)  
A calculus-based treatment of particle kinematics and dynamics, work, energy, momentum, rotational motion, equilibrium, and simple harmonic motion.

*Lecture 3 hours/lab 3 hours*

*Satisfies B1 + B3: Physical + Lab Science (Intensive Science Package)*

**Prerequisite(s):** Writing Enrollment Category I / II / III or GE Area A2 completed (grade of C- or better) or ENGL 1AF (grade of CR); AND, 3 or better on AP Calculus Test, or C or better in MATH 30/30PL /30PL /30X. Allowed Declared Majors: College of Science or Engineering.  
**Grading:** Graded

**PHYS 50W - General Physics/Mechanics Workshop**

1 unit(s)  
A discussion course for students concurrently registered in PHYS 50 General Physics/Mechanics covering problem solving methods as related to topics normally covered in PHYS 50.

*Course may be repeated for credit for up to 3 units.*

**Corequisite(s):** PHYS 50  
**Grading:** Credit/No Credit

**PHYS 51 - General Physics/Electricity and Magnetism**

4 unit(s)  
A calculus-based introduction to electricity and magnetism, covering electric charges, electric and magnetic fields, dc and ac circuits, and electromagnetic waves. Intensive Science Package GE: B1 and B3.

*Misc/Lab: Lecture 3 hours/lab 3 hours.*

*Satisfies B1 + B3: Physical + Lab Science*

**Prerequisite(s):** PHYS 50, MATH 31, both with grades of "C" or better. College of Science or Engineering Majors Only.  
**Grading:** Graded

**PHYS 52 - General Physics/Waves, Light, Heat**

4 unit(s)  
Mechanical Waves, Light, Spectra, Quantization of electromagnetic radiation; Geometric and Physical Optics; Temperature, Heat and Thermodynamics. Intensive Science Package GE Area: B1 and B3.

*Lecture 3 hours/lab 3 hours.*
Satisfies B1 + B3: Physical + Lab Science.

**Prerequisite(s):** PHYS 51, and MATH 31 or MATH 31X; both with grade of "C" or better. Allowed Declared Majors College of Science or Engineering majors only.

**Grading:** Graded

**PHYS 92 - Int'l Program Studies**

1-6 unit(s)

**Grading:** Mixed Grading

**PHYS 100W - Methods of research and communication in physics**

3 unit(s)

Develop communication skills for physics, including proposals, posters, research reports and oral presentations. Research strategies and methodologies for effective communication to general and specialized audiences. GE Area: Z.

Satisfies SJSU Studies Z: Written Communication II.

**Prerequisite(s):** A3 or equivalent second semester composition course (with a grade of C- or better); completion of core GE; satisfaction of Writing Skills Test or completion of ENGL 100A / LLD 100A with C or better; and upper division standing. Or Graduate or Postbaccalaureate level.

**Grading:** Graded

**Note(s):** Must be passed with C or better to satisfy the CSU Graduation Writing Assessment Requirement (GWAR).

**PHYS 105A - Advanced Mechanics I**

4 unit(s)

**Prerequisite(s):** PHYS 52, MATH 33A, each with grade of "C-" or better.

**Grading:** Graded

**Note(s):** Year course.

**PHYS 105B - Advanced Mechanics II**

3 unit(s)

Dynamics of systems of particles: collisions, rigid body rotations, non-inertial frames, coupled oscillations, waves. This course is strongly recommended for students who are considering graduate study in physics.

**Prerequisite(s):** PHYS 105A with grade "C-" or better.

**Grading:** Graded

**PHYS 107 - Waves and Oscillations**

3 unit(s)

Oscillatory phenomena and their connection to waves. Review of simple harmonic motion and extension to damped,
driven, and coupled oscillators. Applications to waves on strings, and basic concepts of electromagnetic and sound waves. Connections to the beginnings of quantum theory are developed.

**Prerequisite(s):** PHYS 52 with C- or better  
**Grading:** Graded

**PHYS 110A - Electricity and Magnetism I**

3 unit(s)  
Theories of electrostatics, magnetostatics, electrodynamics and electromagnetic waves.  

**Prerequisite(s):** PHYS 130, MATH 33A, each with "C-" or better.  
**Grading:** Graded

**Note(s):** Year course.

**PHYS 110B - Electricity and Magnetism II**

3 unit(s)  
Theories of electrostatics, magnetostatics, electrodynamics and electromagnetic waves.  

**Prerequisite(s):** PHYS 110A  
**Grading:** Graded

**PHYS 120A - Electronics, Data Acquisition & Analysis**

3 unit(s)  
The characteristics of basic analog and digital electronic circuits used in a scientific laboratory. Topics include transistors, operational amplifiers, digital electronic circuits, and computer data acquisition.  

**Misc/Lab:** Seminar 2 hours/lab 3 hours.  

**Prerequisite(s):** PHYS 51 with "C" or better. Physics Majors Only  
**Grading:** Graded

**PHYS 120B - Modern and Solid State Physics Lab**

3 unit(s)  
Experimental methods of modern physics and solid state physics, including semiconductors, superconducting quantum interference, Faraday effect, magnetic resonance and electron spin resonance.  

**Misc/Lab:** Seminar 1 hour/lab 6 hours.  

**Prerequisite(s):** PHYS 122 and PHYS 120A both with C- or better. Physics Majors only.  
**Grading:** Graded

**PHYS 120C - Advanced Physics Lab: Optics and Lasers**

3 unit(s)  
Design of optical systems involving lasers and other common optical components. Use of optical systems to explore interference, holography, and other optical phenomena.
Misc/Lab: Lecture 1 hour/lab 6 hours.

**Prerequisite(s):** PHYS 120A and PHYS 158 all with grade of "C-" or better.

**Grading:** Graded

*PHYS 121S - Radiation Safety*

1-2 unit(s)
Health hazards involved in working with radioactive substances. Physical nature of hazards, biological effects, standards of permissible exposures, safety precautions and protection techniques. Two units meet State of California recommendations.

**Prerequisite(s):** Lower division calculus, chemistry and physics.

**Grading:** Graded

*PHYS 122 - Modern Physics*

4 unit(s)
Survey of modern physics for science majors, covering special relativity, pre-quantum theory, basic quantum mechanics, atomic and molecular physics, solid state physics, nuclear and particle physics, and cosmology. Historical foundations of these topics will also be presented.

**Prerequisite(s):** CHEM 1A, MATH 32, and PHYS 52 all with a C- or better.

**Grading:** Graded

*PHYS 126 - Introduction to Nuclear Science*

3 unit(s)
Properties of the atomic nucleus. Applications of nuclear science in biology, chemistry, engineering, geology and physics.

**Prerequisite(s):** Lower division calculus, chemistry and physics.

**Grading:** Graded

*PHYS 127 - Nuclear Science Lab*

3 unit(s)
Basic techniques and procedures used in nuclear science. Nuclear decay, nuclear reactions, radiation detection and measurements, nuclear analytical methods and tracer techniques.

Misc/Lab: Lecture 1 hour/lab 6 hours.

**Prerequisite(s):** NUCS 121S, CHEM 100W and CHEM 126 (with grades of "C" or better; "C-" not accepted); or instructor consent.

**Grading:** ABC-/NC Grading

*PHYS 130 - Mathematical Methods in Physics*

4 unit(s)
Mathematical methodologies commonly used in physics, including linear algebra, vector calculus, partial differential equations and complex variables, and their applications to classical mechanics, electricity and magnetism, and quantum mechanics.
Prerequisite(s): MATH 32 or MATH 32X, and PHYS 52.
Grading: Graded

**PHYS 140 - Computational Methods in Physics**

3 unit(s)
An introduction to the programming of algorithms and numerical techniques pertinent to physical systems.

Misc/Lab: Seminar 2 hours/lab 3 hours.

Prerequisite(s): PHYS 40 or previous programming experience; PHYS 52 with a C- or better. Physics Majors Only.
Grading: Graded

**PHYS 155 - Topics in Physics and Astronomy**

3-9 unit(s)
Trending topics of physics and astronomy research and areas of special interest. Content varies by semester.

Course repeatable when topic changes for a total of 9 units.

Prerequisite(s): PHYS 52, and MATH 32 or MATH 32X, both with a C- or better. Or Instructor Consent.
Grading: Graded

**PHYS 158 - Modern Optics**

3 unit(s)
Thin and thick lens systems. Double and multiple beam interference, holography, Fraunhofer and Fresnel diffraction, Fourier optics, spatial filtering, polarization and birefringence.

Prerequisite(s): PHYS 52 with a C- or better; MATH 32 or MATH 32X.
Grading: Graded

**PHYS 160 - Thermodynamics and Statistical Physics**

3 unit(s)
The laws of thermodynamics and kinetic theory with introduction to statistical mechanics.

Prerequisite(s): CHEM 1A and PHYS 52 both with a C- or better; MATH 32 or MATH 32X.
Grading: Graded

**PHYS 163 - Quantum Mechanics**

3 unit(s)
General principles of quantum theories. Wave functions, operator algebra and approximation methods. Applications to atomic structure and solid state physics.

Prerequisite(s): PHYS 122, MATH 33A, PHYS 130, all with a grade of "C-" or better.
Grading: Graded

**PHYS 166 - Physics of Music**
3 unit(s)
Physical, mathematical and perceptual foundations of music. Includes musical instruments, hearing, harmony, room acoustics, sound analysis, synthesis and reproduction.

Satisfies SJSU Studies R: Earth & Environment

Prerequisite(s): Passage of the Writing Skills Test (WST) or ENGL 100A / LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

Grading: Graded

Note(s): All of SJSU Studies courses require completion of the WST and upper division standing.

PHYS 168 - Lasers

3 unit(s)

Prerequisite(s): PHYS 122 and PHYS 158 with a C- or better.
Corequisite(s): PHYS 110B.
Grading: Graded

PHYS 175A - Solid State Physics

3 unit(s)
A detailed treatment of the physics of solids using quantum mechanics, crystallography, electromagnetism, and metallurgy.

Prerequisite(s): PHYS 122 with grade of "C-" or better.
Grading: Graded

PHYS 180 - Individual Studies

1-4 unit(s)
Advanced work in special fields.

Prerequisite(s): Physics major or minor. Not available to Open University Students.
Grading: Credit/No Credit

Note(s): Maximum 4 units of 180/184 may be applied toward graduation.

PHYS 184 - Directed Reading

1-3 unit(s)
Assigned readings of selected books, journals and special papers to fill gaps in training or for contact with new fields. Weekly reports and conferences.

Prerequisite(s): Not available to Open University Students.
Grading: Credit/No Credit

Note(s): Maximum 4 units of 180/184 may be applied toward graduation.
PHYS 192 - Int'l Program Studies

1-6 unit(s)

**Grading:** Mixed Grading

PHYS 196B - Physics Education: Theory and Practice

3 unit(s)

Instructional Student Assistants and Teaching Associates integrate educational theory, pedagogy, content, and practice by focusing on practical concerns and associated theoretical models. Weekly readings, in-class discussions, out-of-class data collection, reflections, projects, and presentations based on classroom teaching experience.

**Prerequisite(s):** PHYS 50, PHYS 2A, or equivalent

**Grading:** Graded

PHYS 205 - Advanced Dynamics

3 unit(s)

Generalized methods and selected topics in classical mechanics.

**Prerequisite(s):** PHYS 105A, PHYS 130, and MATH 33A, or equivalents; or instructor consent.

**Grading:** Graded

PHYS 208 - Introduction to Electro-Optics

3 unit(s)

This course introduces the physical principles of electro-optics including modulators (electro- and acousto-optic), non-linear optics, semiconductor lasers, optical detection and integrated optics with applications.

**Prerequisite(s):** PHYS 158

**Grading:** Graded

PHYS 210 - Electromagnetic Theory

3 unit(s)

Topics in electrostatics and magnetostatics; Maxwell equations; solutions of boundary-value problems using methods of images and Green's function; boundary-value problems in magnetostatics; electromagnetic plane waves and wave propagation in a dielectric media; Fresnel Equations.

**Prerequisite(s):** PHYS 230

**Grading:** Graded

PHYS 220E - Graduate Optics Lab

3 unit(s)

Covers the application of Lasers and Optics with emphasis on topics such as Gaussian beams, Fabry-Perot cavities, Laser oscillators including CW and pulsed operation, non-linear optics, frequency stabilization and Fourier Optics. Communication of scientific content through written communication.

*Lecture 2 hour/Lab 3 hours.*
Satisfies GWAR: Graduation Writing Assessment Requirement.

**Prerequisite(s):** PHYS 120C or PHYS 208 or PHYS 258 or PHYS 268.
**Grading:** Graded

**Note(s):** This course satisfies graduate-level GWAR in this master's program.

**PHYS 230 - Methods in Mathematical Physics**

3 unit(s)
Partial differential equations and special functions: Bessel functions, Legendre polynomials, spherical harmonics; Green's functions; complex variables and contour integrations; matrices and eigenvalue problems; Fourier and Laplace transforms.

**Prerequisite(s):** MATH 33A and PHYS 130, or equivalents; or instructor consent.
**Grading:** Graded

**PHYS 240 - Computational Physics**

3 unit(s)
Numerical techniques and computational methods applied to solving problems from various branches of physics.

**Prerequisite(s):** PHYS 40, PHYS 105A, and PHYS 163, or equivalents; or instructor consent.
**Grading:** Graded

**PHYS 255 - Advanced Physics**

3 unit(s)
Selected topics in physics. Topics vary each semester. Course is repeatable when content changes.

**Prerequisite(s):** Suitable upper division background in physics and mathematics.
**Grading:** Graded

**PHYS 255C - Celestial Mechanics**

3 unit(s)
Basic concepts in celestial mechanics emphasizing orbital mechanics and the calculation of orbital perturbation. Topics covered include dynamical principles, potential theory, planetary equations, the disturbing function, Lagrange's perturbation equations and geopotential perturbations.

**Prerequisite(s):** Senior or graduate standing.
**Grading:** Graded

**PHYS 258 - Optics**

3 unit(s)
Fourier optics, diffraction theory, imaging and image enhancement, holography and information processing.

**Prerequisite(s):** PHYS 158 and MATH 33A.
**Grading:** Graded

**PHYS 260 - Statistical Mechanics**
3 unit(s)

Prerequisite(s): PHYS 160 and PHYS 163.
Grading: Graded

PHYS 263A - Quantum Theory

3 unit(s)

Prerequisite(s): PHYS 163, PHYS 230.
Grading: Graded

PHYS 268 - Laser Spectroscopy

3 unit(s)
Importance of spectroscopy. Interaction of radiation with matter. Instrumentation for laser spectroscopy. Examples of various techniques, cw and pulsed.

Prerequisite(s): PHYS 110B, PHYS 158 or instructor consent.
Grading: Graded

PHYS 275 - Solid State Physics

3 unit(s)
Properties of crystals; electric, magnetic and thermal properties of solids.

Prerequisite(s): PHYS 175A and PHYS 263A or instructor consent.
Grading: Graded

PHYS 277 - Superconductivity and Magnetism in Solids

3 unit(s)

Prerequisite(s): PHYS 175A, PHYS 275 or instructor consent.
Grading: Graded

PHYS 285 - Seminar

1 unit(s)
Meetings for the presentation and discussion of advanced studies in special fields including work by the faculty, guest investigators and graduate students. Topics will vary each semester.

Grading: Credit/No Credit

PHYS 297 - Directed Research
1-5 unit(s)
Advanced work in special fields. Only open to currently enrolled graduate students.

Course may be repeated for credit for up to 5 units.

Grading: Graded

Note(s): Not available to Open University students.

PHYS 298 - Graduate Research Report

1-4 unit(s)
Graduate Research Report.

Repeatable for credit.

Prerequisite(s): PHYS 297 and Instructor consent. Not available to Open University Students.

Grading: Mandatory CR/NC/RP

PHYS 299 - Master's Thesis

1-4 unit(s)
Prerequisite(s): Admission to candidacy for the master's degree. Not available to Open University Students.

Grading: Mandatory CR/NC/RP

PHYS 1290R - Culminating Experience Supervision

1 unit(s)
Continued work on thesis or project.

Course may be repeated for credit for up to 16 units.

Prerequisite(s): Outstanding RP grade in a preceding semester in Chem 299, Master's Thesis

Grading: CR/NC, No Degree Credit

Note(s): No Degree Credit.

Professors

Ivano W. Aiello, Chair
Jonathan B. Geller
Overview

The second oldest marine lab on Monterey Bay, Moss Landing Marine Laboratories, (MLML), established in 1966, has an international reputation for excellence in marine science research and education. MLML administers the interdisciplinary Master's of Science degree in marine science for seven California State University (CSU) campuses: East Bay, Fresno, Monterey Bay, Sacramento, San Francisco, San José and Stanislaus. MLML's hands-on, field-oriented approach places students, faculty, research and staff where discoveries are made: at the frontiers of marine science worldwide. The wealth of nearby marine resources, excellent marine facilities and operations, renowned faculty and research-based curriculum combine to make the MLML program one of the best graduate programs of its kind in the United States. MLML provides students with a cutting-edge education that prepares them for careers in science, education and outreach, conservation, policy and management, and for doctoral studies.

Master

Marine Science, MS

Moss Landing Marine Laboratories (MLML) is the second oldest marine lab in Monterey Bay. Established in 1966, it has an international reputation for excellence in marine science research and education. MLML administers the interdisciplinary Master's of Science in marine science for seven California State University (CSU) campuses: East Bay, Fresno, Monterey Bay, Sacramento, San Francisco, San José and Stanislaus. The hands-on, field-oriented MLML approach places students, faculty, research, and staff where discoveries are made: at the frontiers of marine science worldwide. The wealth of nearby marine resources, excellent marine facilities and operations, renowned faculty and research-based curriculum combine to make the MLML program one of the best graduate programs of its
kind in the United States. MLML provides students with a cutting-edge education that prepares them for careers in
science, education and outreach, conservation, policy and management, and for doctoral studies. See the program
website at: www.mlml.calstate.edu/.

For more information contact the graduate program coordinator at MLML at gradprog@mlml.calstate.edu.

Admissions Requirements

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at
calstate.edu/apply. All admitted applicants must satisfy all SJSU catalog admission requirements. The university-level
graduate application is separate from the program application. Apply separately to the university to obtain approval
for university-level admission and to the department to obtain admission into the program. Program application and
admission requirements are available at gradprog.mlml.calstate.edu.

Before applying to MLML, prospective students must select an MLML faculty advisor(s) before submitting application
materials and schedule a visit to MLML. Discussing your application with a potential faculty advisor and visiting MLML
will 1) provide you with a better understanding of what our program has to offer; 2) help you determine if the selected
faculty advisor is the right academic mentor for you; 3) enable you to speak with the potential advisor about the
application process; 4) allow you to speak with current students; and 5) strengthen your application and improve your
chances of acceptance. More information can be found at www.mlml.calstate.edu/gradprog/how-to-apply/.

After completing the online program application by February 1, applicants must submit the following supplemental
application materials to MLML-emailed as a single PDF attachment to the MLML Graduate Program Coordinator by
February 15:

- Statement of Purpose - detailing (at a minimum) 1) why you want to study marine science, 2) why you want
to attend MLML, 3) your background in marine science, 4) your specific research interests, and 5) what long-
term goals you ultimately intend to pursue by attending MLML;
- CV/Resume - summarizing relevant academic and professional experience, including 1) academic
background (degrees earned, GPA, relevant coursework), 2) research experience, and 3) relevant
employment history, volunteer experience, and/or memberships;
- Unofficial Transcripts - from all post-secondary institutions attended; and
- Unofficial GRE scores - MLML does not require the GRE, but it is strongly recommended. Submit your
unofficial GRE scores to MLML by either downloading your score report from the ETS website, or scanning
the score report mailed to you by ETS, and including it in the PDF you email to the MLML Graduate Program
Coordinator.

Please see SJSU's minimum score requirements listed on the Graduate Program Test Requirement webpage.

Applicants must also request to have three letters of recommendation sent to the program from people familiar with
their academic and/or professional background. Letters of recommendation must be emailed directly from your
recommenders as a .pdf attachment to the MLML Graduate Program Coordinator at gradprog@mlml.calstate.edu by
February 15.

These application instructions can also be found at: www.mlml.calstate.edu/gradprog/step-by-step-application-
instructions

Applicants may be admitted either as conditional or classified. Conditionally admitted applicants will have some
condition(s), such as completion of additional coursework, placed upon their admission into the MLML program;
classified students are admitted into the program without any such condition(s).

Applicants from countries in which the native language is not English must achieve a minimum English-language
proficiency test score as indicated on the Graduate Program Test Requirement webpage at SJSU GAPE.
Requirements for Advancement to Candidacy

SJSU university requirements for advancement to candidacy for the master's degree are outlined in the Graduate Policies and Procedures section.

Candidacy includes the successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website.

Program requirements for Advancing to Candidacy are as follows:

- Completed the majority of coursework with the exception of the Culminating Experience course MS 299 - Master's Thesis
- Acquired thesis proposal approval from the entire thesis committee, fulfilling the Graduation Writing Assessment Requirement (GWAR)
- Acquired research permitting approval (if applicable)

CSU policy requires that English competency shall be a requirement of classified graduate students as a condition necessary for advancement to candidacy for the award of a master's degree. MLML students satisfy this requirement by successfully completing a Thesis Proposal before they advance to candidacy. The student's thesis committee determines the successful completion of this requirement.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

MS - Marine Science Graduation Requirements

Graduate students shall successfully complete 30 units of course work with a grade of "B" or better in each course, a thesis project, and an oral research defense to qualify for the M.S. degree in Marine Science at Moss Landing Marine Laboratories. MLML program requirements are the same regardless of the student's home campus affiliation; however, admission, graduation and department requirements may vary from campus to campus.

Degree requirements for the M.S. degree in Marine Science are:

- MS 104 - Quantitative Marine Science with a grade of "B" or better, or transfer in with the equivalent mathematical background. MS 104 course cannot be counted toward the 30-unit degree requirement.
- Three of the following five Core Courses: MS 103 - Marine Ecology, MS 141 - Geological Oceanography, MS 142 - Physical Oceanography, MS 143 - Chemical Oceanography, and MS 144 - Biological Oceanography. (Courses from accredited institutions may be transferred with approval from MLML faculty).
  A minimum of fifteen graduate units (200 level) Advanced Coursework including MS 285 - Graduate Seminar in Marine Science (2 unit minimum and 4 unit maximum), MS 298 - Research in the Marine Science (2 unit maximum), and MS 299 - Master's Thesis (Culminating Experience Plan A) (4 units).
- Fulfillment of Classification, Graduation Writing Assessment Requirement, and Advancement to Candidacy.
- A thesis approved by the student's thesis committee. The thesis must conform to the rules set forth by the home campus graduate office and meet the academic standards of the MLML graduate program.
An oral thesis defense in the form of a seminar open to the general public. The student's thesis committee must be present, may request further oral questioning after the seminar, and will evaluate the success of the presentation.

All students shall maintain continuous enrollment in the MLML graduate program until all degree requirements are met. All students shall complete core courses by their third semester to qualify for Classified standing. If a student receives lower than a "B" in a core course, the student may either retake this course or take another core course to fulfill the Classification requirement. If a student receives lower than a "B" in a non-core class, the student may either retake the course or take another course to use towards the 30-unit requirement. Students may enroll in MS 298 - Research in the Marine Science, while they are conducting their research. Students are eligible to use 2-units of MS 298 toward their Advanced Coursework requirement. Students are encouraged to complete their degree requirements within three years.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

Culminating Experience

Plan A (Thesis)

The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master's Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate's thesis committee chair with the assistance of the thesis committee, and must meet the academic standards of the MLML program. The candidate for the MS in Marine Science at MLML must also successfully pass a final oral defense of the thesis, in the form of a seminar open to the general public, with the thesis committee evaluating the success of the presentation.

Masters Preparation

- MS 104 - Quantitative Marine Science 4 unit(s) (Must be passed with a "B" or better, or transfer in with equivalent mathematical background)

Master's Requirements (30 units)

Core (12 units)

Complete three course from:
- MS 103 - Marine Ecology 4 unit(s) (GWAR)
- MS 141 - Geological Oceanography 4 unit(s) (GWAR)
- MS 142 - Physical Oceanography 4 unit(s) (GWAR)
- MS 143 - Chemical Oceanography 4 unit(s) (GWAR)
- MS 144 - Biological Oceanography 4 unit(s) (GWAR)

Advanced Coursework (14 units)

Complete a minimum of fourteen graduate units (200 level), selected with advisor 2019s approval
- MS 285 - Graduate Seminar in Marine Science 2 unit(s) (Variable topic seminar may be taken up to two times)
• MS 298 - Research in the Marine Science 1-4 unit(s) (4 units required)

Culminating Experience (4 units)

Plan A (Thesis)

• MS 299 - Master's Thesis 1-4 unit(s) (4 units required)
• Thesis Defense 0 unit(s)

Total Units Required (30 units)

Advanced Coursework must be planned in consultation with the Graduate Advisor.

The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 15.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate.

MS 103 - Marine Ecology

4 unit(s)
Field-oriented introduction to interrelationship between marine and estuarine organisms and their environment emphasis on quantitative data collection and analysis.

Lecture 2 hours; Lab/Field 6 hours.

Satisfies GWAR: Graduation Writing Assessment Requirement.

Prerequisite(s): Ecology, statistics (or concurrent registration in MS 104), or instructor consent.

Grading: Graded

Note(s): Offered fall semester. This course satisfies graduate-level GWAR in this master's program.

MS 104 - Quantitative Marine Science

4 unit(s)
Mathematical methods for analysis of biological, chemical and physical from the marine environment; experimental design, parametric and non-parametric statistics.

Misc/Lab: Lecture 3 hours/lab 3 hours.

Prerequisite(s): College mathematics.

Grading: Graded

Note(s): Course cannot be used to meet 30-unit degree requirement. Offered fall semester.

MS 105 - Marine Science Diving

3 unit(s)
Skin and SCUBA diving course; pool-training culminates in ten ocean dives. Topics covered include diving physics physiology, diving environments night diving and research diving. Successful completion gives NAUI and MLML
certification.

*Misc/Lab: Lecture 1 hour; lab/field 6 hours.*

**Prerequisite(s):** Certified SCUBA diver (or equivalency as determined by instructor), upper division science major status, thorough physical examination, ability to pass swimming test

**Grading:** Graded

**Note(s):** Course cannot be used to meet 30-unit degree requirement. Offered fall & summer.

**MS 112 - Marine Birds and Mammals**

4 unit(s)
Systematics, morphology, ecology and biology of marine turtles, birds, and mammals.

*Misc/Lab: Lecture 2 hours lab/field 6 hours.*

**Prerequisite(s):** Upper division college vertebrate zoology, instructor's consent; MS 103 recommended.

**Grading:** Graded

**Note(s):** Course is generally offered alternate fall semesters during the odd years.

**MS 113 - Marine Ichthyology**

4 unit(s)
A description of the taxonomy, morphology and ecology of marine fishes. Both field and laboratory work concentrate on the structure, function and habits of marine fishes and the ecological interactions of these fishes with their biotic and abiotic surroundings.

*Misc/Lab: Lecture 2 hours lab/field 6 hours.*

**Prerequisite(s):** College zoology (or equivalent) or instructor's consent. MS 103 recommended.

**Grading:** Graded

**Note(s):** Offered spring semester.

**MS 114 - Physiological Ecology of Marine Animals**

4 unit(s)
Examines the adaptations animals have evolved to live in marine environments to deal with gradients in water, temperature, salinity, oxygen, exercise, nutrients as well as short-term physiological responses to environmental changes. Topics include metabolism, sensory systems, respiration, circulation, thermoregulation, osmoregulation.

*Misc/Lab: 2 hours lecture/ 6 hours lab*

**Prerequisite(s):** upper division vertebrate biology (physiology)

**Grading:** Graded

**MS 124 - Marine Invertebrate Zoology I**

4 unit(s)
A field-oriented introduction to the structure, systematics, evolution and life histories of the major marine phyla.
Misc/Lab: Lecture 2 hours lab/field 6 hours.

**Prerequisite(s):** College zoology or instructor consent; MS 103 recommended.
**Grading:** Graded

**Note(s):** Course is generally offered alternate fall semesters during the odd years.

**MS 131 - Marine Botany**

4 unit(s)
Introduction to the plants of the sea, marshes and dunes, with emphasis on the morphology, taxonomy and natural history of seaweeds and vascular plants.

Misc/Lab: Lecture 2 hours/lab 6 hours.

**Prerequisite(s):** MS 103 recommended, or instructor consent.
**Grading:** Graded

**Note(s):** Offered fall semester.

**MS 135 - Physiological Ecology of Marine Algae**

4 unit(s)
Understanding the adaptations of marine algae to their environment, including respiration, enzyme activity, and biochemical composition. Hands-on experience in basic electronic instrumentation, chemical separations, optical measurements, culturing methods and radioisotope techniques. Designed for students interested in the biology of seaweeds and phytoplankton.

Misc/Lab: Lecture 2 hours/lab and field 6 hours.

**Prerequisite(s):** MS 103, MS 131, MS 144 or instructor consent.
**Grading:** Graded

**Note(s):** Offered fall semester.

**MS 141 - Geological Oceanography**

4 unit(s)
A study of the structures, physiography and sediments of the sea bottom and shoreline.

Lecture 2 hours; Lab/Field 6 hours.

Satisfies GWAR: Graduation Writing Assessment Requirement.

**Prerequisite(s):** Instructor consent.
**Grading:** Graded

**Note(s):** Offered fall semester. This course satisfies graduate-level GWAR in this master's program.

**MS 142 - Physical Oceanography**

4 unit(s)
An introduction to the nature and causes of various oceanic motions including currents, waves, tides and mixing, and
the physical properties of seawater including transmission of sound and light. Limited use of calculus.

*Lecture 2 hours/lab 4 hours.*

*Satisfies GWAR: Graduation Writing Assessment Requirement.*

**Prerequisite(s):** College algebra, college physics recommended, or instructor consent.

**Grading:** Graded

**Note(s):** Offered fall semester. This course satisfies graduate-level GWAR in this master's program.

**MS 143 - Chemical Oceanography**

4 unit(s)
An introduction to the theoretical and practical aspects of the chemistry of the oceans, including major salts, dissolved gases, nutrient ions, carbonate system, transient tracers and shipboard sampling techniques.

*Lecture 2 hours/lab 6 hours.*

*Satisfies GWAR: Graduation Writing Assessment Requirement.*

**Prerequisite(s):** One year of college chemistry.

**Grading:** Graded

**Note(s):** Offered spring semester. This course satisfies graduate-level GWAR in this master's program.

**MS 144 - Biological Oceanography**

4 unit(s)
The ocean as an ecological system. Emphasis on the complexity of environmental influences on plankton, the transfer of organic matter between trophic levels and nutrient cycles. Laboratory sessions will include methods in sampling, shipboard techniques, identification of the plankton, and current analytical techniques.

*Lecture 2 hours/lab 6 hours.*

*Satisfies GWAR: Graduation Writing Assessment Requirement.*

**Prerequisite(s):** General biology, general chemistry, or instructor consent.

**Grading:** Graded

**Note(s):** Offered spring semester. This course satisfies graduate-level GWAR in this master's program.

**MS 175B - Topics in Marine Sciences (Lab)**

1-4 unit(s)
Study of selected area of marine sciences. Subjects vary depending upon demand and availability of instructors. May be repeated once for credit when topic changes.

**Misc/Lab: Lab 3-12 hours.**

**Prerequisite(s):** Instructor consent.

**Grading:** Credit/No Credit
MS 180 - Independent Studies

1-4 unit(s)
Faculty-directed study of selected problems; open to undergraduate students with adequate preparation. Offered every semester. May be repeated once for credit.

Prerequisite(s): Instructor consent.
Grading: Graded

MS 201 - Library Research Methods in Marine Science

1 unit(s)
Students will gain an advanced understanding of the nature of scientific information. Lectures, discussions and assignments will provide the framework for using and evaluating a variety of information sources in marine and ocean sciences. Strong emphasis will be placed on developing critical skills to interweave knowledge of the history of science into the context of bibliographic tools including the digital realm.

Prerequisite(s): Graduate standing, instructor consent.
Grading: Graded

Note(s): Offered spring semester.

MS 202 - Oceanographic Instrumentation

4 unit(s)
Principles of instruments used in oceanographic research, introduction to electronics, and applications of instrument measurements. Emphasis will vary from CTD profilers, current meters, radiometry and chemical measurement.

Misc/Lab: Lecture/discussion 2 hours; lab/field 6 hours.

Prerequisite(s): Graduate standing; MS 141, MS 142 and instructor consent.
Grading: Graded

Note(s): Offered alternate spring semesters.

MS 203 - Advanced Marine Ecology

4 unit(s)
Marine ecology is the study of factors determining the distribution and abundance of marine organisms. This course focuses on the major ecological processes determining the structure and diversity of species assemblages at several scales, primarily at that of the community.

2 hours lecture/ 6 hours lab.

Satisfies GWAR: Graduation Writing Assessment Requirement

Prerequisite(s): Ecology, Statistics, Instructor consent, Graduate level.
Grading: Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

MS 204 - Sampling and Experimental Design
4 unit(s)
Basic design of experiments and field sampling. Biases and problems of sampling marine biota.

Prerequisite(s): Graduate standing; MS 103 and MS 104.
Grading: Graded

Note(s): Offered spring semester.

MS 206 - Molecular Biological Techniques

4 unit(s)
Laboratory-based overview of concepts and techniques for the isolation, characterization, and analysis of DNA and RNA. Covers standard methods (amplification, cloning, and sequencing), and selected specialized techniques (analysis of gene expression), emphasizing marine science applications.

Misc/Lab: Lecture 2 hours/Lab 6 hours.

Prerequisite(s): Graduate standing; college level genetics, molecular biology, or instructor consent.
Grading: Graded

Note(s): Offered spring semester.

MS 208 - Scientific Methods

4 unit(s)
Course is designed to help students develop an understanding of strengths and limitations of various types of scientific reasoning, methodology, and analysis as they relate to scientific progress. Course centers on: round-table discussions of papers and techniques; interactive computer, laboratory, and field learning experiences; and development of critical thinking and writing skills.

Misc/Lab: Lecture 3 hours/Lab 2 hours.

Prerequisite(s): Graduate standing; instructor consent and approved thesis proposal.
Grading: Graded

Note(s): Offered spring semester.

MS 210 - Advanced Marine Mammals, Birds & Turtles

4 unit(s)
This course examines the biology of marine mammals, birds and turtles. Topics include systematics and evolution, adaptations to the marine environment, diving physiology and behavior, communication and echolocation, ecology, and conservation. This class consists of lectures, discussions of recent literature, and laboratory exercises.

Misc/Lab: 2 hours lecture/ 6 hours lab

Prerequisite(s): Introductory Biology, upper division vertebrate biology (physiology, ecology or similar)
Grading: Graded

MS 211 - Ecology of Marine turtles, Birds, and Mammals

4 unit(s)
Community approach to the ecology of marine birds and mammals using experimental and sampling methodology.
The class will examine the distribution, abundance, trophic ecology, and behavior of birds and mammals in Elkhorn Slough and Monterey Bay.

Misc/Lab: Lecture/discussion 2 hours; lab and field 6 hours.

Prerequisite(s): Graduate standing; MS 103, MS 104 and MS 112 and instructor consent.
Grading: Graded

Note(s): Generally offered alternate fall semesters during even years.

MS 212 - Advanced Topics in Marine Vertebrates

1-4 unit(s)
Advanced consideration of the ecology, physiology and phylogeny of fishes, birds, reptiles or mammals, emphasizing current literature and research. Topics and emphasis will vary with term and instructor. May be repeated once for credit.

Misc/Lab: Lecture, lab and field work variable.

Course may be repeated for credit for up to 8 units.

Prerequisite(s): Graduate standing; MS 112 or MS 113 and instructor consent.
Grading: Graded

MS 213 - Advanced Marine Ichthyology

4 unit(s)
This course covers taxonomy and systematics, functional morphology, physiology, biogeography, and ecology of marine fishes at an advanced level. Accompanying laboratory and field sessions focus on taxonomic identification, morphological structure and function, and habits of marine fishes, and the ecological interactions of these fishes with their biotic and abiotic surroundings.

Misc/Lab: Lecture 4 hours/Lab 12 hours

Prerequisite(s): College zoology or equivalent or consent of instructor; MS 103 recommended.
Grading: Graded

MS 214 - Physiological Ecology of Marine Animals

4 unit(s)
Examines the adaptations animals have evolved to live in marine environments to deal with gradients in water, temperature, salinity, oxygen, exercise, nutrients as well as short-term physiological responses to environmental changes. Topics include metabolism, sensory systems, respiration, circulation, thermoregulation, osmoregulation.

Misc/Lab: 2 hours lecture/ 6 hours lab

Prerequisite(s): upper division vertebrate biology (physiology)
Grading: Graded

MS 221 - Advanced Topics in Marine Invertebrates

1-4 unit(s)
Advanced consideration of the ecology, physiology and phylogeny of the various invertebrate phyla emphasizing
current literature and research. Topics and emphasis will vary from term to term. May be once repeated for credit when topic changes.

**Misc/Lab:** Lecture, laboratory and field work variable.

**Prerequisite(s):** MS 124 and instructor consent.

**Grading:** Graded

**MS 231 - Biology of Seaweeds**

4 unit(s)

Discussions on on marine macroalgal biology with extensive reading of original literature. Ecologically-oriented individual research projects involving laboratory culture and field experimentation.

**Misc/Lab:** Lecture 2 hours; lab/field work 6 hours.

**Prerequisite(s):** Graduate standing; MS 131 or instructor consent.

**Grading:** Graded

**Note(s):** Offered fall semester.

**MS 233 - Advanced Topics in Marine Ecology**

1-4 unit(s)

Selected topics and current issues in marine ecology. Subjects vary depending on student demand and availability of instructors. May be repeated once for credit when topic changes.

**Misc/Lab:** Lecture, lab/field work variable.

**Prerequisite(s):** Graduate standing; MS 103 and instructor consent.

**Grading:** Graded

**MS 234 - Advanced Biological Oceanography**

4 unit(s)

Experimental techniques in biological oceanography with emphasis on problems important in plankton ecology. An individual research project involving the use of one or more modern analytical tools will be required.

**Misc/Lab:** Lecture 2 hours; lab/field work 6 hours.

**Prerequisite(s):** Graduate standing; MS 144 or instructor consent.

**Grading:** Graded

**Note(s):** Offered fall semester.

**MS 248 - Marine Benthic Habitat Techniques**

4 unit(s)

Collection and interpretation of geophysical data used to characterize marine benthic habitats. Basic geophysical principals will be reviewed. Application of techniques to identify and characterize marine benthic habitats, including echosounders, multibeam bathymetry and backscatter, sidescan sonar, seismic profiling, and GIS.

**Misc/Lab:** Lecture 2 hours; lab/field work 6 hours.
Prerequisite(s): Graduate standing; MS 141 or instructor consent.
Grading: Graded

Note(s): Offered alternate spring semesters during odd years.

MS 261 - Mixing, Estuarine and Sediment Transport

4 unit(s)
The mathematical description of the distribution of properties (density, dissolved oxygen, etc.) in the oceans relating to physical and biochemical processes. Equations of motion, geotropic method, and theory of distribution of variables.

Misc/Lab: Lecture 3 hours; lab/field work 3 hours.

Prerequisite(s): Graduate standing; MS 142 and college physics strongly recommended, or instructor consent.
Grading: Graded

Note(s): Offered alternate spring semesters during odd years.

MS 263 - Data Analysis in Marine Science

4 unit(s)
Introduction to using observational oceanographic data, with hands on practice in scientific programming for data analysis. Lecture, discussion, and practical experience including the use of existing programs and subroutine libraries. Semester project required.

Misc/Lab: Lecture 2 hours/lab 6 hours.

Prerequisite(s): Graduate standing; MS 104, college math and instructor consent.
Grading: Graded

Note(s): Offer spring semester.

MS 272 - Subtidal Ecology

4 unit(s)
The ecology of nearshore rocky subtidal populations and communities with emphasis on kelp forests. Lectures and discussions of original literature. Field work with SCUBA including group projects on underwater research techniques and community analysis. Individual research on ecological questions chosen by the student. Knowledge of marine algae, invertebrates and statistics recommended.

Misc/Lab: Lecture 2 hours; lab/field work 6 hours.

Prerequisite(s): Graduate standing; MS 103; MLML diver certification and marine ecology.
Grading: Graded

Note(s): Offered alternate spring semesters during odd years.

MS 273 - Marine Environmental Studies of the Gulf of California

4 unit(s)
An analysis of Gulf of California marine environments. Lectures, readings, intensive field work, and written scientific paper based on original research. Topics vary. Taught with Mexican faculty and students from La Paz, Mexico. Must
be able to participate in 2 weeks of field work.

*Misc/Lab: Lecture 2 hours/lab 6 hours.*

**Prerequisite(s):** Graduate standing; instructor consent.  
**Grading:** Graded

**Note(s):** Offered spring semester.

**MS 274 - Advanced Topics in Oceanography**

1-4 unit(s)  
Study of selected area in oceanography. Subjects vary depending on student demand and availability of instructors. May be repeated once for credit when topic changes.

*Misc/Lab: Lecture, lab/field work variable.*

**Prerequisite(s):** Graduate standing and instructor consent.  
**Grading:** Graded

**MS 280 - Scientific Writing**

3 unit(s)  
Techniques and strategies of scientific writing used for proposals, journal submissions and abstracts of meetings. Emphasis to develop writing skills by preparing, editing, and rewriting manuscripts.

**Prerequisite(s):** Graduate standing and instructor consent.  
**Grading:** Graded

**Note(s):** Offered spring semester.

**MS 281 - Coastal Dynamics**

4 unit(s)  
Oceanographic dynamics of coastal environments, with an emphasis on eastern boundary current systems influenced by coastal upwelling. Interactions of physical and geological oceanography and how both affect coastal ecosystem dynamics.

*Misc/Lab: Lecture 4 hour/Lab 12 hours.*

**Prerequisite(s):** Graduate standing and MS 142 or MS 141.  
**Grading:** Graded

**Note(s):** Offered spring semester.

**MS 285 - Graduate Seminar in Marine Science**

2 unit(s)  
Seminar will be held on topics changing each semester. Each student will be required to give at least one seminar.

**Prerequisite(s):** Graduate standing and instructor consent.  
**Grading:** Graded
Note(s): Offered fall and spring semesters.

**MS 298 - Research in the Marine Science**

1-4 unit(s)
Independent investigations of an advanced character for the graduate student with adequate preparation.

Prerequisite(s): Graduate standing and instructor consent.
Grading: Mandatory CR/NC/RP

**MS 299 - Master's Thesis**

1-4 unit(s)
Offered spring and fall semesters. Available only to MLML Masters’ students in good standing with the approval of their major advisor.

Prerequisite(s): classified graduate standing, advancement to candidacy.
Grading: Mandatory CR/NC/RP

**MS 1290R - Culminating Experience Supervision**

1 unit(s)
Continued work on thesis.

Course may be repeated for credit for up to 16 units.

Prerequisite(s): Outstanding RP grade in a preceding semester in MS 299
Grading: CR/NC, No Degree Credit

Note(s): No Degree Credit.

Overview

In concert with the College of Science, the Science Education program offers professional development opportunities for science teachers at all levels. We design and coordinate courses that support the preparation of science teachers in the areas of biology, chemistry, earth science, and physics. In cooperation with the College of Education and the Secondary Education Program, we oversee the single subject teacher credential program in science through advising, coursework offerings and student teacher supervision. In addition, we offer a master's degree in Science Education.

Master

Science Education, MA

- Admissions Requirements
- Requirements for Advancement to Graduate Candidacy
- Requirements for Graduation
- Master's Requirements (30 units)
- Program Learning Outcomes

The MA in Science Education, offered by the Science Education Program, is a flexible program designed for prospective and practicing K-12 science teachers, educators and specialists working in informal or outdoor education, community college science educators, and prospective science education PhD students. The curriculum is designed to augment and broaden the candidate’s knowledge of current advances in science education research, and connect these findings to best classroom practices.

For more information, please visit our website at www.sjsu.edu/scied/academic_programs/masters.

Qualified students who have earned a multiple or single-subject credential at San José State University may apply up to 9 units of approved credential coursework from the College of Education and 3 units of approved credential coursework from the College of Science to the MA Science Education degree. Students who earned their credential elsewhere may transfer up to 9 units of completed post-graduate coursework to the MA Science Education program at the discretion of the Science Education Graduate Coordinator.

Admissions Requirements

Minimum admission requirements to the Graduate Division are outlined in this catalog. In addition, classified standing requires an undergraduate major with a grade point average of 2.75.

- demonstrated subject-matter competency in science, either through a baccalaureate degree in science or by passing the Science Subtests I and II (test codes 118 and 119) of the California Subject Examinations for Teachers (CSET) and one Specialized Science CSET in either biology (120 or 124), chemistry (121 or 125), geoscience (122 or 126) or physics (123 or 127).
- evidence of appropriate goal(s) and commitment to graduate-level study as demonstrated by a personal statement written by the applicant and letters of recommendation from two or more persons qualified to judge the applicant's potential as a graduate student.
• a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE, if the applicant is from a country in which the native language is not English.
• approval of the graduate advisor and/or graduate committee.

Requirements for Advancement to Graduate Candidacy

The student must satisfy general university requirements for advancement to candidacy as outlined in detail in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. SCED 220 meets the GWAR requirement and is also a required course in this program, so no additional classes beyond the core courses for the MA - Science Education are needed to meet this requirement.

Requirements for Graduation

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

This requirement is satisfied by passing SCED 220.

Culminating Experience

Plan A (with Thesis)

This option requires a thesis in science education approved by a master's committee of no fewer than three members. The thesis is credited under SCI 299 units. At the end of the program, the candidate must successfully deliver an oral seminar and defense of the thesis, cumulatively known as a culminating experience. The written thesis must be submitted to the master's advisor and master's committee for approval before being submitted to the Office of Graduate Studies for university approval. Note: this is an uncommon choice for our graduate students.

Plan B (with Project)

This option requires a project related to science education approved by a master's committee of no fewer than three members. The project is credited under SCED 298 units. At the end of the program, the candidate must successfully deliver an oral seminar and defense of the project, cumulatively known as a culminating experience. The written report of the project must be submitted to the master's advisor and master's committee. Note: the majority of our graduate students choose this path to graduation.

Master's Requirements (30 units)

Core Courses (9 units)
- SCED 273 - Secondary School Science 3 unit(s)
- SCED 205 - Methods of Research 3 unit(s)
- SCED 220 - Theories and Practices in Science Education 3 unit(s) (GWAR)

Electives (18 units)

- SCED 255 - Advanced Natural Science 1-3 unit(s)
- SCED 285 - Seminar 3 unit(s)
- Other 100- or 200-level courses within the College of Science selected with advisor approval.

Approved 100- or 200-level Courses Include:

A maximum of 9 units taken through the College of Education may be applied with advisor approval, approved 100- or 200-level courses include:

- EDSC 162 - Language/Literacy Development of L2 Learners 3 unit(s)
- EDSC 172A - Social, Philosophical Multicultural Fdn 3 unit(s)
- EDSC 173 - Psychological Foundations of Secondary Teacher Education 3 unit(s)
- EDSC 182 - Assessment and Evaluation 3 unit(s)
- EDSE 192A - Including and Supporting Students 3 unit(s)
- EDTE 190 - Health Education for the Classroom Teacher 3 unit(s)

Culminating Experience (6 units)

Complete One Option (Plan A or Plan B):

Plan A (Thesis)

- SCED 297 - Science Education Research 1-3 unit(s)
- SCI 299 - Master's Thesis 1-6 unit(s)
- Oral Defense

Plan B (Project)

- SCED 297 - Science Education Research 1-3 unit(s)
- SCED 298 - Research 1-6 unit(s)
- Oral Defense

Total Units Required (30 units)

Elective courses must be planned in consultation with the Graduate Coordinator and Graduate Advisor.

The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 15.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.
Minor

- EDEL 294 - Research and Practices in Health and Special Education 3 unit(s)

Complete One Course From:

- SCED 273 - Secondary School Science 3 unit(s)
- EDEL 108B - Curriculum: Science 1-3 unit(s)

Complete One Course From:

- SCED 175 - Classroom Experiences in Science Teaching 1 unit(s) *(Must take SCED 175 twice to meet requirement)*
- SCED 174 - Training to Teach 3 unit(s)

Complete One Course From:

- EDSC 173 - Psychological Foundations of Secondary Teacher Education 3 unit(s)
- EDTE 224 - Seminar in Educational Psychology 3 unit(s)

Total Units Required (14 units)

SCED 5 - Human Development and the Natural World

3 unit(s)
Introductory course examining the role of the natural world on the physiological, social, and psychological development of human beings within the context of the environmental, social, and academic community system.

Science Education Minor

The science education minor is designed as a program of study that will allow students who are interested in becoming elementary and middle school teachers to satisfy the Introductory Science Authorization course work requirements of the California Commission on Teacher Credentialing.
Satisfies E: Human Understanding & Development

**Grading:** Graded

**SCED 174 - Training to Teach**

3 unit(s)
This is a service learning course in which students will investigate how people learn and how to teach as they are immersed in teaching roles in the San Jose community that involve them acting as: Instructors leading small groups in science after school activities, facilitators assisting teachers with student centered activities and tutors providing personalized assistance.

**Misc/Lab:** Lecture 3 hours/Activity 3 hours.

**Prerequisite(s):** CHEM 1A or CHEM 30A, MATH 19

**Grading:** Graded

**SCED 175 - Classroom Experiences in Science Teaching**

1 unit(s)
The goal of this hybrid online/face-to-face course is to provide students with the opportunity to complete their 45 hours of science teaching observation in California public schools while also reflecting on teaching and learning practices. The course will emphasize the multi-faceted aspects of the teaching profession and most importantly will provide a forum for sharing experiences with other students who are similarly placed. The course will fulfill pre-professional teaching observation experience required of most Single Subject Teacher Credential Programs.

**Prerequisite(s):** Sophomore or upper division standing. Not available to Open University Students.

**Grading:** Graded

**SCED 184Y - Student Teaching II - Classroom Teaching**

4 unit(s)
Minimum 80-120 class hours of classroom, lab or field teaching in appropriate single subject, grades K-12 and related teaching activities/seminar.

**Prerequisite(s):** SCED 273 (Science Credential Candidates must complete SCED 273 with a grade of "B" or better, "B-" not accepted) and joint approval of the Science Education Program and the Secondary Education Department. Not available to Open University Students.

**Grading:** Credit/No Credit

**SCED 184Z - Student Teaching III - Classroom Teaching**

4 unit(s)
Minimum 80-120 class hours of classroom, lab or field teaching in appropriate single subject, grades K-12 and related teaching activities/seminar.

**Prerequisite(s):** SCED 273 (Science Credential Candidates must complete SCED 273 with a grade of "B" or better, "B-" not accepted) and joint approval of the Science Education Program and the Secondary Education Department. Not available to Open University Students.

**Grading:** Credit/No Credit

**Note(s):** May be in different subject/school and will be at a different grade level.
SCED 204 - Earth Systems Science for Teachers

3 unit(s)
Peer teaching and leadership instruction in earth science. Demonstrations, classroom activities, field projects and teaching strategies for K-12 teacher groups.

Prerequisite(s): Teaching credential and instructor consent.
Grading: Graded

SCED 205 - Methods of Research

3 unit(s)
Introduction to techniques and procedures of scientific research. Each student required to prepare and defend a working outline of a master's thesis or project in his or her area of concentration.

Misc/Lab: Lecture/seminar 3 hours.

Grading: Graded

Note(s): Introductory course in statistics or equivalent recommended.

SCED 220 - Theories and Practices in Science Education

3 unit(s)
Analysis of current trends in science curriculum and instruction. Orientation for the philosophy and scope of the program. Emphasis on development of a theory of instruction and curriculum in science with implications for practice.

Misc/Lab: Lecture/seminar 3 hours.

Satisfies GWAR: Graduation Writing Assessment Requirement

Grading: Graded

Note(s): Teaching experience preferred. Must be taken during first year in program. This course satisfies graduate-level GWAR in this master's program.

SCED 255 - Advanced Natural Science

1-3 unit(s)
Selected topics in natural science or science education. Repeatable: Repeatable for credit.

Grading: Graded

SCED 273 - Secondary School Science

3 unit(s)
(Formerly SCED 173) Theory and practice, instructional techniques, and materials for science in the secondary schools.

6 hours Activity.

Prerequisite(s): CSET Subtest I (test code 215) covers general science content and CSET Subtest II (test...
codes 217-220) select the subtest II that fits candidate’s area of concentration. Life Sciences (test code 217), Chemistry (test code 218), Earth and Space Sciences (test code 219), Physics (test code 220).

**Grading:** Graded

**SCED 285 - Seminar**

3 unit(s)
Provides a format for the presentation and discussion of original work by faculty, guest investigators and graduate students.

*Course may be repeated for credit for up to 6 units.*

**Grading:** Graded

**SCED 297 - Science Education Research**

1-3 unit(s)
Research in science education under the supervision of a faculty member associated with the science education program.

*Course may be repeated for credit for up to 6 units.*

**Grading:** Credit/No Credit

**SCED 298 - Research**

1-6 unit(s)
Project development for Plan B MA Natural Science students, to be carried out under direct supervision of a faculty member and committee. Seminar presentation required upon final completion of project. Repeatable: Repeatable for credit.

*Course may be repeated for credit for up to 6 units.*

**Grading:** Mandatory CR/NC/RP

**SCED 375 - Colloquium in Science Education**

2 unit(s)
Resources and innovations for science curriculum development and instruction. An interface with people and facilities which can enhance Bay Area science instruction.

**Corequisite(s):** SCED 184Y or SCED 184Z.
**Grading:** Credit/No Credit

**Note(s):** Also open to experienced teachers.

**SCED 1290R - Culminating Experience Supervision**

1 unit(s)
Continued Work on Thesis

*Course may be repeated for credit for up to 16 units.*
Prerequisite(s): Outstanding RP grade in a preceding semester in a project or thesis class.
Grading: CR/NC, No Degree Credit

Note(s): No Degree Credit.
College of Professional and Global Education

Formerly International and Extended Studies

Office: Student Union West
Telephone: 408-924-2670
Email: cpge@sjsu.edu
Website: www.sjsu.edu/cpge

Overview

In the College of Professional and Global Education, we provide access to relevant educational programs that allow individuals to gain knowledge and skills that create a solid foundation for them to be engaged and productive members of a global society. We offer a learning environment that is dynamic and innovative, ensuring that we are responsive to the ever-evolving workforce and industry demands. Our college is the nexus for connecting professionals, institutions, businesses and industries, locally and from around the world, to the knowledge, resources, and talents of Silicon Valley's premier public university.

Academics

The College of Professional and Global Education offers interdisciplinary and forward-looking academic programs that prepare professionals to address the world's increasing challenges around analyzing, managing, protecting, securing, designing, organizing, and preserving data, information, records, and archives through technology-oriented and user-focused practices. The two academic units within the College of Professional and Global Education are the Department of Applied Data Science and the School of Information. Students have the opportunity to study full-time or part-time, learn in person or online, and pursue their education through master's degrees, a credential program, and certificate programs.

Our college offers the following graduate programs:

- MS in Data Analytics
- MS in Informatics
- Master in Library and Information Science
- Master in Archives and Records Administration
- Teacher Librarian Credential
- Post Master's Certificate in Library and Information Science
- Advanced Certificate in Strategic Management of Digital Assets and Services

Professional Education

At our College, we provide career-minded students and working professionals with the real-world knowledge, experience, and access they need to compete and succeed in a contemporary work force. Within the California State
University (CSU), we have the most extensive portfolio of graduate, academic programs, with the highest enrollments. Through our College or in partnership with six academic colleges, we offer a total of 22 professional degree programs at the Masters level and 15 advanced certificate, and three credential programs.

In addition to our degree programs, we offer credit-earning courses to augment and complement regularly scheduled classes. Through Open University individuals from outside the university can enroll in university courses on a space-available basis and gain college credit. In winter intersession and summer intersession, we have a robust offering of courses, including General Education (GE) courses. These accelerated-format university courses are perfect for satisfying prerequisites, completing GE or major course requirements, or enabling a faster pace towards graduation.

Finally, we offer continuing education courses for professionals (such as teachers and project managers) to meet their industry's continuing education requirements for maintaining credentials or career advancement.

**Global Education**

In our College, we are committed to internationalizing our campus in order to cultivate an environment of diversity and inclusion, and to graduate students who are prepared to live and lead in an increasingly globalized world.

Our College serves more international students than any other master's granting university in the U.S. Students have high success in obtaining internships and work opportunities in Silicon Valley via curriculum practical training during their studies, and once they graduate with over 2,000 students participating in OPT/STEM OPT.

Our International Student & Scholar Services office (ISSS) offers comprehensive immigration advising and co-curricular support programming for our international students and scholars. The goal of ISSS is to enhance the students' experience in the United States and integrate them into our community, while also contributing to their success during their tenure at SJSU and beyond.

In addition, our Study Abroad and Away office offers an extensive portfolio of off-campus globally focused programs that strive to meet the personal, academic, and professional goals of our students. We aim to provide programs for all SJSU students to learn and discover other cultures first-hand, including study abroad (international) and away (domestic), short-term (winter, spring, and summer breaks) and long-term (semester and year-long) options.

Our International Gateways unit provides comprehensive support services and instruction to help non-matriculated international students thrive at our University. Through International Conditional Admissions, we help students apply for Conditional Admission/Eligibility to SJSU undergraduate and graduate degree programs. Our non-credit Academic English and Test Preparation courses prepare students to meet the SJSU English language admission requirements and learn American academic culture. International students interested in studying abroad in Silicon Valley can participate in our Semester at SJSU program. In addition to regularly scheduled programs, we partner with global universities and SJSU academic departments to develop and deliver customized non-credit programs for students and professionals.

For more information about programs offered in CPGE, please visit www.sjsu.edu/cpge.

Overview

The Applied Data Science Department offers academic programs to address emerging workforce demands of interdisciplinary talents designing and deploying intelligent solutions to real-world data challenges. Students acquire a comprehensive understanding and knowledge of the principles, methodologies and technologies of data science. Silicon Valley is known for its leadership in the big data economy and its demand of talents in response to the exponential growth of data. The department continuously seeks guidance from leading data professionals and companies to ensure that the curriculum is relevant for growing the talents needed in Silicon Valley.

Local data professionals regularly interact with our students through teaching classes, speaking at seminars, sponsoring internships, and supervising master projects. Faculty members actively engage with industry partners and sponsors to assess our curricula and update learning objectives in order to provide the most up-to-date skills for supporting the innovations from this region.

The department is an academic hub, in partnership with other SJSU departments and industry partners, for promoting education and research in applied data science. In order to address the immense demands of data science professionals, the department launched a MS in Data Analytics program in August 2018. This program provides students with the advanced education necessary to draw insights from real data and apply analytical skills to solve practical problems.
Data Analytics, MS

The Master of Science in Data Analytics is developed in partnership with industry experts targeting students from diverse academic and professional backgrounds. Students receive the advanced education necessary to apply analytics to solve real-world problems by immersing them in the full data analytics process lifecycle.

Students learn how to build portfolios of data analytics projects by leveraging the interrelationship between domain data knowledge and emerging information technologies. Students advance their knowledge and skills through the integration of:

- Identifying domain-specific problems, defining requirements, and establishing measurable organizational objectives.
- Performing data exploration, preparation, visualization, and governance.
- Applying programming, statistics, database, data mining, and machine learning technologies to build models for descriptive, diagnostic, predictive, and prescriptive data analytics.
- Engaging in the development, validation, and monitoring of data analytics systems to meet requirements and objectives.

Today most organizations treat analytics as a strategic asset, and analytics is central to many functional roles and skills. This program prepares students for a career in data analytics in almost all industry domains. Potential career roles for graduates include data analyst, data administrator, business intelligence analyst, and information research scientist.

The program is offered in both regular and special sessions. For more information, contact the Department of Applied Data Science.

Admissions Requirements

Admission to University

Candidates must apply through the CSU admissions portal, Cal State Apply, and meet all university admission requirements. Applicants will need to apply separately to the university to obtain approval for university-level admission and to CPGE to obtain admission into the MS in Data Analytics.

In addition to holding a bachelor’s degree as required above, international applicants (or applicants who earned their degrees in a country where the primary language is not English) must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE.

Admission to Program

Candidates must meet all the university admission requirements. Students can be admitted in either classified or conditionally classified standing. To be admitted to classified standing, the successful applicant must have earned a bachelor’s degree from a regionally accredited institution and achieved a GPA of at least 3.0 (on a 4.0 scale) in the bachelor’s degree institution or in the last 60 semester or 90 quarter units of all coursework. Also required is at least one semester each of college calculus, statistics, and a programming course.
Admission to Conditionally Classified Standing

An applicant might be conditionally admitted to the program with marginal deficiency in the above requirements. The individual admission notification will explain the required terms and conditions for attaining Classified standing.

Requirements for Advancement to Candidacy

The university requirements for advancement to candidacy for the master's degree are outlined in the Graduate Policies and Procedures section. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR), described in this catalog. DATA 294 is a multidisciplinary seminar class that exposes students to multiple domains in data analytics and satisfies the GWAR for this program. For graduate courses that meet the GWAR, refer to the GWAR Course List on the Graduate Studies website.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

MS - Data Analytics Graduation Requirements

This is an interdisciplinary program consisting of 10 courses with both in-person and online modes of instruction. As shown below, each of the 6 core, 2 elective, and 2 thesis or project courses is 3 semester units.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

Culminating Experience (Plan A or Plan B)

All students must complete one of the following culminating experience options as part of their 30-unit program requirement.

Plan A (Thesis)

Students opting to complete a master's thesis will take the DATA 299A and DATA 299B as a two-course sequence. The student is responsible for securing the commitment of a full-time tenured or tenure-track faculty member who agrees to serve as the thesis committee chair. The student must also secure the commitments of two additional university faculty members, one of whom must be a full-time tenured or tenure-track faculty member, to serve as the student's thesis committee. The student must write a thesis proposal and have it approved by the thesis committee and pass the DATA 299A course before enrolling in DATA 299B. The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master's Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate's thesis committee chair with the assistance of the thesis committee.
Plan B (Project)

The graduate project is a research or development effort performed by a team of students on a topic chosen by mutual agreement between an advisor and the team. The choice of project topic must also be approved by the instructor of DATA 298A. DATA 298A is the first part of the master's project in which students develop a comprehensive plan and preliminary design of a data analytics project. DATA 298B is the second part of the master's project course in which each student completes an in-depth written projects to achieve the program outcomes and satisfy the program's culminating experience requirement.

Masters Requirements (30 units)

Core Courses (18 units)

- DATA 220 - Mathematical Methods for Data Analytics 3 unit(s)
- DATA 225 - Database Systems for Analytics 3 unit(s)
- DATA 230 - Data Visualization 3 unit(s)
- DATA 240 - Data Mining and Analytics 3 unit(s)
- DATA 245 - Machine Learning Technologies 3 unit(s)
- DATA 294 - Data Analytics Seminar 3 unit(s) (GWAR)

Electives (6 units)

Six units 200-level elective courses selected in consultation with the graduate advisor.

Culminating Experience (6 units)

Complete One Plan:

Plan A (Thesis) (6 units)

- DATA 299A - MSDA Thesis I 3 unit(s)
- DATA 299B - MSDA Thesis II 3 unit(s)

Plan B (Project) (6 units)

- DATA 298A - MSDA Project I 3 unit(s)
- DATA 298B - MSDA Project II 3 unit(s)

Total Units Required (30 units)

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate.

DATA 200 - Computational Programming for Data Analytics

3 unit(s)
Computational thinking and problem solving; data structures, algorithms, iterations, functions, and other core
concepts; standard libraries; functional programming and object-oriented programming; applications to data processing, data analytics, data visualization, and database manipulation.

**Prerequisite(s):** Admission into MS in Data Analytics and instructor consent.  
**Grading:** Credit / No Credit

**DATA 220 - Mathematical Methods for Data Analytics**

3 unit(s)  
Mathematical and Statistical methods for Data Analytics. Selected topics from probability, statistics, linear algebra, and mathematical optimization. Programming for numerical implementation of mathematical and statistical algorithms.

**Prerequisite(s):** Instructor Consent.  
**Grading:** Graded

**DATA 225 - Database Systems for Analytics**

3 unit(s)  
Design operational and analytical databases with relational, dimensional, and NoSQL data models; deploy data analytics applications with SQL programming and data access APIs; perform data cleansing, extract, transform, and load (ETL) operations for data warehouses and online analytical processing (OLAP).

**Prerequisite(s):** Classified standing or instructor consent.  
**Grading:** Graded

**DATA 228 - Big Data Technologies and Applications**

3 unit(s)  
Leverage emerging big data systems, technologies, and applications to transform data into knowledge through capturing, managing, analyzing, and understanding large data at volumes and rates; design analytical solutions in data warehouse, big data databases, data streaming, security and governance.

**Prerequisite(s):** Classified standing or instructor consent.  
**Grading:** Graded

**DATA 230 - Data Visualization**

3 unit(s)  
Study data visualization as an analytical tool, a medium of communication, and the basis for interactive dashboards; apply cognitive theories and design principles in the development of presentations and visualizations; create digital data visualizations using emerging software packages and environments.

**Prerequisite(s):** Classified standing or instructor consent.  
**Grading:** Graded

**DATA 240 - Data Mining and Analytics**

3 unit(s)  
Learn data mining technologies for Knowledge Discovery in Databases (KDD) process including system architectures, functionalities, methodology, query language, user interaction, and performance; extract patterns and identify knowledge for diverse applications in data analytics, decision support, text mining, and stream mining.
Prerequisite(s): DATA 220 and DATA 225, or instructor consent.

Grading: Graded

DATA 245 - Machine Learning Technologies

3 unit(s)
Learn concepts, techniques and algorithms in machine learning for the development of real-world applications; build, evaluate and refine machine learning models to predict patterns from trained data sets; apply supervised and unsupervised learning methodologies in solving classification and regression problems.

Prerequisite(s): DATA 220 and DATA 225, or instructor consent.

Grading: Graded

DATA 250 - Large Scale Data Analytics

3 unit(s)
Learn and apply data analytics technologies and processes to large amount of data in various application domains; technologies include big data analytics algorithms, process and solutions, technology platforms, and data repositories; processes include validation, cleaning, preprocessing, and visualization.

Prerequisite(s): DATA 228 or instructor consent.
Corequisite(s): DATA 240 or instructor consent.
Grading: Graded

DATA 255 - Deep Learning Technologies

3 unit(s)
Study deep learning theory, techniques and technologies; implement neural networks using deep learning frameworks to solve problems in various application domains; build convolutional networks for image recognition, recurrent networks for sequence generation, and generative adversarial networks for image generation.

Prerequisite(s): DATA 245 or instructor consent.
Grading: Graded

DATA 294 - Data Analytics Seminar

3 unit(s)
Advanced and domain specific topics in the area of data analytics; content is updated in each offering; possible topics include though not restricted to research design and data analytics for the applications of business, engineering, natural science, social science, etc.

Satisfies GWAR: Graduation Writing Assessment Requirement

Prerequisite(s): Graduate standing and instructor consent
Grading: Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

DATA 295 - Special Problems in Data Analytics
Advanced individual work in data analytics. Repeatable with graduate advisor approval.

**Grading:** Credit/No Credit

DATA 296 - Special Topics in Data Analytics

3 unit(s)
Special topics in Data Analytics. Content varies from semester to semester. Repeatable in different topic areas.

**Prerequisite(s):** Instructor Consent

**Grading:** Graded

DATA 297 - Data Analytics Internship

1 unit(s)
Fieldwork for MS in Data Analytics students. A report is required at the end of the semester addressing the goals set at the start of the assignment.

**Prerequisite(s):** Completed 12 units degree required courses, classified status, in good standing, and graduate advisor consent

**Grading:** Credit/No Credit

DATA 298A - MSDA Project I

3 unit(s)
Comprehensive plan and preliminary design of data analytics project; integration of knowledge in technologies, processes and management to support program outcomes.

**Prerequisite(s):** Classified status, good standing, DATA 294, and graduate advisor consent.

**Grading:** Graded

DATA 298B - MSDA Project II

3 unit(s)
Completion of an in-depth project to achieve the program outcomes and satisfy the cumulating experience; write a detailed project report; make a comprehensive presentation and demonstration.

**Prerequisite(s):** Advancement to candidacy, DATA 298A, and graduate advisor consent.

**Grading:** Graded

DATA 299A - MSDA Thesis I

3 unit(s)
First of a two-course sequence for the Plan A (Thesis) culminating experience.

**Prerequisite(s):** Classified status, good standing, DATA 294, and graduate advisor consent

**Grading:** Credit / No Credit

DATA 299B - MSDA Thesis II
3 unit(s)
Second of the two-course sequence for the Plan A (Thesis) culminating experience.

**Prerequisite(s):** Admission to candidacy, DATA 299A, and graduate advisor consent.

**Grading:** Mandatory CR/NC/RP

## School of Information

**Office:** Clark Hall 417

**Telephone:** 408-924-2490

**Website:** ischool.sjsu.edu

**Professors**
- Anthony Bernier
- Patricia Franks
- Geoffrey Liu
- Ziming Liu
- David Loertscher
- Lili Luo
- Linda Main, Interim Director
- Kristen Rebmann

**Associate Professors**
- Joni Bodart
- Michelle Chen
- Tonia San Nicolas Rocca
- Michael Stephens

**Assistant Professors**
- Mary Ann Harlan
- Deborah Hicks
- Souvick Ghosh
- Darra Hofman
- Virginia Tucker
- Michele Villagran

## Overview

The San Jose State University (SJSU) School of Information prepares individuals for careers as information professionals. Graduates work in diverse areas of the information profession, such as user experience design, digital asset management, information architecture, electronic records management, information governance, digital preservation, and librarianship. The SJSU School of Information is a recognized leader in online education and received the Online Learning Consortium's Outstanding Online Program award. For more information: ischool.sjsu.edu

## Archives and Records Administration, MARA
The fully online Master of Archives and Records Administration (MARA) degree program at the San Jose State University School of Information prepares students for leadership positions in information governance and corporate archives.

With the convenient and fully online MARA program, students can live anywhere while they earn their graduate degrees. The master's program is delivered exclusively online via interactive online learning technology. The multimedia format enlivens the learning experience while introducing students to the same types of tools they'll use in their professional careers.

For more information: ischool.sjsu.edu.

Requirements for Admission to Classified Standing

Candidates must meet all university admissions requirements. Applicants who meet the following requirements beyond university requirements will be considered for classified admission into the School of Information:

- A bachelor's degree from any regionally accredited institution in any discipline with a GPA of at least 3.0 at the bachelor's degree institution or in the last 60 semester or 90 quarter units.
- A general understanding of computers and technology. See Technology Literacy Requirements.
- The School requires that all students have computer access from home. See Home Computing Requirements.
- Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage of GAPE.

Requirements for Admission to Conditionally Classified Standing

The School of Information does not admit students on a conditional basis.

Requirements for Advancement to Candidacy

In order to achieve candidacy, students must meet the university requirements for candidacy. General university requirements for advancement to candidacy for the MARA degree are detailed in the Graduate Policies and Procedures section. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website.

Students must complete and submit the Petition for Advancement to Graduate Candidacy after completion of nine units and by the posted deadlines for the semester in which they plan to graduate. For additional program requirements and submission instructions, refer to the MARA Candidacy Approval Form Information website.

Requirements for Graduation
University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

Special Session Program Information

Academic Programs offered through Special Session are operated by the College of Professional and Global Education (CPGE). Registration and enrollment in a Special Session course or program must use the special session application form and will follow special session fee and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

Masters Requirements (42 units)

Core Courses (27 units)

- MARA 200 - Record and Recordkeeping Professions 3 unit(s) (GWAR)
- MARA 204 - Management of Archives, Records, Inf. Governance 3 unit(s)
- MARA 210 - Records Creation, Appraisal, and Retention 3 unit(s)
- MARA 211 - Access, Storage and Retrieval of Records 3 unit(s)
- MARA 249 - Management of Digital Data, Information, Records 3 unit(s)
- MARA 283 - Enterprise Content Management and Digital Preservation 3 unit(s)
- MARA 284 - Seminar in Archives and Records Management 1-3 unit(s) (3 units required) (Students take MARA 284 twice with different content)
- MARA 285 - Research Methods in Records Management and Archival Science 3 unit(s)

Electives (12 units)

Complete twelve units:

- INFO 202 - Information Retrieval System Design 3 unit(s)
- INFO 220 - Resources and Information Services in Professions and Disciplines 1-3 unit(s)
- INFO 240 - Information Technology Tools and Applications 3 unit(s)
- INFO 242 - Database Design and Management 3 unit(s)
- INFO 246 - Information Technology Tools and Applications - Advanced 1-3 unit(s)
- INFO 247 - Vocabulary Design 3 unit(s)
- INFO 248 - Beginning Cataloging and Classification 3 unit(s)
- INFO 251 - Web Usability 3 unit(s)
- INFO 256 - Archives and Manuscripts 3 unit(s)
- INFO 259 - Preservation Management 3 unit(s)
- INFO 280 - History of Books and Libraries 3 unit(s)
• INFO 281 - Seminar in Contemporary Issues 1-3 unit(s)
• INFO 282 - Seminar in Library Management 1-3 unit(s)
• INFO 284 - Seminar in Archives and Records Management 1-3 unit(s)
• INFO 287 - Seminar in Information Science 1-3 unit(s)
• INFO 298 - Special Studies 1-3 unit(s)
• MARA 294 - Professional Experience 3 unit(s)

Culminating Experience (Plan B only) (3 units)

• MARA 289 - Advanced Topics in Archives and Records Administration (ePortfolio) 1-3 unit(s) (3 units required)

Total Units Required (42 units)

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

California Library Media Teacher Services Credential

To qualify for the California Library Media Teacher Services Credential with authorization as a library media teacher, the student must complete the credential course work outlined here in the university catalog.

Students must either already hold a valid California teaching credential or complete the requirements for a basic teaching credential (see College of Education section for requirements for a teaching credential).

Core Courses (10 units)

• INFO 200 - Information Communities 3 unit(s) (GWAR)
• INFO 202 - Information Retrieval System Design 3 unit(s)
• INFO 203 - Online Learning: Tools and Strategies 1 unit(s)
• INFO 204 - Information Professions 3 unit(s)

Program Curriculum and Technology (9 units)

• INFO 233 - School Library Media Centers 3 unit(s)
• INFO 250 - Design and Implementation of Instructional Strategies for Information Professionals 3 unit(s)
• INFO 285 - Applied Research Methods 1-4 unit(s)

Information Services and Materials (9 units)

• INFO 237 - School Library Media Materials 3 unit(s)
• INFO 248 - Beginning Cataloging and Classification 3 unit(s)
• INFO 266 - Collection Management 3 unit(s)

Capstone Course (3 units)
INFO 295 - School Library Field Work 3 unit(s)

Total Units Required (21 units)

**Informatics, MS**

Informatics is an interdisciplinary and inter-professional field that focuses on collecting, analyzing, securing, and managing data and information; and turning that data and information into actionable knowledge from a user centered perspective within the context of another domain - such as health or sports.

Students will take 18 units of course work that will provide the foundations and skills needed to:

- Design and develop secure user-centered knowledge structures for the Web environment using design thinking, prototyping, and human computer interaction tools.
- Set up secure digital assets management systems (DAM) working with metadata, workflow, taxonomy, data security, governance, and preservation of digital assets.
- Define, identify, control, manage, secure, and preserve electronic records and information including the management of records and information as operational, legal and historical evidence in electronic environments.
- Manage projects: people, timelines, resources, goals, and outcomes.

Students will apply the above informatics skill set in one of three domains with an additional 9 units focused on health, sports, or cybersecurity/privacy.

However, the central set of knowledge and skills obtained in the foundation and skills courses can be applied to many different domains as graduates develop their careers.

For more information: ischool.sjsu.edu/programs/ms-informatics.

**Requirements for Admission to Classified Standing**

Candidates must meet all university admission requirements.

Applicants who meet the following requirements beyond university requirements will be considered for admission into the School of Information:

- A bachelor's degree from any regionally accredited institution in any discipline with a GPA of at least 2.8 at the bachelor's degree institution or in the last 60 semester or 90 quarter units.
- Skill with HTML5 and CSS3 - or updated standards - as demonstrated via class transcripts or work experience.
- The School requires that all students have computer access from home. See Home Computing Requirements.
- Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage of GAPE.

**Requirements for Admission to Conditional Classified Standing**
The School of Information does not admit students on a conditional basis.

**Requirements for Advancement to Graduate Candidacy**

In order to achieve candidacy, students must meet the university requirements for candidacy. General university requirements for advancement to candidacy for the Informatics degree are detailed in the Graduate Policies and Procedures section. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website.

Students must complete and submit the Petition for Advancement to Graduate Candidacy after completion of nine units and by the posted deadlines for the semester in which they plan to graduate.

**Requirements for Graduation**

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

**Special Session Program Information**

Academic Programs offered through Special Session are operated by the College of Professional and Global Education (CPGE). Registration and enrollment in a Special Session course or program must use the special session application form and will follow special session fee and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the CPGE website for more information.

**Master’s Requirements (30 units)**

**Foundation and Skills (18 units)**

- INFM 200 - Informatics: Fundamentals 3 unit(s) (GWAR)
- INFM 201 - Informatics: Technology Foundations 2 unit(s)
- INFM 202 - Informatics: Security Overview 1 unit(s)
- INFM 203 - Big Data analytics and Management 2 unit(s)
- INFM 204 - Human Centered Design 2 unit(s)
- INFM 205 - Informatics: Project Management 2 unit(s)
- INFM 206 - Electronic Records: Foundations 3 unit(s)
- INFM 207 - DAM: Digital Assets Management 2 unit(s)
- INFM 208 - Information Security: Info Assurance 1 unit(s)

**Specialization Area (9 units)**
Specializations will be offered on a rotating basis: Health, Sports, Cybersecurity and Privacy

Health Specialization

- INFM 210 - Health Informatics 3 unit(s)
- INFM 213 - Epidemiological Methods 3 unit(s)
- INFM 214 - Health Data and Analytics 3 unit(s)

Sports Specialization

- INFM 218 - Sports Analytics 3 unit(s)
- KIN 264 - Sport Sociology 3 unit(s)
- KIN 282 - Marketing and Social Aspects of Sport 3 unit(s)

Cybersecurity and Privacy Specialization

- INFM 215 - Network Security 3 unit(s)
- INFM 216 - Computer Digital Forensics 3 unit(s)
- INFM 217 - Tools Lab 3 unit(s)

Culminating Experience (Plan B Only) (3 units)

- INFM 211 - Organizational Consulting Project (OCP) 3 unit(s)

Total Units Required (30 units)

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

Library and Information Science, MLIS

The San José State University (SJSU) School of Information prepares individuals for careers as information professionals. Graduates work in diverse areas of the information profession, such as user experience design, digital asset management, information architecture, electronic records management, information governance, digital preservation, and librarianship. The SJSU School of Information delivers all of its degrees and certificates fully online. It is a recognized leader in online education and received the Online Learning Consortium's Outstanding Online Program award.

For more information: ischool.sjsu.edu.

Requirements for Admission to Classified Standing

Candidates must meet all university admission requirements. Applicants who meet the following requirements beyond university requirements will be considered for admission into the School of Information:
• A bachelor's degree from any regionally accredited institution in any discipline with a GPA of at least 3.0 at the bachelor's degree institution or in the last 60 semester or 90 quarter units.
• A general understanding of computers and technology. See Technology Literacy Requirements.
• The School requires that all students have computer access from home. See Home Computing Requirements.
• Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage of GAPE.

Requirements for Admission to Conditionally Classified Standing

The School of Information does not admit students on a conditional basis.

Requirements for Advancement to Graduate Candidacy

In order to achieve candidacy, students must meet the university requirements for candidacy. General university requirements for advancement to candidacy for the MLIS degree are detailed in the Graduate Policies and Procedures section. Candidacy includes the successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website.

Students must complete and submit the Petition for Advancement to Graduate Candidacy after completion of nine units and by the posted deadlines for the semester in which they plan to graduate. For additional program requirements and submission instructions, refer to the MLIS Candidacy Approval Form Information website.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Special Session Program Information

Academic Programs offered through Special Session are operated by the College of Professional and Global Education (CPGE). Registration and enrollment in a Special Session course or program must use the special session application form and will follow the special session fees and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or the program will trigger a separate and additional set of fees.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR).

This requirement is satisfied by passing INFO 200.

**Culminating Experience**

**Plan A (Thesis)**

The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master's Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate's thesis committee chair with the assistance of the thesis committee.

**Plan B (ePortfolio)**

The e-Portfolio provides a program-based assessment to ensure that each student demonstrates mastery of all program learning outcomes for the MLIS degree before graduation. It requires students to select, document, and assemble evidence of their competence in a series of skill areas the faculty have deemed essential for entry-level professional performance.

**Master's Requirements (43 units)**

**Core Courses (13 units)**

- INFO 200 - Information Communities 3 unit(s) (GWAR)
- INFO 202 - Information Retrieval System Design 3 unit(s)
- INFO 203 - Online Learning: Tools and Strategies 1 unit(s)
- INFO 204 - Information Professions 3 unit(s)
- INFO 285 - Applied Research Methods 1-4 unit(s)

**Electives (27 units)**

Complete twenty-seven units from:

- INFO 210 - Reference and Information Services 1-3 unit(s) (3 units required)
- INFO 220 - Resources and Information Services in Professions and Disciplines 1-3 unit(s)
- INFO 221 - Government Information Sources 3 unit(s)
- INFO 228 - Advanced Information Resources and Services 3 unit(s)
- INFO 230 - Issues in Academic Libraries 3 unit(s)
- INFO 231 - Issues in Special Libraries and Information Centers 3 unit(s)
- INFO 232 - Issues in Public Libraries 3 unit(s)
- INFO 233 - School Library Media Centers 3 unit(s)
- INFO 234 - Intellectual Freedom Seminar 3 unit(s)
- INFO 237 - School Library Media Materials 3 unit(s)
- INFO 240 - Information Technology Tools and Applications 3 unit(s)
- INFO 241 - Automated Library Systems 1-3 unit(s) (3 units required)
- INFO 242 - Database Design and Management 3 unit(s)
- INFO 243 - Systems Analysis 3 unit(s)
- INFO 244 - Online Searching 3 unit(s)
- INFO 245 - Advanced Online Searching 3 unit(s)
• INFO 246 - Information Technology Tools and Applications - Advanced 1-3 unit(s)
• INFO 247 - Vocabulary Design 3 unit(s)
• INFO 248 - Beginning Cataloging and Classification 3 unit(s)
• INFO 249 - Advanced Cataloging and Classification 3 unit(s)
• INFO 250 - Design and Implementation of Instructional Strategies for Information Professionals 3 unit(s)
• INFO 251 - Web Usability 3 unit(s)
• INFO 254 - Information Literacy and Learning 3 unit(s)
• INFO 256 - Archives and Manuscripts 3 unit(s)
• INFO 257 - Records Management 3 unit(s)
• INFO 259 - Preservation Management 3 unit(s)
• INFO 260 - Resources for Children, Ages 0-6 3 unit(s)
• INFO 261 - Resources for Children, Ages 6-12 3 unit(s)
• INFO 262 - Resources for Young Adults 3 unit(s)
• INFO 263 - Materials for Children 3 unit(s)
• INFO 264 - Materials for Tweens 3 unit(s)
• INFO 265 - Materials for Young Adults Ages 3 unit(s)
• INFO 266 - Collection Management 3 unit(s)
• INFO 267 - Services to Youth 1-9 unit(s)
• INFO 268 - History of Youth Literature 3 unit(s)
• INFO 269 - Early Childhood Literacy 3 unit(s)
• INFO 270 - Intellectual Freedom and Youth 3 unit(s)
• INFO 271A - Genres and Topics in Youth Literature 1-9 unit(s)
• INFO 272 - Authors and Illustrators in Youth Literature 3 unit(s)
• INFO 275 - Library Services for Racially and Ethnically Diverse Communities 3 unit(s)
• INFO 280 - History of Books and Libraries 3 unit(s)
• INFO 281 - Seminar in Contemporary Issues 1-3 unit(s)
• INFO 282 - Seminar in Library Management 1-3 unit(s)
• INFO 283 - Marketing of Information Products and Services 1-3 unit(s) (3 units required)
• INFO 284 - Seminar in Archives and Records Management 1-3 unit(s)
• INFO 286 - Interpersonal Communication Skills for Librarians 1-3 unit(s)
• INFO 287 - Seminar in Information Science 1-3 unit(s)
• INFO 293 - Introduction to Data Networking 3 unit(s)
• INFO 294 - Professional Experiences: Internships 2-4 unit(s)
• INFO 295 - School Library Field Work 3 unit(s)
• INFO 298 - Special Studies 1-3 unit(s)

Culminating Experience (3 units)

Complete One Option (Plan A Thesis Or Plan B Portfolio):

Plan A (Thesis)

• INFO 299 - Thesis 3 unit(s)

Plan B (Portfolio)

• INFO 289 - Advanced Topics in Library and Information Science 3 unit(s)
Total Units Required (43 units)

Students can transfer up to 9 units subject to the School's transfer policies.

Elective courses must be planned in consultation with the Graduate Advisor

The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 15.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

**Library Information Sciences Post-Masters Certificate**

The Post-Master's Certificate program features eight career pathways focused on diverse specializations, such as digital curation, emerging technologies, web programming, data science and more! Certificate program students choose one career pathway and then select five courses from that career pathway, tailoring their in-depth learning experience to their career aspirations. In addition, all students begin the program with a one-unit guided learning experience that introduces our school's interactive online learning environment. After completing 16 units of required coursework, certificate students demonstrate their mastery of the program's learning outcomes.

**Gainful Employment Disclosure**

**Strategic Management of Digital Assets and Services Certificate (Graduate)**

Handling and governance of digital information and data in organizational and networked contexts— including digital assets management, digital curation, information governance, information assurance, data analytics, marketing, community informatics, and demonstrating value. Students pick one career pathway and select 9 units from that pathway, [http://ischool.sjsu.edu/programs/advanced-certificate-strategic-management](http://ischool.sjsu.edu/programs/advanced-certificate-strategic-management)

**Digital Assets Management Pathway (9 units)**

Students select any 9 units from the following:

- INFO 282 - Seminar in Library Management 1-3 unit(s) (3 units required)
- INFO 284 - Seminar in Archives and Records Management 1-3 unit(s)

**Information Governance, Assurance and Security (9 units)**

- MARA 284 - Seminar in Archives and Records Management 1-3 unit(s) (6 units required)
- INFO 287 - Seminar in Information Science 1-3 unit(s) (3 units required)

**Data Analytics and Data Driven Decision Making (9 units)**

Students select any 9 units from the following:

- INFO 246 - Information Technology Tools and Applications - Advanced 1-3 unit(s)
• INFO 220 - Resources and Information Services in Professions and Disciplines 1-3 unit(s)
• INFO 282 - Seminar in Library Management 1-3 unit(s)

Advocacy, Marketing and Community Informatics (9 units)

• INFO 281 - Seminar in Contemporary Issues 1-3 unit(s)
• INFO 282 - Seminar in Library Management 1-3 unit(s)
• INFO 283 - Marketing of Information Products and Services 1-3 unit(s)

Total Units Required (9 units)

INFM 200 - Informatics: Fundamentals

3 unit(s)
A broad perspective and understanding of informatics as a technical skill set that focuses on user-centered systems and balances legal and ethical considerations and measures. Examines informatics applications in specific and interprofessional contexts.

Satisfies GWAR: Graduation Writing Assessment Requirement

Grading: Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

INFM 201 - Informatics: Technology Foundations

2 unit(s)
Analyze and implement web applications using APIs, web frameworks and infrastructure-as-a-service to support web services and web resources.

Grading: Graded

INFM 202 - Informatics: Security Overview

1 unit(s)
Fundamentals of network security, compliance and operational security; threats and vulnerabilities; application, data, and host security; access control and identity management; and cryptography. Students are provided with an opportunity to gain hands-on experience using typical cybersecurity solutions.

Grading: Graded

INFM 203 - Big Data analytics and Management

2 unit(s)
Overview and use of important big data technologies, trends, infrastructure, and management issues that enable users to make informed and strategic decisions with the presence of large-scale data sets.

Grading: Graded

INFM 204 - Human Centered Design
Designing and developing user-centered knowledge structures for the Web environment. Core topics are: problems addressed by effective human-computer interaction; how to design for findability; design thinking concepts and tools; prototyping; and informing stakeholders about a content-rich product.

Grading: Graded

INFM 205 - Informatics: Project Management

2 unit(s)
Introduces essential strategies and techniques for project management. Topics include: management styles, institutional constraints, project life cycles, stakeholder management, scope definition, risk assessment, project planning tools, and team management.

Grading: Graded

INFM 206 - Electronic Records: Foundations

3 unit(s)
Principles and methods of managing records and information as operational, legal and historical evidence in electronic environments. Examines the ways in which new information technologies challenge organizations' capacities to define, identify, control, manage, and preserve electronic records and information.

Grading: Graded

INFM 207 - DAM: Digital Assets Management

2 unit(s)
Concepts, terminology, practice and application of DAM in the private and public sector. Addresses metadata, workflow, taxonomy, data security, governance, and preservation of digital assets.

Grading: Graded

INFM 208 - Information Security: Info Assurance

1 unit(s)
Overview of Information Assurance and Risk Management theories, principles, and techniques. This course examines the information assurance frameworks and risk management planning structures used to ensure that an organization’s information resources and assets are protected.

Grading: Graded

INFM 210 - Health Informatics

3 unit(s)
Health data and standards, electronic health records (EHR) and other healthcare information, data management concerns and technology governance in the health care environment.

Grading: Graded

INFM 211 - Organizational Consulting Project (OCP)
3 unit(s)
Application of knowledge and skills developed in the Informatics program to address a specific problem in a specific domain (such as health or sports).

**Grading:** Mandatory CR/NC/RP

INFM 213 - Epidemiological Methods

3 unit(s)
Introduction to the principles and methods of epidemiologic research. Students are enabled to design, conduct, analyze, and interpret epidemiologic research.

**Grading:** Graded

INFM 214 - Health Data and Analytics

3 unit(s)
Exploration of healthcare informatics and its relation to health information technology. Students will apply basic knowledge and skills from healthcare data mining, data science, data management and professional project management to address practical healthcare business and clinical intelligence issues.

**Grading:** Graded

INFM 215 - Network Security

3 unit(s)
Technical and administrative aspects of information security and assurance. Includes compliance and operational security, Web application attacks, penetration testing, data loss prevention, cloud computing security, psychological and behavioral traits of users vulnerable to cyber and social engineering attacks, and application programming development security.

**Prerequisite(s):** Graduate Standing or Instructor Consent

**Grading:** Graded

INFM 216 - Computer Digital Forensics

3 unit(s)
Digital forensic investigation activities. Data acquisition, forensic imaging, use of Forensic Tool Kit (FTK) suite of applications (using Access Data virtual labs), locking mechanisms, search and seizure procedures, and report writing.

**Prerequisite(s):** Graduate Standing or Instructor Consent

**Grading:** Graded

INFM 217 - Tools Lab

3 unit(s)
Security tools used to detect network security threats and vulnerabilities at a microscopic level. Introduction to penetration testing, packet analyzers, standards and cryptography, reconnaissance and malware, hacking, and vulnerability scanning.

**Prerequisite(s):** Graduate Standing or Instructor Consent

**Grading:** Graded
INFM 218 - Sports Analytics

3 unit(s)
Analytical techniques and quantitative methods used to inform decisions in the sport industry. Theory, development, and application of analytics in sports to support player performance, in-game strategy, team management, sports operations, and fantasy competitions.

Prerequisite(s): Graduate Standing or Instructor Consent
Grading: Graded

INFO 20 - Introduction to Computing for Personal Information Management

3 unit(s)
Introduction to computing for personal information access, use and management including basic computer operations, access to geographically distributed information on the global Internet, electronic communication, word processing and document design, data modeling with spreadsheets, database design and maintenance for information storage and retrieval and information presentation.

Grading: Graded

INFO 200 - Information Communities

3 unit(s)
Examines information users and the social, cultural, economic, technological, and political forces that shape their information access and use.

Satisfies GWAR: Graduation Writing Assessment Requirement

Prerequisite(s): Demonstrated computer literacy.
Grading: Graded

Note(s): This course satisfies graduate-level GWAR in this master's program.

INFO 202 - Information Retrieval System Design

3 unit(s)
The systems and knowledge structures that information professionals create and use to connect users with information.

Prerequisite(s): Demonstrated computer literacy.
Grading: Graded

INFO 203 - Online Learning: Tools and Strategies

1 unit(s)
This course introduces students to new and emerging technologies used in today's online learning environment. It covers learning management tools, various social networking platforms, web conferencing, as well as strategies and skills needed for success in online learning.

Grading: Credit/No Credit

INFO 204 - Information Professions
3 unit(s)
Examines the organizations and environments in which information professionals work.

**Prerequisite(s):** Demonstrated computer literacy.
**Grading:** Graded

**INFO 208 - Big Data Technologies**

3 unit(s)
Introduction to the technological ecosystem of Big Data and Hadoop as well as the goals and work of Data Science.

**Prerequisite(s):** Graduate Standing or instructor consent
**Grading:** Graded

**INFO 209 - Web and Data Mining**

3 unit(s)
Covers topics ranging from data mining, Web mining, classification, numeric prediction, association rules, sequential patterns, Web crawling, retrieval and search engines, social network analysis, link analysis, ranking, Web personalization and recommender systems, to Hadoop based technologies, including MapReduce, Spark, MLlib

**Prerequisite(s):** Basic knowledge of Linux/UNIX programming. Some familiarity with C, C++, and/or Java.
**Grading:** Graded

**INFO 210 - Reference and Information Services**

1-3 unit(s)
Process-oriented examination of how information professionals answer reference questions. Stresses interpersonal skills required for effective question negotiation and sources with which questions are answered.

*Course may be repeated for credit for up to 3 units.*

**Prerequisite(s):** INFO 202.
**Grading:** Graded

**INFO 211 - Transfer Course One**

3 unit(s)
*Misc/Lab: Lecture 2 hours/lab 3 hours.*

**Prerequisite(s):** Transfer content for MLIS students who transfer graduate credits. Needs graduate advisor and/or academic advisor approval.
**Grading:** Graded

**INFO 212 - Transfer Course Two**

3 unit(s)
*Misc/Lab: Lecture 2 hours/lab 3 hours.*

**Prerequisite(s):** Transfer Content for MLIS Students who transfer graduate credits. Needs graduate advisor and/or academic advisor approval.
**Grading:** Graded
INFO 213 - Transfer Course Three

3 unit(s)
Misc/Lab: Lecture 2 hours/lab 3 hours.

Prerequisite(s): Transfer content for MLIS students who transfer graduate credits. Needs graduate advisor and/or academic advisor approval.
Grading: Graded

INFO 215 - Information Visualization

3 unit(s)
Applying perceptual and cognitive principles to the design and development of information visualization techniques, such as scatterplots, treemaps, parallel coordinates, and GIS visualizations; interactive visualization interface design and implementation; narrative visualization and storytelling; visual analytics for decision making.

Prerequisite(s): Graduate Standing or Instructor Consent
Grading: Graded

INFO 220 - Resources and Information Services in Professions and Disciplines

1-3 unit(s)
Examination of the nature of resources for, and services to, professions and disciplines. Possible disciplines for study may be law, business and economics, life and/or physical sciences, medical sciences, engineering and computer science, maps, and visual and performing arts. Course is repeatable in the same semester for a maximum of nine units when content changes.

Course may be repeated for credit for up to 9 units.

Grading: Graded

INFO 221 - Government Information Sources

3 unit(s)
Study in government publications and databases, their bibliographic organization, use in all types of libraries and information centers, methods of acquiring information from federal, state and local sources; problems of depository and non-depository collections.

Course may be repeated for credit for up to 6 units.

Prerequisite(s): INFO 210.
Grading: Graded

INFO 228 - Advanced Information Resources and Services

3 unit(s)
In-depth survey of information needs, uses, and sources across different user groups; current methods of providing reference services and instruction in different information seeking contexts; and techniques for evaluating reference sources and services.
Prerequisite(s): INFO 202 and INFO 210.
Grading: Graded

INFO 229 - Practicum/Seminar in Information Services

3 unit(s)
Opportunity to work in a setting delivering information services. Discussion of encountered problems, current trends and contemporary approaches to information service delivery.

Prerequisite(s): INFO 244 or instructor consent.
Grading: Credit/No Credit

INFO 230 - Issues in Academic Libraries

3 unit(s)
Investigate current issues that impact the functioning of the academic library. Topics include issues related to social and political environments, clientele, services, collections, physical settings, financing, staffing and future trends in the academic library sector.

Prerequisite(s): INFO 200, INFO 202 and INFO 204.
Grading: Graded

INFO 231 - Issues in Special Libraries and Information Centers

3 unit(s)
This course will investigate current issues that impact the functioning of special libraries/information centers. Topics covered will include issues related to social and political environments, clientele, services, collections, physical settings, financing and staffing, and future trends in the special library/information center sector.

Prerequisite(s): INFO 200, INFO 202, INFO 204.
Grading: Graded

INFO 232 - Issues in Public Libraries

3 unit(s)
This course will investigate current issues that impact the functioning of the public library. Topics covered will include issues related to social and political environments, clientele, services, collections, physical settings, financing and staffing, and future trends in the public library sector.

Prerequisite(s): INFO 200, INFO 202, INFO 204.
Grading: Graded

INFO 233 - School Library Media Centers

3 unit(s)
The role of the school library media teacher and the school library media program in the educational community. Emphasis on creation of effective learning environments, involvement in the curriculum and teaching process as well as philosophies of service and management.

Prerequisite(s): INFO 204 and INFO 250.
Grading: Graded
INFO 234 - Intellectual Freedom Seminar

3 unit(s)
Focuses on current intellectual freedom issues and the centrality of intellectual freedom to librarianship.

Prerequisite(s): INFO 200, INFO 204.
Grading: Graded

INFO 237 - School Library Media Materials

3 unit(s)
Survey of materials in a variety of formats that meet the needs of K12 students. Materials will be examined that support state and national curriculum standards as well as material that support independent reading and learning. Course can be repeated one time.

Course may be repeated for credit for up to 3 units.

Prerequisite(s): INFO 200, INFO 202, INFO 203, INFO 204
Grading: Graded

INFO 240 - Information Technology Tools and Applications

3 unit(s)
Focuses on building practical skills in a variety of networked computer applications. Topics will vary, but will typically include web coding languages and designing web sites.

Prerequisite(s): INFO 202.
Grading: Graded

INFO 241 - Automated Library Systems

1-3 unit(s)
Review of major systems for library automation. Problems associated with the planning, implementation and use of the systems, negotiation of systems acquisition and trends in the field.

Course may be repeated for credit for up to 3 units.

Prerequisite(s): INFO 200, INFO 202 and INFO 204. Not available to Open University Students.
Grading: Graded

INFO 242 - Database Design and Management

3 unit(s)
Design and implementation of relational databases. Learn about database management systems (such as Oracle), database administration, and database querying with SQL.

Prerequisite(s): INFO 202. Not available to Open University Students.
Grading: Graded

INFO 243 - Systems Analysis
3 unit(s)
Study of systems as applied to libraries and information centers. Application of methods for studying the means by which libraries deliver information services to users.

Prerequisite(s): INFO 200, INFO 202 and INFO 204. Not available to Open University Students.
Grading: Graded

INFO 244 - Online Searching

3 unit(s)
Techniques and concepts for searching online, including strategies, database content, search options, and understanding the information environment. The course includes extensive hands-on experience with subscription search engines.

Prerequisite(s): INFO 202.
Grading: Graded

INFO 245 - Advanced Online Searching

3 unit(s)
Emphasis is on on-line techniques for developing current awareness services.

Prerequisite(s): INFO 244.
Grading: Graded

INFO 246 - Information Technology Tools and Applications - Advanced

1-3 unit(s)
Designing advanced Web applications using technology such as dynamic HTML and XML and Web programming languages such as XSLT, JavaScript, JSP, Perl, PHP, MYSQL, and ASP. May be repeated for up to 12 units when content changes.

Course may be repeated for credit for up to 12 units.

Prerequisite(s): INFO 202.
Grading: Graded

INFO 247 - Vocabulary Design

3 unit(s)
Survey of principles and practices used to index information-bearing objects such as documents or images. Includes term assignment, review of existing vocabularies, thesaurus design, metadata structures and automatic and natural language processes.

Prerequisite(s): INFO 202.
Grading: Graded

INFO 248 - Beginning Cataloging and Classification

3 unit(s)
Theory and practice of bibliographic control including the study of representative cataloging using AACR2, machine-based representation using MARC formats and other standards, subject analysis and classification using LCSH.
Dewey, and LCC with application to books, non-book materials and serials.

**Prerequisite(s):** INFO 202.
**Grading:** Graded

**INFO 249 - Advanced Cataloging and Classification**

3 unit(s)
Application of cataloging and organization of information principles to multi- and hyper-media resources. Complex serial publications, evolving standards for representation of non-traditional networked information, and cataloging policy development. Specific focus of the course may vary each time taught.

**Prerequisite(s):** INFO 202, INFO 248.
**Grading:** Graded

**INFO 250 - Design and Implementation of Instructional Strategies for Information Professionals**

3 unit(s)
Examination of concepts of instruction in the use of information technologies, information services and sources. Includes investigation of learning theory and instructional design. Emphasis on application of theory through development of instruction and instructional resources in various media for use in a broad array of institutional environments.

*Course may be repeated for credit for up to 6 units.*

**Prerequisite(s):** INFO 200. Not available to Open University Students.
**Grading:** Graded

**INFO 251 - Web Usability**

3 unit(s)
Through examination of theory, methodologies, and real-life cases, Info 251 offers a user experience (UX) framework for developing information systems. Students learn the principles of user-centric design and style for particular circumstances and populations.

**Prerequisite(s):** INFO 202.
**Grading:** Graded

**INFO 252A - Information Processing and Management I**

3 unit(s)
An introduction to programming in the Java programming language. Emphasis on techniques necessary for manipulating character strings, sorting and searching algorithms frequently used for information storage and retrieval problems, and fundamental concepts of modern software engineering.

**Prerequisite(s):** Computer Literacy.
**Grading:** Graded

**INFO 252B - Information Processing and Management II**

3 unit(s)
Introduction to Object-Oriented Programming (OOP) and Object-Oriented Database Design (OODB) in the Java
programming language. Emphasis is on how to apply these concepts and techniques to problem solving in the field of information storage and retrieval.

**Prerequisite(s):** INFO 252A or instructor consent.
**Grading:** Graded

**INFO 253 - Natural Language Processing and Automatic Indexing/Abstracting**

3 unit(s)
Introduction to natural language processing and automatic indexing/abstracting with emphasis on text processing. Topics include: semantic dictionary, lexical analysis, word frequency analysis and automatic selection of indexing tokens, term weighting, the vector space model and document representation.

**Prerequisite(s):** INFO 252B or instructor consent.
**Grading:** Graded

**INFO 254 - Information Literacy and Learning**

3 unit(s)
Provides theory and practice for teaching information literacy in an LIS setting. The course emphasizes learning theory as well as the practical aspects of teaching. Students learn methods and tools for teaching in both synchronous and asynchronous settings.

**Prerequisite(s):** INFO 200
**Grading:** Graded

**INFO 256 - Archives and Manuscripts**

3 unit(s)
An introduction to the theory and practice of managing archival documents, such as personal papers, institutional records, photographs, electronic records and other unpublished material. Topics covered include manuscript and records acquisition and appraisal, arrangement and description, conservation and preservation, reference and access.

**Prerequisite(s):** INFO 200, INFO 202, INFO 204.
**Grading:** Graded

**INFO 257 - Records Management**

3 unit(s)
An introduction to the theories, methodologies and technologies used in managing institutional information and records. Topics include the history of records management, the records' life cycle, record inventory and analysis, classification and filing, retention scheduling and equipment.

**Prerequisite(s):** INFO 200, INFO 202, INFO 204.
**Grading:** Graded

**INFO 259 - Preservation Management**

3 unit(s)
An introduction to the philosophies and techniques used to preserve manuscript, printed and digital materials. Examination of the evolution of preservation practice, with emphasis on emerging theories, models and technologies.
in digital preservation.

Prerequisite(s): INFO 200, INFO 202, INFO 204.
Grading: Graded

INFO 260 - Resources for Children, Ages 0-6

3 unit(s)
Survey of children's materials for infants to age six, with emphasis on books for beginning readers, integration of this material into library and school programs, planning and implementation of public relations. Repeatable for credit. Repeatable for credit when content changes.

Grading: Graded

INFO 260A - Programming and Services for Children Ages 0-8

3 unit(s)
This course examines the importance of programming for children, including parent education programs, story hours, outreach techniques, services with schools, summer reading programs, and program series such as weekly or monthly programs on manga, knitting, book discussions, or homework help.

Prerequisite(s): INFO 200
Grading: Graded

INFO 261 - Resources for Children, Ages 6-12

3 unit(s)
A survey of the books and media available for children 6-12, and of the evaluation, selection, and use of these materials in the contexts of collection development, children's reading interests, informational needs, school curricula, and multicultural library service. Repeatable for credit. Repeatable for credit when content changes.

Grading: Graded

INFO 261A - Programming and Services for Young Adults Ages 9-18

3 unit(s)
Administration and delivery of professional library and information services with multi-cultural young adult populations: features critical youth studies cultural/historical research, resources, policy, threats, tools, methods, service philosophies and management skills necessary for a comprehensive profile of YA library services.

Prerequisite(s): INFO 200
Grading: Graded

INFO 262 - Resources for Young Adults

3 unit(s)
Materials for adolescents and pre-adolescents and methods for incorporating these materials into library planning. Collection development, needs assessment and programming will be featured. Information services for young adults in a variety of settings will also be addressed. Repeatable for credit. Repeatable for credit when content changes.

Grading: Graded
INFO 262A - Materials for Children Ages 0-4

3 unit(s)
Survey of children's materials, including "toy" books, picture books, and various media and technology appropriate for this age group, and how they can meet developmental needs. Collection development tools and techniques for these materials will also be included.

Prerequisite(s): INFO 200
Grading: Graded

INFO 263 - Materials for Children

3 unit(s)
Survey of materials in a variety of formats including nonfiction, beginning chapter books, fictional genres, paperback series and electronic resources, and how they can help meet developmental needs. Collection development tools and techniques for this material will also be included.

Prerequisite(s): INFO 200, and either INFO 260A or INFO 261A
Grading: Graded

INFO 264 - Materials for Tweens

3 unit(s)
Survey of materials in various formats including fiction, nonfiction, movies, CDS, computer games and other materials, and how they can meet the developmental needs of this age group. Collection development tools and techniques for this material will also be included.

Prerequisite(s): INFO 200, and either INFO 260A or INFO 261A
Grading: Graded

INFO 265 - Materials for Young Adults Ages

3 unit(s)
This course will allow students to take an in depth look at materials in a variety of formats for teens, including fiction, popular nonfiction, graphic novels, movies, computer games, websites, other media, and determine how they can meet developmental needs.

Prerequisite(s): INFO 200, and either INFO 260A or INFO 261A
Grading: Graded

INFO 266 - Collection Management

3 unit(s)
Study of collection management in all types of libraries and information centers. Includes analysis of information needs, criteria for selection, collection use evaluation and resources for collection development.

Prerequisite(s): INFO 202, INFO 204.
Grading: Graded

INFO 267 - Services to Youth
1-9 unit(s)
Seminar in planning, developing and evaluating youth services in public libraries. Special needs of children and young adults in the public library, liaison with schools, reference services, and collection planning will be featured. Repeatable for credit, for up to 9 units. Repeatable for credit when content changes.

Course may be repeated for credit for up to 9 units.

Prerequisite(s): INFO 200, and either INFO 260A or INFO 261A
Grading: Graded

INFO 268 - History of Youth Literature

3 unit(s)
The history of literature for children and teens from its earliest examples to today's current trends, including how childhood has changed over the years, the influence of culture on those changes, and on the materials created for children and teens.

Prerequisite(s): INFO 200
Grading: Graded

INFO 269 - Early Childhood Literacy

3 unit(s)
Covers a wide variety of topics important for an understanding of early childhood multi-literacies in library and non-library environments, including current research, best practices and practical examples that can be implemented in various work environments with children.

Prerequisite(s): INFO 200
Grading: Graded

INFO 270 - Intellectual Freedom and Youth

3 unit(s)
This course will focus on intellectual freedom issues with youth, the value of youth literature to enhance individuals' lives, the ethics of intellectual freedom, the psychology of censorship and how to combat it, and how to defend materials for youth.

Grading: Graded

INFO 271A - Genres and Topics in Youth Literature

1-9 unit(s)
Various topics and genres in literature for children or teens will be examined in depth, such as graphic novels, poetry, fantasy, science fiction, publishing and writing trends, reading motivation techniques, literature in the classroom, and the art of picture books. Repeatable for up to 9 units.

Course may be repeated for credit for up to 9 units.

Prerequisite(s): INFO 200, and either INFO 260A or INFO 261A
Grading: Graded

INFO 272 - Authors and Illustrators in Youth Literature
This course will look at selected authors and/or illustrators of youth literature, examining their work, their lives, their motivations, their criticism, and the usefulness of their work.

Course may be repeated for credit for up to 9 units.

Grading: Graded

INFO 275 - Library Services for Racially and Ethnically Diverse Communities

3 unit(s)
This course focuses on developing skills for planning, implementing and evaluating programs for addressing the information needs of racially, ethnically and linguistically diverse communities. Reviews the major national, state and local studies.

Prerequisite(s): INFO 200 and INFO 204. Not available to Open University Students.

Grading: Graded

INFO 280 - History of Books and Libraries

3 unit(s)
This class traces the development of the book through its many stages and explores how the creation, use, and storage of information are affected by social and technological change. The development of libraries and librarianship and how they have accommodated themselves to the changing form of the book will also be considered.

Prerequisite(s): INFO 200

Grading: Graded

INFO 281 - Seminar in Contemporary Issues

1-3 unit(s)
Investigation of major contemporary issues within the information profession. Topics range from censorship to the need for a national information policy and change each time the course is offered. A maximum of nine units may be repeated in the same semester when content changes.

Course may be repeated for credit for up to 9 units.

Prerequisite(s): INFO 200, INFO 202, INFO 204.

Grading: Graded

INFO 282 - Seminar in Library Management

1-3 unit(s)
Application of management theory to specific problems. Readings and discussions of the development of effective strategies for planning and implementing organizational change. Content changes each time offered. A maximum of nine units may be repeated in the same semester when content changes.

Course may be repeated for credit for up to 9 units.

Prerequisite(s): INFO 200 and INFO 204. Not available to Open University Students.

Grading: Graded
INFO 283 - Marketing of Information Products and Services

1-3 unit(s)
Applications of marketing concepts to library and information services. Market analysis, use surveys, market targeting and introduction of services.

Prerequisite(s): INFO 200 and INFO 204. Not available to Open University Students.
Grading: Graded

INFO 284 - Seminar in Archives and Records Management

1-3 unit(s)
In-depth study of current issues and practices in archives and records management. The course addresses new areas of research and application such as oral history, sound and visual archives, digitization, archival automation, archival security, genealogy, and more. Course is repeatable for credit for up to 12 units.

Course may be repeated for credit for up to 12 units.

Prerequisite(s): INFO 200, INFO 202, INFO 204
Grading: Graded

INFO 285 - Applied Research Methods

1-4 unit(s)
Selection, formulation and development of problems in library and information science research. Evaluation of published research and in the field.

Course may be repeated for credit for up to 6 units.

Prerequisite(s): INFO 200, INFO 202, INFO 204
Grading: Graded

INFO 286 - Interpersonal Communication Skills for Librarians

1-3 unit(s)
The principles and practice of interpersonal communication; small group and peer relationships.

Course may be repeated for credit for up to 3 units.

Prerequisite(s): INFO 200 and INFO 204. Not available to Open University Students.
Grading: Graded

INFO 287 - Seminar in Information Science

1-3 unit(s)
Current issues and problems in information retrieval as related to concepts and theories of information science. A maximum of nine units may be repeated with different content.

Course may be repeated for credit for up to 12 units.

Prerequisite(s): INFO 200. Not available to Open University Students.
Grading: Graded
INFO 289 - Advanced Topics in Library and Information Science

3 unit(s)
Advanced independent examination of selected issues and problems in library and information science with a focus on the integration of theory and practice. Issues and problems addressed will vary each semester.

**Grading:** Mandatory CR/NC/RP

INFO 292 - Professional Experience: Projects

3 unit(s)
Gives students the opportunity to complete a professional project related to the theory and method of Library & Information Science in an information organization or institution, and to gain practical experience in one or more areas of LIS.

**Prerequisite(s):** INFO 200, INFO 202, INFO 204, plus six advanced courses.

**Grading:** Credit/No Credit

INFO 293 - Introduction to Data Networking

3 unit(s)
An introduction to computer networking in both Lan and Wan environments with an emphasis on hands-on projects.

**Prerequisite(s):** INFO 200, INFO 202, INFO 204. INFO 240 desirable.

**Grading:** Graded

INFO 294 - Professional Experiences: Internships

2-4 unit(s)
Supervised professional experience in an approved public, academic, or special library or other information-based organization.

*Course may be repeated for credit for up to 8 units.*

**Prerequisite(s):** INFO 200, INFO 202, INFO 204, and three advanced courses.

**Grading:** Credit/No Credit

INFO 295 - School Library Field Work

3 unit(s)
A supervised professional experience of school librarianship at the levels of both elementary and secondary (middle or high) schools. Emphasis is on observation and guided practice with a credentialed school librarian (library media teacher).

**Prerequisite(s):** INFO 200, INFO 202, INFO 204.

**Grading:** Credit/No Credit

INFO 297 - Practicum in Instruction for Information Literacy

3 unit(s)
Experience with instruction in the computer, network and media aspects of information literacy. Course may be repeated in different semester.
**Grading:** Credit/No Credit

**INFO 298 - Special Studies**

1-3 unit(s)
Advanced individual research and projects related to libraries and information systems. Available only to those students who have completed the major portion of the degree coursework. May be repeated for a maximum of six units of credit.

*Course may be repeated for credit for up to 6 units.*

**Prerequisite(s):** INFO 200, INFO 202, INFO 204, instructor consent.

**Grading:** Mandatory CR/NC/RP

**INFO 299 - Thesis**

3 unit(s)
Approved thesis proposal and consent of a faculty advisor required. May be repeated for a maximum of six units of credit.

*Course may be repeated for credit for up to 6 units.*

**Prerequisite(s):** INFO 200, INFO 202, INFO 204, INFO 285.

**Grading:** Mandatory CR/NC/RP

**INFO 1290R - Culminating Experience Supervision**

1 unit(s)
Continued work on thesis.

*Course may be repeated for credit for up to 16 units.*

**Prerequisite(s):** Outstanding RP grade in a preceding semester in a thesis class

**Grading:** CR/NC, No Degree Credit

**Note(s):** No Degree Credit.

**MARA 200 - Record and Recordkeeping Professions**

3 unit(s)
Overview of the management and role of records and information in business, society and history.

*Satisfies GWAR: Graduation Writing Assessment Requirement.*

*Course is not repeatable.*

**Prerequisite(s):** Demonstrated computer literacy through completion of required new student online technology workshop.

**Grading:** Graded

**Note(s):** This course satisfies graduate-level GWAR in this master's program.
MARA 204 - Management of Archives, Records, Inf. Governance

3 unit(s)
Overview of management and leadership roles and responsibilities in archives, records management, and information governance settings, and application of management principles, techniques and theories to program administration.

Prerequisite(s): Demonstrated computer literacy through completion of required new student online technology workshop.
Grading: Graded

MARA 210 - Records Creation, Appraisal, and Retention

3 unit(s)
Overview of records creation and management processes and documentation of those processes. Topics include electronic records content management, digitization, physical records document control, legal compliance.

Prerequisite(s): MARA 200.
Grading: Graded

MARA 211 - Access, Storage and Retrieval of Records

3 unit(s)
Overview of archival and contemporary records and information access, storage and retrieval. Examines records and information classification retrieval systems, storage operations, archival reference service and outreach, legal and ethical access considerations, and user communities.

Course is not repeatable.

Prerequisite(s): MARA 200 and MARA 204.
Grading: Graded

MARA 249 - Management of Digital Data, Information, Records

3 unit(s)
Principles and methods of managing data, information and records as operational, legal and historical evidence in digital environments. Examines the way in which new information technologies impact an organizations’ capacity to define, identify, control, manage, and preserve digital assets.

Course is not repeatable.

Prerequisite(s): MARA 200 and MARA 204.
Grading: Graded

MARA 256 - 21st Century Archival Methods

3 unit(s)
Archival science and archival methods as presently practiced in archival repositories. Types of archival repositories. Influence of other disciplines on archives and vice versa. Focus on technological changes and their effects on traditional archival records, systems, methodologies.

Course is not repeatable.
**Prerequisite(s):** MARA 200.

**Grading:** Graded

**MARA 283 - Enterprise Content Management and Digital Preservation**

3 unit(s)

Presents theoretical principles and practical aspects of digital content management and preservation. Explores challenges related to multiple file formats, standards, and retention requirements. Provides hands-on experience using both a digital content management system and a trusted digital repository.

**Prerequisite(s):** MARA 210, or MARA 211, or MARA 249

**Grading:** Graded

**MARA 284 - Seminar in Archives and Records Management**

1-3 unit(s)

This course explores current issues and practices in archives and records management such as Protecting Conflicting Rights in the Digital Environment, Archivist: Meet Web 2.0, Ethics and Computer Forensics, and Implications of Cloud Computing on Records Management.

*Course is repeatable for up to 12 units.*

**Prerequisite(s):** MARA 200 and MARA 204.

**Grading:** Graded

**MARA 285 - Research Methods in Records Management and Archival Science**

3 unit(s)

Overview of research methods in the social sciences and their application to research about and within archives and records centers. Research design, human subjects, quantitative and qualitative methods, model studies, methodological critique and evaluation, data analysis and presentation. Not repeatable.

**Grading:** Graded

**MARA 289 - Advanced Topics in Archives and Records Administration (ePortfolio)**

1-3 unit(s)

Completion of the ePortfolio, integrating theory and practice, to satisfy the Culminating Experience, with the portfolio based on core competencies for archives and records administration professionals as outlined in the MARA 289 Handbook. Completed in final semester. Not repeatable.

*Course may be repeated for credit for up to 12 units.*

**Prerequisite(s):** See information about eligibility by looking at the current MARA 289 Handbook and revising the section on "Eligibility".

**Grading:** Credit/No Credit

**MARA 292 - Professional Certification**

3 unit(s)

Through consultation with advisor: preparation exercises, mock exams, information, work experience and registration guidance toward application, submission and completion (completion not required) of ICRM and/or ACA exams for
professional certification(s) in archives and records administration. Not repeatable.

**Prerequisite(s):** MARA 200, MARA 202, MARA 204, plus six advanced courses.

**Grading:** Credit/No Credit

**MARA 293 - Professional Experience: Projects**

3 unit(s)
Professional projects submitted by an individual or organization, supervised by a professional archivist or records manager, which can be completed during one semester.

**Prerequisite(s):** MARA 200, MARA 204

**Grading:** Credit/No Credit

**MARA 294 - Professional Experience**

3 unit(s)
Completion of an internship assignment or an organizational consulting project, or a special project related to the field of archives, records management and/or information governance. Repeatable for up to 6 units of credit.

*Course is repeatable for up to 6 units.*

**Prerequisite(s):** MARA 200 and MARA 204.

**Grading:** Credit/No Credit

**MARA 295 - Organizational Consulting Project (OCP)**

3 unit(s)
Organizational Consulting Projects are submitted by an individual or organization, supervised by a professional archivist or records manager, and requires the application of the knowledge and skills developed throughout the program. Repeatable for up to 6 units.

*Course may be repeated for credit for up to 6 units.*

**Prerequisite(s):** MARA 200, MARA 204

**Grading:** Credit/No Credit

Melinda Jackson, Associate Dean of Undergraduate Education (Political Science)

Overview

Undergraduate Education (UE) is involved with all aspects of undergraduate academic matters which support retention and graduation of students. It includes the following areas and programs: Academic Preparation Programs, Academic Scheduling, Accreditation, Articulation, Assessment, Campus Reading Program, Center for Community Learning and Leadership, CommUniverCity, General Education, Program Planning, Catalog, Curriculum, MyProgress, and MyPlanner.

The courses offered by UE under the subject University Studies (UNVS) promote leadership, integrated and applied interdisciplinary academic experiences for students. The office also sponsors undergraduate degrees as a Special Major, which is an individually designed course of study leading to a BA or BS degree. The Special Major is designed for situations in which an existing university-level SJSU undergraduate degree major does not adequately accommodate academic professional aims. Students who complete a Special Major shall be able to demonstrate the characteristics of "intentional learners" who can adapt to new environments, integrate knowledge from different sources, and continue learning throughout their life.

Undergraduate Special Major, BA

The Office of Undergraduate Education sponsors undergraduate degrees as a Special Major, BA. The Special Major is designed for situations in which an existing SJSU undergraduate degree major does not adequately accommodate academic professional aims. Students who complete a Special Major shall be able to demonstrate the characteristics of "intentional learners" who can adapt to new environments, integrate knowledge from different sources, and continue learning throughout their life.

The Special Major is an individually designed, interdisciplinary course of study leading to a BA that gives a student who has a specific educational objective the opportunity to accomplish that goal. It is not to be used to bypass normal graduation requirements or projected programs of the University, nor to substitute for a major in which a student is having academic difficulty.

Program Learning Outcomes
The proposed course of study must be a coherent program organized around an academic theme. Students who complete a Special Major shall be able to demonstrate: "the ability to analyze an issue or problem, integrating at least two disciplinary perspectives." In addition, students identify two or more student learning outcomes related to their specific areas of study in consultation with a major faculty advisor. They demonstrate their attainment of the learning outcomes through a portfolio or senior project completed in a capstone course.

Eligibility Requirements

Applicants must have both a cumulative and SJSU GPA of at least 2.75, at least sixty units earned (upper division standing), and at least one year of academic work still to be completed to meet minimum degree requirements. Special Majors are considered on a case-by-case basis. Approval is based on the academic merit of the proposed course of study, the applicant's proposed rationale and potential for successful completion of the program, and the ability of the university to support the proposed program. Students apply for consideration for the Special Major through the Office of Undergraduate Education.

General Education/American Institution Requirements

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Attributes.

University Requirements (53 units)

Core Lower Division General Education (39 units)

Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

Upper Division General Education (9 units)

American Institutions (6 units)

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B/HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Complete One Sequence From:

African American Studies (6 units)

- AFAM 2A - African Americans and the Development of America's History and Government 3 unit(s) (D2)
- AFAM 2B - African Americans and the Development of America's History and Government 3 unit(s) (D3+US123)

Asian American Studies (6 units)

- AAS 33A - Asian Americans in U.S. History I 3 unit(s) (D2)
- AAS 33B - Asian Americans in U.S. History II 3 unit(s) (D3+US123)

Chicana and Chicano Studies (6 units)
• CCS 10A - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D2)
• CCS 10B - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D3+US123)

U.S. History and Government (6 units)

• HIST 15 - Essentials of U.S. History 3 unit(s) (D2+US1)
• POLS 15 - Essentials of U.S. & California Government 3 unit(s) (D3+US23)

Physical Education (2 units)

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Major Requirements (40 units minimum)

1. Students must formally request admission to a Special Major program through the Office of Undergraduate Education.
2. The student must cite academic and professional objectives and describe the nature of the proposed major. The student must have at least one year of academic work still to be completed to meet the minimum degree requirements.
3. Courses used to meet General Education Requirements may not be applied to the major, nor may any courses in the major field be used for GE.
4. Students must self-identify any disabilities for which reasonable accommodations are necessary to complete the proposed degree program.
5. The student must have both cumulative and an SJSU GPA of at least 2.75.

Procedures

Before, during, and after the initial consultation with the Associate Dean for Undergraduate Education, student must complete the following:

1. A written reflective statement that includes:
   1. description of the proposed major;
   2. discussion of why existing majors are not suitable;
   3. a reflection on what it means to the student to be an "educated person" and how this special major will help the student to become one;
   4. description of any disabilities that may require accommodations (if applicable);
   5. academic, professional, and personal objectives; and,
   6. how does your Special Major help you to meet your academic, professional, and personal objectives?
2. A major course of study plan that includes:
   1. 40-45 total units in the major;
   2. 24 units in residence at SJSU; and,
   3. 30-40 units in upper division.
3. Student must meet with department advisor(s) and have a suggested major advisor (Undergraduate Education does not assign advisors, students pick major advisor).
   1. Completion of the major course of study plan in consultation with the suggested major advisor and other departments involved in the program;
   2. Preparation of the Special Major worksheet and evaluation of General Education and graduation requirements in consultation with the Associate Dean for Undergraduate Education. Approval of Special Major Worksheet; and,
   3. Approval of modifications in Course of Study by Associate Dean for Undergraduate Education.
4. If Special Major is approved, students must complete the following:
   1. A Change of Major Form;
   2. Major Form (will be completed between the student, department advisor(s), and Associate Dean for Undergraduate Education);
   3. Application for Graduation; and,
   4. Forms must be completed and submitted at least 1 year prior to graduation.

Diploma and transcript will contain the title (Special Major) followed by the exact title of the major listed in the Major Form.

**Special Major, BS**

The Office of Undergraduate Education sponsors undergraduate degrees as a Special Major, BS. The Special Major is designed for situations in which an existing SJSU undergraduate degree major does not adequately accommodate academic professional aims. Students who complete a Special Major shall be able to demonstrate the characteristics of "intentional learners" who can adapt to new environments, integrate knowledge from different sources, and continue learning throughout their life.

The Special Major is an individually designed, interdisciplinary course of study leading to a BS that gives a student who has a specific educational objective the opportunity to accomplish that goal. It is not to be used to bypass normal graduation requirements or projected programs of the University, nor to substitute for a major in which a student is having academic difficulty.

**Program Learning Outcomes**

The proposed course of study must be a coherent program organized around an academic theme. Students who complete a Special Major shall be able to demonstrate: "the ability to analyze an issue or problem, integrating at least two disciplinary perspectives." In addition, students identify two or more student learning outcomes related to their specific areas of study in consultation with a major faculty advisor. They demonstrate their attainment of the learning outcomes through a portfolio or senior project completed in a capstone course.

**Eligibility Requirements**

Applicants must have both a cumulative and SJSU GPA of at least 2.75, sixty units earned (upper division standing), and at least one year of academic work still to be completed to meet minimum degree requirements. Special Majors are considered on a case-by-case basis. Approval is based on the academic merit of the proposed course of study, the applicant's proposed rationale and potential for successful completion of the program, and the ability of the university to support the proposed program. Students apply for consideration for the Special Major through the Office of Undergraduate Education.

**General Education/American Institution Requirements**

Courses that meet General Education/American Institution requirements are noted with area designation for required area. For legend please see General Education Course Attributes.
University Requirements (53 units)

Core Lower Division General Education (39 units)

Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

Upper Division General Education (9 units)

American Institutions (6 units)

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/AMS 1B) and Humanities Honors (HUM 1A/HUM 1B/HUM 2A/HUM 2B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

African American Studies (6 units)

- AFAM 2A - African Americans and the Development of America's History and Government 3 unit(s) (D2)
- AFAM 2B - African Americans and the Development of America's History and Government 3 unit(s) (D3+US123)

Asian American Studies (6 units)

- AAS 33A - Asian Americans in U.S. History I 3 unit(s) (D2)
- AAS 33B - Asian Americans in U.S. History II 3 unit(s) (D3+US123)

Chicana and Chicano Studies (6 units)

- CCS 10A - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D2)
- CCS 10B - Mexican Americans and the Development of U.S. History and Government 3 unit(s) (D3+US123)

U.S. History and Government (6 units)

- HIST 15 - Essentials of U.S. History 3 unit(s) (D2+US1)
- POLS 15 - Essentials of U.S. & California Government 3 unit(s) (D3+US23)

Physical Education (2 units)

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. Exceptions to the GWAR may be found at Graduation Writing Assessment Requirement (GWAR).

A grade of C or better (C- not accepted) is required to meet graduation requirement.
Major Requirements (40 units minimum)

1. Students must formally request admission to a Special Major program through the Office of Undergraduate Education.
2. The student must cite academic and professional objectives and describe the nature of the proposed major. The student must have at least one year of academic work still to be completed to meet the minimum degree requirements.
3. Courses used to meet General Education Requirements may not be applied to the major, nor may any courses in the major field be used for GE.

Procedures

Before, during, and after the initial consultation with the Associate Dean for Undergraduate Education, student must complete the following:

1. A written reflective statement that includes:
   1. description of the proposed major;
   2. discussion of why existing majors are not suitable;
   3. a reflection on what it means to the student to be an "educated person" and how this special major will help the student to become one;
   4. description of any disabilities that may require accommodations (if applicable);
   5. academic, professional, and personal objectives; and,
   6. how does your Special Major help you to meet your academic, professional, and personal objectives?

2. A major course of study plan that includes:
   1. 40-45 total units in the major;
   2. 24 units in residence at SJSU; and,
   3. 30-40 units in upper division.

3. Student must meet with department advisor(s) and have a suggested major advisor (Undergraduate Education does not assign advisors, students pick major advisor). 
   1. Completion of the major course of study plan in consultation with the suggested major advisor and other departments involved in the program;
   2. Preparation of the Special Major worksheet and evaluation of General Education and graduation requirements in consultation with the Associate Dean for Undergraduate Education. Approval of Special Major Worksheet; and,
   3. Approval of modifications in Course of Study by Associate Dean for Undergraduate Education.

4. If Special Major is approved, students must complete the following:
   1. A Change of Major Form;
   2. Major Form (will be completed between the student, department advisor(s), and Associate Dean for Undergraduate Education);
   3. Application for Graduation;
   4. Forms must be completed and submitted at least 1 year prior to graduation.

Diploma and transcript will contain the title (Special Major) followed by the exact title of the major listed in the Major Form.

ESE 1001 - Introduction-College Reading and Composition
This rhetoric-based course introduces students to the demands of college-level expository, analytical, and argumentative reading and writing. Students will study the relationships between authorial purpose, structure, and intended audience; types and use of evidence; the impact of rhetorical strategies; and the social, political, and philosophical assumptions that underlie the text. Students will receive feedback on their writing in every class. Full attendance and participation satisfies the Early Start requirement in English. An end of course analytical essay may be used to improve freshman English placement for SJSU students.

Prerequisite(s): Writing enrollment category W-III or W-IV and Undergraduate Transitory (UGT) program.

Grading: Early Start Program English

Note(s): No Degree Credit

ESE 1003 - Introduction to Analytical Writing

1 unit(s)
Students will submit an analytical essay on an assigned topic, master a rubric for evaluating analytical writing, peer review essays written by classmates, and then reevaluate their own writing. All deadlines must be strictly adhered to. Online course.

Prerequisite(s): Writing enrollment category W-III or W-IV and Undergraduate Transitory (UGT) program.

Grading: Early Start Program English

Note(s): No Degree Credit

ESM 1001 - ES Elementary Algebra Review

1-2 unit(s)
Review topics from elementary algebra, including basic mathematics skills, real numbers and variables, exponents and radicals, polynomials and rational expressions, linear equations and inequalities (including their graphs), systems of linear equations, quadratic equations, and functions. This live class will be taught in an online environment. Full attendance and participation satisfies the Early Start requirement in mathematics. The final exam and an optional ELM retest may be used to improve freshman mathematics placement and in some cases may satisfy the ELM requirement.

Prerequisite(s): Math enrollment category M-III or M-IV AND Undergraduate Transitory (UGT) program.

Grading: Early Start Program Math

Note(s): No Degree Credit

ESM 1005 - Topics in Elementary Algebra

1 unit(s)
This course reviews topics from elementary algebra using an online tool called ALEKS. To fulfill the Early Start requirement, students must spend at least 15 hours using ALEKS. This course may not be used to improve freshman mathematics placement.

Prerequisite(s): Math enrollment category M-III or M-IV AND Undergraduate Transitory (UGT) program.

Grading: Early Start Program Math

Note(s): No Degree Credit

UNVS 15F - Statway Part A: Statistics-Concepts & Methods
3 unit(s)
Concepts and methods of statistics with an emphasis on data analysis. Topics include methods for collecting data graphical and numerical descriptive statistics, correlation, simple linear regression, basic concepts of probability, confidence intervals and hypothesis test for means and proportions, and chi-square tests. Must complete UNVS 15F/UNVS 15S sequence to satisfy GE Area B4.

Misc/Lab: Lecture 1 hour / Activity 4 hours

Grading: Graded

UNVS 15S - Statway Part B: Statistics-Concepts & Methods

3 unit(s)
Concepts and methods of statistics with an emphasis on data analysis. Topics include methods for collecting data graphical and numerical descriptive statistics, correlation, simple linear regression, basic concepts of probability, confidence intervals and hypothesis test for means and proportions, and chi-square tests. Completion with a grade of C- or better satisfies the GE Area B4 Mathematical Concepts requirement.

Lecture 1 hour / Activity 4 hours

Satisfies B4: Mathematical Concepts

Prerequisite(s): UNVS 15F with a grade of C- or better or concurrent enrollment in UNVS 1015W.

Grading: Graded

UNVS 57 - Community Involvement and Personal Growth

3 unit(s)
Human development in community context, with an emphasis on civic responsibility. The influence of community engagement on individual physiological, social/cultural, and psychological well-being. Participation in a service-learning project in a multicultural organization.

Satisfies E: Human Understanding & Development.

Grading: Graded

UNVS 75 - Fundamentals of Leadership and Career Accelerator

3 unit(s)
This course is a foundational course designed to begin preparing students in their sophomore year or first year of transfer to SJSU to practice the leadership habits of mind and workplace skills needed to thrive in 21st century workplaces once they graduate from school. Given the increasingly competitive, and globalized job marketplace, this course enables participants to cycle through rounds of interactive experiences and practice to acquire "hard" and "soft" skills needed to succeed. Students will apply these skills in real-life leadership situations and build meaningful networks of peers and adults, all while activating their personal assets and deepening their sense of self and community.

Misc/Lab: 2 hours lecture/ 2 hours lab

Prerequisite(s): ENGL 1A

Grading: Graded

UNVS 90 - Leadership in Residential Life
3 unit(s)
Class is designed for students selected by University Housing Services to serve as leaders in the residence halls. Students will receive an introduction to residential education, student development theory, conflict mediation, community development, and leadership as well as training in university policies and procedures. Classroom learning will be integrated with on the job experience.

Prerequisite(s): Current application or employment with University Housing Services.
Grading: ABC-/INC Grading

UNVS 92 - International Program Studies

1-6 unit(s)
Grading: Mixed Grading

UNVS 95 - Special Topics in Student Leadership Development

1 unit(s)
University 95 is for students selected as staff for San Jose State University's Summer Transition Programs (e.g., Summer Bridge Resident Assistants and Academic Coaches and Spartan Scholars Program Community Assistants and Academic Coaches). Through a series of lectures, project-based activities, and required readings, students will explore both theoretical and practical elements of leadership.

Course may be repeated for credit for up to 3 units.
Grading: Graded

UNVS 95A - Service Learning for Academic Leaders

2 unit(s)
Course enhances student success in college through basic and leadership skills development, pertinent academic information, and strategies for achieving personal and academic goals.
Grading: Graded

UNVS 95B - First Year Experience- Academic Success

1-2 unit(s)
University 95 is a series of lectures, project-based activities, and required readings to promote academic success. This course introduces students to university faculty, campus administrators, and campus resources. It also provides students with a wide range of information regarding various institutional academic expectations, university policies and procedures, and practical study skills to prepare them for the successful completion of courses at SJSU.
Grading: Graded

UNVS 95V - Warriors at Home: Success in College and Life

3 unit(s)
This course will assist veteran/military students in making positive transitions from military to civilian life or from deployment to post-deployment life. It provides essential tools to navigate the university, succeed in academics and interpersonal relationships, and develop a career plan.
Grading: Graded
UNVS 96D - Academic Skill Development

1 unit(s)
Grading: CR/NC, No Degree Credit

UNVS 96E - Leadership and Creating Change

3 unit(s)
This course will introduce students to conceptual and theoretical dimensions of leading, following, and creating social change. We will be particularly interested in connecting the social construction of identities with the idea of leadership as a form of social influence. This will include an examination of issues of power, privilege, marginalization, inclusion, and social and group behavior. Students will explore literature, case examples and applications in the form of community service-learning to build their understanding of, and capacity for serving as ethical and effective community leaders, advocates and allies.

Grading: Graded

UNVS 101 - Leadership and Career Accelerator

3 unit(s)
Prepares students for the increasingly competitive, globalized job marketplace. Through online, peer learning, interactive experiences, and reflection, students build meaningful networks, discover their innate leadership, and cultivate the hard" and "soft" skills and habits of mind needed to thrive in twenty-first century workplaces and make positive impact through their careers upon graduation. Aimed at students in their sophomore or junior year or first year of transfer, though all students of all majors can participate.

Lecture 2 hours/Activity 2 hours.

Prerequisite(s): ENGL 1A or ENGL 1AS with a grade of "C-" or better or complete GE Area A2 with a grade of "C-" or better.
Grading: Graded

UNVS 120 - Peer Mentor

3 unit(s)
Seminar course intended to provide the knowledge and skills necessary to be an effective Peer Mentor who will work in the new student seminars and in the Peer Mentor Center at San Jose State University.

Prerequisite(s): Must apply and be accepted.
Grading: Graded

UNVS 120L - Seminar for Peer Educators

1-2 unit(s)
This seminar provides students with the skills and knowledge necessary to be an effective and empowered peer educator. Students will practice and demonstrate their understanding of the university experience in terms of academic and personal development factors.

Prerequisite(s): Upper division standing and consent of instructor
Grading: ABC-/NC Grading

UNVS 125M - McNair Research Colloquium
3 unit(s)
Course is designed to assist students in the SJSU McNair Scholars Program to prepare for graduate study at the doctoral level. Various faculty will lecture on topics including research methodology, research writing, protocol for presenting research results conferences, graduate school experiences and academic expectations.

**Prerequisite(s):** Students must be accepted in the SJSU McNair Scholars Program.
**Grading:** Credit/No Credit

**UNVS 180 - Indiv Studies**

1-4 unit(s)
**Grading:** Credit/No Credit

**UNVS 190 - University Internship**

1-4 unit(s)
Supervised placement in student support services for advanced students.

**Grading:** Credit/No Credit

**UNVS 195H - Interdisciplinary Research Practicum**

3 unit(s)
This practicum will integrate the methods of at least two disciplines to conduct basic and applied research. Undergraduate students will have hands-on experiences working with faculty from different disciplinary traditions in real research projects.

**Prerequisite(s):** Upper Division Standing
**Grading:** Credit/No Credit

**UNVS 199 - Orientation Leadership Studies**

3 unit(s)
This class is designed for students selected by Student Life Center to serve as SJSU Orientation Leaders. Students will learn theoretical/practical aspects of leadership, and receive training in university policies/procedures. Curriculum will apply to students' leadership experiences.

**Prerequisite(s):** Apply and be selected (fall semester), 2.0 G.P.A., upper division standing or instructor consent.
**Grading:** Graded

**UNVS 295H - Interdisciplinary Research Graduate Practicum**

3 unit(s)
This practicum will integrate the methods of at least two disciplines to conduct basic and applied research. Graduate students will have hands-on experiences working with faculty from different disciplinary traditions in real research projects.

**Prerequisite(s):** Graduate standing
**Grading:** Mandatory CR/NC/RP

**UNVS 1015D - Statway Algebra Review Activity**
1 unit(s)
Supplemental course for Statway students planning to enter a field requiring algebra or calculus, e.g., Business.

Prerequisite(s): UNVS 15F or instructor consent.
Corequisite(s): UNVS 15S.
Grading: CR/NC, No Degree Credit

Note(s): No degree credit.

UNVS 1015W - Statway Supplemental Activity

1 unit(s)
Supplemental activity course for Statway students who complete UNVS 15F (Statway A) with a grade below C-.
Includes review of UNVS 15F and supporting activities for UNVS 15S.

Misc/Lab: Activity 2 hours.

Course may be repeated for credit for up to 3 units.

Corequisite(s): UNVS 15S
Grading: CR/NC, No Degree Credit

Note(s): No Degree Credit.

UNVS 1290R - Culminating Experience Supervision

1 unit(s)
Continued work on thesis or project writing.

Course may be repeated for credit for up to 20 units.

Prerequisite(s): Outstanding RP grade in a preceding semester in a project or thesis class.
Grading: CR/NC, No Degree Credit

Note(s): No Degree Credit
Athletics (Intercollegiate)

**Office:** Alan B. Simpkins Intercollegiate Athletics Administration Building (7th & Alma)

**Telephone:** 408-924-1200 (Voice); 408-924-1291 (Fax)

**Professors**
Tamar Semerjian, NCAA Faculty Athletic Representative

**Athletics Staff**
Joanne Bowers, Head Coach, Gymnastics  
Brent Brennan, Head Coach, Football  
Darren Coelho, Assistant Athletics Director for Ticket Operations  
Rob Clark, Deputy Director of Athletics Development  
Jamie Craighead, Head Coach, Women's Basketball  
Eileen Daley, Senior Associate Athletic Director for Academic and Student Services  
Dana Dormann, Head Coach, Women's Golf  
Lawrence Fan, Associate Athletics Director for Football Comms and Special Projects (FB & TEN)  
Lauren Hanson, Head Coach, Women's Soccer  
Beth Harberts, Head Coach, Women's Water Polo  
Sage Hopkins, Head Coach, Swimming/Diving  
John Kennaday, Head Coach, Men's Golf  
Trent Kersten, Head Coach, Beach Volleyball & Volleyball  
Ryan Jordan, Assistant Athletics Director for Compliance  
Heather Limosnero, Head Cheer Coach  
Ryan O'Rorke, Assistant Athletics Director for Marketing and Multimedia Services  
Roseanne Oty, Director of Compliance, Eligibility/Admissions  
Jean Prioleau, Head Coach, Men's Basketball  
Jeff Pritsker, Associate Athletic Director, Finance  
Mary Quintanar, Associate Athletics Director, Human Resources  
David Rasmussen, Associate Athletic Director of Compliance  
Kendra Reimer-Gonzales, Director of Track and Field and Cross Country  
Brad Sanfilippo, Head Coach, Baseball  
Blake Sasaki, Senior Associate Athletics Director for External Relations  
Scott Shaw, Director of Sports Medicine  
Chad Skorupka, Head Coach, Women's Tennis  
Simon Tobin, Head Coach, Men's Soccer  
Garrett Ton, Director of Athletics Facilities and Events  
Marie Tuite, Director of Athletics  
Peter Turner, Head Coach, Softball  
Gary Uribe, Head Coach, Athletic Performance  
Mike Walfer, Sr. Associate Athletic Director, Finance and Administration  
Joe Waltasti, Assistant Athletics Director for Media Relations  
Bruce Watson, Head Coach, Men's Water Polo  
Brad Wick, Head Coach, Men and Women's Cross Country, Assistant Track and Field Coach

**Overview**
Intercollegiate athletics offers a comprehensive spectrum of 17 sports (6 men's and 11 women's) which compete at the NCAA Division I level (the highest level of collegiate competition). San Jose State University is a member of the Mountain West Athletic Conference. Over the years, San Jose State athletics teams have won 10 NCAA team and 50 individual championships.

Course offerings are designed to satisfy the needs and interests of highly skilled student-athletes and provide them with the highest level of intercollegiate athletics experience. Note: Courses are open only to those SJSU students who are currently on one of the Spartan team rosters.

ATH 2I - Men's Baseball

1 unit(s)
Activities include mental and physical skill development for successful participation in NCAA intercollegiate men's baseball including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.

Course may be repeated for credit for up to 8 units.

Grading: Graded

ATH 2S - Men's Skills Development, Baseball

1 unit(s)
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate men's baseball. Approximately 8 hours per week.

Course may be repeated for credit for up to 8 units.

Grading: Credit/No Credit

ATH 4I - Men's Basketball

1 unit(s)
Activities include mental and physical skill development for successful participation in NCAA intercollegiate men's basketball including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.

Course may be repeated for credit for up to 8 units.

Grading: Graded

ATH 4S - Men's Skills Development, Basketball

1 unit(s)
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate men's basketball. Approximately 8 hours per week.

Course may be repeated for credit for up to 8 units.

Grading: Credit/No Credit

ATH 6I - Women's Basketball
1 unit(s)
Activities include mental and physical skill development for successful participation in NCAA intercollegiate women's basketball including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.

Course may be repeated for credit for up to 8 units.

Grading: Graded

ATH 6S - Women's Skills Development, Basketball

1 unit(s)
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate women's basketball. Approximately 8 hours per week.

Course may be repeated for credit for up to 8 units.

Grading: Credit/No Credit

ATH 12I - Football

1 unit(s)
Activities include mental and physical skill development for successful participation in NCAA intercollegiate football including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.

Course may be repeated for credit for up to 8 units.

Grading: Graded

ATH 12S - Skills Development, Football

1 unit(s)
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate football. Approximately 8 hours per week.

Course may be repeated for credit for up to 8 units.

Grading: Credit/No Credit

ATH 14I - Men's Golf

1 unit(s)
Activities include mental and physical skill development for successful participation in NCAA intercollegiate men's golf including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.

Course may be repeated for credit for up to 8 units.

Grading: Graded

ATH 14S - Men's Skills Development, Golf

1 unit(s)
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate
men's golf. Approximately 8 hours per week.

Course may be repeated for credit for up to 8 units.

Grading: Credit/No Credit

ATH 16I - Women's Golf

1 unit(s)
Activities include mental and physical skill development for successful participation in NCAA intercollegiate women's golf including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.

Course may be repeated for credit for up to 8 units.

Grading: Graded

ATH 16S - Women's Skills Development, Golf

1 unit(s)
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate women's golf. Approximately 8 hours per week.

Course may be repeated for credit for up to 8 units.

Grading: Credit/No Credit

ATH 20I - Women's Gymnastics

1 unit(s)
Activities include mental and physical skill development for successful participation in NCAA intercollegiate women's gymnastics including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.

Course may be repeated for credit for up to 8 units.

Grading: Graded

ATH 20S - Women's Skills Development, Gymnastics

1 unit(s)
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate women's gymnastics. Approximately 8 hours per week.

Course may be repeated for credit for up to 8 units.

Grading: Credit/No Credit

ATH 26I - Women's Tennis

1 unit(s)
Activities include mental and physical skill development for successful participation in NCAA intercollegiate women's tennis including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.
Course may be repeated for credit for up to 8 units.

**Grading:** Graded

**ATH 26S - Women's Skills Development, Tennis**

1 unit(s)
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate women's tennis. Approximately 8 hours per week.

Course may be repeated for credit for up to 8 units.

**Grading:** Credit/No Credit

**ATH 30I - Men's Soccer**

1 unit(s)
Activities include mental and physical skill development for successful participation in NCAA intercollegiate men's soccer including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.

Course may be repeated for credit for up to 8 units.

**Grading:** Graded

**ATH 30S - Men's Skills Development, Soccer**

1 unit(s)
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate men's soccer. Approximately 8 hours per week.

Course may be repeated for credit for up to 8 units.

**Grading:** Credit/No Credit

**ATH 32I - Softball**

1 unit(s)
Activities include mental and physical skill development for successful participation in NCAA intercollegiate softball including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.

Course may be repeated for credit for up to 8 units.

**Grading:** Graded

**ATH 32S - Skills Development, Softball**

1 unit(s)
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate softball. Approximately 8 hours per week.

Course may be repeated for credit for up to 8 units.
**Grading:** Credit/No Credit

**ATH 34I - Women's Swimming**

1 unit(s)
Activities include mental and physical skill development for successful participation in NCAA intercollegiate women's swimming including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.

*Course may be repeated for credit for up to 8 units.*

**Grading:** Graded

**ATH 34S - Women's Skills Development, Swimming**

1 unit(s)
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate women's swimming. Approximately 8 hours per week.

*Course may be repeated for credit for up to 8 units.*

**Grading:** Credit/No Credit

**ATH 36I - Women's Volleyball**

1 unit(s)
Activities include mental and physical skill development for successful participation in NCAA intercollegiate women's volleyball including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.

*Course may be repeated for credit for up to 8 units.*

**Grading:** Graded

**ATH 36S - Women's Skills Development, Volleyball**

1 unit(s)
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate women's volleyball. Approximately 8 hours per week.

*Course may be repeated for credit for up to 8 units.*

**Grading:** Credit/No Credit

**ATH 42I - Women's Cross Country**

1 unit(s)
Activities include mental and physical skill development for successful participation in NCAA intercollegiate women's cross country including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.

*Course may be repeated for credit for up to 8 units.*
**Grading:** Graded

**ATH 42S - Womens Skill's Development, Cross Country**

1 unit(s)
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate women's cross country. Approximately 8 hours per week.

*Course may be repeated for credit for up to 8 units.*

**Grading:** Credit/No Credit

**ATH 44I - Women's Soccer**

1 unit(s)
Activities include mental and physical skill development for successful participation in NCAA intercollegiate women's soccer including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.

*Course may be repeated for credit for up to 8 units.*

**Grading:** Graded

**ATH 44S - Women's Skills Development, Soccer**

1 unit(s)
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate women's soccer. Approximately 8 hours per week.

*Course may be repeated for credit for up to 8 units.*

**Grading:** Credit/No Credit

**ATH 46I - Women's Water Polo**

1 unit(s)
Activities include mental and physical skill development for successful participation in NCAA intercollegiate women's water polo including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.

*Course may be repeated for credit for up to 8 units.*

**Grading:** Graded

**ATH 46S - Women's Skills Development, Water Polo**

1 unit(s)
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate women's water polo. Approximately 8 hours per week.

*Course may be repeated for credit for up to 8 units.*

**Grading:** Credit/No Credit
ATH 48I - Men's Cross Country

1 unit(s)
Activities include mental and physical skill development for successful participation in NCAA intercollegiate men's cross country including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.

Course may be repeated for credit for up to 8 units.

Grading: Graded

ATH 48S - Men's Skills Development, Cross Country

1 unit(s)
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate men's cross country. Approximately 8 hours per week.

Course may be repeated for credit for up to 8 units.

Grading: Credit/No Credit

ATH 50I - Women's Track & Field

1 unit(s)
Activities include mental and physical skill development for successful participation in NCAA intercollegiate women's track & field including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.

Course may be repeated for credit for up to 8 units.

Grading: Graded

ATH 50S - Women's Skills Development, Track & Field

1 unit(s)
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate women's track & field. Approximately 8 hours per week.

Course may be repeated for credit for up to 8 units.

Grading: Graded

ATH 52I - Men's Water Polo

1 unit(s)
Activities include mental and physical skill development for successful participation in NCAA intercollegiate men's water polo including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.

Course may be repeated for credit for up to 8 units.

Grading: Graded

ATH 52S - Men's Skills Development, Water Polo
1 unit(s)
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate men's water polo. Approximately 8 hours per week.

Course may be repeated for credit for up to 8 units.

Grading: Graded
Interdisciplinary Studies, MA

Overview

The Interdisciplinary Studies master's program for either an MA or MS provides an alternative for individuals whose desired plan of study does not fit into the degree offerings of any single existing graduate degree program on campus.

More information about the program can be found on the College of Graduate Studies website at www.sjsu.edu/cgs.

Admissions Requirements

Candidates apply separately to the university to obtain approval for university-level admission and to the College of Graduate Studies for admission to the Interdisciplinary Studies program. Candidates must meet all university admission requirements. They must also satisfy programmatic requirements, including a minimum 3.25 GPA in the last 60 semester units of post-secondary academic work. In addition, they must complete a programmatic application, separate from the university application, found in the Interdisciplinary Studies Guide. In brief, the application includes the signature of a tenured or tenure-track faculty member from San Jose State who agrees to chair the master's committee of the student. Approval of the proposed curriculum, periodic advice, and supervision of the student's research and culminating report (usually a thesis) are expected of the faculty mentor. A summary of the proposed research and reasons for the appropriateness of the Interdisciplinary Studies program are also needed in advance of a positive admissions decision. Once the application is completed, it should be sent to the Associate Dean (AD) of Graduate Studies, who will make the final admissions decision.

Applicants from countries in which the official language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE.

Requirements for Advancement to Graduate Candidacy

General university requirements for advancement to candidacy for the Interdisciplinary Studies master's degree are detailed in the Graduate Policies and Procedures section. Candidacy includes the successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.
MA or MS - Interdisciplinary Studies Graduation Requirements

The program consists of an individualized program of 30 units in classes taken from at least two different departments; a minimum of half of the units must be in graduate-level classes. Prerequisite classes must be taken in excess of the 30 unit total. The program may be Plan A (thesis), Plan B (project, but under highly restricted circumstances), or Plan C (creative project). All courses must be approved by the AD of Graduate Studies. The culminating report must be approved by the student's master's committee and by the College of Graduate Studies Associate Dean.
